Mr. LUGAR. Mr. President, I yield the floor, with the intention, as I have stated, as soon as I can regain the floor again, to offer a motion to table the Pell amendment so that we might come to a resolution of this situation; the parliamentary situation being that if the Pell amendment should be tabled, then we would proceed to a vote on the Helms perfecting substitute for the Lugar amendment, which changed but two words, and, in essence, adopt the Lugar-Helms position at that point if the Pell amendment would be tabled.

I yield the floor.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I would hasten, as a matter of fairness, to say that the substance of this amendment was worked on and crafted with great originality and thought by the Senator from Connecticut. The rest of us in the committee participated in it, and we voted 13 to 1 for it. But he should receive the full credit.

UP AMENDMENT NO. 413, AS MODIFIED

Mr. PELL. Mr. President, I would like to modify my earlier amendment by substituting 180 for 120. That means the certification would be once every 180 days, or twice a year, rather than 120 days, or three times a year.

The PRESIDING OFFICER. Is there objection to the Senator's request to modify his pending amendment? It is so modified.

The amendment (UP No. 413), as modified, is as follows:

An amendment (UP No. 411) by Mr. LUGAR:

On page 2, line 1, strike out thru the end of the amendment and insert in lieu thereof the following:

"SEC. 707(1) In fiscal year 1982 and 1983 funds may be obligated for assistance for El Salvador under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offer may be issued and credits and guaranties may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if every 180 days after enactment of this act, the President makes a certification in accordance with subsection (c).

"(b) If the President does not make such a certification, then the President shall immediately—

"(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

"(2) withhold all approvals for use of credits and guarantees for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act;

"(3) suspend all deliveries of defense articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

"(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect during fiscal year 1982 until such time as the President makes a certification in accordance with subsection (c).

The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador, to the extent not precluded by forces outside its control—

"(1) is making a concerted and significant effort to control gross violations of internationally recognized human rights;

"(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

"(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

"(4) is committed to the holding of free elections at an early date and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity. Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (4).

(d) On making the first certification under subsection (a) of this section, the President shall also certify to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders.

Mr. PELL. Mr. President, I ask for the yeas and nays on that.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PELL. I yield the floor.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, wonders will never cease. We are now at a stage where we can vote on something. Instead of five negatives in a row, the chairman will be able to vote yea.

Mr. PELL. Mr. President, I am afraid the Senator is incorrect. The first vote may be nay, because it will be a tabling motion.

Mr. PERCY. Well, then, we will vote nay in order to vote yea.

I thank my distinguished colleagues again. In the spirit of collegiality and bipartisanship, we are at a point of certification every 6 months and the goals and objectives expressed by the committee. We are going to move toward goals and objectives that Jose Napoleon Duarte concurred with and that there was no dissent from members of his government who met with us yesterday.

Now, I think we have a chance to indicate that we do wish to move forward. But we would like a certification from the President every 6 months that says that there is progress toward the goals which we share in common with many in El Salvador—goals we believe will help provide stability in that country, stability for its interim government, that is, move them toward the free elections to which they are now committed.

The certification would be that the Government of El Salvador:

(1) Is making a concerted and significant effort to control gross violations of internationally recognized human rights;

(2) Is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

(3) Is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) Is committed to the holding of free elections at an early date and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Mr. President, I hope we can vote this amendment up or down now. It is as close to the committee amendment provisions as we could get after several hours of discussion.

Again, I express deep appreciation to my colleagues who have worked with us in a common purpose. I do hope that we can vote and the Senate will vote favorably to sustain the committee in this regard, because I think that these are goals that express our desire to help that government to become a viable, strong government that can stand on its own feet. They are also a message to citizens in this country who feel we should not be offering any military or economic assistance to the government, but who feel much better that there are certain goals and objectives laid down in statute that will be certified to by the President that progress is being made each step of the way.

Mr. DODD addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, I wish to express my support for this modification. I do so with reluctance.

As the chairman of the committee and the ranking minority member knows, I have a different view as to how often the certification process ought to occur. It is not that I like certification, the process itself. I am reluctant to have any administration saddled with that kind of a process. But I think the determination ought to be made on a case-by-case basis, and while the burden ought to rest on those who would like to impose a certification process, there are circumstances and events which occur which warrant, I think, that kind of a process.

It ought not to be one that we engage in every corner of the world. But I happen to believe that, in the case of El Salvador, the certification, in light of the fact that over the last year and a half we have seen some 15,000 innocent human being butchered and slaughtered in a nation of 5 million people, the fact that we see such turmoil in that country which threatens not only El Salvador but the entire Central American region, the fact that we have seen, without any real evidence to the contrary, excesses by national guard forces in that country, elements who would like to destroy the reform process, incredible violations of human rights, I think, in these circumstances, certification is warranted and that at least for a couple of years we ought to require a certification process before we say we are willing to continue in an unconditional way the military assistance.

I would have preferred that we have that certification process occur a bit more often to guarantee, at least in my mind, and I think in the minds of a majority of the people in this country, that we would insist that those basic goals be achieved or met. But I am willing to accept this modification. I would hope that those on the other side who have felt uneasy about a certification process would agree that the circumstances in this particular nation warrant it and that requiring it twice a year for the next couple of years is not going to place an undue burden or restriction on this administration and that, in fact, it may very well guarantee the success of Jose Napoleon Duarte and the moderate junta that is in power at this moment.

I will reluctantly support the modification as suggested by the Senator from Rhode Island. I yield back the floor.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, unfortunately, the distinguished Senator from Illinois, the chairman of our Foreign Relations Committee, has pointed out the strength of the Pell modified amendment, which has two certifications, indicating that we are back to where we were with the committee bill. If I had been in favor of the committee bill, I would not have offered an amendment to begin with to get away from certification. That is the issue. It is not whether we have four, three, or two a year. Goodness knows, two is better than four. We have made progress during the course of this debate. But two is too many. It frustrates our foreign policy.

Indeed, the point made by the distinguished Senator from Connecticut, that there are unusual circumstances in El Salvador, is all too true. As a matter of fact, they are so unusual that the guerrillas of the left and the people of the right have grown so frustrated in the furtherance of these goals as to make certification impossible by any objective person.

As Secretary Haig pointed out, to offer a blueprint to the opposition of left and right, to make it absolutely certain that Congress would have to advise the President to get out of El Salvador altogether, would be impossible for President Duarte to achieve those goals under certain circumstances and pressures over which he would not have any power and we would not, if we were out.

The point of this debate is to say that there is a difference between certification whether it be two, three, or four times a year, and a sense-of-the-Congress resolution with, as in the final paragraph of my amendment, within 6 months of the date of enactment the President shall report to the Congress concerning the status of its efforts.

We should follow up and should know, and in the event El Salvador does not appear to be a promising situation I trust my colleagues will not vote aid for that country.

That is the issue, Mr. President. Reluctantly but, nevertheless, in an attempt to move this onto a constructive situation, unless there is further debate, I am about to propose a motion to table the Pell amendment. I search to see if any of my colleagues wish to continue the debate prior to my making that motion.

Mr. PERCY. I ask my distinguished colleague to yield for just a comment.

Mr. LUGAR. I am pleased to yield to the Senator from Illinois for a comment.

Mr. PERCY. Fully taking into account what has been said, I would like to point out that at the suggestion of the administration a modification was made in the language just preceding the goals or objectives. I will read it:

The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate of a determination that the government of El Salvador to the extent not precluded by forces outside its control. . . .

And the the four goals and objectives—which are not absolute. No one has to certify they have been achieved, but that progress is being made toward them to the extent they can, not precluded by forces outside their control.

That seemed to be an excellent modification of this language which made it much more practical to achieve and easier for the administration to certify.

Once again, I would hope that we could vote on this issue up or down, but, of course, it is the prerogative of the Senator to move to table it if he so desires.

Mr. LUGAR. I appreciate the point made by the Senator from Illinois.

Mr. NUNN. Will the Senator yield for a question? I will be glad to pose this question both to the Senator from Indiana and the Senator from Illinois.

Suppose the extremists forces in El Salvador, either on the left or the right, decide that the best way for them to cut off American aid is to so disrupt the process that the Government cannot make progress toward these goals? In other words, suppose they intensify terrorism? Suppose every time they get ready to make any progress toward an election there is a disruptive kind of violent action by either the right or the left? Suppose that occurs. What, then, is the President's duty under the Dodd amendment if it becomes law?

Mr. PERCY. The interpretation of the Senator from Illinois is that that is exactly what the administration had in mind when they suggested that we add the words "to the extent not precluded by forces outside its control."

Obviously, forces that are in opposition either from the right or the left to the government, that use force and violence, are disruptive and are trying to prevent the government carrying out its goals. That would reinforce our desire to continue economic assistance. There would be no preclusion whatsoever because of that.

There is no incentive whatsoever. In fact, there is a disincentive because that would strengthen our resolve to help the government even more.

Mr. LUGAR. May I respond to the Senator from Georgia? The question, in my judgment, is not that easily answered because I suspect the definition of that term "force beyond control." It is a difficult one, given the circumstances in El Salvador.

Indeed, the problem of imposing so many conditions and definitions is a genuine temptation to those who would argue that the U.S. policy in El Salvador ought to be to leave El Salvador altogether. I would presume that, clearly, the Government of El Salvador might argue that the frustrating circumstances were beyond its control, but it does not escape our attention that others might very well argue the opposite, that those circumstances were fully within the control of that government.

Precisely who is to be the jury in that situation is not clear, but it is clear by not following that course of conditions we obviate the entire problem.

Mr. DODD. Will the Senator yield for a further answer?

As the author of the language under consideration, let me tell my colleague from Georgia what the intent of the author was with this language.

If the leftist insurgents or rightwing terrorists try to disrupt the activities in El Salvador, I do not expect that the government of Jose Napoleon Duarte should not be able to respond to it. I choose as the verbs in the condition "is making concerted effort," "is making continued progress," "is committed to holding free elections," "has demonstrated its willingness to negotiate."

That does not require that they absolutely respond in a pristine fashion to every set of circumstances that come up. It is giving them the opportunity to say, "This is the direction we want to be heading."

I realize that there are those who want to disrupt government activities of one kind or another, but I do not intend, nor did I intend, that we hamstring or hobble Jose Napoleon Duarte or his government from dealing with people trying to disrupt the government in his country. At the time the committee was considering this I made that point, and I make it again today. That is not the intent of the goals or conditions in this amendment.

Mr. NUNN. How would the Senator from Connecticut interpret it if the President were to state in his certification that the Government in El Salvador has not moved to achieve control over all elements of the armed forces and gave as the reason therefor that the use of the armed forces was necessary when there were stringent attacks going on from the left so that a move against both the right and the left at the same time would be impossible?

Suppose the President said that in his certification. Would that meet the requirements of this amendment to section 2, where it says:

Is moving to achieve control over all elements of its own armed forces, so as to bring an end to the indiscriminate torture and murder of Salvadoran citizens by these forces.

Everybody looks at that as a goal. But if the government is perceived as against the left and right at the same time, it could move against both those forces at the same time so as to meet the requirements of the certification.

Mr. DODD. I would think they could. It was not my intention to say they have to move in one direction for control. I meant more control over indiscriminate acts of violence that are not being directed by the central government, Jose Napoleon Duarte, or the generals in the army, or other activities. That is the problem that has existed with some of the national guard forces. They have been acting unilaterally, on their own, going around and conducting their own kind of private warfare. That control is control of their activities. If the Government decides they have a major threat from the right and want to respond to that and, at the same time, are being attacked, as they are, by the left—taking on both those fronts at once does not meet what I would describe as a lack of control because of the dual front the government would be facing.

Mr. NUNN. I thank the Senator.

Mr. LUGAR. Mr. President, I thank the Senator from Georgia for his questions.

Mr. President, out of my own very considerable respect for the chairman of our committee, the distinguished ranking member, I shall not move to table but will, in fact, be pleased to vote on an up-or-down basis. I hope that specifically, in the event the Pell amendment should fail, there will be a disposition on the part of the chairman and the ranking member to vote reasonably promptly then on what is the Helms substitute to the Lugar amendment, which I think then would terminate our debate, one way or another, at that point.

Mr. President, I yield the floor.

● Mr. LEVIN. Mr. President, I rise to support the Senator from Rhode Island.

The issue before us here today is not the desire and need to end the violence in El Salvador; the issue is not whether we support the efforts and goals of the Duarte government. Rather, the issue we confront is the best way for the American Government to help achieve these worthwhile and necessary goals.

This modified requirement for a twice-a-year Presidential certification is a modest and moderate requirement. It does not interfere with the President's responsibility, but rather fulfills the Congress obligation. This moderate proposal would require that the American President certify that the Government of El Salvador is fulfilling and meeting five specific conditions relating to human rights in El Salvador, control by the government over the armed forces, political and economic reforms, free elections in El Salvador, and a negotiated settlement to the present conflicts.

This proposal is the result of the strongly bipartisan consensus that emerged from the committee. This bipartisan position reached in the committee should enable President Duarte to achieve the necessary reforms to bring peace to his troubled country.

It is not too much to ask our President to certify that these conditions are being fulfilled as a requisite for the contiuation of aid.

Such an approach is the best way to promote stability and democracy in El Salvador, and for this reason I support the committee's amendment.●

Mr. PERCY. Mr. President, I express my appreciation to my distinguished colleagues. I assure him that, although the chairman has agreed that Senator KENNEDY could come over immediately with three noncontroversial amendments, we shall move with great dispatch, subject to time limitations this evening, to see, if this measure is defeated, whether we could have a vote and resolve the El Salvador issue. I am certain we shall have the full support of the minority in that regard.

I appreciate again the opportunity to vote up or down on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Connecticut (Mr. WEICKER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Hawaii (Mr. INOUYE), and the Senator from Hawaii (Mr. MATSUNAGA) are necessarily absent.

The PRESIDING OFFICER (Mr. EAST). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 54, nays 42, as follows:

[Rollcall Vote No. 277 Leg.]

YEAS—54

| | | |
|---|---|---|
| Andrews | Evon | Mitchell |
| Baker | Ford | Moynihan |

NOT VOTING—4

Biden Matsunaga Weicker
Inouye

So Mr. PELL's amendment (UP No. 413), as modified, was agreed to.

Mr. PELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, if I could have the attention of Senators, let us have order in the Senate.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I do not think we have order now. I ask the Chair to try to restore order in the Senate so I can make an inquiry and an announcement.

The PRESIDING OFFICER. If the Senate will be in order the majority leader has the floor and wishes to make an announcement.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I had earlier told a number of Senators that there would be no more rollcall votes tonight and indeed there will not. There are other votes that may be eligible on fairly short time, and I urge Members to go ahead and complete the debate on that and if votes are ordered today, I ask unanimous consent that they be put over until tomorrow 30 minutes after the time that the Senate returns to the consideration of this measure.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, I reserve the right to object.

I thing this is an excellent suggestion. Could the distinguished majority leader indicate about what time he thinks any such rollcall votes would begin so that our colleagues might be on notice?

Mr. BAKER. Yes. As I announced earlier today I hope that at 10 a.m. tomorrow we will be on the continuing resolution, but since I am told there are some votes that can be made ready for early in the morning I hope that we can finish debate on a couple of amendments tonight and have a vote on those amendments, say, at 10 a.m. tomorrow and be on the continuing resolution then at 10:30 a.m. or shortly thereafter.

Mr. President, let me for the moment withdraw by unanimous-consent request and give both sides an opportunity to see if that will discommode Senator.

To reiterate what I will do a little later, it is my present intention to ask that any votes that are ordered tonight be put over until tomorrow and that they occur back to back with the first vote 15 minutes and any subsequent votes 10 minutes each beginning 30 minutes after we resume consideration of this bill.

It should also be understood that after those votes are completed I will then move, in accordance with the order previously entered, to consideration of the continuing resolution, assuming that it is on the calendar and available under the provisions of the unanimous-consent order.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. So the majority leader anticipates that the first rollcall would occur at about 10 a.m. or 10:30 a.m.?

Mr. BAKER. At about 10 a.m. to 10:30 a.m.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BAUCUS. Has the unanimous-consent request——

Mr. BAKER. I withdrew the unanimous-consent request and I merely describe it, may I say, so that both cloakrooms can check and see if that arrangement would seriously inconvenience anybody.

Mr. BAUCUS. Mr. President, if the leader will yield, it is this Senator's hope that any rollcall votes that occur tomorrow will occur sometime after 10:30 a.m.

Mr. BAKER. I think the arrangement I have suggested will do that. We would be on this bill at 10 o'clock and the first vote would occur 30 minutes after that, so the first one would occur, if I make that request, at 10:30.

Mr. BAUCUS. I thank the Senator.

Mr. BAKER. Mr. President, I reiterate I am not making that request at this time. I anticipate doing that before the Senate completes its business today.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I am told by the Parliamentarian that there are two amendments which are currently pending. If it is agreeable to the manager of the bill and the ranking minority member I would welcome the opportunity to be able to offer three different amendments which I have discussed with both the chairman of the Committee on Foreign Relations (Mr. PERCY) and the ranking minority member (Mr. PELL). I believe, there is no objection to these amendments, however I will conform to the wishes of the manager of the bill. I can offer these amendments now and move to set aside the existing amendments, if that is agreeable to the manager.

Since it is agreeable to the manager, Mr. President, I ask unanimous consent that the pending amendments be laid aside temporarily and that it be in order to consider the first amendment which I have submitted and sent to the desk.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. While I have the attention of the Senate, I have three amendments about which I have spoken to the manager of the bill and the ranking minority member, and I ask unanimous consent that all three be eligible for consideration and that we temporarily set aside the two pending amendments.

While the Chair is prepared to put the question, I am prepared to start a brief discussion on the first amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Massachusetts that the current pending amendments be temporarily laid aside?

Mr. PERCY. The managers of the bill concur and, inasmuch as there will not be rollcall votes, if they are acceptable to the managers of the bill, and there is no intention to debate further the Helms perfecting amendment, therefore, it is agreeable to lay aside the pending amendments and take up the three Kennedy amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 417

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mr. PERCY, Mr. PELL, Mr. CRANSTON, Mr. BIDEN, Mr. TSONGAS, Mr. MITCHELL, and Mr. LUGAR proposes an unprinted amendment numbered 417.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 23, after line 22, insert the following:

"(h) Notwithstanding any other provision of the law, of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $5,000,000 shall be available only for Poland for the purchase, transportation and distribution of food and medical supplies through private voluntary agencies where appropriate."

HUMANITARIAN RELIEF FOR POLAND

Mr. KENNEDY. Mr. President, there is no question today that the people of Poland are facing an acute shortage of food and medical supplies. The Polish Government has acknowledged this and has supported the efforts of American voluntary agencies to purchase, transport and distribute these supplies to the Polish people.

America and the world are all watching the dramatic events unfolding in Poland. I am sure that all in this Chamber join in the hope that the Polish people will succeed in resolving their political and economic problems peacefully and without outside interference.

The Independent Trade Union Solidarity has completed the initial phase of its first national convention and will open the second phase this Saturday. It is now time for Poland to move decisively to consolidate the gains of the labor movement and to rally its strength toward leading the country out of political and economic crisis.

The pending amendment is cosponsored by the chairman and ranking members—Senators PERCY and PELL and by Senators CRANSTON, BIDEN, TSONGAS, MITCHELL, and LUGAR. It does not and cannot seek to resolve this crisis, but it can and does earmark a modest $5 million in economic support funds to bolster the private relief effort already underway—of Americans offering a helping hand to the people of Poland at a critical time in the history of their nation.

Currently, both Catholic Relief Services and CARE have purchased or raised voluntary food contributions for Poland. Raising money from privates sources, Catholic Relief Services has already sent

some $8 million in food supplies to Poland, principally dairy products—powdered milk, cheese, and butter—targeted especially for distribution to infants, young children, and the aged in institutions.

But more is obviously needed, and the voluntary agencies need our support in facilitating the transportation of food and medical supplies they purchase or which are donated here from the warehouses in the United States to the docks—where the Polish Government have sent their own ships to cover the ocean freight costs.

Bishop Broderick, director of Catholic Relief Services, estimates that they alone could use $3 million to cover local transportation costs—to move privately donated or purchased food to the docks where it can be shipped to Poland. In Poland, the distribution of this food is also facilitated and monitored by the church.

Other agencies—such as CARE, the Polish American Congress, and the Red Cross—can also use modest public support to facilitate and expedite their private efforts in behalf of the Polish people. The pending amendment will make it possible for them to carry out effectively the essential assistance of the church and other private agencies to the Polish people.

The administration was consulted on this amendment; it is supported by the chairman of the Foreign Relations Committee (Mr. PERCY) and the ranking minority member of that committee (Mr. PELL). And I am pleased to report that this amendment is also strongly supported by both the President of the Polish American Congress and the director of the Catholic Relief Services.

Mr. President, I ask unanimous consent that correspondence with President Reagan and from Secretary Haig on the necessity for emergency relief and longer term assistance to Poland, be inserted at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
*Washington, D.C., July 21, 1981.*

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: At this critical time for Poland, we urge you to approve much needed food aid for that nation, and to work with our allies and other nations to provide longer-term economic assistance as the Polish government and Solidarity carry out their historic agreements.

As you know, the Polish people presently face serious food shortages in their country. U.S. food aid at this time is not only justified on humanitarian grounds, but would be a clear signal of continuing support for the process of reform and democratization in Poland.

We believe that food aid would be of direct and immediate benefit to the Polish people, and would enhance the future prospects for peace and stability. We are confident that this aid is in the best traditions of our nation and would be strongly supported by the American people even at this time of budgetary restraint.

With our thanks and best wishes,
Sincerely yours,

ROBERT C. BYRD,
PAUL SARBANES,
DALE BUMPERS,
TED KENNEDY,
ALAN CRANSTON,
CLAIBORNE PELL,
JOSEPH R. BIDEN.

---

THE SECRETARY OF STATE,
*Washington, D.C., August 15, 1981.*

Hon. EDWARD M. KENNEDY,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR KENNEDY: I am grateful for your expression of support—along with that of your colleagues Senators Byrd, Cranston, Pell, Biden, Sarbanes, and Bumpers—for our decision to extend additional food assistance to Poland. I agree fully with you and your colleagues' rationale for extending aid to Poland. This is indeed a critical juncture for Poland, and we cannot remain aloof from the needs of her people. As you may know, the Administration decided on July 28 to accede to the most recent Polish request for assistance by selling approximately 350,000 tons of corn to Poland under the PL–480 food aid program on concessional credit terms. The total cost of the transaction will be $55 million.

As important to Poland as this sale will be, a more comprehensive financial aid program covering the medium and longer term will have to be worked out with our Western allies if Poland is to avert disaster. In the interim, we are confident that this sale demonstrates our continuing humanitarian concern for the people of Poland as well as our support for the historic process of reform and democratization ongoing in that country.

Sincerely,

ALEXANDER M. HAIG, Jr.

Mr. PELL. Mr. President, I have studied this amendment and think it an excellent one, and particularly approve of the idea that the voluntary agencies will be used where appropriate. I think it is a good amendment and at least from the viewpoint of this side of the aisle I find it most acceptable.

Mr. KENNEDY. I am prepared to vote on the amendment.

Mr. PERCY. I would simply like to say to my colleague I am very proud indeed to cosponsor this amendment. I cannot imagine any place in the world where it would be more appropriate for Americans to reach out now to assist and help in every way they possibly can than in Poland. It is not just $5 million, it is a tremendous morale backing that it would give. There is no more beleaguered people today who have stood up for principles in which they deeply believe, and to assist at this time I think would be very appropriate. I fully support the amendment and commend my distinguished colleague.

Mr. KENNEDY. I thank the Senator.

Mr. President, I am prepared to vote on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (UP No. 417) was agreed to.

U.S. AMENDMENT NO. 418

Mr. KENNEDY. I send a second amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mr. BOSCHWITZ, Mr. MITCHELL, and Mr. TSONGAS proposes an unprinted amendment numbered 418.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 83 delete lines 16 through 25 and lines 1 and 2 on page 84; In lieu thereof, insert the following:

LEBANON

SEC. 715. (a) It is the sense of the Congress thta the Government of the United States should continue to support diplomatic efforts to resolve the current crisis in Lebanon, and to pursue a comprehensive and coordinated policy in Lebanon guided by the following principles—

(1) Maintenance of an effective cease-fire through Lebanon;

(2) Resolution of the issue of the Syrian missiles deployed in Lebanon;

(3) Freedom, security and opportunity for the Christian and all other Lebanese communities, including the Moslem, Druze, and Jewish communities in Lebanon;

(4) Reaffirmation of the historic United States-Lebanon relationship and strengthening the longstanding commitment of the United States to the independence, sovereignty, and territorial integrity of Lebanon, without partition, free from terrorism and violence, and free to determine its future without Soviet or other outside interference;

(5) Generous international support for relief, rehabilitation, and humanitarian assistance for Lebanon, particularly for those Lebanese citizens who have suffered from the terrorism and violence of recent events; and

(6) Respect for and strengthening of the authority of a Lebanese Government, based on open national elections free from external interference which will be able to preserve security through its national army and its security forces without outside military presence.

(b) Section 532 of the Foreign Assistance Act of 1961, as amended by Section 201(b) of this Act, is further amended by adding at the end thereof the following:

"(h) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $5,000,000 shall be available only for Lebanon for relief and rehabilitation programs of international and private voluntary agencies.".

AID AND SUPPORT FOR LEBANON

Mr. KENNEDY. Mr. President, my colleagues, Senator BOSCHWITZ, Senator MITCHELL, and Senator TSONGAS are joining with me today to introduce an amendment to S. 1196—a bill to amend the Foreign Assistance Act of 1961—to reiterate congressional support for a strong United States policy toward Lebanon and to provide $5 million in urgently needed humanitarian assistance.

In May I introduced a resolution later adopted unanimously by the Senate to offer strong support for diplomatic efforts to resolve the current crisis in

Lebanon, including the issue of the Syrian missiles, and to protect the right of all Lebanese communities to live in freedom and security. This resolution was cosponsored by several of my colleagues.

Since Senate passage of the resolution, violence and terrorism has continued to undermine the sovereignty of Lebanon. Foreign agents, terrorists, and non-Lebanese acting as so-called peace forces continue to intervene in the daily life of Lebanon and to undermine the ability of the Lebanese Government to exercise its authority throughout the country.

Since Senate passage of the resolution, we have seen the untiring efforts of Ambassador Philip Habib bear fruit. He successfully negotiated a ceasefire and restored a fragile truce to that war-torn and ravaged land. But daily we hear reports of continued fighting—of acts of terrorism and wanton destruction which bring misery and heartache to innocent people.

Mr. President, though we have taken one small step forward by means of this new ceasefire, there remains much more to be done. In our Senate resolution, we called for a comprehensive and coordinated policy in Lebanon based on six principles:

Establishment of an immediate and effective ceasefire throughout Lebanon.

Resolution of the issue of the Syrian missiles deployed in Lebanon.

Freedom, security, and opportunity for the Christian and all other Lebanese communities, including the Moslem, Druze, and Jewish communities in Lebanon.

Reaffirmation of the historic United States-Lebanese relationship and strengthening the longstanding commitment of the United States to the independence, sovereignty, and territorial integrity of Lebanon, without partition, free from terrorism and violence, and free to determine its future without Soviet or other outside interference.

Generous international support for relief, rehabilitation, and humanitarian assistance for Lebanon, particularly for those Lebanese who have suffered from the terrorism and violence of recent events.

Respect for and strengthening of the authority of a Lebanese Government, based on open national elections free from external interference which will be able to preserve security through its national army and its security forces without outside military presence.

Mr. President, this amendment would substitute the full statement of policy in Senate Resolution 144 in the place of the abbreviated statement in section 715 of the present bill. Our statement is consistent with but expands upon the present language in that section.

Further, I would call the Senate's attention to point five of our resolution on Lebanon—generous support for relief and humanitarian assistance. Today, we in the Senate have an opportunity to implement this point and to this end our amendment would earmark $5 million in urgently needed humanitarian assistance for Lebanon, to respond to relief needs that have developed since the original budget submission. The escalation of violence and conflict in recent months—since the tragic bloodletting in the city of Zahle—have overwhelmed the resources of the voluntary agencies, the International Committee of the Red Cross (ICRC), and others attempting to respond to the medical and food needs of the Lebanese people.

The ICRC alone estimates that its requirements over the coming year will exceed $8 to $10 million. Of particular importance are the needs of Zahle, which has suffered so much from the terrorism and violence of recent events. In addition, the voluntary agencies will require continued support, as will the hospital at the American University in Beirut, which is the only lifeline to the daily casualties of the violence and terrorism in Beirut. A $5 million American contribution to these relief programs is modest, indeed—and could well prove inadequate if the violence continues.

Mr. President, the least we can do is to earmark the minimum amount we can foresee now to respond to the already well-documented needs of the International Red Cross, the voluntary agencies and other relief organizations. This amendment responds to those minimum needs. I ask my colleagues to join me in supporting this amendment.

Mr. MITCHELL. Mr. President, I rise in support of this amendment which I am introducing with Senator KENNEDY, a Member of this body long concerned about events in Lebanon.

The committee bill provides Lebanon with $15 million in foreign military sales (FMS) guarantees, $840,000 in military education and training assistance, and $5 million in economic support fund assistance.

Of the $5 million in economic support funds, the committee bill would devote $2.5 million to private voluntary organization relief work; $1 million to private sector housing efforts; and $1 million to health education. In addition, the program calls for $500,000 to go to a newly established Lebanese Council on Development and Reconstruction.

Mr. President, I have no quarrel with the purposes to which the administration and committee would put the funds slated for Lebanon. I firmly believe, however, that the level of funding for Lebanon contained in the committee bill is insufficient.

The Lebanon aid program for 1981 included $4 million in economic support funds. As I have already pointed out, the 1982 program contains $5 million—in other words an increase of $1 million over the previous year's ESF effort.

Given what has occurred in Lebanon over the past year; given the enormous destruction which has occurred in and around East Beirut and Zahle; given the tremendous number of Lebanese who have lost their lives, have been injured, or have been forced from their homes, how can the United States in good conscience present a fiscal year 1982 assistance program which is only $1.4 million more than last year's program?

The amendment introduced by Senator KENNEDY and myself would earmark $5 million of additional ESF funds for reconstruction, rehabilitation, development, and relief assistance in Lebanon. This does not involve an increase of the amount prescribed in the bill; it merely allocates a small portion of those funds to Lebanon.

It will also set in statute the resolution, passed by this body in June, which expresses the view that Lebanon's territorial integrity and sovereignty should not be diminished in any way, and that the Christian and all other Lebanese communities should have the opportunity to live in peace without the intimidation of foreign forces present.

It is important that we send such a message to Lebanon. At a time when modern weapons of destruction are being used in so many parts of the world, peace there seems a distant dream.

At a time when more governments take and hold power by the bullet rather than the ballot, justice does not exist for most of mankind.

And at a time when societies the world over are torn by racial and religious divisions, unity among peoples has rarely seemed so out of reach.

But the more distant the dream, the more difficult the objective, the more we must strive to reach it.

Lebanon's trials today testify to the harshness of the eternal human struggle to overcome injustice and aggression. Every nation, in its own way, must work to reunite Lebanon, to rebuild its institutions, to restore its economy, and, most importantly, to reestablish the common ground on which the peoples of Lebanon can live together.

It is a slow, difficult process, but is a necessary process. For Lebanon's very existence as a free, democratic, sovereign state is in serious jeopardy. For over 1,500 years, Lebanon, like America throughout its history, has been a haven for the oppressed, where people of all faiths have lived in free and secure communities. A free Lebanon is of great value to itself, to the region, and to the whole world.

I believe that Senate passage of this amendment will send an important message to the beleaguered people of Lebanon. Passage will assure them of our belief:

That repeated acts of violence in Lebanon, resulting in death and injury to innocent residents, have hindered the pursuit of peace in the Middle East:

That a continued cease-fire in Lebanon is in the interest of the United States and the free world generally; and

That the cause of peace in the Middle East can best be achieved through negotiation rather than military confrontation.

Moreover, Lebanon's leaders and the Lebanese people will understand that the United States:

Seeks a lasting cessation of hostilities in Lebanon;

Seeks the withdrawal from Lebanon of all foreign forces prior to the 1982 Lebanese elections and ;

Reaffirms the important, historic relationship between it and Lebanon, and our longstanding commitment to the restoration and maintenance of the nation's freedom, sovereignty, and territorial integrity.

In summary, Mr. President, this amendment will provide Lebanon with urgently needed relief assistance and an expression of U.S. support for Lebanon's peaceful and independent future. Moreover, it is a sound amendment which will make clear our interest in preserving the historic and friendly ties between the Lebanese and American peoples.

I urge my colleagues to support this amendment.

Mr. President, I wish to make one comment before we move on to consideration of other matters.

Most Members of this body are familiar with the excellent programs and good works of the American University of Beirut, an educational institution chartered under the laws of New York State, which has been in operation since 1866. The bill currently under consideration contains $12 million in funding for the American schools and hospitals abroad program from which the American University of Beirut receives support each year.

It is my hope that this support will continue in the years ahead. The return on this investment in an American education unit based in the Arab world is enormous. All over the Middle East—in Bahrain, Saudi Arabia, Qatar, and elsewhere, graduates of the American University of Beirut participated in public and business affairs bringing great distinction to their university and to the American educational tradition of which it is an important part.

Mr. PELL. Mr. President, the initiative of the Senator from Massachusetts (Mr. KENNEDY) will increase by half the economic assistance funds available to Lebanon. I think this is a very good cause, indeed, and I am glad to support it, because I believe we must move beyond the cease-fire to do our utmost to end violence in Lebanon.

Beyond the terrible cost in human life and suffering, there has been the devastation of Lebanon itself. For example, the city of Tyre, which has been a major Middle Eastern post since the time of Alexander the Great, has been greatly damaged and remains threatened. We must not let Tyre and the other historical cities in the countryside of Lebanon remain in jeopardy.

Mr. HATFIELD. Mr. President, the Senator from Massachusetts and the Senator from Maine should be commended for again bringing to the Senate's attention the plight of Lebanon. This nation of diverse and enterprising people is the ground on which east and west truly meet. Historically it serves to prove that the two cultures can profit from open and free interchange. Unfortunately, in recent years Lebanon also has served as the symbol of failed policies in the Middle East. This nation has become a victim of forces totally beyond her control. For this we all must accept our share of responsibility and do what we can to rectify the injustices and relieve the suffering these people have endured.

One of our best assets for promoting understanding and showing that the U.S. cares, not only about Lebanon but about the entire region, is the American University of Beirut. AUB's reputation in the Middle East is legendary, and it provides visible and meaningful evidence to states in the Arab world that the United States is concerned about their future and attaches importance to its relationship with them.

The university is a trusted American presence which day in and day out contribute to the development of the region through the transfer of knowledge and technology. Worthy of special mention is AUB's teaching hospital, which helps educate 75 new physicians a year, and which serves all parties to the conflict in Lebanon without distinction or discrimination.

The humanitarian relief contemplated in the Kennedy-Mitchell amendment would be especially well used in assisting AUB to carry on its mission. Events of the past few months in Lebanon have placed severe new strains on the university, and, in the absence of new financial commitments to its continued existence, AUB may have to close its doors in the very near future. This would indeed be a tragedy after more than 114 years of operation in service to the region. And it would be a tragedy not only for AUB and for Lebanon. Its demise would also be seen throughout the Arab world as a failed U.S. commitment.

Again, Mr. President, I thank my colleagues for raising this matter, and I urge the adoption of their amendment.

Mr. PERCY. Mr. President, I fully support the Kennedy amendment. Recent military actions in Lebanon have brought renewed human suffering and property destruction to that country. Until peace can be restored to that troubled region, the United States should continue to help Lebanon to rebuild destroyed infrastructure and to bolster its war-debilitated economy.

Five million dollars will provide tangible assistance to Lebanon in its efforts at rebuilding and economic recovery, and also provide the central government with some resources with which to exert its authority. And it will provide the Lebanese people with evidence that the American people continue to stand by them during these difficult times.

While discussing Lebanon, I would also like to take note of another important way in which the United States assists that strife-torn country—our support for the American University of Beirut. This support, through the American schools and hospitals program which is also funded through this bill, has been particularly important during the recent hostilities in Lebanon. The university hospital has suffered damage from a gun battle between two warring factions, the crops on the university farm in the Bekaa Valley have been lost because of war damage, and expenses have amounted from treating patients suffering from war-related wounds.

I certainly hope that AUB will continue to receive the support of our Government and those of other interested nations and private groups. It is important that this 114-year-old institution can continue to perform its critical role of producing the qualified professionals so badly needed in the region.

I ask the sponsor of the amendment, Senator KENNEDY, if he would request unanimous consent that I be added as a cosponsor.

Mr. PELL. Will the Senator add my name also?

Mr. KENNEDY. Mr. President, I so request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. The managers of the bill, then, accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts (Mr. KENNEDY).

The amendment (UP No. 418) was agreed to.

UP AMENDMENT NO. 419

(Purpose: To make available up to $5,000,000 for countries seeking to improve infant feeding practices)

Mr. KENNEDY. Mr. President, I send an amendment to the desk on behalf of myself and Senators LEAHY, BAUCUS, INOUYE, METZENBAUM, and RIEGLE, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mr. LEAHY, Mr. BAUCUS, Mr. INOUYE, Mr. METZENBAUM, and Mr. RIEGLE, proposes an unprinted amendment numbered 419.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, between lines 6 and 7, insert the following:

"(b)(1) It is the sense of the Congress that the United States should strongly support the efforts of developing countries to improve infant feeding practices, in particular, through the promotion of breast feeding. As a demonstration of that support, the President is authorized to spend up to $5,000,000 from funds made available for fiscal year 1982 to carry out the purposes of sections 103 and 101(c) of the Foreign Assistance Act of 1961, to assist developing countries establish or improve programs to encourage improved infant feeding practices. As part of such a program, the Agency for International Development should fund necessary research to obtain better information on the precise nature and magnitude of problems relating to infant feeding practices, including the use of infant formula, in developing countries.

"(2) The President shall, as part of the Congressional Presentation Documentation for fiscal years 1983 and 1984, include information relevant to the implementation of this section, including—

"(A) A description of actions taken by the Agency for International Development to promote breast feeding and to improve supplemental infant feeding practices in devel-

oping countries through funds made available in this section and through its regular programs in the fields of health, nutrition, and population activities;

"(B) Summary information on results of studies authorized by this section on the nature and magnitude of problems in the developing countries related to infant feeding practices; and

"(C) Summary of reports by member countries of the World Health Organization on their actions to implement the International Code of Marketing of Breast Milk Substitutes."

On page 24, line 7, change "(b)" to "(c)".

Mr. KENNEDY. Mr. President, on behalf of Senators LEAHY, BAUCUS, INOUYE, METZENBAUM, RIEGLE, and myself, I am introducing today an amendment to the pending foreign assistance bill to establish a modest fund to assist developing countries implement the objectives of the World Health Organization's (WHO) "International Code of Marketing Breast Milk Substitutes," which was adopted last May by the World Health assembly.

Shockingly, the United States was the only nation to vote against the code—an action that has since been repudiated by overwhelming, bipartisan votes in both the Senate and the House of Representatives.

The vote of this administration simply failed to reflect the humanitarian concerns of the American people. It turned our back to the views of the overwhelming majority of the world community, and against a fundamental issue that is literally a matter of life and death to millions of newborn children. Standing isolated and alone on a vote of 118 against our single vote of "no", we in effect voiced our opposition to the cries for help from the developing nations in the Third World who want and need the code, where human suffering of unspeakable proportions—from poverty, disease, and malnutrition—is a daily reality of life.

If nothing else, we should have voted for the code to show that we understand the horror and the sickness, the poverty and the frustration of millions—to say to other nations that we are your friends, we grieve with you for your dying infants, and we want to do all we can to help.

With the pending foreign assistance bill we have an opportunity to express this concern in a tangible way, by providing funds to help implement the code and for improving the health of infants by promoting breast feeding.

The amendment I am offering earmarks up to $5 million to implement the aims of the WHO code. Since the code is voluntary, the amendment stipulates that the funds authorized are to assist only those developing countries "who desire to implement the code."

Every day, countless infants and young children pay with their lives because the formulas they are fed are watered down or prepared with unsanitary water. Daily, mothers who could have provided breast milk to their children are persuaded to be "modern," to do what advertisements say is the best thing for their children—to give them special infant formulas, but the tragedy is that their own milk is far safer.

Again, we know these facts because over the years we have heard repeated expert testimony from physicians and nurses in the field, who have seen with their own eyes infant formula deaths. We know this from missionaries and health experts who have seen malnourished children languishing in remote lands—so remote that there is no medicine, but there are cans of infant formula available and sold by international companies.

Currently, Mr. President, there are no funds authorized in the Agency for International Development's budget to deal specifically with the implementation of the infant formula code. Although the $5 million authorized by this amendment is a modest sum, I know from sources within AID, as well as in the World Health Organization, that this sum is urgently needed if we are to join with others in helping to implement the code.

These funds can be used to help ministries of health in developing countries establish programs and write appropriate legislation to implement the code. They can be used to support research and field projects on infant feeding practices. They can help developing countries integrate the promotion of breast feeding in their health education programs, and to incorporate controls on the use of infant formulas in hospitals, health centers, and primary health programs. And they can help strengthen governmental understanding of the misuse of infant formula.

These are just some of the programs this amendment would support in an effort to help, on a voluntary basis, developing countries implement the code. In doing so, we will help save the lives of millions of children who now fall victim each year to the misuse of infant formula throughout the poorest nations on Earth.

Mr. President, action on this amendment carries forward the spirit of the congressional resolutions on the WHO code adopted overwhelmingly by the House and Senate during consideration of the Department of State authorization bill. Now we can lend more tangible support to these expressions of support for the code by authorizing funds to help implement its objectives.

So while our Government's vote in Geneva may have set our country against the rest of the civilized world, the Senate can act to support the code with the certain knowledge that if America's vote had been cast by the American people, the outcome would have been different.

This amendment helps express the concern of the American people for the plight of infants around the world who, daily, die infant formula deaths.

Mr. LEAHY. Will the Senator yield?

Mr. KENNEDY. I am happy to yield.

Mr. LEAHY. Mr. President, I think this amendment provides a positive way for the Congress to demonstrate its own concern about the children of the world. I applaud Senator KENNEDY for his leadership on this issue.

Mr. President, I am pleased to support the amendment by the Senator from Massachusetts to earmark funds for the promotion of breast feeding.

In light of the past opposition of the Reagan administration on the World Health Association's Infant Formula Code, I feel it is important for us to restate the dedication of this country to the health and well-being of all the world's children.

In study after study, in country after country—including our own—medical evidence reveals that breast feeding is the superior form of nutrition for infants. Breast milk provides special immunities for the newborn, and a perfect balance of nutrients.

But in spite of these natural benefits, and in spite of the fact that breast milk is free, many mothers in poor regions of the Third World have been sold the notion that artificial powdered formula is better for their children. Heavy promotion by infant formula companies have shown beautiful mothers with healthy babies, implying that using the bottle is the "modern and the Western thing to do."

But what these new mothers soon find, if they begin to use the formula, is that the bottle is expensive and the formula may cost more than half of the family's income. Even more tragically, however, these mothers soon see their babies grow ill and weak if the water they used to mix the formula is polluted.

At that point, any mother would naturally want to take her baby off the formula if it was making her baby sick. But by that point it would be too late. If a woman has stopped breast feeding, she cannot start again.

Mr. President, this is a tragedy, a needless tragedy. Every day a mother breast feeds her child is to the benefit of the baby. But for the poor woman, the woman without access to pure water, or the fuel necessary to sterilize the bottles, the choice is more than just better nutrition. The choice to use formula may be a life-and-death decision for the baby.

Yet, when the Reagan administration had a chance to show its sensitivity to this problem, to express its concern about the health of innocent children, it chose not to. We were the only country to vote "no" on the World Health Organzation/UNICEF Code of Marketing Practices for Infant Formula. The insensitivity shown by that vote was not lost on the rest of the world, and frankly, I think that decision did damage to our Nation's standing in the world. That "no" vote certainly did not reflect the support that the Congress has shown for the many health and development programs we have funded over the years.

The amendment we are addressing today will set the record straight. In this amendment, AID will be authorized to fund necessary research to obtain better information on the precise nature and magnitude of infant feeding problems, including the use of infant formula, in developing countries. AID will also be required to report on its efforts to promote breast feeding. Finally, AID will also report to the Congress on progress of the members of the World Health

Organization in their efforts to implement the infant formula code.

Mr. President, I think this amendment provides a positive way for the Congress to demonstrate its own concern about the children of the world. I applaud Senator KENNEDY for his leadership on this issue and I support his amendment.

The leadership by the senior Senator from Massachusetts in forming a bipartisan coalition in this matter demonstrates the true feelings of the Senate.

Mr. President, I yield the floor back to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, this is a familiar issue to both the chairman of the Foreign Relations Committee and the ranking minority member. I hope that they accept the amendment.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, from the viewpoint of this side of the aisle, the amendment seemed an excellent one and in order. I am glad to recommend its passage.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I support the amendment.

I believe all of my colleagues support the idea that AID programs should promote improved infant feeding practices. This amendment clearly enunciates that position.

While most of us agreed with the basic aim of the WHO International Code of Marketing of Breast Milk Substitutes, as did the administration, a number of us had strong reservations about specific operative sections of the code. I believe that this amendment provides us all a chance to prove to the world that we do wish to make a positive contribution to the promotion of sound infant feeding practices. Senators DOLE and LEAHY, who previously have been intimately involved with this issue on the Senate floor, also support this amendment.

I also think it would be beneficial to increase our knowledge of the actual nature and magnitude of the problem of infant feeding in the Third World. This amendment encourages AID to increase the data available on this issue and to report such information to the Congress.

On balance, I believe this amendment provides a positive way for the United States to show the unanimity of our position when it comes to finding realistic ways to help assure that children all over the world have a better chance of receiving appropriate care during infancy.

Mr. KENNEDY. Mr. President, I wish to thank the chairman of the Foreign Relations Committee and the ranking minority member for their courtesy and responsiveness.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts (Mr. KENNEDY).

The amendment (UP amendment No. 419) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider all three of those amendments.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 413, AS MODIFIED FURTHER

Mr. PELL. Mr. President, I ask unanimous consent to make a technical correction that my perfecting amendment, unprinted amendment No. 413, as modified, be further modified in the instructions to reflect my stated intention to delete all of subsection (b) of the Lugar amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (UP No. 413), as modified further, is as follows:

On page 1, strike subsection (b) through the end of the amendment and insert in lieu thereof the following:

"In fiscal year 1982 and 1983 funds may be obligated for assistance for El Salvador under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offer may be issued and credits and guaranties may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if every 180 days after enactment of this Act, the President makes a certification in accordance with subsection (c).

"(b) If the President does not make such a certification, then the President shall immediately—

"(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

"(2) withhold all approvals for use of credits and guarantees for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act.

"(3) suspend all deliveries of defense articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

"(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect during fiscal year 1982 until such time as the President makes a certification in accordance with subsection (c).

"(c) The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador, to the extent not precluded by forces outside its control—

"(1) is making a concerted and significant effort to control gross violations of internationally recognized human rights;

"(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

"(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

"(4) is committed to the holding of free elections at an early date and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (4).

"(d) On making the first certification under subsection (a) of this section, the President shall also certify to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders."

Mr. DODD. Mr. President, what is the pending business before the Senate?

The PRESIDING OFFICER. The pending question is on the amendment of the Senator from North Carolina, UP amendment No. 412.

---

## TWENTIETH ANNIVERSARY OF THE PEACE CORPS

Mr. PERCY. Mr. President, 20 years ago today, President John F. Kennedy signed legislation founding the Peace Corps. Since that day, more than 80,000 Peace Corps volunteers have served in 88 foreign nations. They have compiled a shining record of service to the people of those nations and to the United States.

Peace Corps volunteers have served in diverse capacities at many levels abroad. They have taught in local schools and trained teachers, helped construct village housing, roads, and schools, provided health care and taught people how to provide better nutrition and health care for themselves with their own resources. Volunteers have assisted with irrigation and sanitation projects and taught improved farming and fishing techniques.

The Peace Corps has helped millions of people around the world improve their lives, and it has done so largely by showing people what they can do for themselves with a minimum of assistance from outside the local society. At the same time, Peace Corps volunteers, through their reports to families and friends have given millions of Americans realistic understanding of foreign cultures and the promise, as well as the difficulty, of realizing development goals in countries locked in poverty for centuries.

Mr. President, the Peace Corps was launched in a period of high optimism about changing the world in a very short time. Americans have since shed some of their romantic illusions about the rest of the world, but America's readiness to help in the long, hard struggle to improve living conditions in poor countries remains steadfast. Peace Corps volunteers continue to be the finest representatives of the American spirit. The Corps continues to welcome to its ranks, now as it did 20 years ago, Americans of all ages with the courage and dedication to serve others.

## PENDING BUSINESS

Mr. BAKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The amendment of the Senator from North Carolina, numbered 412.

Mr. BAKER. Mr. President, have roll-call votes been ordered on amendments on which votes have not yet occurred?

The PRESIDING OFFICER. They have been.

Mr. BAKER. I thank the Chair.

## ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, in a moment, I expect to propound a request in respect to those votes, but for the time being, I have a few housekeeping matters to take care of; and for that purpose, I ask unanimous consent that there now be a brief period for the transaction of routine morning business, not to extend past 6:30, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE LIBRARY OF CONGRESS

Mr. BAKER. Mr. President, I take this opportunity to inform my colleagues about a new Senate report that has been prepared at my request.

The title, "The Original Library of Congress: The History (1800–1814) of the Library of Congress in the United States Capitol," captures the essence of this study's rare historical journey through the Capitol's past.

My office is fortunately located amidst the original location for the Library of Congress, and it is my hope that many of my colleagues and interested citizens alike will avail themselves of the opportunity to read this report.

I thank Dr. Anne-Imelda Radice, Curator for the Architect, and Cynthia Miller, Archivist assistant in conjunction with the Library of Congress, for their help.

Of course, none of this would be possible without the expert advice and assistance from the distinguished Architect of the Capitol, George M. White.

## CLYDE DuPONT TO BECOME MEMBER OF HAWAIIAN PUBLIC UTILITIES COMMISSION

Mr. STEVENS. Mr. President, on September 14, Clyde DuPont, former chairman of the Postal Rate Commission, left his position as a commissioner to accept membership on the Hawaiian Public Utilities Commission. Many of us remember Clyde when he was minority staff director for the Senate Post Office and Civil Service Committee, working with the distinguished Senator from Hawaii, Hiram Fong.

Clyde was initially appointed to the Postal Rate Commission by President Ford in September of 1974 and then appointed chairman early the following year. As chairman, he established new procedures for regulatory hearings of the Commission by ordering expedited procedures dispensing with the services of administrative law judges and having the Commission hear all cases en banc with the Chairman acting as presiding officer.

These expedited procedures reduced the time for considering postal rate cases from an excess of 20 months to less than 10 months. These expedited procedures were later adopted into law by Congress in 1976.

Additionally, he ordered refined costing procedures on postal rate cases utilizing incremental costing approach rather than fully distributed costing in conformance with statutory directives. He established periodic reporting procedures for the Postal Service enabling the Postal Rate Commission and all interested parties to follow the financial condition of the Postal Service each accounting period, quarterly and annually.

These accomplishments as chairman assisted in expediting rate cases, reducing the costs, particularly the administrative costs, to the Postal Service and the Postal Rate Commission, as well as the litigating cost to the intervening parties. In addition, Commissioner DuPont established goals and objectives for guiding the Commission's work in all areas, particularly personnel actions to reduce members of supergrades and focus on skills needed for more efficient work output.

As a member of the U.S. Administrative Conference as a member of its Economics and Ratemaking Committee, he participated in formulating policy studies and reports on regulatory delays, Freedom of Information Act problems, and other similar studies of Federal regulatory concern.

All in all, Clyde DuPont has done an outstanding job on this Commission. I know Clyde wanted to return to his home in Hawaii and I know his many friends here join with me in wishing him every success as the newest member of the Hawaiian Public Utilities Commission.

## HITLER'S DEATH CAMPS

Mr. PROXMIRE. Mr. President, an upcoming book by Dr. Konnilyn Feig, entitled "Hitler's Death Camps," explores in grim detail the murder apparatus of the Third Reich.

The book is a historical account written in a personal style. What sets this book off from other holocaust literature is that it focuses upon the concentration camps themselves. Each camp is analyzed and discussed individually, focusing on the characteristics of that camp, for as Dr. Feig says, "each camp exemplifies a major aspect of the system."

For all her technical and systematic analysis of the camps themselves, Dr. Feig is anything but removed from the incredible emotional and psychological forces which we must confront whenever we think about the holocaust. As she states at one point, "the camps are in all of us."

I could not agree with her more, Mr. President. The camps are in all of us, and likewise the spectre of genocide is in all of us. "Hitler's Death Camps" provides a close look at the actual apparatus of genocide. It reminds us how capable we are of mass murder.

This book also reminds us once again that we have not done our part in preventing a future holocaust. The first step in helping to prevent such catastrophes is very easy to take, and can be taken right here in this Chamber. I urge swift ratification of the Genocide Convention.

## CHILDREN'S CAMPAIGN FOR NUCLEAR DISARMAMENT

Mr. LEAHY. Mr. President, my increasing concern about the possibility of a nuclear holocaust is directly related to thought about what the future holds for our children. Children themselves are quick to see the danger posed by this unbridled arms race, and their concern is represented in the "Children's Campaign for Nuclear Disarmament."

On October 17, 1981, letters written to the President by children across the country will be read at a rally in Washington, D.C. I insert in the RECORD excerpts from three of the hundreds of letters already written by these children:

DEAR MR. PRESIDENT: I am only twelve years of age and looking into the future scares me more than anything. To know that there might be a possible World War Three frightens me very much. Every day the nuclear war comes closer and closer. Having the most power is not important. Having the best nation is, but if there is a nuclear war it won't matter who is most powerful or who has the best nation because nobody will be left on earth.

DEAR MR. PRESIDENT: Even at age 14, I know that in a nuclear war no one wins. Even my brother Sam, who is five, knows that bombs mean injury, death, and destruction.

I also have a brother, Pippin, three, and a sister, Aerin, one. I love them all, and I do not want them hurt or killed.

Please, do whatever is in your power to decrease nuclear weapons manufacturing. It is the only wise thing to do.

DEAR MR. PRESIDENT: Radiation is very dangerous to plants, animals, grownups and children.

It makes me very sick.

Please don't make any more nuclear weapons.

## MESSAGES FROM THE HOUSE

At 12:07 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bills, each with amendments, in which it requests the concurrence of the Senate:

S. 917. An act to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving spouses and children; to authorize the Administrator of Veterans Affairs to guarantee home loans with provisions for graduated-payment plans; to increase the maximum amount payable in Veterans' Administration specially adapted housing assistance; to expand eligibility for memorial markers; and for other purposes; and

S. 1191. An act to extend for 1 year the authority of the Secretary of Commerce to reimburse commercial fishermen of the United States for losses incurred as the result of the seizure of their vessels by foreign nations.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1952. An act authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, and for other purposes;

H.R. 3136. An act to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation;

H.R. 4084. An act to improve the operation of the Marine Mammal Protection Act of 1972, and for other purposes;

H.R. 4284. An act to name the lock authorized as a replacement for Vermilion Lock, Louisiana, as "Leland Bowman Lock."

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 111. A concurrent resolution expressing the sense of the Congress that the Government of the Soviet Union should cease its imprisonment of Yuriy Shukhevych and permit him and his family to emigrate from the Soviet Union; and

H. Con. Res. 179. A concurrent resolution making apportionment of funds for the National System of Interstate and Defense Highways for the fiscal year 1983.

## ENROLLED BILLS AND JOINT RESOLUTION SIGNED

At 6:18 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following bills and joint resolution:

H.R. 618. An act to convey certain interests in public lands to the city of Angels, California;

H.R. 2218. An act to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes; and

S.J. Res. 65. Joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

## HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 1952. An act authorizing appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1982, 1983, and 1984, and for other purposes; to the Committee on Environment and Public Works.

H.R. 4084. An act to improve the operation of the Marine Mammal Protection Act of 1972, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 4284. An act to name the lock authorized as a replacement for Vermilion Lock, Louisiana, as "Leland Bowman Lock"; to the Committee on Environment and Public Works.

## HOUSE BILL HELD AT DESK

The following bill was ordered held at the desk by unanimous consent:

H.R. 3136. An act to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

## HOUSE CONCURRENT RESOLUTIONS REFERRED

The following concurrent resolutions were read and referred as follows:

H. Con. Res. 111. A concurrent resolution expressing the sense of the Congress that the Government of the Soviet Union should cease its imprisonment of Yuriy Shukhevych and permit him and his family to emigrate from the Soviet Union; to the Committee on Foreign Relations.

H. Con. Res. 179. A concurrent resolution making apportionment of funds for the National System of Interstate and Defense Highways for the fiscal year 1983; to the Committee on Environment and Public Works.

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1959. A communication from the Assistant Secretary of the Army for Installations, Logistics, and Financial Management transmitting, pursuant to law, a report on a decision to convert to contractor performance the laundry and drycleaning function at Fort Indiantown Gap, Pennsylvania; to the Committee on Armed Services.

EC–1960. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Faster Processing of DOD Personnel Security Clearances Could Avoid Millions in Losses"; to the Committee on Armed Services.

EC–1961. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, notice of credit extended by the Export-Import Bank to the People's Republic of China; to the Committee on Banking, Housing, and Urban Affairs.

EC–1962. A communication from the Secretary of Transportation transmitting a draft of proposed legislation to provide for the transfer of the Alaska Railroad to the State of Alaska; to the Committee on Commerce, Science, and Transportation.

EC–1963. A communication from the Secretaries of Transportation, Commerce, and Housing and Urban Development transmitting, pursuant to law, a report on use of federal funds to assist public and private redevelopment in the vicinity of urban rail stations in the Northeast Corridor; to the Committee on Commerce, Science, and Transportation.

EC–1964. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Burdensome and Unnecessary Reporting Requirements of the Public Utility Regulatory Policies Act Need To Be Changed"; to the Committee on Energy and Natural Resources.

EC–1965. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a list of the reports submitted to Congress by the General Accounting Office in August 1981; to the Committee on Governmental Affairs.

EC–1966. A communication from the Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a report with respect to a certain scientific and professional position; to the Committee on Governmental Affairs.

EC–1967. A communication from the Assistant Attorney General for Legislative Affairs, transmitting a draft of proposed legislation to amend the Trading with the Enemy Act in order to authorize the use of assets vested under that Act during World War II for an ex gratia payment of $20,000 to the Government of Switzerland and to provide for the deposit in the Treasury of the remainder of such assets; to the Committee on the Judiciary.

EC–1968. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "SBA's Progress In Implementing The Public Law 95–507 Subcontracting And Surety Bond Waiver Provisions Has Been Limited"; to the Committee on Small Business.

## PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–416. Joint resolution adopted by the Legislature of the State of Alabama; to the Committee on the Judiciary:

"S.J.R. 41

"Whereas, there is a great need for a government of laws and not of men in this country; and

"Whereas, many federal justices and judges have strayed in their rulings from strictly interpreting the Constitution of the United States as it was intended, passed and ratified; and

"Whereas, such straying from the intent of the Constitution is in effect judicial legislation by means of judicial extrapolation; and

"Whereas, members of the federal judiciary have been able to follow this course of action because they are not answerable to the people because they are appointed for lifetime tenure; and

"Whereas, this country was founded in order to escape the awesome power of lifetime appointments from nonelected rulers and royalty; and

"Whereas, the federal judiciary is the last remaining vestige of such awesome, lifetime political patronage in this country; and

"Whereas, the public has always been under the impression that federal judges aided and abetted criminals and criminal activity in America by giving the criminals more rights than the victims; now therefore,

*"Be it resolved by the Legislature of Alabama, both Houses thereof concurring,* That the Legislature of Alabama hereby petitions the Congress of the United States to convene a convention, pursuant to Article V of the Constitution of the United States, for the specific and exclusive purpose of proposing an amendment which would prohibit lifetime appointments of federal supreme court justices and all other federal judges and require that they be elected and re-elected every six years by the people.

*"Be it resolved further,* That the legislature of each of our sister states is urged to give the most serious consideration to the problems arising from lifetime judicial appointments, and to petition the Congress of the United States to call a convention for the specific and exclusive purpose of proposing an amendment which would prohibit lifetime appointments of federal supreme court justices and all other federal judges and require that they be elected and re-elected every six years by the people.

*"Be it resolved further,* That the Secretary of the Senate transmit duly authenticated copies of this resolution to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representative, to each member of Congress, both Senate and House, and to the executive authority of each of our sister states for transmittal to its legislature."

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

Report entitled "Report to the Senate of the Select Committee on Intelligence, United States Senate, Covering the Period January 1, 1979–December 31, 1980" (with additional views) (Rept. No. 97–193).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 67. Joint resolution to establish National Nurse-Midwifery Week.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 199. A resolution to authorize National Productivity Improvement Week.

S. Res. 175. A resolution to congratulate the State of Oklahoma on the celebration of its Diamond Jubilee.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

H.J. Res. 263. Joint resolution to designate May 6, 1982, as "National Recognition Day for Nurses".

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment:

S.J. Res. 107. Joint resolution to designate the seventh day of October 1981 as "National Guard Day".

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee of the Judiciary:

J. Paul McGrath, of New Jersey, to be an Assistant Attorney General;

3. Children and spouses names: None.

4. Parents names: None.

5. Grandparents names: None.

6. Brothers and spouses names: None.

7. Sisters and spouses names: none.

---

John E. Dolibois, of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States to Luxembourg:

[1] Date of President Reagan's call.

Nominee: John E. Dolibois.
Post: Ambassador to Luxembourg.
Nominated: June 2, 1981.
Contributions, amount, date, donee:
1. Self and spouse: $25, June 22, 1977, GOP Campaign Fund; $35, January 3 and February 7, 1978, RNC; $25, April 22, 1978, Rhodes for Governor; $20, June 18, 1979, RNC; $25, December 9, 1979, GOP Victory Fund.
2. Children and spouses names: John Michael, $35, 1978, RNC; Robert Joseph, $10, 1978, Delegate, Republican State Convention, Virginia; $25, February 20, 1980, RNC; $25, August 4, 1980, RNC; $35, August 14, 1980, GOP Victory Fund; $25, May 20, 1980, NRCC; $20, May 21, 1980, Ohio Republican Party; $125, December 23, 1980, RNC; $25, February 27, 1981, Ohio Republican Party; $50, April 13, 1981, GOP Victory Fund.
3. Parents names: Deceased.
4. Grandparents names: Deceased.
5. Brothers and spouses names: None.
6. Sisters and spouses names: None.

Paul J. Manafort, Jr., of Virginia, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1983;

John Augustus Bohn, Jr., of California, to be United States Director of the Asian Development Bank;

Nyle C. Brady, of New York, to be an Assistant Administrator of the Agency for International Development;

L. Keith Bulen, of Indiana, to be a Commissioner on the part of the United States on the International Joint Commission, United States and Canada; and

Sundry nominations within the Foreign Service to be summarized and placed on the Secretary's desk.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed subject to the nominees' commitment to respond to requests to appear and testify before a duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HELMS:

S. 1650. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to extend coverage under provisions of that act relating to benefits to survivors of certain public safety officers who died in the performance of duty; to the Committee on the Judiciary.

By Mr. BENTSEN (for himself, Mr. CANNON, and Mr. ROTH):

S. 1651. A bill to combat international terrorism; to the Committee on the Judiciary.

By Mr. GOLDWATER (for himself and Mr. DECONCINI):

S. 1652. To restore certain lands in Arizona to the Colorado River Indian Reservation; to the Select Committee on Indian Affairs.

By Mr. MATSUNAGA:

S. 1653. A bill to restructure the State and local assistance programs designed to improve the quality of criminal justice, and for other purposes; to the Committee on the Judiciary.

By Mr. BOREN (for himself, Mr. STENNIS, Mr. HEFLIN, Mr. FORD, Mr. JOHNSTON, Mr. NICKLES, Mr. HOLLINGS, Mr. SASSER, Mr. BENTSEN, Mr. HELMS, Mr. MATHIAS, Mr. LONG, and Mr. THURMOND):

S. 1654. A bill granting the consent of Congress to the Southern States Energy Compact, and for related purposes; to the Committee on the Judiciary.

By Mr. HART:

S. 1655. A bill to amend the Internal Revenue Code of 1954 to reduce the deduction for business meals and to earmark the savings from such reduction for the school lunch programs; to the Committee on Finance.

By Mr. DURENBERGER (for himself, Mr. ROTH, Mr. CHAFEE, Mr. BRADLEY, and Mr. HEINZ):

S. 1656. A bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds, and for other purposes; to the Committee on Finance.

By Mr. SCHMITT (for himself, Mr. CANNON, Mr. GORTON, Mrs. KASSEBAUM, Mr. LUGAR, and Mr. SYMMS):

S. 1657. A bill entitled the "Uniform Science and Technology Research and Development Utilization Act"; to the Committee on Commerce, Science, and Transportation.

By Mr. DODD:

S 1658. A bill to amend title VII of the Housing and Urban Development Act of 1970 to require a National Public Investment Requirements Analysis; to the Committee on Banking, Housing, and Urban Affairs.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN (for himself, Mr. CANNON, and Mr. ROTH):

S. 1651. A bill to combat international terrorism; to the Committee on the Judiciary.

INTERNATIONAL TERRORISM CRIME ACT OF 1981

● Mr. BENTSEN. Mr. President, the Central Intelligence Agency reports that some 3,668 people have been killed, 7,474 wounded in 6,714 acts of international terrorism since 1968.

The situation seems to be getting worse. There were more casualties of terrorism in 1980 than in any year since the CIA began its analysis of international terrorism in 1968.

As they have from the beginning, Americans in 1980 remained the primary targets of terrorist activity. Ten Americans were killed last year and ninety-four wounded in attacks around the world. Nearly two out of every five incidents involved U.S. citizens or property.

Given the increase in terrorist activity around the world and given our vulnerability to the depradations of terrorists it is incredible to think that the U.S. Government, through a loophole in the law, would condone activities that aid and abet international terrorism.

Yet, Mr. President, that is exactly what is happening.

As things now stand it is legal for a U.S. citizen or group of citizens to manufacture or purchase explosive devices in this country, and sell those devices to, say, the regime of Colonel Khadafy in Libya. They could do this even if they know that the Libyan Government planned to use these devices to promote terrorism; to blow up bridges and buildings and airplanes, killing innocent people in the far corners of the globe.

Let us take this a step further, Mr. President.

These U.S. citizens could also travel this country recruiting people to go work in Libya training terrorists. They could hire people to go to this foreign country and teach terrorists how to most effectively use the explosives they have sold them to blow up people and property.

In addition, Mr. President, these same U.S. citizens—perhaps former intelligence officers for our country—could sell to Libya or to any other foreign power a master plan for terrorism and they would not be violating the laws of our country.

The fact is, Mr. President, it is not now illegal for citizens of this country who are in this country to aid and abet international terrorism. I think it should be illegal, clearly illegal, and I am introducing legislation today to make it so.

Recent news reports—in the New York Times Sunday magazine, in Newsweek and in other publications—have revealed that there are some Americans who have taken advantage of the loophole in our law to aid and abet terrorism.

There is compelling evidence that U.S. citizens have become active agents of international terrorists; that U.S. firms fill suspicious orders with the tacit understanding that they are intended for use by terrorists; and that our laws are just not an effective deterrent to this activity.

If the United States cannot take action against its own citizens who work within its borders to foster terrorism then we cannot lead a successful international effort to combat terrorism.

Mr. President, I am introducing today the International Terrorism Crime Act of 1981. Its purpose is to prevent citizens of this country from taking actions in this country to further the terrorist ambitions of governments like Libya's.

Specifically this bill prohibits the sale of weaponry, explosive devices, munitions, plans and like items to a foreign state, or to an agent of a foreign state, for the purpose of aiding or abetting international terrorism.

Anyone convicted of violating this law, Mr. President, would face a prison term of up to 10 years, a fine of up to $25,000, or both.

Mr. President, we live in an age of terrorism, as anyone who went through the decade of the seventies can testify: The massacre at the Munich Olympics in 1972, the siege at Entebbe, the seizure of Embassies in Tehran and Bogota and London, the skyjackings, the bombings.

American property and American citizens have been and continue as the main targets of terrorists.

If the United States does not lead an international effort to combat terrorism—to wipe the last traces of terrorist activity from the face of the Earth—then, Mr. President, I do not know what country will do so.

We can, we must, rally all civilized nations of the world in an all-out war against terrorism.

But, before we can succeed at that we must insure that our own house is in order.

Mr. President, the legislation I propose today will help do that by making it a crime for Americans within this country to hatch plots to forment terrorism.●

Mr. ROTH. Mr. President, I rise to join my distinguished colleague and

friend, Senator BENTSEN, with whom I serve on the Intelligence Committee, to cosponsor the International Terrorism Crime Act of 1981. I share his abhorrence of the growing menace of terrorism in the world.

I believe this bill will close a loophole in our Criminal Code and allow prosecution of American citizens who aid international terrorism outside the United States.

There is growing interest in the Congress in stemming the activities of Americans who profit from international terrorism by providing arms, training, and technology to irresponsible foreign organizations and governments. The recent press coverage of the activities of Edwin P. Wilson in Libya has raised questions about the effectiveness of our laws that control the export of American military equipment and advanced technology.

This bill would make it a crime knowingly to manufacture, sell, or export military equipment, weapons, or technology, or to provide training or expertise to a foreign power or its agent for the purpose of aiding international terrorism. At present, according to Federal law enforcement officials, there are no criminal laws prohibiting Americans from supporting terrorism outside the United States. This bill, I hope, can correct that flaw.

Therefore, I urge my colleagues in the Senate to move swiftly and pass this bill into law to provide the Justice Department a tool it needs to help prevent the further spread of the source of international terrorism.

---

By Mr. GOLDWATER (for himself and Mr. DECONCINI):

S. 1652. A bill to restore certain lands in Arizona to the Colorado River Indian Reservation; to the Select Committee on Indian Affairs.

RESTORATION OF CERTAIN LANDS TO THE COLORADO RIVER INDIAN RESERVATION

● Mr. GOLDWATER. Mr. President, it gives me great pleasure to introduce for myself and my colleague from Arizona (Mr. DECONCINI), the following legislation at the request of the Colorado River Indian Tribes.

In brief, the bill would authorize the return of 16,000 acres of public lands, known as the La Paz area, to the Colorado River Indian Reservation in Yuma County, Ariz.

The Colorado River Indian Reservation was created by the act of March 3, 1865. Ten years after the establishment of the reservation, its southern boundary was extended twice by Executive order to provide a buffer between the Indian lands and the mineral prospectors and cattlemen. The La Paz Arroyo lands were originally a part of the Colorado River Indian Reservation. There is no question about this fact.

In 1875, in an effort to clearly define the extent of the reservation trust lands, the Commissioner of the General Land Office, pursuant to a request of the Commissioner of Indian Affairs, arranged for a survey of the reservation by a Mr. Chandler Robbins. Mr. Robbins' survey located its southern boundary at La Paz Arroyo. This survey was reconfirmed by the 1912 Harrington resurvey and the location was upheld finally by the Commissioner of the General Land Office in 1913 and 1914. In spite of and contrary to the surveys, the lands were removed from the reservation by the Executive order of November 22, 1915, as a result of erroneous reasons and without any compensation.

Today, the Colorado River Indian Tribes would like to have their lands returned because of issues of historical ownership, legal rights, and agricultural need.

The bill Senator DECONCINI and I are introducing will accomplish this purpose under the legislation, the return of the La Paz lands will, of course, be subject to valid existing rights. This means all existing private and public rights, including easements, unpatented mining claims, property claims, and all other valid existing rights. These will be examined closely as the legislation is being considered.

The return of these lands has been approved in general terms by the Arizona State Office of the U.S. Bureau of Land Management in a report dated November 25, 1974, and it is my understanding that that office believes the conclusions of the 1974 report are still valid. There will be thorough hearings on this legislation so that there will be no unexpected consequences of what I believe is a necessary and appropriate resolution of a longstanding boundary problem.●

---

By Mr. MATSUNAGA:

S. 1653. A bill to restructure the State and local assistance programs designed to improve the quality of criminal justice, and for other purposes; to the Committee on the Judiciary.

CRIMINAL JUSTICE ASSISTANCE AMENDMENTS OF 1981

Mr. MATSUNAGA. Mr. President, I am today introducing the Criminal Justice Assistance Amendments of 1981, a bill designed to recommit the efforts and the resources of the Federal Government to assisting the States in the fight against crime and in improving State and local systems of criminal justice.

Mr. President, crime in America is once again the topic of considerable discussion among officials at all levels of Government in this country and among the American people in general. There is no denying that crime has reached intolerable levels not only in our urban areas where it has long thrived, but in our suburban and rural areas as well.

I need not recite the results of national polls which clearly indicate that crime across this Nation is one of the greatest concerns of Americans. Indeed, the tremendous fear of crime in America which indicate that 1 out of every 3 is borne out by recent crime statistics households in the United States was directly affected by some kind of serious crime in 1980—I repeat—1 out of every 3 households. Criminal justice experts predict that within 4 or 5 years, each and every household in this Nation will be touched in some manner by serious crime.

In view of these and other crime statistics which show a steady increase in crime throughout the past decade and an explosion of violent crime in America over the past 2 years, the Chief Justice of the Supreme Court, Warren E. Burger, warned recently that America is approaching the status of an impotent society—one whose ability to provide and maintain elementary security for its people in its streets and towns and villages is in serious doubt.

Mr. President, there is every indication that this new wave of violent crime which is sweeping our land—crime so violent in its nature as to shake even the most crime-hardened of Americans—is threatening the very fabric of American society.

One of our basic responsibilities as a civilized society is the maintenance of public safety and the promotion of the public welfare. Certainly, it is the right of all Americans to feel secure in their homes, safe on their streets, and protected in their places of business and leisure. Clearly, we are failing to fulfill this critical responsibility.

In my judgment, there is no question that the leadership and the resources of the Federal Government are sorely needed to support the efforts of State and local governments to deal with crime and delinquency, particularly violent and serious crimes.

Our Federal system assigns a very limited direct public safety role to the National Government. We have a strong tradition of opposition to a national police force, which means that Federal efforts in connection with serious crime, especially most forms of violent crime, must necessarily be indirect and involve forms of support to State and local law enforcement agencies. Intergovernmental financial support is a form of Federal participation that respects and affirms the jurisdictional limits on national power.

As a result of severe cuts in Federal spending programs, State and local units of government are presently under tremendous financial pressure. While some jurisdictions are doing well to maintain their present level of criminal justice services, some jurisdictions simply cannot do it.

Even financial status quo means that State criminal justice systems are falling even further behind the demands being placed upon them. The preceeding years of lack of investment in the criminal justice system and the increased number of serious criminal offenders being processed by that system are now haunting us. Our police forces are undermanned, our courts are overrun and our prisons and correctional facilities are overcrowded.

With the full recognition that the Federal Government cannot and should not provide operational support to State and local criminal justice agencies, what State and local governments need are the techniques to do a better job with scarce resources and the financial and technical assistance to incorporate those advanced proven techniques into general operations during a period of transition.

Mr. President, I fully recognize that there are budget limitations not only at

the State and local levels, but at the Federal level as well. But if the fight against crime is of the highest domestic priority and comparable to maintaining our national defense and upgrading our Armed Forces, then Federal resources must be found to provide financial assistance to hard-pressed State and local governments.

To make the most effective use of the scarce resources at both the Federal and local levels, the Federal Government's initiative against serious crime should concentrate on programs in justice agencies that have the most direct impact on crime.

Thus, my bill, the Criminal Justice Assistance Amendments of 1981, concentrates in the near term on a limited number of replicate programs already proven effective. By emphasizing activities already proven effective, my bill would build on the investments that were the soundest aspects of the LEAA experience, while at the same time provide opportunity for developing and testing other program models.

By using proven models which are well documented, and which merit general professional acceptance, the program will have the advantages of rapid implementation and early reports on program impact to the public and to the Congress. A selected range of program models will permit the use of a simpler administrative apparatus. Tested program models will also attract the investment of State and local appropriated funds.

The proposed Federal financial assistance program is in the form of a block grant to the States. Members on the other side of the aisle should note that my proposal is consistent with the administration's basic federalism principles. The bill will facilitate greater integration of Federal funds with State appropriations, utilize Federal funds in the highest priority areas, and provide greater coordination in the use of Federal and State resources.

Mr. President, in these times of fiscal restraint, the Federal Government must coordinate its policies and activities, both among its constituent agencies and levels of government. The legislation creates a national commission, two-thirds of whose members are State and local government representatives, and one-third of whom are representatives of the Federal Government.

The Commission is intended to serve as a forum for anticipating and recognizing issues related to the impact of Federal policies and decisions on State and local criminal justice systems.

Such issues arise, for example, when there are changes in FBI or DEA priorities, refugee policies, or border control measures. Such impact may also derive from patterns of Federal court actions involving prison and jails, or from legislation, such as the Civil Rights of Institutionalized Persons Act.

In response to negative impacts, the Commission should identify and propose appropriate offsetting measures.

For example, Federal prisons might house persons convicted in State courts of crimes for which there is concurrent jurisdiction, or prisoner exchange treaty processes might be made available to remove appropriate noncitizens from State prisons. Another possibility would be the offering of presently unneeded military, Forest Service, or other Federal properties for use as minimum security correctional facilities. Some measures might involve funding, such as the earmarking of some oil windfall profit tax money to compensate for law enforcement costs traceable to fuel price decontrol or energy "boom town" developments.

The Commission will serve as a vehicle for coordinating the efforts of existing separate programs, such as the National Institute of Corrections, and proposed forums, such as the State Justice Institute (S. 537) proposed by Senator HEFLIN. The legislation provides for an intensive interagency coordinating function involving key Federal officials.

The Commission, through direct participation by representative State and local justice executives, will also insure that local needs will be fairly considered in the development of new or additional criminal justice assistance programs.

The Commission will operate as a resource both to (a) provide advice to Federal officials and (b) require Federal officials to undertake impact studies on the effect of changing Federal policies on crime and local criminal justice systems before such new Federal policies are implemented.

Based on the LEAA experience of the past decade, it is clear that a Commission or some other appropriate mechanism is necessary if intergovernmental conflicts are to be reduced and criminal justice fragmentation is to be minimized.

While some criminal justice fragmentation and conflict is inherent in our constitutional structure, intergovernmental conflict is not.

We must understand where our criminal justice policies are supportive and where they are in opposition. We must be able to measure the impact of our actions. We must operate as one in our fight against violent crime.

Anything less than joint and concentrated action by all levels of Government would mean that we have failed the American people.

The bill also proposes a limited categorical program which either supports the block program's activities funded by the States or provides funding to meet criminal justice emergency situations beyond the capacity of State and local governments to respond adequately.

Mr. President, incredible as it may seem, the Federal Government's only major criminal justice assistance program was terminated last year. There is now a vacuum which needs to be filled by a responsible program which adequately meets the criticisms launched against the past LEAA program. I am convinced, Mr. President, that the legislation I am introducing today will establish such a program, for the following reasons:

First, under my bill, Federal funds will not be indiscriminately spread over a vast problem area with little impact. The bill establishes a modest, highly targeted program which supports the replication of tested, successful former LEAA program models of demonstrated impact and broad adaptability.

Initially the list of eligible programs would consist of: First, integrated criminal apprehension program (ICAP); second sting projects; third, community anticrime programs; fourth, management information systems; fifth, career criminal prosecution programs; sixth, victim, witness, and juror assistance programs; seventh, coordinated arson programs; eighth, prosecution of white-collar, organized, public corruption, and fraud against Government crimes; ninth, alternatives to pretrial detention, jail and prison for persons who pose no danger to the community; tenth, programs for drug-dependent offenders; eleventh, jail and prison overcrowding programs; and twelfth, programs addressing serious offenses committed by juveniles.

Second, State legislatures will not be uninvolved. The legislation requires State legislative review as well as appropriation of a high State match which will mean that Federal grant funds will tend to be dealt with on the same basis as State appropriated money.

Third, the proposed program will not be plagued by redtape. The requirement of a voluminous comprehensive criminal justice plan will be replaced with the submission of a simple application. Extensive evaluation and annual reports will be stripped down. Administrative requirements will be reduced to the minimum level necessary. The use of well documented tested models will reduce the necessity for extensive applications and program descriptions.

Fourth, the use of the block grant delivery mechanism will eliminate the multi-layered, elaborate and cumbersome planning system which was a part of the old LEAA program. Under the "Criminal Justice Assistance Amendments of 1981" the States will be able to choose programs consistent with their chosen directions of criminal justice system change.

At the same time, States will have full control over the processes by which programs are selected and funds allocated. No longer will there be a requirement for bureaucracies at the Federal, State, regional and local levels.

Moreover, decisions will not be made by federally supported regional and local government administrative enclaves that were too often isolated from permanent Government structures.

Fifth, the legislation will no longer specify the structure of State planning agencies. The States will be able to continue or establish State planning agencies which fit into the State government structure and meet State needs and criteria.

Sixth, the legislation will not reinforce the fragmentation of the criminal justice system. The bill establishes vehicles for coordination of Federal, State, and local efforts. At the same time, it eliminates the artificial allocations which required money to be spread without regard to States' needs.

Gone will be the requirements for juvenile justice maintenance of effort dollars, requirements that an adequate share of funds be distributed without regard to

need to every aspect of criminal justice, formulas that required specific dollar allocations to each local jurisdiction, and specific, substantive mandates to be met.

Seventh, no longer will enormous bureaucracies at the Federal, State, and local levels be needed to run a criminal justice assistance program. The modest funding of this streamlined block grant program supporting only successful programs will require only a stripped down administrative structure at each level of government.

Mr. President, in conclusion, let me speak plainly about this country's crime problem. It is evident to me that although a majority of my constituents want to see Federal spending reduced and Federal taxes cut, they will not tolerate the cessation of the Federal role in the war on crime.

In my opinion, crime and the fear of crime is so pervasive in America today that the public believes that Federal spending in this one area is, indeed, justified.

If, over the past decade, crime had disappeared from our streets, we could have declared victory and ended the Federal role in crime control and criminal justice assistance. But the fact of the matter is that crime has not disappeared; it has increased steadily and is now exploding. We cannot now declare victory and leave the scene.

The Federal Government has a responsibility to the American people to provide for public safety. We can properly fulfill that responsibility by assisting the States in controlling crime and restoring order to our communities.

Mr. President, I, therefore, urge my colleagues to support the enactment of the Criminal Justice Assistance Amendments of 1981.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1653

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Criminal Justice Assistance Amendments of 1981".

DECLARATION AND PURPOSE

SEC. 2. The Congress finds and declare that the high incidence of crime, particularly violent crime, and juvenile delinquency is detrimental to the general welfare of the people of this Nation.

Congress further finds that while crime and juvenile delinquency are primarily local problems dealt with first by State and local units of government, these problems continue to require the joint and coordinated efforts of Federal, State, and local governments.

Congress further finds that the Federal Government must provide leadership, coordinate its own anticrime efforts, provide financial and technical resources, simplify the grant structures, and reduce bureaucratic redtape.

It is therefore the declared policy of the Congress to aid State and local governments in strengthening and improving their systems of criminal justice by providing financial and technical assistance through a simplified, State administered block grant program with State flexibility and a limited categorical program. It is the purpose of this bill to amend title I of the Omnibus Crime Control and Safe Streets Act of 1968, to establish a new, modest, highly targeted program of block grant assistance to State and local governments for implementation of a limited number of high-priority criminal justice improvements. It is further the purpose of this title to establish a limited categorical program to support national programs of direct assistance to State and local criminal justice agencies and to provide temporary assistance to meet criminal justice emergency situations beyond the capacity of State and local agencies to respond adequately. It is further the purpose of this bill to establish a Bureau of Justice Assistance to administer the program created by this bill. It is further the purpose of this bill to create a National Justice Commission to coordinate operational activities and policies of Federal, State, and local criminal justice agencies and identify criminal justice problem areas warranting priority attention by the Federal Government.

PART A—BUREAU OF JUSTICE ASSISTANCE

SEC. 3. Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by striking out section 101, 102, and 103 and inserting in lieu thereof the folowing new sections:

"SEC. 101. There is hereby established within the Department of Justice under the general authority of the Attorney General, a Bureau of Justice Assistance (hereinafter referred to in this title as the "Administration"). The Administration shall be under the direction of an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate, and such other Deputy Administrators as may be designated by the Attorney General. The Administrator shall have final authority over all grants, cooperative agreements, and contracts awarded by the Administration.

"SEC. 102. The Administrator shall—

"(a) provide funds to eligible States pursuant to part D;

"(b) provide funds to eligible recipients pursuant to part F;

"(c) provide benefits pursuant to part L;

"(d) provide such support to the National Justice Commission as the Commission directs;

"(e) publish and disseminate information on the condition and progress of the criminal justice system;

"(f) establish and carry on a specific and continuing program of cooperation with the States and units of local government designed to encourage and promote consultation and coordination concerning decisions made by the National Justice Commission affecting State and local criminal justice priorities;

"(g) cooperate with and render technical assistance to States, units of local government, and other public and private organizations or international agencies involved in criminal justice activities;

"(h) exercise the powers and functions set out in part H; and

"(i) exercise such other powers and functions as may be vested in the Administrator pursuant to this title.".

PART B—NATIONAL INSTITUTE OF JUSTICE

SEC. 4. Part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended as follows:

Section 202(c)(10) is amended to read as follows:

"(10) after consultation with appropriate agencies and officials of States and units of local government, make recommendations for programs or projects which will be effective in improving the functioning of the criminal justice system; and".

PART D—BLOCK FORMULA PROGRAM

SEC. 5. Part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by striking out sections 401, 402, 403, 404, and 405, and inserting in lieu thereof the following new sections:

"SEC. 401. (a) During the fiscal year ending September 30, 1982, the Administration is authorized to make grants under this part to assist States and units of local government in carrying out specific criminal justice system programs of proven effectiveness, record of proven success, or high probability of criminal justice system improvement. Such grants shall be for the purpose of—

"(1) improving approaches to reduce crime, especially street and violent crime, by means of crime prevention, detection, and investigation efforts through systematic data collection and analysis;

"(2) improving approaches to crime prevention, especially those based on police and citizen partnership, and community organization and government cooperation;

"(3) disrupting illicit commerce in stolen goods and property;

"(4) improving workload management systems for criminal justice agencies;

"(5) improving methods to identify, prosecute, and recommend sentencing of repeat and multiple-felony offenders (including juvenile offenders) known as career criminals;

"(6) developing and implementing programs which provide assistance to victims, witnesses, and jurors, including restitution by offenders, encouragement of participation by victims and witnesses in the criminal justice system, and prevention of retribution against or intimidation of witnesses;

"(7) improving arson detection and investigation and arson control coordination;

"(8) effectively investigating and prosecuting white-collar crime, organized crime, public corruption crimes, and fraud against the government;

"(9) providing alternatives to pretrial detention, jail and prison for persons who pose no danger to the community;

"(10) providing programs which identify and meet the needs of drug dependent offenders;

"(11) providing programs which alleviate prison and jail overcrowding; and

"(12) providing programs which address the problem of serious offenses committed by juveniles.

"(b) During the fiscal years ending September 30, 1983, and September 30, 1984, unless superseded by legislation enacted pursuant to section 501 or some other authority, States will be authorized to fund the programs set forth in or established pursuant to subsection (a) and the five program areas given the highest priority by the National Justice Commission.

"SEC. 402. (a) The Administration is authorized to make financial assistance under this part available to an applicant State to enable it to carry out all or any of the programs set forth under section 401.

"(b) For any State allocation under this part, the Federal portion of any grant may be up to 50 per centum of the cost of the programs specified in the State application for such grant.

"(c) The non-Federal portion of the cost of such grant shall be in cash appropriated in the aggregate by the State and units of local government.

"(d) Funds appropriated by a State and local units of government may be included in the non-Federal appropriated portion if they support (1) any program meeting the purposes of section 401, (2) the State accountability function, as set forth in section 403(a)(2), for the Federal dollars awarded by the Administration or its predecessor, (3) the State planning agency responsible for statewide criminal justice coordination,

planning, and analysis, and (4) the regional or local planning agency responsible for regional or local criminal justice coordination, planning, and analysis.

"(e) The Administrator may waive all or a portion of the required match if the Administrator determines that the recipient State, local unit of government, Indian tribe, or other aboriginal group does not have sufficient funds available to meet the non-Federal portion of such cost.

"(f) Each recipient of a subgrant from a State shall assume the cost of a successful program or project funded under this part after a reasonable period of Federal assistance.

"SEC. 403. (a) Each State shall establish or designate and maintain a State planning agency for the purpose of—

"(1) preparing a simple application to obtain a State's allocation under this part;

"(2) administering funds awarded by the Administration and its predecessor agency, such administration to include (A) subgrant application receipt, review, and processing; (B) grant and subgrant administration, including monitoring, progress and financial report review, technical assistance, grant adjustments, accounting, fund disbursements, grant closeouts; (C) audit; and (D) evaluation;

"(3) providing financial assistance to State agencies, local units of government and private nonprofit corporations pursuant to the purposes of section 401 and on the terms and conditions established by such State planning agency;

"(4) preparing annual reports for the chief executive of the State, the State legislature and the Administration containing a description of the use and distribution of the Federal and non-Federal matching funds, and an assessment of the effectiveness and efficiency of the funded programs;

"(5) coordinating the policies, plans, and functions of State and local criminal justice agencies to the extent consistent with State law and in accordance with the policies established by the chief executive officer of the State; and

"(6) analyzing criminal justice data from within the State and periodically publishing the results of such analysis.

"(b) The State planning agency shall be created or designated by State law and shall be subject to the jurisdiction of the chief executive of the State. The State planning agency shall be provided necessary professional, technical, and clerical staff to perform the functions set forth in subsection (a).

"(c) The Administration shall suspend funding for an approved application in whole or in part if such application contains a program or project which has failed to conform to the purpose of section 401 or the requirements of this Act as evidenced by—

"(1) the annual report submitted to the Administration by the applicant pursuant to section 403(a)(4) of this title;

"(2) the failure of the applicant to submit an annual report pursuant to section 403(a)(4) of this title;

"(3) evaluations conducted pursuant to section 802(b); and

"(4) evaluations and other information provided by the National Institute of Justice.

"(d) Grant funds awarded under part D shall not be used for—

"(1) programs which have as their primary purpose general salary payments for employees or classes of employees within an eligible jurisdiction, except for the compensation of personnel for time engaged in conducting or undergoing training programs or the compensation of personnel engaged in research, development, demonstration, or short-term programs; or

"(2) construction projects.

"(e) The Administration shall not finally disapprove any application submitted to the Administrator or suspend funding for an approved application under this part without first affording the applicant reasonable notice and opportunity for a hearing and appeal pursuant to section 803 of this title.

"(f) No award of funds that are allocated to the States under this part shall be made with respect to a program other than a program contained in an approved application.

"(g) If the Administration determines, on the basis of information available to it during any fiscal year, that a portion of the funds allocated to a State for that fiscal year will not be required, or that the State will be unable to qualify or receive funds under the requirements of this part, such funds shall be accumulated and reallocated on a periodic basis among all the States for expenditure in accordance with section 401.

"(h) Funds under this part may be awarded by State and local units of government to private nonprofit organizations.

"SEC. 404. The Administration shall award a grant to a State if a State submits an application which is consistent with the purposes set forth under section 401 of this title and which (a) sets forth the proposed criminal justice programs to be funded, (b) identifies the subgrantees that will receive funding, and (c) allocates funds among subgrantees. The application must project the programs to be funded for a two-year period of time. Funds shall be awarded by the Administration for the two-year period subject to the availability of appropriated funds. Simple amendments shall be submitted to adjust for changes in fund availability. The application shall contain—

"(a) a certification that Federal funds made available under this title will not be used to supplant State or local funds, but will be used to increase the amounts of such funds that would, in the absence of Federal funds, be made available for criminal justice activities;

"(b) an assurance that functions set forth under section 403(a) will be performed;

"(c) a provision for fund accounting, auditing, monitoring, and such evaluation procedures as may be necessary to keep such records as the Administration shall prescribe to assure fiscal control, proper management, and efficient disbursement of funds received under this title;

"(d) a provision for the maintenance of such data and information and for the submission of such reports in such form, at such times, and containing such data and information as the Administration may reasonably require to administer other provisions of this title; and

"(e) a certification that its programs meet all the requirements of this part, that all the information contained in the application is correct, that there has been appropriate coordination with affected agencies, and that the applicant will comply with all provisions of this title and all other applicable Federal laws. Such certification shall be made in a form acceptable to the Administration and shall be executed by the chief executive officer or other officer of the applicant qualified under regulations promulgated by the Administration.

"SEC. 405. The chief executive officer of the State should submit the State's proposed uses of the part D funds to the State legislature while in session or a body designated to act while the legislature is not in session for its advisory review prior to the State's submission of its application to the Administration. If the legislature or the interim body has not commented upon the proposed uses forty-five days after receipt, such proposed uses shall then be deemed reviewed.

"SEC. 406. (a) The Administration shall provide financial assistance to each State applicant under this part to carry out the programs or projects submitted by such applicant upon determining that—

"(1) the application is consistent with the requirements of this title;

"(2) the application was made public prior to submission to the Administration and an opportunity to comment thereon was provided to citizens, neighborhood groups, private nonprofit organizations, and units of local government; and

"(3) the application was submitted to the State legislature in accordance with the requirements of section 405.

"(b) Each application submitted for approval to the Administration pursuant to section 404 of this title shall be deemed approved, in whole or in part, by the Administration within sixty days after first received unless the Administration informs the applicant of specific reasons for disapproval.

"SEC. 407. Of the total amount appropriated for parts D and F in any fiscal year, not less than 95 per centum shall be set aside for part D and allocated annually to the States as follows: The sum of $250,000 to each of the participating States and the balance in proportion to the relative population within a State as compared to the population in all States.".

PART E—NATIONAL JUSTICE COMMISSION

SEC. 6. Part E of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by striking out sections 501, 502, 503, 504, and 505, and inserting in lieu thereof the following new section:

"SEC. 501. (a)(1) There is hereby established in the executive branch of the United States a National Justice Commission (hereinafter in this section referred to as the 'Commission'). The Commission is established for the purpose of coordinating operational activities and policies of Federal agencies whose actions and regulations impact on crime in the United States, coordinating operational activities and policies of Federal, State, and local criminal justice agencies, identifying criminal justice problem areas warranting priority attention by the Federal Government and recommending to Federal departments and agencies, the Office of Management and Budget, the President, and Congress those criminal justice priority areas and actions and policies that will improve criminal justice and reduce crime, and recommending to the Congress priority program areas that might be included as new purposes set forth in section 401(a).

"(2) The Commission shall be composed of twenty-one members to be appointed by the President. Such members shall be qualified by virtue of their training, experience, or education to represent the views of Federal, State, and local government agencies involved in the administration of justice and of other public and private organizations concerned with the fair and effective administration of justice.

"(3) Fourteen members of the Commission shall be representative of the interests of State and local governments, at least two of whom shall not be elected or appointed State or local government officers or employees. The following Federal officials shall be members of the Commission: The Attorney General, one other official of the Department of Justice designated by the Attorney General who has responsibility for criminal justice matters, the Secretary of the Treasury or the Secretary's designee, the Secretary of Health and Human Services or the Secretary's designee, the Secretary of Labor or the Secretary's designee, the Secretary of Housing and Urban Development or the Secretary's designee, and the Secretary of Education or the Secretary's designee. The Administrator of the Bureau of Justice Assistance shall serve as a nonvoting member of the Commission. The Director of

the Office of Juvenile Justice and Delinquency Prevention, the Director of the National Institute of Justice, and the Director of the Bureau of Justice Statistics shall serve as advisors to the Commission notwithstanding any other provision of law.

"(4) The Attorney General shall serve as the Chairman of the Commission. The Attorney General shall designate the Vice Chairman from among the elected or appointed State or local government officers or employees serving on the Commission.

"(5) The term of office of each non-Federal member of the Commission appointed under subsection (a) shall be three years except the first composition of the Commission which shall have one-third of these members appointed to one-year terms, one-third to two-year terms, and one-third to three-year terms; and any such member appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term. Initial members shall be appointed within ninety days after the date of enactment of this Act. The President shall fill a vacancy not later than ninety days after such vacancy occurs. Members may serve after the expiration of their terms until their successors have taken office. The non-Federal members of the Commission appointed under subsection (a) shall receive compensation for each day engaged in the actual performance of duties vested in the Commission at rates of pay not in excess of the daily equivalent of the highest rate of basic pay then payable in the General Schedule of section 5332(a) of title 5, United States Code, and in addition shall be reimbursed for travel, subsistence, and other necessary expenses.

"(b) (1) By March 15, 1982, and every two years thereafter, the Commission shall publish a list in the Federal Register of criminal justice problems which should receive priority attention by Federal, State, and local governments. In preparing this list the Commission shall consult with the House and Senate Judiciary Committees, Federal, State, and local government officials and others in the public and private sector concerned with the problem of crime. The Commission shall assure that the problems of all of the States are taken into account in preparing the list. The Bureau of Justice Assistance, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Juvenile Justice and Delinquency Prevention and their advisory committees shall, in a manner to be determined by the Commission, advise the Commission on their views as to what crime problems should be designated as priority crime problems. The Bureau of Justice Assistance shall perform any duties requested by the Commission in support of developing its priority list of criminal justice problems.

"(2) By March 1, 1982, the Commission shall communicate to the chairman of the Senate and House Judiciary Committees for congressional consideration a list of priority criminal justice problems which it recommends should receive priority attention by Federal, State, and local governments. Each problem shall be supported by descriptions of possible federally assisted programs and Federal, State, and local governmental actions. If the committees on review determine that the programs identified in section 401 should be modified for the fiscal years ending September 30, 1983, and September 30, 1984, they should report out of committee appropriate amendments to section 401 by May 15, 1982.

"(c) The Federal officials of the Commission shall meet not less often than quarterly to coordinate overall Federal policy with respect to shaping their respective departmental actions to reduce crime and juvenile delinquency and to develop complimentary objectives and priorities for Federal programs and activities that affect crime and juvenile delinquency. The foregoing Federal officials through the Attorney General shall make recommendations to the President, the Director of the Office of Management and Budget, the Commission, and the Congress at least annually on means to improve Federal crime prevention and control policy.

"(d) The Commission may request and the Bureau of Justice Assistance shall provide the Commission with such personnel, funding, and administrative support as the Commission determines are necessary to carry out the Commission's mandate. The Attorney General shall request adequate funding for the Bureau of Justice Assistance's support of the Commission as part of the Department of Justice's annual request to the Congress for appropriations. Any agency, department or the like in the executive branch of the United States is authorized to make funds for personnel and administrative support available to the Commission notwithstanding any other provision of the law.".

PART F—DISCRETIONARY GRANTS

SEC. 7. Part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended as follows:

"SEC. 601. It is the purpose of this part, through the provision of additional Federal financial assistance to—

"(a) provide technical assistance and training to State agencies, units of local government, combinations of such units, or private nonprofit organizations, which are carrying out programs that meet the purposes of section 401;

"(b) improve State criminal justice coordination, planning and analysis; and

"(c) meet criminal justice emergency situations beyond the capacity of State and local governments to respond adequately.

"SEC. 602. (a) Of the total amount appropriated for parts D and F in any fiscal year, not more than 5 per centum shall be set aside pursuant to this part in a special discretionary fund for use by the Administration in making grants, cooperative agreements and contracts (in addition to any other grants, cooperative agreements, and contracts, which may be made under this title to the same entities or for the same purposes) to States, units of government, combinations of such units, or private nonprofit organizations, for the purposes set forth in section 601 of this title. Notwithstanding the limitations of this section, the Congress may under the authority of this part specifically appropriate additional funds to meet criminal justice emergency situations beyond the capacity of State and local governments to respond adequately.

"(b) The Administration shall give priority to grants, cooperative agreements or contracts with—

"(1) State and local unit of government criminal justice agencies; and

"(2) national nonprofit organizations providing technical assistance to State and local unit of government criminal justice agencies.

"(c) The Administration may, if the purposes can better be served thereby, award grants, enter into cooperative agreements or contracts with—

"(1) other nonprofit organization with expertise in criminal justice;

"(2) institutions of higher education;

"(3) individuals, partnerships, firms, or corporations; and

"(4) Federal agencies.

"SEC. 603. No grant may be made to a private nonprofit organization pursuant to this part unless an application has been submitted to the Administration in which the organization indicates that it has consulted with appropriate agencies and officials of the State and local units of governments to be affected by the program and project.

"SEC. 604. Federal funding under this part may be up to 100 per centum of the cost of the program. In distributing funds under this part among the States, the Administration shall assure that the needs of all the States are taken into account and the funds are distributed equitably.

"SEC. 605. The Administration may provide financial aid and assistance to programs or projects under this part for a reasonable period of time. Funding for the management and the administration of national nonprofit organizations under section 602(b)(2) and 602(c)(1) of this part is not subject to funding limitations of this part.

"Section 606 is deleted."

PART G—TRAINING AND MANPOWER DEVELOPMENT

SEC. 8. Part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by striking out sections 701, 702, and 703.

PART H—ADMINISTRATIVE PROVISIONS

SEC. 9. Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended as follows:

Section 802(b) is amended by deleting the section and inserting in lieu thereof the following section:

"(b) The Bureau of Justice Assistance shall, after consultation with the National Institute of Justice, the Bureau of Justice Statistics, State and local governments, and the appropriate public and private agencies, establish such rules and regulations as are necessary to assure the continuing evaluation of selected programs or projects conducted pursuant to parts D and F, in order to determine—

"(1) whether such programs or projects have achieved the performance goals stated in the original application, are of proven effectiveness, have a record of proven success, or offer a high probability of improving the criminal justice system;

"(2) whether such programs or projects have contributed or are likely to contribute to the improvement of the criminal justice system and the reduction and prevention of crime;

"(3) their cost in relation to their effectiveness in achieving stated goals;

"(4) their impact on communities and participants; and

"(5) their implication for related programs.

In conducting the evaluations called for by this subsection, the Bureau of Justice Assistance shall, when practicable, compare the effectiveness of programs conducted by similar applicants and different applicants. The Bureau of Justice Assistance shall also require applicants under part D to submit an annual report concerning activities carried out pursuant to part D together with an assessment by the applicant of the effectiveness of those activities in achieving the objectives of section 401 of this title and the relationships of those activities to the needs and objectives specified by the applicant in the application submitted pursuant to section 404 of this title. The Administration shall suspend funding for an approved application under part D if an applicant fails to submit such an annual report.".

Section 809(2) is amended by deleting the words "Administrator of the Law Enforcement Assistance" and substituting in place thereof the words "Administrator of Bureau of Justice Assistance".

Section 816 is amended by deleting the section in its entirety and substituting in place thereof the following section:

"SEC. 816. On or before March 31 of each year the Administrator of the Bureau of Jus-

tice Assistance shall report to the President and to the Committees on the Judiciary of the Senate and House of Representatives on activities pursuant to this title during the preceding fiscal year.".

PART J—FUNDING

SEC. 10. Part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended as follows:

Section 1001 is amended by striking the third sentence and inserting in lieu thereof the following sentence: "There is authorized to be appropriated for parts D, E, F, H, and J, and for the purposes of carrying out the remaining functions of the Bureau of Justice Assistance, other than part L, $75,000,000 for the fiscal year ending September 30, 1982; $125,000,000 for the fiscal year ending September 30, 1983 and $125,000,000 for the fiscal year ending September 30, 1984.".

Section 1002 is deleted.

Section 1003 is deleted.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 11. Title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended as follows:

(1) The words "Bureau of Justice Assistance" are substituted for the words "Law Enforcement Assistance Administration" everywhere they appear in this Act except for sections 1301 (a) and (g).

(2) Section 1301(a) is amended as follows: The words "Bureau of Justice Assistance" are substituted for the second occurrence of the words "Law Enforcement Assistance Administration".

---

By Mr. BOREN (for himself, Mr. STENNIS, Mr. HEFLIN, Mr. FORD, Mr. JOHNSTON, Mr. NICKLES, Mr. HOLLINGS, Mr. SASSER, Mr. BENTSEN, Mr. HELMS, Mr. MATHIAS, Mr. LONG, and Mr. THURMOND):

S. 1654. A bill granting the consent of Congress to the Southern States Energy Compact, and for related pu poses; to the Committee on the Judiciary.

SOUTHERN STATES ENERGY COMPACT

● Mr. BOREN. Mr. President, the purpose of the bill that I am introducing today is not to create a new agency of Government, but to grant the consent of Congress to certain amendments to the charter of an existing interstate compact organization. The Southern Interstate Nuclear Compact was created and entered into by 16 southern States and the Commonwealth of Puerto Rico nearly 2 decades ago. originally, the purpose of the compact was the safe development of nuclear power and the fostering of regional cooperation on nuclear issues. Congress recognized the legitimacy of that purpose and concurred by enacting Public Law 87–563 on July 31, 1962.

During the decade of the 1970's, the purview and scope of activities of the board were enlarged, at the request of the Southern Governors' Association, to include all energy sources and environmental quality. In recognition of this expanded role the southern Governors adopted a resolution in 1978 changing the name of the organization to the Southern States Energy Board and the charter to the Southern States Energy Compact.

The changes contained in the resolution of the Southern Governors' Association are the substance of this bill. These amendments are also supported by the Southern Legislative Conference and have already been enacted by 10 of the party States to the compact. Only congressional concurrence is needed and the amendments become effective.

These amendments make two substantive changes in the compact, in addition to the name change. First, the purview of the board is enlarged from nuclear energy to all energy sources and environmental quality and, second, the number of a member States' representatives is increased to provide for State legislator participation.

For more than 18 years this organization has provided invaluable assistance to the southern region in energy matters. The board and staff provide technical support, research, and information serving to the party States, both the executive and legislative branches and to the general public. It is funded primarily by States revenues and receives no Federal appropriations.

The interest of the Federal Government is protected by a Federal representative to the board, appointed by the President. The Federal representative reports annually to the President and to the Congress on the programs and activities of the board.

The amendments to the compact serve to modernize the role of the organization and enable it to better serve the southern region and the party States. The board is actively assisting the member States in the development of all forms of energy. The importance of that endeavor is apparent to all and I would urge this body to concur in this most worthwhile purpose and consent to this legislation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1654

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That it is hereby declared to be the national policy to encourage and recognize the performance of functions by the States with respect to the development, production, and use of energy. The Federal Government recognizes that many programs in energy fields can benefit from cooperation among the States, as well as between the Federal Government and the States. The importance of the interstate compact as one means for promoting such cooperation is hereby declared as part of the intention of Congress to facilitate the use of State jurisdiction in and over portions of the development and regulatory energy field.

SEC. 2. The Congress hereby consents to the Southern States Energy Compact, which compact is as follows:

"ARTICLE I—POLICY AND PURPOSE

"The party States recognize that the proper employment and conservation of energy, and employment of energy-related facilities, materials, and products, within the context of a responsible regard for the environment, can assist substantially in the industrialization of the South and the development of a balanced economy for the region. They also recognize that optimum benefit from an acquisition of energy resources and facilities require systematic encouragement, guidance, and assistance from the party States on a cooperative basis. It is the policy of the party States to undertake such cooperation on a continuing basis; it is the purpose of this compact to provide the instruments and framework for such a cooperative effort to improve the econmoy of the South and contribute to the individual and community well-being of the people of this region.

"ARTICLE II—THE BOARD

"(a) There is hereby created an agency of the party States to be known as the 'Southern States Energy Board' (hereinafter referred to as the 'Board'). The Board shall be composed of three members from each party State, one of whom shall be appointed or designated to represent the Governor and one to represent each house of the State legislature. Each member shall be designated or appointed in accordance with the law of the State which he represents and serving and subject to removal in accordance with such law. Any member of the Board may provide for the discharge of his duties and the performance of his functions thereon (either for the duration of his membership or for any less period of time) by a deputy or assistant, if the laws of his State make specific provision therefor. The Federal Government may be represented on the Board without vote, if provision is made by Federal law for such representation.

"(b) Each party State shall be entitled to one vote on the Board, to be determined by majority vote of each member or member's representative from the party State present and voting on any question. No action of the Board shall be binding unless taken at a meeting at which a majority of all members representing the party States are present and unless a majority of the total number of votes by States are cast in favor thereof.

"(c) The Board shall have a seal.

"(d) The Board shall elect annually, from among its members, a chairman, a vice chairman, and a treasurer. The Board shall appoint an Executive Director who shall serve at its pleasure and who shall also act as Secretary, and who, together with the treasurer, shall be bonded in such amounts as the Board may require.

"(e) The Executive Director, with approval of the Board, shall appoint and remove or discharge such personnel as may be necessary for the performance of the Board's functions irrespective of the civil service, personnel, or other merit system laws of any of the party States.

"(f) The Board may establish and maintain, independently or in conjunction with any one or more of the party States, a suitable retirement system for its full-time employees. Employees of the Board shall be eligible for social security coverage in respect of old age and survivors' insurance provided that the Board takes such steps as may be necessary pursuant to Federal law to participate in such program of insurance as a governmental agency or unit. The Board may establish and maintain or participate in such additional programs of employee benefits as may be appropriate.

"(g) The Board may borrow, accept, or contract for the services of personnel from any State or the United States or any subdivision or agency thereof, from any interstate agency or from any institution, person, firm, or corporation.

"(h) The Board may accept for any of its purposes and functions under this compact any and all donations and grants of money, equipment, supplies, materials, and services (conditional or otherwise) from any State or the United States or any subdivision or agency thereof, or interstate agency, or from any institution, person, firm, or corporation, and may receive, utilize, and dispose of the same.

"(i) The Board may establish and maintain such facilities as may be necessary for the

transacting of its business. The Board may acquire, hold, and convey real and personal property and any interest therein.

"(j) The Board shall adopt bylaws, rules, and regulations in convenient form and shall also file a copy of any amendment thereto with the appropriate agency or officer in each of the party States.

"(k) The Board annually shall make to the Governor of each party State a report covering the activities of the Board for the preceding year, and embodying such recommendations as may have been adopted by the Board, which report shall be transmitted to the legislature of said State. The Board may issue such additional reports as it may deem desirable.

"ARTICLE III—FINANCES

"(a) The Board shall submit to the executive head or designated officer or officers of each State a budget of its estimated expenditures for such period as may be required by the laws of that jurisdiction for presentation to the legislature thereof.

"(b) Each of the Board's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party States. One-half of the total amount of each budget of estimated expenditures shall be apportioned among the party States in equal shares; one-quarter of each such budget shall be apportioned among the party States in accordance with the ratio of their populations to the total population of the entire group of party States based on the latest official decennial census; and one-quarter of each such budget shall be apportioned among the party States on the basis of the relative average per capita income of the inhabitants in each of the party States based on the latest computations published by the Federal census-taking agency. Subject to appropriation by their respective legislatures, the Board shall be provided with such funds by each of the party States as are necessary to provide the means of establishing and maintaining facilities, a staff or personnel, and such activities as may be necessary to fulfill the powers and duties imposed upon and entrusted to the Board.

"(c) The Board may meet any of its obligations in whole or in part with funds available to it under article II(h) of this compact, provided that the Board takes specific action setting aside such funds prior to the incurring of any obligation to be met in whole or in part in this manner. Except where the Board makes use of funds available to it under article II(h), the Board shall not incur any obligation prior to the allotment of funds by the party jurisdiction adequate to meet the same.

"(d) The Board shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the Board shall be subject to the audit and accounting procedures established under its bylaws. However, all receipts and disbursements of funds handled by the Board shall be audited yearly by a qualified public accountant and the report of the audit shall be included in and become part of the annual report of the Board.

"(e) The accounts of the Board shall be open at any reasonable time for inspection.

"ARTICLE IV—ADVISORY COMMITTEE

"The Board may establish such advisory and technical committees as it may deem necessary, membership on which to include but not to be limited to private citizens, expert and lay personnel, representatives of industry, labor, commerce, agriculture, civic associations, medicine, education, voluntary health agencies, and officials of local, State, and Federal government, and may cooperate with and use the services of any such committees and the organizations which they represent in furthering any of its activities under this compact.

"ARTICLE V—POWERS

"The Board shall have the power to—

"(1) Ascertain and analyze on a continuing basis the position of the South with [illegible] energy, energy-related industries, and environmental concerns.

"(2) Encourage the development, conservation, and responsible use of energy and energy-related facilities, installations, and products as part of a balanced economy and a healthy environment.

"(3) Collect, correlate, and disseminate information relating to [illegible] and energy-related materials and products.

"(4) Conduct, or cooperate in conducting, programs of training for State and local personnel engaged in any aspects of:

"(A) Energy, environment, and application of energy, environmental, and related concerns to industry, medicine, education or the promotion or regulation thereof.

"(B) The formulation or administration of measures designed to promote safety in any matter related to the development, use, or disposal of energy and energy-related materials, products, installations or wastes.

"(5) Organize and conduct, or assist and cooperate in organizing and conducting, demonstrations of energy product, material, or equipment use and disposal and of proper techniques or processes for the application of energy resources to the civilian economy or general welfare.

"(6) Undertake such nonregulatory functions with respect to resources of radiation as may promote the economic development and general welfare of the region.

"(7) Study industrial, health, safety, and other standards, laws, codes, rules, regulations, and administrative practices in or related to energy and environmental fields.

"(8) Recommend such changes in, or amendments or additions to the laws, codes, rules, regulations, administrative procedures, and practices or ordinances of the party States in any of the fields of its interest and competence as in its judgment may be appropriate. Any such recommendation shall be made through the appropriate state agency with due consideration of the desirability of uniformity but shall also give appropriate weight to any special circumstances which may justify variations to meet local conditions.

"(9) Prepare, publish, and distribute (with or without charge) such reports, bulletins, newsletters or other material as it deems appropriate.

"(10) Cooperate with the United States Department of Energy or any agency successor thereto, any other officer or agency of the United States, and any other governmental unit or agency or officer thereof, and with any private persons or agencies in any of the fields of its interests.

"(11) Act as licensee of the United States Government or any party State with respect to the conduct of any research activity requiring such license and operate such research facility or undertake any program pursuant thereto.

"(12)(A) Ascertain from time to time such methods, practices, circumstances, and conditions as may bring about the prevention and control of energy and environmental incidents in the area comprising the party States, to coordinate the environmental and other energy-related incident prevention and control plans and the work relating thereto of the appropriate agencies of the party States and to facilitate the rendering of aid by the party States to each other in coping with energy and environmental incidents.

"(B) The Board may formulate and, in accordance with need from time to time, revise a regional plan or regional plans for coping with energy and environmental incidents within the territory of the party States as a whole or within any subregion or subregions of the geographic area covered by this compact.

"ARTICLE VI—SUPPLEMENTARY AGREEMENTS

"(a) To the extent that the Board has not undertaken any activity or project which would be within its power under the provisions of article V of this compact, any two or more of the party States (acting by their duly constituted administrative officials) may enter into supplementary agreements for the undertaking and continuance of such an activity or project. Any such agreement shall specify its purpose or purposes; its duration and the procedure for termination thereof or withdrawal therefrom; the method of financing and allocating the costs of the activity or project; and such other matters as may be necessary or appropriate. No such supplementary agreement entered into pursuant to this article shall become effective prior to its submission to and approval by the Board. The Board shall give such approval unless it finds that the supplementary agreement or the activity or project contemplated thereby is inconsistent with the provisions of this compact or a program of activity conducted by or participated in by the Board.

"(b) Unless all of the party States participate in a supplementary agreement, any cost or costs thereof shall be borne separately by the States party thereto. However, the Board may administer or otherwise assist in the operation of any supplementary agreement.

"(c) No party to a supplementary agreement entered into pursuant to this article shall be relieved thereby of any obligation or duty assumed by said party State under or pursuant to this compact, except that timely and proper performance of such obligation or duty by means of the supplementary agreement may be offered as performance pursuant to the compact.

"ARTICLE VII—OTHER LAWS AND RELATIONSHIPS

"Nothing in this compact shall be construed to—

"(1) Permit or require any person or other entity to avoid or refuse compliance with any law, rule, regulation, order, or ordinance of a party State or subdivision thereof now or hereafter made, enacted, or in force.

"(2) Limit, diminish, or otherwise impair jurisdiction exercised by the United States Department of Energy, any agency successor thereto, or any other Federal department, agency, or officer pursuant to and in conformity with any valid and operative Act of Congress.

"(3) Alter the relations between and respective internal responsibilities of the government of a party State and its subdivisions.

"(4) Permit or authorize the Board to exercise any regulatory authority or to own or operate any nuclear reactor for the generation of electric energy; nor shall the Board own or operate any facility or installation for industrial or commercial purposes.

"ARTICLE VIII—ELIGIBLE PARTIES, ENTRY INTO FORCE AND WITHDRAWAL

"(a) Any or all of the States of Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia, any State contiguous to any of the foregoing States, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States shall be eligible to become party to this compact.

"(b) As to any eligible party State, this compact shall become effective when its legislature shall have enacted the same into law: *Provided*, That it shall not become initially effective until enacted into law by seven states.

"(c) Any party State may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall become effective until the Governor of the

withdrawing state shall have sent formal notice in writing to the Governor of each other party State informing said governors of the action of the legislature in repealing the compact and declaring an intention to withdraw.

"ARTICLE IX—SEVERABILITY AND CONSTRUCTION

"The provisions of this compact and of any supplementary agreement entered into hereunder shall be severable and if any phrase, clause, sentence, or provision of this compact or such supplementary agreement is declared to be contrary to the constitution of any participating state or of the United States or the applicability thereof to any governmen, agency, person, or circumstance is held invalid, the validity of the remainder of this compact or such supplementary agreement and the applicability thereof to any government, agency, person, or circumstance shall not be affected thereby. If this compact or any supplementary agreement entered into hereunder shall be held contrary to the constitution of any state participating therein, the compact or such supplementary agreement shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters. The provisions of this compact and of any supplementary agreement entered into pursuant hereto shall be liberally construed to effectuate the purposes thereof.".

SEC. 3. Pursuant to article II(a) of the Southern States Energy Compact, there shall be one representative of the Federal Government on the Southern States Energy Board. The representative shall be appointed by the President and he shall report to the President either directly or through such agency or official as the President may specify. He shall be compensated for each day of service rendered in such capacity in an amount fixed by the President not to exceed the daily equivalent of the maximum rate for grade GS-18 of the General Schedule prescribed in section 5332 of title 5, United States Code: *Provided*, That if the representative be an employee of the United States, he shall serve without additional compensation. Board members, including the Federal representatives, serving as such at the time of enactment of this Act, shall continue to serve until their successors may be appointed, in accordance with the law of their respective jurisdictions.

SEC. 4. The Department of Energy, the Nuclear Regulatory Commission, the National Aeronautics and Space Administration, the Environmental Protection Agency, the Federal Energy Management Administration, the Secretary of Health and Human Services, the Secretary of Commerce, the Secretary of Labor, the Secretary of Agriculture, and the heads of other departments and agencies of the Federal Government are authorized, within available appropriations and pursuant to law, to cooperate with the Southern States Energy Board.

SEC. 5. Copies of the annual reports made by the Southern States Energy Board pursuant to article II(k) of the Southern States Energy Compact shall be transmitted to the President and to the appropriate committees of the Senate and the House of Representatives.

SEC. 6. The consent to the Southern States Energy Compact given by this Act shall extend to any and all supplementary agreements entered into pursuant to article VI of such compact: *Provided*, That any such supplementary agreement is only for the exercise of one or more of the powers conferred upon the Southern States Energy Board by article V of such compact.

SEC. 7. The right to alter, amend, or repeal this Act is expressly reserved.

SEC. 8. The right is hereby reserved to the Congress or any of its standing committees to require the disclosure and furnishing of such information or data by the Southern States Energy Board as is deemed appropriate by the Congress or any such committee.

SEC. 9. The Act entitled "An Act granting the consent of Congress to the Southern Interstate Nuclear Compact, and for related purposes", approved July 31, 1962 (76 Stat. 249), as amended, is hereby repealed, effective on the date the Southern States Energy Compact becomes effective.●

---

By Mr. HART:

S. 1655. A bill to amend the Internal Revenue Code of 1954 to reduce the deduction for business meals and to earmark the savings from such reduction for the school lunch programs; to the Committee on Finance.

SCHOOL LUNCH PROGRAMS

● Mr. HART. Mr. President, unfortunately one never has far to look to find inequities in this Nation's commitments to different groups within our society. None is less conscionable, however, than in the allocation of federally subsidized meals. At a time when Congress has just cut $1.5 billion from child nutrition programs, the Federal Government is subsidizing the meals and entertainment costs of America's business men and women to the tune of several billion dollars a year.

Today I am introducing legislation to address this inexcusable inequity by amending the Tax Code to reduce the deduction for business meals and entertainment by 30 percent, and earmark the savings, as estimated by the Secretary of the Treasury, for the school lunch program. This proposal, which will have no impact on the Federal budget, will bring funding for the school lunch program back to the policy base level of last year, $2.8 billion.

Let me emphasize this bill does not eliminate or abolish the business meal deduction. It does not even cut this expensive subsidy in half. It merely reduces from 100 percent to 70 percent the allowable deduction for business meals and entertainment, and thereby allows full funding of the national school lunch program.

Mr. President, this Congress recently cut the school lunch program by about $1 billion. The adverse consequences for 27 million children participating in this program—40 percent of whom are from families whose income is less than $11,000/year—are already being felt throughout the school lunchrooms of this country.

On the average, school lunches are expected to cost parents about a 25 cents more per meal in 1982. One school in Colorado has already raised its prices 60 cents per meal this year. Consequently, children are being priced out of the program at record rates. A preliminary study conducted by the State Child Nutrition Directors Association indicated a 15- to 20-percent drop in participants this year.

Earlier this year, when Congress was shrinking the school lunch program, costcutters argued tighter eligibility requirements and reduced subsidies would reduce benefits for the middle class but not the truly needy. However, a reduced volume raises unit costs for the whole program at each school, forcing some school districts to drop out of the program entirely. In 17 States, 70 schools have already dropped out this year, including two schools in Colorado. At these schools, even the neediest children, who otherwise receive insufficient nutrients in their diets, must now forego a nutritionally balanced school lunch.

A final ominous consequence of Congress cutbacks in the school lunch program is the Department of Agriculture's proposals to permit cutting the size of meals. By the proposed new standards, 1.5 ounces of meat splashed with ketchup—to be counted as a vegetable—10 french fries, a few grapes and a half a cup of milk is decreed an adequate lunch, whether the child is 5 or 11 years old.

Mr. President, these cuts were made in the name of fiscal austerity. Yet, while our children are being asked—or forced—to tighten their belts, America's business men and women continue to have 40, 50 or even 70 percent of the costs of luxury meals subsidized by the U.S. Treasury. Under existing law, business meal and entertainment expenses are fully deductible as ordinary and necessary operating expenses.

The arguments against this subsidy are well known. The Senate has heard them many times. It is expensive, it is inflationary and it is grossly unfair. The Joint Committee on Taxation estimates the Treasury will forgo about $2 billion in fiscal year 1982 and $3.7 billion in fiscal year 1983 from tax deductions taken for business meals and entertainment. If just 30 percent of this business deduction for meals and entertainment were disallowed, the Treasury would collect about $0.5 billion in fiscal year 1982 and about $1.2 billion in extra revenues in fiscal year 1983. That is enough to fully restore the school lunch program to precutback levels.

Mr. President, this bill stands for a simple reassignment of priorities. It says, in effect, that nutritionally balanced meals in our children's lunchrooms should take priority over expense account meals in private clubs and fancy restaurants. I urge the Senate to act on this matter promptly.

I ask unanimous consent that the attached article by Ellen Goodman describing the consequences of cutbacks in the school lunch program, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 15, 1981]

REAGAN'S NOUVELLE CUISINE FOR KIDS

(By Ellen Goodman)

BOSTON.—The luncheon was arranged rather neatly. A discreet hamburger sat on half a roll. Six longish French fries lay beside it. Nine green grapes lolled nearby. To the side stood half a glass of milk.

It sounded to me like some forlorn menu for overweight executives. But it wasn't. It was, rather, a prototype of a school lunch, or what may remain of it, after the budget cuts.

We are about to see the full-fledged Nouvelle Reagan Cuisine for Kiddies. Higher costs and smaller portions. No stars, please.

As you may have heard, dinner with the Reagans in the White House has definitely improved these days. When the Reagans dine with the Anwar Sadats on the federal tab,

they eat smoked filet of mountain trout, a roast supreme of duckling à l'orange, a touch of wild rice with raisins, a bit of Brie and chèvre, followed by the palate-cleansing melon glace and fresh raspberries.

But under Reagan, lunch in the school cafeteria is quite another affair: an ounce-and-a-half of meat or meat alternatives, a half-cup of fruit and vegetables, one serving of bread, six ounces of milk. Yummy in the empty tummy.

FRAC, the Food Research and Action Center, cooked up the lean-and-hungry lunch described above, by carefully following the new proposals that have come out of the Department of Agriculture.

According to FRAC's Nancy Amidei, the Agriculture people were assigned the task of cutting fat from the budget "without impairing the nutritional value of the meals." But they ended up cutting food.

Under the old requirements, more food was served to older grammar-school kids than younger ones. But under the proposed new rules, the 11-year-olds will get the same amount of meat and vegetables as the 5-year-olds. Even the bread and milk are cut, from eight pieces a week to five, from eight ounces a day to six.

The other changes in rules are even more curious. Ketchup and pickles now qualify as vegetables; tofu (try that on your second grader) now qualifies as a meat; and any school can put its eggs in a cake instead of on a plate.

According to Amidei, the lunches would supply less than one-third of the daily nutritional value and only 17 percent of the calories needed. "We feel this is compromising children's health," she says flatly.

The motto of the Nouvelle Reagan Cuisine—"Eat Light and Like It"—would be fine for the statesmen passing up the Brie. But the Department of Agriculture's own study shows that poor kids get anywhere from one-third to one-half of all their daily nutrients from school lunch.

Of the 27 million children who eat school lunches, 12.6 million get a free or reduced rate. If the meal shrinks just when food stamps are being cut and food prices are on the rise, these kids can't make up the difference at home.

There is also a social effect of the Nouvelle Reagan Cusine. Middle-class parents, who pay the full amount for lunch, are going to balk at paying more for a snack. As a 10-year-old visitor to FRAC said when she spied the prototype meal, "Yuk! Where's the rest of it?"

In our house, after the price went up last week, the brown bags came back. But if these proposals are approved, there could be a national two-track lunchroom, with only the poorest students going through a highly stigmatized free-lunch line. The end result of that is higher costs, fewer schools in the system, and a program goes on the skids.

There is the taste of irony sprinkled over all this food talk. The lunch program started back in 1946 because of the military. During World War II, the draft board had to reject an enormous number of men suffering from poor nutrition. When the School Lunch Act was passed in 1946, they wrote: "It is declared to be the policy of Congress as a measure of national security to safeguard the health and well-being of the nation's children."

Today we have another administration that is worried about the Army, worried that an Army of illiterates will end up operating sophisticated multi-billion dollar military equipment. But as Amidei notes, "At this rate we'll have an Army of anemic illiterates."

If the Reagans will pass me a glass of their Domaine Chandon Blanc de Noir, I'll drink to that.●

By Mr. DURENBERGER (for himself, Mr. ROTH, Mr. CHAFEE, Mr. BRADLEY, and Mr. HEINZ):

S. 1656. A bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds, and for other purposes; to the Committee on the Judiciary.

MORTGAGE SUBSIDY BONDS

● Mr. DURENBERGER. Mr. President, we all recognize that this Nation faces a critical shortage of low- and moderate-income housing. The debate surrounding both the all savers certificates and the HUD budget outlined the enormous magnitude of this problem. We need to act promptly and responsibility to resolve it.

Today, I am introducing legislation that would help meet this shortage by making it possible to issue mortgage revenue bonds as intended in the legislation Congress passed last year. Last year's Reconciliation Act legislation was never intended to kill the mortgage revenue bond program which helps provide housing assistance for hundreds of thousands of people nationally. The legislation was meant to better target mortgage revenue bond proceeds and to tighten up the administration of these programs.

This is not a budgetary question. We have always presumed that mortgage revenue bonds would be issued this year in substantial numbers. It is a matter of being able to carry out the intent of last year's legislation, making a good program even better.

The first half of 1981 saw virtually no bonds issued as new regulations were awaited from Treasury. This delay in and of itself was far longer than anticipated. Now, the new regulations are out, and according to housing agencies across the country, they raise virtually insurmountable problems.

My State of Minnesota has always been one of the most sophisticated users of mortgage revenue bonds. Our bonds have always been targed toward low- and moderate-income housing as last year's legislation directed. My State has tried to issue bonds under the new regulations with poor results. The underwriters have had $13 million of bonds due to the manner in which the good faith provision in the new regulation was written. This will mean the loss of 4,000 home improvement loans for low- and moderate-income people trying to maintain the quality of their housing stock.

Without changes in the arbitrage regulations the State of Minnesota will have to forgo issuance of single family mortgage revenue bonds this year. This means 2,500 to 3,000 fewer mortgages in 1981 for those people most serious affected by rising inflation and soaring interest rates.

Mortgage revenue bonds are a workable way of providing housing. Some adjustments were needed to improve the program. The outline of these changes was proposed in last year's legislation, and Treasury was expected to draw up workable regulations. The result has been contrary to the intent of Congress. We now have a virtually unworkable mortgage revenue bond program when a strong program could be filling a large hole in our Nation's housing needs.

In light of the discussion surrounding housing in recent months, I think that we must set free a proven program for helping people obtain shelter.

The five changes I propose are the most basic corrections that are needed to present law and regulations in order to allow the issuance of mortgage revenue bonds. I think other changes could be made, but in order to work as quickly as possible to get this program underway again, I am offering this bare bones legislation.

First, the 95 percent good faith requirement would be made more reasonable. An issue would not lose its tax-exempt status if it fell below 95 percent compliance as long as periodic audits are conducted and any cases of fraud would be prosecuted. This is a much fairer means of insuring the correct use of mortgage revenue bonds without creating a bureaucratic nightmare than in the present regulations.

Second, the issuer would be allowed a 1.25-percent yield to cover the cost of issuing the bonds. This is a realistic figure in light of what is required to be covered within this yield by last year's legislation.

Third, the present regulations have a very restrictive provision concerning the sale of excess reserves which might even force an issuer to sell reserves at a loss. This legislation would not force reserves to be sold at a loss.

Fourth, the registration requirement for mortgage revenue bonds would be removed since no other tax-exempt bonds face this requirement.

Fifth, two technical changes would be made for multifamily bond issues. The income level for the lower income occupancy requirement would be set at 80 percent of area median income and separated from the section 8 definitions. The 20-percent requirement for low- or moderate-income occupancy would be set at the longest of 10 years, one-half the term of the issue, or the term of the subsidy. This prevents the use of short-term bonds and the possibility of a long construction period from reducing the term of the lower income occupancy.●

● Mr. BRADLEY. Mr. President, I am pleased to join my colleague Senator DURENBERGER from Minnesota in introducing legislation to help localities issue mortgage revenue bonds. The marketing of any long-term bonds is currently extremely difficult under the best of circumstances. In addition it is virtually impossible for any middle-income family to privately finance homeownership. Under these conditions Congress has a special responsibility to eliminate those requirements that are now preventing issuance of State mortgage revenue bonds and to facilitate the use of this source of below market mortgages for single- and multi-family housing.

Since enactment of the Mortgage Subsidy Bond Tax Act of 1980 on December 5, 1980 the use of tax-exempt bonds

for providing below market mortgages has halted. The restrictions in the act regarding arbitrage, good faith, and the registration requirement are too severe to be workable in the bond market. By reducing arbitrage from 1½ percent to 1 percent and redefining arbitrage to include costs previously excluded, the 1980 act prevents the structuring of bond sales which can be financially self-supporting.

The requirement that bonds become taxable retroactively from date of issuance if housing finance agencies do not insure that 95 percent of the loans are in compliance is too onerous and creates uncertainty which prevents bond counsel from issuing "clean" opinions. The 1980 act's requirement that mortgage revenue bonds be registered is not only administratively costly but discriminatory since no other tax-exempt bonds are required to be in registered form.

In my State the New Jersey Mortgage Finance Agency has thus far been unable to issue any single family or home improvement bonds. The New Jersey MFA normally raises $200 million annually in the tax-exempt bond market for its programs, which finance home purchases in urban neighborhoods and home improvements for moderate income citizens throughout the State. Funds for the programs have been exhausted for months, and it is still unclear if the MFA will be able to sell a bond issue until the Mortgage Subsidy Bond Tax Act of 1980 is amended.

In June 1981, Senator SASSER introduced S. 1348 which I cosponsored to alleviate the major problems of the Mortgage Subsidy Bond Tax Act. It would have eliminated the registration requirement for such bonds and make several technical changes to section 103A of the Internal Revenue Code, including: First, replace strict 95 percent compliance by applicants with a covenant of good faith by issuers; second, include those persons living in substandard housing with first-time home buyers as the targets for the financing; third, return the arbitrage spread from 1 to 1½ percent for issuers; fourth, allow up to 25 percent of the area of a State to be designated as targetable including energy impacted areas. Congressman DUNCAN introduced H.R. 3614, a companion bill. Unfortunately it appears that this legislation is not likely to be adopted since the Treasury Department will not support extensive changes into the law.

Because of the critical situation of the housing industry we must have effective action immediately. So today I join Senator DURENBERGER in introducing this legislation to eliminate the most severe restrictions on the mortgage revenue bond market. The proposal has no Federal fiscal implications. These technical changes would remove many of the unnecessary regulations and inconsistencies that are stopping the use of these bonds.

I urge my colleagues to join us in progressing rapidly to correct this crisis.●

By Mr. SCHMITT (for himself, Mr. CANNON, Mr. GORTON, Mrs. KASSEBAUM, Mr. LUGAR, and Mr. SYMMS):

S. 1657. A bill entitled the "Uniform Science and Technology Research and Development Utilization Act"; to the Committee on Commerce, Science, and Transportation.

UNIFORM SCIENCE AND TECHNOLOGY RESEARCH AND DEVELOPMENT UTILIZATION ACT

● Mr. SCHMITT. Mr. President, today I am introducing for myself and Senators CANNON, GORTON, KASSEBAUM, LUGAR, and SYMMS, the Uniform Science and Technology Research and Development Utilization Act. The purpose of this legislation is to maximize the return to the public from our national investment in research and technology development by establishing a uniform Federal policy for the management and utilization of inventions developed under Federal contracts.

This bill is a revised version of S. 1215, a bill which I introduced prior to the conclusion of the 96th Congress. The bill has been reviewed by leaders in industry, business, academia, and Government. The responses have been very helpful and supportive. The revised bill which is being introduced today reflects the many thoughtful views and suggestions of those who responded to my request for comments.

Mr. President, recent economic indicators suggest that the United States is experiencing an alarming decline in the rate of technological innovation and economic growth. Symptoms of this decline are reflected in the diminishing growth in productivity, the increasing penetration of domestic markets by our foreign competitors, and the shrinking percentage of world patents being granted to Americans. We are becoming more aware that the scientific and technological advantages which we enjoyed relatively unchallenged for much of this century can no longer be taken for granted.

My Subcommittee on Science, Technology, and Space has had a longstanding interest in technological innovation and Federal policies which adversely impact upon it. For the past 3 years the subcommittee has conducted extensive oversight hearings examining the direction of Federal R. & D. and the Federal Government's role in promoting the development, application, and diffusion of new technologies. The problems are varied and complex, but include overburdensome regulations, counterproductive tax policies, and inadequate funding of basic research. Nevertheless, there are steps which the Federal Government can and should take to reverse the downward trend of the development of new products and processes.

The influence of the Federal Government on the innovation process is extensive. For example, the Federal Government currently supports some $35 billion of research and development through grants and contracts, about half the total national investment in R. & D. This enormous investment has lead directly to such spectacular achievements as the landing of American explorers on the Moon and the new era of utilization of the extraterrestrial environment which was heralded by the successful launch of the Space Shuttle.

Less immediately apparent have been discoveries in electronics which have revolutionized our lives or that of recombinent DNA, the source of new breakthroughs in the treatment of disease and the development of food sources as examples.

The value of much of this research and development is lost unless the discoveries and inventions which result can be commercialized. This result, in turn, can best be achieved if those who perform the R. & D. have the opportunity and the incentive to effect that commercialization.

The present administration is emphasizing incentives for those willing to take the risks of innovation and commercialization, while reducing direct Government participation. As examples, this approach appears in the form of tax credits for investment in R. & D. and reduction in regulatory burdens. A related incentive lies in patent rights to inventions which result from federally funded R. & D.

Unfortunately the policies of Federal agencies vary widely regarding assignment of rights to performers of federally funded R. & D. The Government's policy generally has been to retain title and rights to these inventions. As a result, the Government presently holds title to some 28,000 inventions, of which only about 5 percent have been commercialized.

We think that a better payoff from our national investment in R. & D. is possible and that reform of Federal patent policies is an important ingredient.

On such step was taken in the last Congress with passage of Public Law 96-517, the University of Small Business Patent Procedures Act. That act provides for uniform assignment to universities, small businesses, and nonprofit organizations of title to inventions developed under Federal research and development grants and contracts.

Regulations have been developed by the Office of Federal Procurement Policy and are now out for comment.

However, the majority of Federal funding for research and development goes to larger businesses, which are not covered by Public Law 96-517. We believe that the rights to the title for inventions should be extended to all contractors, regardless of size.

Our draft bill provides for the necessary uniform procedures and assigns responsibility for implementation to the Secretary of Commerce. Specific situations in which the Government would retain title are narrowly drawn to protect the public interest, where necessary. Otherwise the title would be assumed by the contractor. The Government also retains certain "march-in" rights, which can be exercised in the event that the contractor fails to take reasonable and timely steps to develop the invention.

The bill thus provides not only for proprietary rights, but also clear obligations for the recipient.

Mr. President, I ask unanimous consent that the text of my bill, together with a section-by-section analysis, be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 1657

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

TITLE I—POLICY

FINDINGS

SEC. 101. The Congress, recognizing the profound impact of science, engineering, and technology policy on the economic, social, political, and technological well-being, and the health and safety of the Nation as a whole, hereby finds and declares that:

(1) The United States has recently experienced a decline in the process of industrial innovation and productivity which is integrally related to, and adversely impacts upon, domestic productivity, the rate of economic growth, the level of employment, the balance of trade, and the attainment of other national goals.

(2) The national support of scientific and technological research and development is indispensable to sustained growth and economic stability, and it is in the national interest to maximize the benefits to the general public from such investment.

(3) Scientific and technological developments and discoveries resulting from work performed with Government contracts constitute a valuable national resource which should be developed in a manner consistent with the public interest and the equities of the respective parties.

(4) Current Federal policy with respect to the allocation of rights to the results of federally sponsored research and development deters contractor participation in Government contracts, delays technological progress, and stifles the innovative process.

(5) There is a need for the establishment and implementation of a flexible Government-wide policy for the management and utilization of the results of federally funded research and development. This policy should promote the progress of science and the useful arts, encourage the efficient commercial utilization of technological developments and discoveries, guarantee the protection of the public interest, and recognize the equities of the contracting parties.

PURPOSE

SEC. 102. It is the purpose of this Act to—

(1) establish and maintain a uniform Federal policy for the management and use of the results of federally sponsored science and technology research and development; and

(2) insure the effective uniform implementation of the provisions of this Act, and to monitor on a continuing basis the impact of Federal science and technology policies on innovation and technology development.

DEFINITIONS

SEC. 103. As used in this Act the term—

(1) "contract" means any contract, grant, cooperative agreement, commitment, understanding, or other arrangement entered into between any Federal agency and any person where a purpose of the contract is the conduct of experimental, developmental, or research work. Such term includes any assignment, substitution of parties or subcontract of any type entered into or executed for the conduct of experimental, developmental, or research work in connection with the performance of that contract;

(2) "contractor" means any person or other entity that is a party to the contract;

(3) "disclosure" means a written statement sufficiently complete as to technical detail to convey to one skilled in the art to which the invention pertains a clear understanding of the nature, purpose, operation, and, to the extent known, the physical, chemical, or electrical characteristics of the invention;

(4) "Federal agency" means an "executive agency" as defined by section 105 of title 4, United States Code, and the military departments as defined by section 102 of title 4, United States Code;

(5) "Government" means the Government of the United States of America;

(6) "invention" means any invention, discovery, innovation, or improvement which is or may reasonably be patentable subject matter as defined in title 35, United States Code;

(7) "inventor" means any person, other than a contractor, who has made an invention under a contract but who has not agreed to assign his rights in such invention to the contractor;

(8) "made under the contract" or "made under a contract" when used in relation to any invention means the conception or first actual reduction to practice of such invention in the course of any work under the contract or under a contract, respectively;

(9) "nonprofit organization" means universities and other institutions of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code of 1954 (26 U.S.C. 501(a)) or any nonprofit scientific or educational organization qualified under a State nonprofit organization statute;

(10) "person" means any individual partnership, corporation, association, institution, or other entity;

(11) "practical application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system, and, in each case, under such conditions as to establish that the invention is being worked and that its benefits are available to the public either on reasonable terms or through reasonable licensing arrangements;

(12) "Secretary" means the Secretary of Commerce; and

(13) "small business firm" means a small business concern, as defined in section 2 of Public Law 85–536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this Act, size standards for small business concerns involved in Government procurement, contained in section 121.3–8 of title 13, Code of Federal Regulations, and in subcontracting, contained in section 121.3–12 of title 13, Code of Federal Regulations, will be used.

TITLE II—IMPLEMENTATION

RESPONSIBILITIES

SEC. 201. (a) The Secretary shall coordinate, direct, and review the implementation and administration of the Federal policy set forth in this Act with respect to the ownership of inventions resulting from federally sponsored research and development, and promote the efficient and effective utilization of the results of federally sponsored research and development.

(b) With a view to obtaining consistent application of the policies of this Act, the Secretary is authorized and directed—

(1) to consult and advise with Federal agencies concerning the effective implementation and operation of the policies, purposes, and objectives of this Act;

(2) in consultation with the Office of Federal Procurement Policy, to formulate and recommend to the President such proposed rules, regulations, and procedures as are necessary and desirable to assure the consistent application of the provisions of this Act;

(3) to accumulate, analyze, and disseminate data necessary to evaluate the administration and effectiveness of the policies set forth in this Act;

(4) to determine with administrative finality, in an expeditious manner without unnecessary delay, any dispute between a Federal agency and an aggrieved party arising under title III of this Act; and

(5) to perform such other duties as may be prescribed by the President or by statute.

(c) For the purpose of assuring the effective management of Government-owned inventions, the Secretary is authorized to—

(1) assist and coordinate agency efforts to promote the licensing and utilization of Government-owned inventions;

(2) coordinate and advise the Federal agencies in seeking protection and maintaining inventions in foreign countries, including the payment of fees and costs connected therewith;

(3) consult and advise Federal agencies as to areas of science and technology research and development with potential for commercial utilization; and

(4) receive funds from fees, royalties, sales, or other management of Government-owned inventions authorized under this Act: *Provided, however*, That such funds will be used only for the purpose of this Act.

(d) The Secretary shall submit to Congress an annual report of activities pursuant to this Act. Such report shall include (1) relevant statistical data regarding the disposition of invention disclosures resulting from federally funded research and development, including those inventions disclosed by small businesses and nonprofit organizations; (2) any legislative or administrative recommendations to better achieve the policy and purposes of this Act; and (3) an analysis of the impact of Federal policies on the purposes of this Act.

EXPIRATION

SEC. 202. The authorities conferred upon the Secretary under this title shall expire 7 years following the effective date of this Act, unless renewed by action of Congress.

TITLE III—ALLOCATIONS OF RIGHTS—GOVERNMENT CONTRACTORS

RIGHTS OF THE GOVERNMENT

SEC. 301. (a) Each Federal agency shall acquire on behalf of the United States, at the time of entering into a contract, title to any invention made under the contract of a Federal agency if the agency determines that—

(1) the services of the contractor are for the operation of Federal research and development centers, including Government-owned research or production facilities;

(2) following a finding by a Government authority which is authorized by statute or Executive order to conduct foreign intelligence or counterintelligence activities, the restriction or elimination of the right of the contractor to retain title to any subject invention is necessary to protect the security of such activities;

(3) in exceptional circumstances, restriction or elimination of the right of the contractor to retain title to any subject invention will better promote the policy and objectives of this Act; and

(4) the principal purpose of the contract is to develop or improve products, processes, or methods which will be required for use by Goverment regulations: *Provided, however*, That the Federal agency may subsequently waive all or any part of the rights of the United States under this section to such invention in conformity with the provisions of section 303.

(b) The rights of the Government under subsection (a) shall not be exercised by the Federal agency unless it first determines that at least one of the conditions, identified in paragraphs (1) through (4) exist and it files with the Secretary a statement stating such determination.

(c) Each contract entered into by a Federal agency shall include appropriate provisions to—

(1) require periodic written reports at reasonable intervals in the commercial use of other forms of utilization or efforts at obtaining commercial utilization made by the inventor or contractor or their licensees or assignees: *Provided,* That any such report shall be treated by the Federal agency as commercial or financial information obtained from a person and privileged or confidential and not subject to disclosure under the Freedom of Information Act (5 U.S.C. 552); and

(2) reserve to the United States at least an irrevocable, nonexclusive, nontransferable, paid-up license to make, use, and sell the invention throughout the world by or on behalf of the United States and States and domestic municipal governments, unless the agency determines that it would not be in the public interest to acquire the license for the States and domestic municipal governments.

RIGHTS OF THE CONTRACTOR

SEC. 302. (a) Whenever a contractor enters into a contract with a Federal agency other than in those circumstances identified in section 301(a), the contractor or inventor shall have the option of retaining title to any invention made under the contract. Such rights shall be subject to the limitations set forth in section 304 and the provisions of section 305. Such option shall be exercised by notifying the Government at the time of disclosure of the invention or within such time thereafter as may be provided in the contract. The Government shall obtain title to any invention for which this option is not exercised.

(b) When the Government obtains title to an invention under section 301, the contractor shall retain a nonexclusive, royalty-free license which shall be revocable only to the extent necessary for the Government to grant an exclusive license.

WAIVER

SEC. 303. A Federal agency may at any time waive all or any part of the rights of the United States under this title to any invention or class of inventions made or which may be made by any person or class of persons under the contract of the agency if the agency determines that the condition justifying acquisition of title by the Government under section 301 no longer exists or the interests of the United States and the general public will be best served thereby. The agency shall maintain a record, which shall be made public and periodically updated, of determinations made under this section. In making such determinations, the agency shall consider the following objectives:

(1) encouraging the wide availability to the public of the benefits of the experimental, developmental, or research programs in the shortest practicable time;

(2) promoting the commercial utilization of such inventions;

(3) encouraging participation by private persons in the Government-sponsored experimental, developmental, or research programs; and

(4) fostering competition and preventing undue market concentration or the creation or maintenance of other situations inconsistent with the antitrust laws.

MARCH-IN-RIGHTS

SEC. 304. (a) Where a contractor has elected to retain title to an invention under section 302 or 303, the Federal agency shall have the right, pursuant to regulations and subject to the provisions of subsection (b), to grant, or require the contractor to grant, a nonexclusive, partially exclusive, or exclusive license to a responsible applicant or applicants, upon terms reasonable under the circumstances, if the agency determines such action is necessary—

(1) because the contractor has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the invention;

(2) to alleviate serious health or safety needs which are not reasonably satisfied by the contractor, or its licensees;

(3) to meet requirements for public use specified by Federal regulation which are not reasonably satisfied by the contractor or its licensees; or

(4) because the actions of the contractor beyond the exercise of the exclusive rights in the invention have tended substantially to lessen competition or to result in undue market concentration in any section of the United States in any line of commerce to which the technology relates, or to create and maintain other situations inconsistent with the antitrust laws.

(b) The rights of the Federal agency under subsection (a) shall be subject to the prior approval of the Secretary, who shall make a determination after a formal hearing with affected parties present and conducted in accordance with rules, regulations, and procedures adopted by the Secretary.

GENERAL PROVISIONS

SEC. 305. (a) Each contract entered into by a Federal agency shall employ a single patent rights clause containing such terms and conditions as the agency deems appropriate for the protection of the interests of the United States and the general public, including appropriate provisions to—

(1) require the timely disclosure by the contractor or inventor to that agency of any invention made under the contract: *Provided,* That Federal agencies are authorized to withhold from disclosure to the public, information disclosing any invention made under the contract of an agency for a reasonable time in order for a United States or foreign patent application to be filed;

(2) require an election by the contractor within a reasonable time after disclosure as to whether the contractor intends to file a patent application on any invention made under the contract;

(3) require a declaration by the contractor within a reasonable time after disclosure of the contractor's intent to commercialize or otherwise achieve the widespread utilization of the invention by the public.

(4) an obligation on the part of the contractor, in the event a United States patent application is filed by or on its behalf or by any assignee of the contractor, to include within the specification of such application and any patent issuing thereon, a statement specifying that the invention was made with Government support and that the Government has certain rights in the invention; and

(5) allow deviation to the minimum rights acquired under section 301 on a class basis in—

(A) contracts involving cosponsored, cost sharing or joint venture research when the contractor is required to make a substantial contribution of funds, facilities, or equipment to the work performed under the contract;

(B) special contracting situations such as Federal price or purchase supports and Federal loan or loan guarantees; and

(C) no deviation under this subsection shall waive in whole or in part, the minimum rights to be secured for the Federal Government set forth in section 304(a)(4).

(b) When it is determined that the right to require licensing or the right of the Federal agency to license should be exercised pursuant to section 304, the Federal agency may specify terms and conditions, including royalties to be charged, if any, and the duration and field of use of the license, if appropriate. Agency determinations as to the rights to inventions under this title shall be made in an expeditious manner without unnecessary delay.

BACKGROUND RIGHTS

SEC. 306. Nothing contained in this Act shall be construed to deprive the owner of any background patent or to such rights as the owner may have thereunder.

GOVERNMENT LICENSING AUTHORITY

SEC. 307. A Federal agency may grant exclusive or partially exclusive licenses in any invention to which the Government has acquired title if the agency determines that—

(1) the desired practical application has not been achieved, or is not likely to be achieved within a reasonable period of time by the granting of a nonexclusive license;

(2) exclusive or partially exclusive licensing is a reasonable and necessary incentive to call forth the investment of risk capital to bring the invention to practical application; and

(3) the proposed terms and scope of exclusivity are not greater than reasonably necessary to provide the incentive for bringing the invention to practical application.

TITLE IV MISCELLANEOUS

REPEAL OF EXISTING STATUTORY RESEARCH AND DEVELOPMENT AUTHORIZATIONS

SEC. 401. The following Acts are hereby amended as follows:

(1) Section 205(a) of the Act of August 14, 1946 (7 U.S.C. 1624(a); 60 Stat. 1090), is amended by striking out the last sentence thereof.

(2) Section 501(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 951(c); 83 Stat. 742) is amended by striking out the last sentence thereof.

(3) Section 106(c) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1395(c); 80 Stat. 721) is repealed.

(4) Section 12 of the National Science Foundation Act of 1950 (42 U.S.C. 1871(a); 82 Stat. 360) is repealed.

(5) Section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182; 68 Stat. 943) is repealed.

(6) The National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.; 72 Stat. 426) is amended—

(A) by repealing section 305 thereof (42 U.S.C. 2457): *Provided, however,* That subsections (c), (d), and (e) of such section shall continue to be effective with respect to any application for patents in which the written statement referred to in subsection (c) of such section has been filed or requested to be filed by the Commissioner of Patents and Trademarks prior to the effective date of this Act;

(B) by inserting the following new section 305:

"INVENTIONS AND CONTRIBUTIONS BOARD

"SEC. 305. Each proposal for any waiver of patent rights held by the Administrator shall be referred to an Inventions and Contributions Board which shall be established by the Administrator within the Administration. Such Board shall accord to each interested party an opportunity for a hearing, and shall transmit to the Administrator its findings of fact with respect to such proposal and its recommendations for action to be taken with respect thereto.";

(C) by repealing section 306 thereof (42 U.S.C. 2458);

(D) by inserting at the end of section 203 (c) thereof (42 U.S.C. 2473(c)); the following new paragraph:

"(14) to provide effective contractual provisions for reporting of the results of the

activities of the Administration, including full and complete technical reporting of any innovation made in the course of or under any contract of the Administration.".

(E) by inserting at the end of section 203 thereof (42 U.S.C. 2478) the following new subsection:

"(d) For the purpose of chapter 17 of title 35 of the United States Code, the Administration shall be considered a defense agency of the United States."; and

(F) by striking out the following in section 203(c)(3) thereof (42 U.S.C. 2473(c)(3)) "(including patents and rights thereunder).".

(7) Section 6 of the Act of July 7, 1960 (30 U.S.C. 666; 74 Stat. 337), is repealed.

(8) Section 4 of the Helium Act Amendments of 1960 (50 U.S.C. 167b; 74 Stat. 920) is amended by striking out both proviso clauses at the end thereof.

(9) Section 32 of the Arms Control and Disarmament Act (22 U.S.C. 2572; 75 Stat. 634) is repealed.

(10) Subsection (e) of section 302 of the Appalachian Regional Development Act of 1965 (40 U.S.C. App. 302(e); 79 Stat. 5) is repealed.

(11) Section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908; 88 Stat. 1887) is amended by striking all after "hours" the second time it appears therein, and inserting in lieu thereof a period.

(12) Section 5(1) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831d(1); 48 Stat. 61) is amended by striking both proviso clauses at the end thereof.

(13) Section 5(d) of the Consumer Product Safety Act (15 U.S.C. 2054(d); 88 Stat. 1211) is repealed.

(14) Section 3 of the Act of April 5, 1944 (30 U.S.C. 323; 58 Stat. 191), is repealed.

(15) Section 8001 of the Solid Waste Disposal Act (42 U.S.C. 6981; 90 Stat. 2892) is repealed.

(16) Sections 200 through 209 and section 211 of title 35, United States Code, are repealed.

(17) Section 6e (1) and (2) of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3705(e) (1) and (2); 94 Stat. 2313) is repealed.

EFFECTIVE DATE

SEC. 402. This Act shall take effect 6 months after the date of enactment of this Act.

---

SECTION-BY-SECTION ANALYSIS—UNIFORM SCIENCE AND TECHNOLOGY RESEARCH AND UTILIZATION ACT

SECTION 101. FINDINGS

In this section Congress finds and declares that the United States has recently experienced a decline in innovation and productivity; that scientific and technological developments resulting from Government contracts constitute a valuable national resource; that current Federal patent policy deters contractor participation, delays technological progress and stifles innovation; and there is a need for a flexible, government-wide policy for the management and utilization of the results of Federally-funded research and development.

SECTION 102. PURPOSE

This section states that the purpose of this Act is to maintain the effective implementation of a Federal policy for the management and use of the results of Federally-sponsored science and technology research and development.

SECTION 103. DEFINITIONS

This section states several definitions, including "contract" and "practical application".

SECTION 201. RESPONSIBILITIES

Subsection (a) directs the Secretary of Commerce to coordinate, direct and review the implementation of the policy set forth in this Act. For the purpose of assuring uniformity in the administration of this Act, the Secretary is directed to develop proposed regulations, accumulate and analyze relevant data, determine with administrative finality any dispute arising under Title 3 of this Act, and monitor the "march-in" rights of the Government under Section 304. For the purpose of assuring the effective management of Government-owned inventions, the Secretary is directed to assist and coordinate agency efforts to promote the licensing and utilization of Government-owned inventions, including the explicit authority to accept custody of any Federal agency invention, protect U.S. inventions in foreign countries, and receive funds from the management of these inventions. Subsection (d) requires the Secreary to submit an annual report of his activities under this section to Congress. There is no authorization provided for the Secreary to carry out these provisions.

SECTION 202. EXPIRATION

The authorities conferred upon the Secretary under this title shall expire in seven years unless renewed by an Act of Congress.

SECTION 301. RIGHTS OF THE GOVERNMENT

Subsection (a) specifies those situations in which it would be presumed the Government should take title to any invention made under Federal contract. The determination as to the Government's rights would be made at the time of contracting. These Government rights would not be assumed by the agency unless it determines that one of the enumerated criteria exists, and files a determination statement with the Secretary.

SECTION 302. RIGHTS OF THE CONTRACTOR

Subsection (a) states that in all other situations not specified in Section 301, the contractor or inventor shall have the option of retaining title to any invention made under the contract. The Government shall retain title when this option is not exercized by the contractor.

Subsection (b) specifies that when the Government takes title to an invention under this section, the contractor will retain a non-exclusive, royalty-free license.

SECTION 303. WAIVER

To assure flexibility in the implementation of the policies, this section would authorize the Government to waive rights to inventions when deemed to be in the public interest.

SECTION 304. MARCH-IN RIGHTS

This section would authorize the Government to require the contractor to license an invention or assign title to the Government if the contractor fails to take reasonable steps to develop the invention or the Government determines such action is necessary in the public interest.

SECTION 305. GENERAL PROVISIONS

This section authorizes Federal agencies to include Federal research and development contract provisions necessary to protect the public interest, including appropriate provisions, to require the timely disclosure by the contractor of any invention made under a Federal contract, to require the contractor to file a patent application within a reasonable time after disclosure, and to require the contractor to declare his intent to commercialize the invention. Additional provisions allow deviation to the minimum government rights when a contractor makes a substantial contribution of funds or facilities. If the agency determines it necessary to license pursuant to Section 304, the agency may specify the terms and conditions thereby.

SECTION 306. BACKGROUND RIGHTS

This Act shall not be construed to deprive the owner of any background patent.

SECTION 307. GOVERNMENT LICENSING AUTHORITY

In this section the Government is expressly authorized to grant exclusive licenses in any invention to which it has acquired title.

This Act shall take effect six months after the date of enactment of this Act.●

SECTION 401. REPEAL OF EXISTING STATUTORY RESEARCH AND DEVELOPMENT AUTHORIZATIONS

SECTION 402. EFFECTIVE DATE

This section repeals various agency research and development statutes which are inconsistent with the provisions of this Act.

---

By Mr. DODD:

S. 1658. A bill to amend title VII of the Housing and Urban Development Act of 1970 to require a national public investment requirements analysis; to the Committee on Banking, Housing, and Urban Affairs.

REBUILDING OUR NATION'S CITIES

Mr. DODD. Mr. President, economic development remains one of this Nation's highest priorities. We have worked to attract and keep in our communities the businesses and industries that bring jobs, tax revenues, and other businesses. In our zeal to promote and sustain development we take for granted the utility and transportation systems needed to support this growth.

In fact, the bridges, sewers, roads, and waterways that form the infrastructure of every city and town are decaying rapidly. Businesses are moving from cities which can no longer support them; newer communities are unable to build the service base that would attract them. This atrophy threatens more than development plans; it also threatens the future of this Nation. Yet, it persists and extends across regions and economically diverse areas, as the Urban Institute's George Peterson documents in "The Condition of America's Urban Capital Stock."

The scope of rehabilitation and construction needs is staggering. A report published by the Council of State Planning Agencies, appropriately entitled "America in Ruins," estimates that at least one-half and more likely two-thirds of the Nation's communities cannot undertake modernized development until major investments are made in their basic facilities. That report and others provide grim statistics:

One of every four miles in the still-incomplete Interstate Highway System needs replacement and one of every five American bridges needs either major repairs or rebuilding, estimated to cost $33 billion. In my home State, Connecticut, an estimated $1.47 billion is needed during this decade to repair rapidly deteriorating bridges and roads.

Thirty percent of railroad track mileage needs repair.

New York City loses 100 million gallons of water daily through leaks in its deteriorating water system. Nationally, urban areas with populations of more than 50,000 must spend $75 to $100 billion over the next 20 years to maintain their water systems.

Rehabilitation and new construction to maintain existing service levels on nonurban highways will cost more than $700 billion in this decade, far more than all public works expenditures made by all levels of government in the 1970's.

Despite these and other clear signals of the burgeoning need for infrastructure repair and construction, investment in this area is falling precipitously. In the past 15 years, public works expenditures suffered a real decline of 28 percent,

dropping to less than $25 billion in 1979 from $33.7 billion in 1965. On a per capita basis, investment fell 36 percent during the same period to $111 from $174. As a percentage of gross national product, public works investment dropped by more than 53 percent to only 1.7 percent of 1979 GNP from 3.5 percent of 1965 GNP.

As budgets tightened and tax bases shrunk, public works funds were decimated. In the 1960's, capital spending covered 28 percent of State and local government budgets. By the late 1970's, it had been cut almost in half, to an average of only 15 percent. When Federal and State funding cuts hit municipalities and shrinking tax bases reduced capital resources, by necessity, the longer term capital outlays and maintenance expenditures were sacrificed to preserve essential social services.

Revival of public facilities does not, however, rest solely on increased or sustained Federal funding. Financial limitations demand other alternatives: More effective use of limited resources and a concerted effort at long-term planning and development.

That effort is being made in Connecticut, where the public and private sectors are working together to sustain economic development and rebuild the aging infrastructure of many municipalities. Hartford's new and rehabilitated landmarks: The Civic Center Coliseum and Mall, the Constitution Plaza Commerical Center, and the Old State House are clear examples of the gains that can be made. The Connecticut General Assembly this year enacted legislation authorizing the creation of "enterprise zones," offering tax and other incentives to rejuvenate ailing urban centers. An urban jobs program is providing businesses with needed skilled labor. Innovative and creative ideas, not just money, are being used to address critical problems. Much remains to be done in Connecticut and across the country.

We can and should begin immediately to meet the challenge of urban revitalization and national economic recovery. First, existing regional and State planning processes should be expanded to insure a review of the effects of proposed governmental rehabilitation or construction activities on regional economic development. For example, a new highway system may contribute to the deterioration of a sophisticated subway route; or a new waterway system may revive a troubled port and encourage the repair of sagging bridges.

This approach would help newer communities absorb people and expanded business activity and, help older communities retain and attract business through economic incentives. The cost of doing business in a given area is a decisive factor in location decisions. Troubled by problems created by a deteriorating infrastructure, cities are far more expensive locations. It is 20 to 30 percent more expensive to do business in economically distressed older cities than in their nearby suburbs and rural areas, according to Dr. James M. Howell, senior vice president of the First National Bank of Boston.

A review of existing economic development and infrastructure programs and systems should occur simultaneously with a review of the impact of planned development. This second, concurrent effort would be aimed at eliminating the overlap and duplication of these services. The Council of State Planning Agencies calculates there are at least 100 separate Federal agencies, 50 State governments—each with separate agencies and departments—3,042 counties, 35,000 general purpose local governments, 15,000 school districts, 2,000 areawide units of government, more than 200 interstate compacts, and 9 multi-State regional development organizations currently planning and completing public works activities.

The Department of Housing and Urban Development, as the principal Federal agency serving the cities, should take the lead in pursuing that goal, identifying duplication and suggesting possible methods to consolidate funding mechanisms. To support this effort, I am asking the Congressional Research Service of the Library of Congress to begin an investigation of duplication found in existing development programs. I intend to present the results of this investigation to the Senate Committee on Banking, Housing, and Urban Affairs for the committee's information and for use in possible oversight hearings. In analyzing this information, the enormous contributions made by private entities throughout the Nation must be considered to insure the best use of this essential public-private partnership.

Finally, today I am proposing legislation to establish a national public investment requirements analysis, as a first step toward the establishment of a national capital budget. Expansion of existing planning processes to consider the impact of future development and review of existing services to prevent duplication are steps that can be taken now to address existing problems. This annual analysis goes further, providing assistance in the formulation of national public investment policy.

Specifically, the NPIRA would contain four basic elements:

An inventory of public facilities and an assessment of their condition and the quality of service they provide, an inventory which does not exist now;

An estimate of current and projected capital needs and expenditures for up to 10 years;

An estimate of current and projected operation and maintenance needs and expenditures; and

The identification of financing sources for construction, rehabilitation, maintenance and operation activities, including both public and private sources.

It would also include a summary of significant problems and trends facing national public investment, a review of State, local, and private activities affecting public investments, and an evaluation of Federal efforts to satisfy investment needs.

This report would be submitted by the executive branch to the Congress by February 15 of each year, so that the information it contains is available before consideration of the budget begins. This concept could help discipline existing and haphazard capital budgeting processes. For the first time, Congress could accurately determine the condition of aging capital stock and could target funds to areas and projects most in need.

This analysis and the two steps that would precede it, could provide a desperately needed catalyst for economic growth and urban revitalization. It is not only the highways and roads, bridges and waterways, sewers and transit systems of the Nation that are at stake, it is the Nation itself and all its parts. That this country last year had the lowest growth rate in the Western community, with the exception of Great Britain, clearly speaks to the need for immediate action. The productivity and development of the United States depends directly on our efforts to revive the public facilities at the heart of our cities and our national economy.

Mr. President, I ask that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1658

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That part A of title VII of the Housing and Urban Development Act of 1970 is amended by adding at the end thereof the following:

"NATIONAL PUBLIC INVESTMENT REQUIREMENTS ANALYSIS

"SEC. 704. (a) The President shall transmit to the Congress by February 15, 1982, and by February 15 of each year thereafter, a National Public Investment Requirements Analysis which shall contribute to the formulation of public investment policy and in addition shall include—

"(1) an inventory of public facilities and an assessment of their condition and quality of service provided, classified by types of facilities and regional location;

"(2) an estimate of current and projected capital needs and expenditures for up to 10 years, including a breadkdown of capital expenditures between new construction and rehabilitation, and between economic development projects and community service projects, and also an identification of priorities for future investment;

"(3) an estimate of current and projected operation and maintenance needs and expenditures, identified by Federal program, by type of project, and by area;

"(4) identification of sources of financing for construction, rehabilitation, maintenance, and operation activities, including both public and private sources;

"(5) a summary of significant problems and trends facing the United States as a result of public investment needs;

"(6) a review of State, local, and private policies, plans, and programs affecting public investment; and

"(7) an evaluation of the progress and effectiveness of Federal efforts to meet investment needs and to carry out such a policy.

"(b) In addition to the Analysis required by subsection (a), the President may transmit to the Congress supplementary analyses on reports regarding public investment needs and policies and their relation to an urban policy, including such supplementary and revised recommendations as may be appropriate.

"(c) Prior to the submission of the Analysis required by subsection (a) and any sup-

plementary analysis or report, the President shall consult a broad range of appropriate public and private organizations and individuals familiar with the problems of urban areas and with public investment needs, drawing from Federal officials, Governors of States, mayors, county officials, members of State and local legislative bodies, and others qualified to assist in the preparation of such Analysis or supplementary analysis or supplementary analysis or report.".

## ADDITIONAL COSPONSORS

S. 895

At the request of Mr. MATHIAS, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes.

S. 1326

At the request of Mr. SASSER, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 1326, a bill to amend title 38, United States Code, to authorize a service pension of up to $150 per month for veterans of World War I and for certain surviving spouses and dependent children of such veterans.

S. 1348

At the request of Mr. SASSER, the Senator from Nebraska (Mr. EXON), and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1407

At the request of Mr. PRYOR, the Senator from New Jersey (Mr. WILLIAMS), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of S. 1407, a bill to amend title 39, United States Code, by strengthening the investigatory and enforcement powers of the Postal Service by authorizing inspection authority and by providing for civil penalties for violations of orders under section 3005 of such title (pertaining to schemes for obtaining money by false representations or lotteries), and for other purposes.

S. 1648

At the request of Mr. HATFIELD, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 1648, a bill entitled the "Military Spouse Retirement Equity Act."

SENATE JOINT RESOLUTION 59

At the request of Mr. ROBERT C. BYRD, the Senator from California (Mr. CRANSTON), the Senator from Nebraska (Mr. EXON), the Senator from New Mexico (Mr. DOMENICI), and the Senator from Tennessee (Mr. BAKER) were added as cosponsors of Senate Joint Resolution 59, a joint resolution designating the square dance as the national folk dance of the United States.

SENATE JOINT RESOLUTION 67

At the request of Mr. THURMOND, the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of Senate Joint Resolution 67, a joint resolution to establish "National Nurse-Midwifery Week."

SENATE RESOLUTION 175

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Resolution 175, a resolution to congratulate the State of Oklahoma on the celebration of its Diamond Jubilee.

SENATE RESOLUTION 199

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Resolution 199, a resolution to authorize National Productivity Improvement Week.

## SENATE CONCURRENT RESOLUTION 36—CONCURRENT RESOLUTION DESIGNATING "NATION'S CAPITAL SALUTE TO SUGAR RAY LEONARD DAY"

Mr. MATHIAS (for himself and Mr. COHEN) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary.

S. CON RES. 36

Whereas Sugar Ray Leonard became the Olympic boxing champ for his weight class in 1976 while representing the United States;

Whereas Sugar Ray Leonard is today the undisputed World Welterweight Boxing Champion;

Whereas Sugar Ray Leonard showed the world uncommon courage and determination and overcame tremendous odds, including an eye injury, while gaining his title; and

Whereas Sugar Ray Leonard's matchless skill, courage, and fortitude are an inspiration to the youth of our Nation: Now, therefore, be it

*Resolved by the House of Representatives (the Senate concurring)*, That it is the sense of the Congress that September 23, 1981, should be designated and considered as the 'Nation's Capital Salute to Sugar Ray Leonard Day".

## SUGAR RAY LEONARD DAY

Mr. MATHIAS. Mr. President, I am pleased to submit this concurrent resolution honoring Ray Leonard for his attainment of the undisputed world welterweight boxing title. While this is a great achievement, it is made even greater because of the character and courage of Ray Leonard. Ever since he captured the gold medal in the 1976 Olympics in Montreal and the hearts of the people of this Nation, the Nation's Capitol and his home State of Maryland, (Sugar) Ray Leonard has shown a strength of character and a level of courage which is an inspiration to people everywhere. All Marylanders can take pride in Sugar Ray Leonard. I am privileged to submit this concurrent resolution today on behalf of myself and Mr. COHEN honoring Ray Leonard for his accomplishments and symbolizing our appreciation of him.

Mr. President, I ask unanimous consent that an editorial from the Washington Post in praise of Sugar Ray's qualities of heart and mind appear in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 18, 1981]

CHAMPION

Here's to keeping going when you are hurt and the chance of success is but a glimmer. Here's to Sugar Ray Leonard of Palmer Park, who gave the kind of comeback performance in defeating Thomas Hearns that is, in short, the stuff of legends. With only two rounds to go, he had lost most of the fight and his left eye was badly swollen. His opponent seemed capable of jabbing and dancing for two more rounds—not much to do, really—to win the fight by a decision.

Then Sugar Ray Leonard showed something seen only in the truest of champions: in boxing lingo, heart. It was not a raging, desperate, flailing attack he mounted, not some lucky punch that found the mark. No, it was a deep-down determination coupled with intelligence, with style. It was heart. He had come to the brink, but, with a certainty that was awesome, he moved totally into control, leaving Thomas Hearns woozy and overmatched. With defeat in sight, he fought it and his adversary and proved himself the better of both.

In looking back over the fight—and in considering its stunning finish—it seems that Sugar Ray Leonard's greatest opponent in that Las Vegas ring was his own cockiness. In the early going he seemed to think he could psych Thomas Hearns. He put his glove in the challenger's face after the bell sounded ending the first round, as if to say, "Is that all you've got?" In response came a short, pushing punch that almost started the second round right there. So it went for the first five rounds, with the eventual hero seeming complacement, lost in some strategy apparent to no one but himself. In the sixth round he rattled his nemesis, nearly knocking him down. But this display of aggressiveness was short-lived, and for only two rounds. Then he seemed oddly pleased to go back to his earlier diffidence. Defeat seemed close at hand.

The stage thus set, the champion suddenly started to pull laver after layer from his challenger's pretension to be the better man. He was inside with sharp uppercuts and rapid-fire combinations. There was a calm to it, no rush, simply a steady beat getting more powerful, growing louder, finally taking over the fight and every inch of the ring. Thomas Hearns was forced against the ropes, then knocked through them, pinned and battered. Sugar Ray Leonard was a winner again.

So here's to Sugar Ray Leonard and his incomparable inner strength. He showed he could take a punch, could be all but out, and still prevail. It was thrilling. The man really has heart.

## SENATE RESOLUTION 215—RESOLUTION DESIGNATING "NATION'S CAPITAL SALUTE TO SUGAR RAY LEONARD DAY"

Mr. COHEN (for himself and Mr. MATHIAS) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 215

Whereas Sugar Ray Leonard became the Olympic boxing champion for his weight class in 1976 while representing the United States;

Whereas Sugar Ray Leonard is today the undisputed World Welterweight Boxing Champion;

Whereas Sugar Ray Leonard showed the world uncommon courage and determination and overcame tremendous odds, including an eye injury, while gaining his title; and

Whereas Sugar Ray Leonard's matchless skill, courage, and fortitude are an inspiration to the youth of our Nation: Now, therefore, be it

*Resolved*, That it is the sense of the Senate that September 23, 1981, should be designated and considered as the "Nation's Capital Salute to Sugar Ray Leonard Day".

Mr. COHEN. Mr. President, I send a Senate resolution to the desk. It is an honor for me to join Senator CHARLES

MATHIAS in sponsoring this resolution honoring Sugar Ray Leonard in the Nation's Capital.

Last week, Sugar Ray Leonard became the undisputed welterweight boxing champion of the world. During that 14-round contest, he demonstrated that the secret of champions is quite simple. They are born and not made. Technique is important, but raw talent is critical. No amount of training, no amount of road work, no amount of sparring, no amount of time on the heavy or light bags will make a champion out of one who is deficient in the physical and psychological assets demanded in boxing. It is a special talent and spirit that a champion possesses. It is indefinable but unmistakable. We all know it when we see it.

When you step into a boxing ring, if I may paraphrase Dr. George Sheehan, you are under oath. In that ring, you give testimony as to who and what you are. And millions of eyes will know immediately whether that testimony is true or false.

Last week, Sugar Ray Leonard knew what the poet Blake meant when he said that he held infinity in the palm of his hand and eternity for an hour. When he stepped into that boxing ring with Thomas Hearns, he gave testimony, as he had on so many occasions before, as to who he is and what he is capable of. He reached back for the indefinable something that only champions have and demonstrated that whatever is necessary becomes possible, whatever is extraordinary becomes nearly routine.

To the ancient Greeks, honor was the prize of areté. It was the tribute paid to men of ability, those who chose to live nobly for a year rather than pass many years living a quiet, ordinary life. The object of the honorable man was to "take possession of the beautiful."

Sugar Ray Leonard, through his incomparable athletic skill in the ring and his exemplary conduct outside it, has demonstrated that he not only has pursued, but has, indeed, "taken possession of the beautiful."

## AMENDMENTS SUBMITTED FOR PRINTING

### INTERNATIONAL SECURITY ASSISTANCE AND DEVELOPMENT ACT OF 1981

AMENDMENT NO. 557

(Ordered to be printed and to lie on the table.)

Mr. HUMPHREY submitted an amendment intended to be proposed by him to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

AMENDMENTS NOS. 558 THROUGH 560

(Ordered to be printed and to lie on the table.)

Mr. GLENN submitted three amendments intended to be proposed by him to the bill S. 1196, supra.

AMENDMENT NO. 561

(Ordered to be printed and to lie on the table.)

Mr. MITCHELL (for himself, Mr. HATFIELD, Mr. LEVIN, Mr. KENNEDY, Mr. HART, Mr. BAUCUS, Mr. DODD, and Mr. LEAHY) submitted an amendment intended to be proposed by them to the bill S. 1196, supra.

Mr. MITCHELL. Mr. President, I send to the desk an amendment which I ask to be printed in the RECORD. I intend to call this up for consideration at a later point in the deliberation on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

NOMINATION FOR THE POSITION OF ASSISTANT SECRETARY OF STATE FOR HUMAN RIGHTS AND HUMANITARIAN AFFAIRS

SEC. 716. (a) The Congress finds that—

(1) the United States has long been a leading defender of the basic rights of persecuted, oppressed, and endangered people around the world, and should continue in this role; and

(2) effective foreign policy formulation requires that the President and the Secretary of State possess current and accurate information derived from continuous observation and review of all matters pertaining to human rights and humanitarian affairs (including matters relating to refugees, prisoners of war, and members of the United States Armed Forces missing in action).

(b) It is the sense of the Congress that—

(1) a strong commitment to the defense of human rights should continue to be a central feature of American foreign policy; and

(2) the President, not later than 60 days after the date of enactment of this Act, should submit to the Senate the name of a nominee for the position of Assistant Secretary of State for Human Rights and Humanitarian Affairs, as established by section 624 (f) of the Foreign Assistance Act of 1961.

On page 84, line 4, strike out "SEC. 716." and insert in lieu thereof "SEC. 717".

AMENDMENT NO. 562

(Ordered to be printed.)

Mr. LUGAR proposed an amendment to the bill S. 1196, supra.

AMENDMENT NO. 563

(Ordered to be printed.)

Mr. HELMS proposed an amendment to the amendment (No. 562) proposed by Mr. LUGAR to the bill S. 1196, supra.

## NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public that the hearing on the nomination of Harry E. Thomas to be an Assistant Secretary of Energy for International Affairs, previously scheduled for 10 a.m. on Thursday, September 24, has been rescheduled for 9:30 a.m. on that date. The hearing will be held in room 3110 of the Dirksen Senate Office Building.

SUBCOMMITTEE ON GOVERNMENTAL EFFICIENCY AND THE DISTRICT OF COLUMBIA

Mr. MATHIAS. Mr. President, I would like to announce that the Subcommittee on Governmental Efficiency and the District of Columbia of the Governmental Affairs Committee will continue hearings on S. 744, a bill to authorize the District of Columbia to issue and sell general obligation bonds for the purpose of paying certain liabilities of the District. The hearing will be held on Tuesday, September 29 at 10 a.m. in room 357 of the Russell Senate Office Building.

For further informtaion, contact Eileen Mayer of the subcommittee staff at 224-4161.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FINANCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate this afternoon to consider legislative proposals dealing with social security.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be permitted to meet during the session of the Senate at 10 a.m. on Thursday, September 24, to hold nomination hearings on the nomination of Loretta Cornelius to be Deputy Director of the Office of Personnel Management.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### A PLAN FOR RENTAL HOUSING

● Mr. CRANSTON. Mr. President, the New York Times published an article in last Sunday's edition authored by my good friend, the distinguished Senator from Connecticut, CHRISTOPHER DODD, concerning the future of this Nation's housing policy.

As a member of the Banking Committee, Senator DODD is actively exploring creative ways to increase the production of housing at less cost to the Federal Government. He is working with all of us at the committee to develop new financing techniques that will be of benefit to our society in the coming years.

Mr. President, I highly recommend the article to all of my colleagues and ask that it be printed in the RECORD.

The article follows:

[From the New York Times, Sept. 20, 1981]

A PLAN FOR RENTAL HOUSING

(By CHRISTOPHER J. DODD)

In a 1949 law, the goal was set: Provide "a decent home and suitable living environment" for every American family. Thirty-two years later, a housing shortage persists, threatening to reach crisis proportions. Before we resolved the problems of one era, economic and social changes presented new challenges.

The goal first articulated in 1946—as admirable now as it was then—has become an empty promise. It lacks definition.

What is "a decent home and suitable living environment?" It lacks substance. Where are the initiatives that will place it within reach? It remains important for the same reasons it was enacted into law: to contribute "to the development and redevelopment of communities and to the advancement of the growth, wealth and security of the nation."

Yet, as a statement of national policy, it has lost direction. Not only have we failed to focus adequate resources and effective pro-

grams on achievement of this goal, but we have also failed to recognize changing demographics and economics.

For example, there are fewer people in each household: 2.75 in 1980 from 3.3 in 1964, according to the Census Bureau. In the last decade, the rate of increase in the number of households was more than twice that of the population.

Energy prices, inflation-fueled interest rates and building costs have made single-family homes unaffordable to the vast majority of the American public. And the shift of funds from mortgage-granting thrift institutions to other investments has all but destroyed conventional financing sources. The result: An already tight supply of housing is strained by new demand.

The high price of single-family homes has pushed middle-income family into competition with lower-income families for rental housing. A classic supply-demand picture develops, housing prices increase and incentives to improve housing diminish.

The figures reflect the difficulty both income groups face in finding adequate and affordable shelter. Nationwide, rental vacancy rates have plummeted. For the first quarter of 1981, the national vacancy rate rested barely above 5 percent. In each region, the figures are dangerously low: 1 percent in Los Angeles, 2 percent in Chicago, below 3 percent in New York City and below 3 percent in Hartford.

We have seemed to ignore housing's integral role in the community and the economy. Numerical goals have been set for new housing construction or rehabilitation, with scant attention given to environment or residents. Statistics hide the squalid conditions that can result from "warehousing" the poor or planning in a sociological vacuum. "A decent home and suitable living environment" must be redefined in terms that reach beyond the walls of any given household and it must be supported by policies that recognize its role in economic and community development.

The Reagan Administration has offered a worn rope to those drowning in the current housing dilemma. Seventeen percent of all budget cuts—the largest share—came from assisted housing. Only 154,000 new housing units are included in the proposed budget. In Connecticut alone, 173,000 households either cannot afford adequate housing or are living in substandard housing. Eligibility standards for Federal assistance have been dropped, and the tenant's contribution to housing has been increased from 25 to 30 percent.

Cutting housing out of the Federal pie will not abate the trends that signal "crisis." Section 8, the primary Federal vehicle for new housing construction or substantial rehabilitation, has been reduced substantially. An increasing proportion of remaining funds has been earmarked for income subsidies used with existing housing. Prohibitively expensive, the Section 8 program is dying. Perhaps rightfully so, but before we applaud its demise, alternatives must be considered.

In fashioning a balanced housing policy, the Government has a dual responsibility: to help increase supply where needed, and to ensure that adequate housing is within the means of lower- and moderate-income people. Through a single subsidy mechanism, Section 8 provides assistance for rent payments and for new construction or substantial rehabilitation. The long-term commitments inherent in this approach carry price-tags conservatively estimated at $150,000 over the life of each apartment.

A more cost-effective approach would split the issues of development and income assistance, retaining and increasing less costly income subsidies but shifting development assistance. Second-mortgage loans for rental housing construction or rehabilitation could provide this new mechanism. By reducing financing costs, these up-front loans to private developers through state and local governments could promote construction of moderately priced apartments.

A return to the provision of tax write-offs for construction period interest and tax costs on rental housing, when these costs are incurred, could provide another outlet to relieve supply problems. These write-offs were permitted before 1976 and provided an incentive for investments in housing construction. Since their prohibition, construction of unsubsidized apartments has dropped 75 percent.

Existing housing problems will not be solved overnight. The goal of "a decent home and suitable living environment" remains to be redefined and met. It demands action.

A lethargic response to current problems ensures their continuation. A response that measures existing and future needs against limited resources would produce the policy direction that would prevent that goal from constantly moving beyond reach.●

## PEACE CORPS 20TH ANNIVERSARY

● Mr. HATFIELD. Mr. President, yesterday was the 20th anniversary of the signing of the Peace Corps Act by President John Kennedy. Over the past 20 years over 80,000 volunteers have been involved in creating bonds of peace in over 90 Third World countries. It is estimated that Peace Corps volunteers have had contact with almost one million people in those nations.

The concept of the Peace Corps was born in a late night speech during the 1960 Presidential campaign as John F. Kennedy was addressing a crowd of students at the University of Michigan in Ann Arbor, Mich. In an extemporaneous speech Kennedy challenged his audience by asking them a series of questions.

How many of you are willing to spend 10 years in Africa or Latin America or Asia working for the U.S. and working for freedom?

How many of you who are going to be doctors are willing to spend your days in Ghana; technicians and engineers, how many of you are willing to work in foreign service and spend your lives traveling around the world?

The crowd's response to each question was enthusiastic and one week before the 1960 election he pledged to create a Peace Corps, if elected.

The rest is history as Kennedy went on to win the election and, on January 21, 1961, he appointed Sargent Shriver to head a task force to study the feasibility of creating a Peace Corps. On March 1, 1961, President Kennedy signed an Executive order formally creating the Peace Corps, and on September 12, 1961, Tom Livingston of Woodale, Ill., became the first Peace Corps volunteer when he took up his post as an English teacher in Dodowa, Ghana.

Legislation officially creating the Peace Corps was signed by President Kennedy on September 22, 1961 with the following three goals:

First, to help the people of interested countries and areas in meeting their needs for trained manpower; second, to help promote a better understanding of Americans on the part of the peoples served; and third, to help promote a better understanding of other peoples on the part of Americans.

The Peace Corps has been tremendously successful in fulfilling those goals, as evidenced by the vast numbers of people reached and the overwhelmingly positive response of nations served by Peace Corps volunteers. The U.S. Senate has the proud distinction of having two of its members serving in the Peace Corps: PAUL TSONGAS and CHRISTOPHER DODD. I am sure that their experiences with the Peace Corps have been very influential in their lives and, as a result, our lives have been benefited by their experiences.

I believe that there is still a role for the Peace Corps to play in the effort to reduce poverty, ignorance and underdevelopment worldwide. There is a great need in this day of increasing world tension to have Americans at the grassroots in many nations who are viewed as expatriates, but as friends who have shared food, obeyed their laws, spoken their languages, and worked in their fields.

This component of the Nation's foreign policy is invaluable both in spreading American goodwill throughout the Third World, but also in assisting our Nation to understand and be more sensitive to the needs of those nations being served.

In closing, regardless of our policy differences on the Peace Corps in the Senate, I believe that the Peace Corps can make a valuable contribution to the Nation's foreign assistance goals in the future and should be preserved.●

## TWENTY YEARS OF THE PEACE CORPS

● Mr. MATHIAS. Mr. President, I congratulate the Peace Corps on 20 years of achievement. American volunteers began serving abroad in late 1961. The first volunteer was sent to teach English in Ghana.

Education remains one of the primary contributions of the Peace Corps program, but the education works both ways. American experience and understanding have been enriched by what Peace Corps volunteers have learned abroad.

Men and women who volunteer to serve in the Peace Corps today can do so with the knowledge that their service is welcomed as much by the people of developing countries now as in 1961, and with confidence that, as volunteers, they will gain as much in insight as they give in assistance.

The Peace Corps was an American invention which, like many American inventions, is now emulated by similar programs supported by other developed nations. The tangible contributions of direct person-to-person help through the Peace Corps and similar programs may seem small, if one looks only at the number of bricks mortared or lengths of waterpipe laid, but the returns in goodwill among the people of poor nations and in hope for long term development are enormous.

The Peace Corps is 20 years old, but it is really ageless. The Peace Corps is constantly renewed by the enthusiasm and goodwill of volunteers of all ages who seek to help other people improve their living conditions. The Peace Corps is reborn every time another American vol-

unteer accepts the challenge of service abroad.●

## SENATOR MATHIAS WRITES ON UNITED STATES-SOVIET RELATIONS

● Mr. CRANSTON. Mr. President, earlier this month my distinguished colleague and good friend from Maryland, Senator MATHIAS, and I devoted 2 weeks to discussions in Moscow and Bonn with senior Soviet and West German officials.

As a result of these discussions, Senator MATHIAS has written a thoughtful and illuminating piece on the future course of United States-Soviet relations. This piece was run in the September 21 issue of the New York Times; I submit it for the RECORD today and I highly commend it for my colleagues' attention.

The text follows:

GROMYKO AND HAIG

(By CHARLES MCC. MATHIAS, JR.)

WASHINGTON.—Secretary of State Alexander M. Haig, Jr. and Foreign Minister Andrei A. Gromyko are to meet soon at the United Nations in an encounter that could be of vast significance for the world.

Earlier this month, I went to Moscow with Senator Alan Cranston of California for a "reconnaissance" of the state of American-Soviet relations. We met with some 50 senior and mid-level officials, including Mr. Gromyko and the chief of staff of the armed forces, Marshal Nikolai V. Ogarkov.

The barriers to personal and political communication between American and Soviet citizens are so great that the visitor to Moscow faces enormous difficulty in weighing evidence and drawing conclusions. What the Russians choose to stress may in fact be unimportant to them except as a debating ploy to introduce some subsequent point of substance.

It is interesting, therefore, that our hosts spent relatively little time on the "China threat" and the neutron weapon—subjects that currently are focal points of Soviet propaganda. Instead, they chose to focus their attention on the North Atlantic Treaty Organizations' decision to deploy the Pershing 2 and cruise missiles in Europe and on America's failure to ratify SALT II. These issues were variations on a larger theme: the absolute need to restore dialogue and negotiation.

The Russians refused to accept the connection made in the West—one that we pressed repeatedly—between the possibility of constructive agreement and their conduct in Afghanistan, violation of the Helsinki accords, and their other contributions to global tension. Rather than responding constructively, they preferred to retreat into excuses about the "aggressive" intentions of President Carter and President Reagan.

It is possible that they actually believe that we are largely to blame for the sorry state of our relationship. They certainly are vociferous on the sub'ect of "outside" interference in Afghanistan. If they hold such a belief, is a graphic measure of the gulf in perception of facts between our two countries?

However, there is another element that should not be ignored. The Soviet leadership has an average age well into the 70's and, we were told, makes major decisions only with the greatest difficulty. Perhaps this condition more than any other has kept the Russians out of Poland; perhaps it also has contributed to the Kremlin's unyielding position on Afghanistan. Or, the leaders may actually see relatively few costs in staying in Afghanistan and few benefits in getting out.

One does sense in Moscow a concern with an accumulation of political and economic difficulties that have been exacerbated by a tough, largely mystifying, new Administration in Washington. The "tough" Reagan message has been received. What they don't know are the limits of this toughness. Thus, the Russians are taking the measure of the Administration. They recognize that we are sending mixed signals (higher defense spending, but a lifting of the grain embargo). For the first time, they are uncertain whether they can do even limited business wth Washington, and are slightly off balance. After reflection, it may occur to them that they need to take some positive steps of their own to improve the situation.

The Soviet leaders are in a holding pattern. It is comfortable for them because they can score points against us on such issues as the nonratification of SALT II. But it is also uncomfortable because they recognize that things can get worse—much worse. They are, I believe, genuinely concerned that tensions may escalate.

Should we hold out much immediate hope for success in negotiations on arms control, Afghanistan, and other issues critical to the relationship? I think not. The Soviet regime will find it very difficult to make hard decisions. It demonstrates little interest in compromise.

Should we, therefore, not negotiate? That would be a mistake. We would run two major risks in refusing. First, we would risk locking the Soviet leadership into a position of "permanent" hostility that could encourage rather than discourage the aggressive tendencies we are trying to curtail. It is too easy for them to blame their problems on "foreign enemies." Second, we would feed the propaganda effort in Europe that is painting us, with some success, as the enemy of dialog, at the expense of our allies in NATO.

It is time that we developed realistic, substantive positions on the major issues and put them forward with suitable advocacy and allied support in a variety of public forums. The Russians need to be confronted with decisions. In time, perhaps, they might respond constructively on some issues. But we should be under no illusions that these decisions would come quickly. It is, however, in our mutual interest to reduce the huge gap in perceptions between our two countries. The Haig-Gromyko meeting can be a useful step in this process.●

## CARL ROWAN'S AND WILLIAM BUCKLEY'S ARTICLES ON AWACS

● Mr. TOWER. Mr. President, the Reagan administration's proposal to sell airborne warning and control system (AWACS) aircraft and F–15 enhancement equipment to Saudi Arabia is generating intense interest in the marketplace of ideas which the media provides to the American public. Just yesterday, Evans and Novak wrote a column outlining the grave strategic consequences for the United States of congressional disapproval of the sales.

In today's Washington Post, columnists Carl T. Rowan and William F. Buckley, Jr., usually on opposite poles within this marketplace, argue that the sale is in the vital interests of both the United States and Israel, and hence should receive congressional blessing. I recommend to my colleagues these articles, both of which I found to be tightly reasoned and persuasive.

Mr. President, I ask that the text of both Carl Rowan's and William Buckley's articles be printed in the RECORD.

The articles follow:

THE AWACS SALE IS VITAL TO US . . .

(By Carl T. Rowan)

We are in for a time of nastiness as the debate intensifies over the proposed sale of five AWACS radar surveillance planes and other military equipment to Saudi Arabia. Already we hear charges that the United States is jeopardizing Israel just to get back 8.5 billion petrodollars and that senators opposing the sale are groveling for campaign donations from Jews.

When we sweep some of the emotion aside, a few points seem remarkably clear. The first is that for more than three decades the United States has honored its commitment to Israel, even at great financial and political cost.

In 1973, when Israel was in military peril, the United States launched an airlift that helped Israel to turn her war fortunes around—and the United States warned the Soviet Union that Israel would survive as long as the United States survives.

There is nothing about the proposed AWACS sale that suggests the United States is either abandoning or diminishing its commitment to Israel, so it seems to me that the Begin administration and its U.S. supporters are being shortsighted when they push Americans into strife over the AWACS.

Neither this sale nor 100 like it would make Saudi Arabia a credible threat to Israel's security. Beyond that, the United States has made it clear it intends to keep Israel stronger than all her potential foes combined. Thus, I cannot swallow suggestions that this deal will leave Israel naked to her enemies.

On the other hand, there are myriad threats to Saudi Arabia. The Soviet Union, some other Arabs, Moslem fanatics and several other nations and groups would love to oust the Saudi royal family, or take other actions to gain control of the Saudi oil fields. Perhaps never in history has a nation had so much to defend and so little with which to defend it.

Whatever threatens Saudi Arabia also threatens the lifeblood of the industrial West, a point so obvious that the Israelis ought to be saying, "We understand why you must deal with Saudi Arabia on the basis of the same kind of respect you show us."

Instead, the Begin government is spreading a warning around this town that the United States errs in arming a "corrupt, anachronistic" regime in Riyadh and that the Saudi royal family will go the way of the Shah of Iran before the end of this century.

Even though the alarmists can suggest no feasible alternative to the royal family, some members of the Senate are so gullible as to fasten on the above argument, ignoring the Saudi contribution to the United States' security, and thus indirectly to Israel's.

America's current economic woes are modest compared with what they might be if Saudi Arabia had not worked so diligently to halt the spiral of petroleum prices. Prices have even come down a bit recently because of a worldwide glut created mostly because the Saudis pumped more oil than was good for them.

Some opponents of the sale argue that we dare not entrust sophisticated weapons to the Saudis because the Russians will quickly get our secrets. This is a galling argument, given the fact that Great Britain has produced some celebrated traitors, West Germany has had Communist spies right in the office of the chancellor, and other allies such as Italy and France have huge Communist parties; Communists are in the French Cabinet. When we entrust weapons and secrets to these countries, how do we say to the Saudis (who don't even have diplomatic relations with the Soviets): "We can't trust you the way we do our other friends"?

If Congress blocks the AWACS sale, the long-run cost will be great for the United States and for Israel. It is easy for Israel to

say to the United States: "If you are our friend, you cannot be Saudi Arabia's friend." But what does Israel do if the United States is crippled and must struggle on one economic leg?

The AWACS sale must go forward.

---

. . . AND THUS TO ISRAEL AS WELL

(By William F. Buckley Jr.)

I see, in the AWACS for Saudi Arabia, a long and tangled shadow of symbolism, and that is a pity.

Because, upon reflection—and this is written by someone whose criticisms of Saudi Arabia are on the record—Congress should authorize the sale.

Here are the salient considerations:

(1) Do we desire that Saudi Arabia should have the information it would get by use of the AWACS?

(2) Is the security of Israel threatened by the AWACS?

(3) Is the prestige of the United States government jeopardized by a refusal to sell the AWACS?

If the answers to the above are Yes, No and Yes—then we should go through with the proposed deal.

In geopolitical terms, Saudi Arabia is important as the principal source of Western oil reserves. These reserves need to be protected as obviously as we need to protect the economic life of our allies. As things now stand, the Saudis would receive two to four minutes' warning from the land-based Saudi radar installations in the event the Soviet Union decided to cripple Saudi oil facilities, which are congested in a small area of the kingdom. With AWACS on duty, this critical interval rises to 15 minutes, during which Saudi planes—and those of its allies—can be launched to provide cover for the fields.

Now if that were the whole of the problem, presumably the Congress would vote overwhelmingly for the sale. But critics argue the offensive capability of these AWACS in respect to Israel.

More mystery, it would seem, attaches to the AWACS in question than is reasonable. They are in one sense formidable intelligence-gatherers, but there is a definite limit to what they can accomplish. They are, after all, Boeing 707s. Their radars were designed sometime in the early '60s. What is of course special is the software, and some critics claim that if the airplanes fell into enemy hands—if Saudi Arabia were to go, say, the way of Iran—the loss would be irreparable. Wrong. The software is designed around codes that could be reciphered overnight.

You see—and here the sales talk is best said in a whisper—the Saudi AWACS have to do not only with the security of the Saudi oil fields, but with our comprehensive presence in the area.

The AWACS are viewed primarily as an instrument for the preservation of the Saudis' treasures, but also as an adjunct of our own intelligence. If the Soviet Union elected to pounce on Saudi Arabia, it would not be the Saudis alone who could deter it. Our presence would be indispensable. But a technical and military cooperation between the United States and the Saudis must be exactly that, a cooperation that preempts the Saudis' alternative. Which is quite simply, to turn to the Soviet Union.

Mr. Begin cannot seriously believe that the United States is going to risk the security of Israel. He is playing symbolic stakes. And so are a number of congressmen and senators. Begin wants to prove to his people that for any deal in the Middle East involving another power, he is in a position to veto. The congressmen wish to register that no conceivable opponents running for public office can outdo the incumbents in servility to Begin.

It is not right. The haunting part of it is that it isn't right for Israel, either. Because the strength of the American presence in the area is the principal source of Israeli security. Mr. Eugene Rostow, than whom no stauncher friend of Israel was ever bred, is (thankfully) in charge of arms control programs for the Reagan administration. His wholehearted backing of the AWACS deal deserves considerable respect.

Sen. Bob Packwood, who is heading the opposition, wears another hat: he is in charge of the Republican Senate Reelection Committee. Gentlemen, please behave.

---

## SAUDI MINISTER OF COMMERCE'S ARTICLE ON AWACS

● Mr. TOWER. Mr. President, in the debate over the Reagan administration's proposal to sell airborne warning and control system (AWACS) aircraft and F–15 enhancement equipment to Saudi Arabia, the Saudi viewpoint has been much discussed, but little understood.

In an article that appeared in the Washington Post of September 21, 1981, Soliman A. Solaim, the Minister of Commerce of Saudi Arabia has described the Saudi perception of these sales and what they mean for future United States-Saudi Arabian relations. I recommend this article to my colleagues and ask that they consider its argument as they assess the merits of this important foreign policy initiative.

Mr. President, I ask that the text of Minister Solaim's article be printed in the RECORD.

The article follows:

A SAUDI VIEWPOINT ON AWACS

(By Soliman A. Solaim)

Commerce and commercial concerns are my areas of expertise; my knowledge of the technological complexities of radar planes and military equipment is no greater than any well-read American's. From a purely commercial point of view, there are those who argue that Saudi Arabia would get more for her investment if she bought British Nimrods. Our political and military leadership, however, decided that the AWACS system would be best suited to providing us with essential advance warning we need to guarantee that our planes can respond quickly and accurately to enemy attacks on our strategic installations, particularly the oil complex in the Eastern Province.

Now, however, what had been a straightforward assessment of Saudi Arabia's military needs by our leaders, with the advice of their American counterparts, has become an unfortunate controversy that focuses not on American national and security interests, nor on Saudi Arabian national or security interests. Instead, the focus is on the speculative vulnerability of Israel as a result of this sale.

As one who had the fortunate experience of working as the first coordinator of the Saudi Arabian-U.S. Joint Economic Commission in 1974, and in my many years in the United States as a student and visitor, I find that this focus does little justice to the wisdom of American leadership.

Having faced a similar controversy in 1978 when we bought the F–15s, we expected controversy over this deal as well. But we did not expect the intensity of debate that has surrounded the AWACS sale. The issue will be decided one way or another by October 30, and most probably the sale will be approved—after the usual consolation prize for Israel. But when all is said and done, everybody will feel just the way the late Vince Lombardi described his feelings after a Redskins tie: like kissing your sister.

It is the focus of this present controversy, as well as its existence, that will be remembered long after the planes are paid for and delivered. One has to keep in mind that there is much more involved in the controversy than the relative technological sophistication of the Boeing 707s with their electronic gadgetry that belongs to the '60s.

The issues at stake here are our bilateral relationship with the United States, America's strategic posture in the Middle East, and the grip of the Israeli lobby on America's ability to act in its own interest.

When we Saudis reflect on the developing debate over the AWACS, we cannot fail to see the contrast between the way the United States treats Israel and the way we are treated. Nor can we help seeing the irony in the eagerness to provide Israel with whatever she demands—often at the expense of American taxpayers—while getting approval of Saudi Arabia's requests, completely paid for by our government, is like pulling teeth.

The AWACS are being opposed on the basis of an imagined threat to Israel. Yet when Mr. Begin actually violates the air space of others, bombing Beirut and Baghdad, and violates his country's agreement with the United States on the use of American weapons, all he gets is a slap on the wrist. So much for the long-promised evenhanded policy in the Middle East.

When we look at this inequity, we cannot fail to compare the complexities involved in dealing with the United States and the ease with which we can deal with European powers on matters political and military. When the French president visits us by the end of this month, and when our crown prince visits Britain, we will not be looking for soft shoulders to cry on. Most probably, impetus will be given to an already existing trend toward diversification of our relations with the big powers.

This process was started in the mid-70s as a result of such restrictive American legislation as the nit-boycott law, the anti-trust laws and the tax laws relating to Americans working abroad—and was helped by Japanese and European salesmanship and receptiveness to our requests. What is needed is a careful watch on this "everyday" aspect of our relationship, not a constant monitoring of our political leaders for a sudden and "radical" reaction in case the AWACS sale doesn't go through.

The present state of affairs in our bilateral relationship is complicated by, first, the failure to gain a tangible movement toward resolving the Palestinian situation and, second, by what increasingly appears to be an invincible Israeli lobby in this country.

We have seen a great number of U.S. senators and congressmen express their opposition to the AWACS sale even before the administration has presented its case. This does not merely reflect the power of the Israeli lobby (a power that is being brought into the open—a healthy development for both the American political system and Arab-American relations). It also shows that we Saudis are being taken for granted by those who have their eyes on their own political gains, with little regard for what we perceive as the larger interests of the United States and its friends in the area.

So the question becomes: will Saudi Arabia, as a result of the AWACS controversy, continue to be blamed whenever she receives a promise from an American administration; does she need to get such a promise cleared first with Mr. Begin, or whoever is Israel's current leader, in order to guarantee a fair hearing?

Saudi Arabia has proven her friendship with the United States in different areas and at the most critical of times: we are producing far more oil than necessary to finance our development; we have conducted our investments in a most responsible manner and continue to support the American dollar; we have helped reorient certain regimes

in the area toward a pro-Western posture; and we counseled caution and moderation to our neighbours, including the Palestinians.

Those of us who have come to value this friendship are watching the current debate with serious concern. Whether or not the AWACS sale is approved, we will have to provide answers to the pointed questions and raised eyebrows about our American connection. After 50 years of constructive partnership with the United States, we Saudis find ourselves today at a loss to answer.●

## UNITED STATES-CANADIAN RELATIONS

● Mr. EAST. Mr. President, the Dallas Morning News has recently examined United States-Canadian relations in an intriguing editorial. This editorial, in my opinion, suggests the best possible response that our Government could make to the discriminatory economic policies that Premier Trudeau has imposed upon American businessmen. I ask that the complete text of this editorial be reprinted in the RECORD.

The editorial follows:

U.S. OIL'S BAD NEIGHBORS TO THE NORTH

Pierre Trudeau's Canada, not to put too fine a point on it, is trying to run American energy companies out of the country, and something should be done about it.

Something will be done.

Trudeau's xenophobic policies violate not only good economics but the spirit and perhaps the letter of our tax treaty with his country.

Foreign-controlled oil companies are being unfairly taxed—so that foreigners will unload these firms on Canadians, as in fact is being done. Further, Trudeau is pushing legislation to restrict foreign access to Canadian lease.

As Interior Secretary Watt told a House subcommittee the other day, "There is no disagreement that we must make a case of Canada. The argument is over which is the best policy tool to use."

Yet for his unwillingness to play a tit-for-tat game—i.e., to restrict the access of Canadian firms to American leases—Watt was belabored by congressmen such as John Dingell of Michigan.

Dingell, who used to spend all his time castigating American oil companies, suddenly has reversed his field. Now he's concerned that American oil companies are being picked on.

So are we.

But picking on Canadian oil companies is hardly the answer.

The truth is that Trudeau's chauvinistic energy policies—evict the foreigners and raise oil company taxes—have resulted in an outflow of Canadian capital and expertise to the U.S. in search of better opportunities.

The Canadians are welcome here.

The job of developing American oil and gas reserves is a titanic one; the more hands, the better.

Why retard the job by closing off leases to those ready and eager to drill them?

Other US options, Watt said in his testimony, include delaying approval of the Alaska natural gas pipeline and imposing tariffs on Canadian goods. Tariffs could provoke a trade war that no one needs, and putting off building the pipeline savors of cutting off our nose to spite our face.

More reasonably the White House could take note of the large Canadian government borrowings in the American bond market, which, by fueling demand, help keep interest rates high.

We could impose a tax of 15 percent, or more, on borrowings by the governmental units of a nation that discriminates in its tax policies against Americans.

This wouldn't hurt innocent bystanders; it would hurt the Canadian government, which depends on American borrowings to prop up its inflation-riddled dollar, currently at a 50-year-low against the U.S. dollar.

Trudeau is a socialist and the poorest neighbor America has ever had to the north. Let him, not his put-upon countrymen, suffer for all the mischief he has caused.●

## RAOUL WALLENBERG

● Mr. SARBANES. Mr. President, in giving overwhelming approval yesterday to Senate Joint Resolution 65, the House of Representatives confirmed action taken on August 3 by the Senate to grant honorary U.S. citizenship to Raoul Wallenberg, the Secretary of the Swedish Legation in Hungary in the last years of World War II who, through his own efforts—efforts that were at once courageous, heroic, and ingenious—personally saved an estimated 100,000 Jews from extermination.

A decision to confer honorary citizenship is a most serious matter. Mr. Wallenberg is the only person other than Winston Churchill, whose mother was American, to be so honored. The overwhelming congressional support for including Mr. Wallenberg among the citizenry of our Nation reflects the great respect and admiration, even the reverence, with which his noble, selfless efforts, and his extraordinary achievement, are remembered.

Mr. President, in recent months much has been written about Raoul Wallenberg, but nothing more evocative of his moving life and his tragic fate than the review by Jonathan Yardley, recipient of the 1981 Pulitzer Prize for criticism, review of John Bierman's "Righteous Gentile: The Story of Raoul Wallenberg, Missing Hero of the Holocaust." Mr. Yardley's review appeared in the Sunday, September 20, edition of Book World, and I ask that it be inserted in the RECORD.

The review follows:

SAVIOR FROM STOCKHOLM: RESCUING THE JEWS OF BUDAPEST

(By Jonathan Yardley)

In December of 1944 and January of 1945, Budapest was a chamber of horrors. From without, American and British bombers attacked the city constantly. From within, Jewish residents of the city were beaten, tortured and murdered by SS troopers, Nazi soldiers and members of the Hungarian "Arrow Cross," an especially virulent band of homegrown Fascists; Gentile residents did not fare much better, for the food supply was rapidly vanishing and living conditions were abominable.

Yet as a survivor of that brutal time now recalls, "In the complete and total hell in which we lived, there was a savior-angel somewhere, moving around." This survivor, who was 13 at the time, recalls hearing that person's name:

"One morning, a group of these Hungarian Fascists came into the house and said all the able-bodied women must go with them. We knew what this meant. My mother kissed me and I cried and she cried. We knew we were parting for ever and she left me there, an orphan to all intents and purposes. Then, two or three hours later, to my amazement, my mother returned with the other women. It seemed like a mirage a miracle. My mother was there—she was alive and she was hugging me and kissing me and she said one word: 'Wallenberg.'"

Raoul Wallenberg was 32 years old a representative of the neutral Swedish government; his specific mission was to use whatever means were at hand to rescue as many Jews as possible from the Final Solution. He performed this task with an ardor and effectiveness that nearly defy description and then, in the hour of his triumph, mysteriously disappeared—seized, it later turned out, by the conquering Russian troops as he approached them on an errand of mercy, then spirited back to Moscow, and finally thrust into the labyrinthine passages of the Gulag Archipelago.

It is possible that he is there yet—that the Russian claim that he died of a heart attack in 1947 is, like virtually everything else the Kremlin has had to say about Wallenberg, a transparent lie. If that indeed is the case, if Wallenberg has been a guiltless prisoner for more than half his life, the Russian state has perpetrated a gross, unconscionable injustice. And as one of Wallenberg's admirers told John Bierman: "It is a bitter irony that because of his fate Wallenberg is becoming a symbol of injustice rather than being celebrated as a symbol of humanity because of his deeds."

"Righteous Gentile" is the first book about Wallenberg to appear in the United States; a second will appear early next year. This small burst of publishing activity may well focus attention on Wallenberg in this country as nothing else has. If that actually happens, the book as well as its subject will merit the attention; Bierman has written a careful, literate and quietly passionate account that does both honor and justice to Wallenberg.

Raoul Wallenberg was born in 1912 into an exceptionally wealthy and influential Gentile family. There was little in either his background or personality to suggest the role he would assume in Budapest; his half-sister describes him as "definitely not the square-jawed hero type, more an anti-hero." As a young man he was dominated by his grandfather, who wanted him to go into business and thwarted his dream of becoming an architect; he seemed, for all his ability and charm, destined to live out his life in comfort, without inspiration or challenge.

World War II changed that. Though Sweden scrupulously maintained its neutrality, its government resolved late in the war "to extend the protection of the Swedish crown to as many as possible of Hungary's Jews." When Wallenberg was offered the assignment, he leaped at it. Instantly, it seems, his life had acquired meaning.

He arrived in Budapest in July 1944. Adolph Eichmann was already there. In two months, he had deported 437,402 Jewish men, women and children from the Hungarian provinces: "Now, apart from several thousand able-bodied Jewish males serving in the labor battalions of the Hungarian army, there remained only 230,000 terrified Jews trapped in the capital." Six months later, when Russian troops took Budapest, 120,000 Jews were still alive—"the only substantial Jewish community left in Europe." Most if not all of them owed their lives to the Gentile from Stockholm.

The source of Wallenberg's passion may be a mystery, but the effect of it is not. He swept through Budapest like a one-man army of peace; he distributed thousands of Swedish passports to endangered Jews, he bluffed Fascist officers into surrendering their Jewish captives, and he so vexed Eichmann that at last he screeched: "I will kill that Jew-dog Wallenberg." The number of lives he directly saved is put at between 30,000 and 100,000; the psychological effect he had on the Jewish populace, appearing as he did as a "savior-angel," is simply incalculable. A friend recalls:

"He never tired and was at work day and night. He saved human lives, traveled, bargained, threatened the interruption of diplomatic relations, was in consultation with the Hungarian government—in short, achieved something that makes him a sort of legendary figure."

The legend is even larger, among those familiar with it, because of his disappearance into the Gulag. It is difficult to imagine a crueler, more mindless irony than that the "savior-angel" of Budapest's Jews should himself become a victim, a prisoner of the monstrous and paranoid Soviet state. Whatever happened to him after 1945 is, as Bierman explains in useful detail, the fault of many—blunders by Sweden and the United States, indifference in Hungary and Israel. But the villain is the Soviet Union; after arresting Wallenberg, evidently on the mistaken impression that he was a spy, the Kremlin not only refused to acknowledge its error and free him, but also compounded that error into bleak farce by consigning him to the bowels of the Gulag.

In all this terrible injustice there is, to be sure, a certain undeniable poetic justice. The disappearance of Wallenberg after performing such heroic deeds not only elevates life into art—the story is much better this way—but also elevates Wallenberg himself into something approximating sainthood. He achieved a heroism beyond the imagination of most humans, and then he was punished. But perhaps the publication of this book will at last begin the process of restoring him to the world's attention, and granting him the honor he so passionately earned.●

## FEDERAL FUNDING

● Mr. EAST. Mr. President, I call my colleagues' attention to a brief but significant essay by Frederick Sontag that recently appeared in the Christian Science Monitor. Dr. Sontag, who is chairman of the department of philosophy at Pomona College in California, reminds us of a fact that too many of our people seem to have forgotten: That America has traditionally been a "voluntarist" society.

Like Dr. Sontag, I am impatient with those who suggest that unless the Federal Government comes up with the money, many fine charitable enterprises will have to be abandoned for lack of funds. That suggestion is an insult to the American spirit.

For most of our history, it was a private, not public philanthropy that carried the burden of alleviating social ills and supporting the arts. The American Red Cross, the Society for Prevention of Cruelty to Animals, the Metropolitan Opera, and countless other worthy organizations were founded by private individuals and funded by private donors—and at a time when such donations were not tax deductible.

I ask that the full text of Dr. Sontag's essay be inserted in the RECORD.

The article referred to is as follows:

HAVE AMERICANS BECOME ADDICTED TO FEDERAL FUNDING?

(By Frederick Sontag)

Those familiar with the history of American culture know the United States is unique in having launched a "voluntarist" society. Those who travel abroad learn that few other cultures depend as largely as Americans do on individual initiative to meet social problems. By comparison, they have little dependence on centralization. More than other societies, they have counted on local groups to band together to meet their problems.

Why, then, does almost all the discussion of the Reagan administration's proposed budget suggest that any service cut from federal funding is lost? Legal aid, food stamps for the poor, support for the arts, and many others are worthy and needed projects. But the outcry seems to assume that it is federal funding from the central budget or nothing.

Have Americans become so addicted to federal funding in recent years that they assume there is no other way to support what they deem valuable? Every other form of funding is more difficult. Money that pours from central budgets does seem free. But do Americans lose something important in their society if they forget its past and its unique attempt to meet social needs by voluntary organizations and local efforts?

Voluntarism takes up time; committees are inherently inefficient. The odds are that the average American spends more time working for voluntary organizations than the average citizen of any other country. But this independence of spirit is something valuable, whatever its inefficiencies. It is costly in time and often questionable in its effectiveness, but Americans may be poorer if they lose that effort. Have they already gone too far toward central dependence to recover their original spirit?

The issue is how shall Americans rally to meet the needs in their society which they agree to be important, not whether a cut in the federal budget spells doom for some pet program. In fact, if Americans can't rally themselves to find alternative sources of support for nonfederally funded projects, it may mean that the value of these projects is questionable to begin with. Or it may mean that Americans' will to rally to meet community needs voluntarily has declined so far that it cannot be revived.

If so, they should ask themselves: is there anything unique left in the American spirit, and is its society really worth funding after all?●

## TREATMENT OF RELIGIOUS MINORITIES IN THE SOVIET UNION

● Mr. BOREN. Mr. President, many times, my colleagues and I have contacted officials of the State Department and the Government of the Soviet Union in behalf of families in Russia who wish to emigrate because of political or personal reasons and have not been allowed to do so. We have joined in efforts to get relief for the Chmykhalov and Vachchenko families and others who have been trying for years to emigrate from Russia.

Only last week, I and others of my colleagues sent a letter to Secretary of State Haig expressing our growing concern about the treatment of religious minorities in the Soviet Union. The letter expressly cited the unreasonable restrictions imposed on emigration by the Soviet Government, the systematic efforts of that government to prohibit the teaching of the Hebrew language and the harassment of religious groups in the Soviet Union.

During my first year in the Senate, I was a part of the congressional delegation that went to Russia in relation to the SALT II treaty. I saw firsthand the difficulties encountered by the families taking refuge in the U.S. Embassy, as well as other families in Russia who have suffered because of their beliefs. During our stay in Russia, the delegation presented a letter written in support of those families directly to Chairman Brezhnev. Upon my return to the United States and my home State of Oklahoma, I organized a letterwriting campaign in support of these families and delivered the letters I received to the Soviet Embassy.

I have also contacted the State Department numerous other times to try to get some help for families who are imprisoned, separated from their families, and face discrimination in the Soviet Union. Unfortunately, the Russian Government is not too responsive to our inquiries about individuals in their country.

Another example of the disheartening extent of this problem has been brought to my attention. Isak Shkolnik has been separated from his wife for more than half of the 15 years they have been married, because of Soviet intervention in their lives. I should like to share with Senators this article from the Omaha Herald, December 17, 1980, about the trials facing Isak and Feiga Shkolnik, and would ask that it be printed in the RECORD following my address.

As this article states so aptly, "So many of us take freedom for granted." The Chmykhalov, Vachchenko, and Shkolnik families are only a few who have faced hardships, separation, and degradation because of their religious or political beliefs. We cannot be allowed to forget these people; we must continue to do everything we can to insist that the Russian Government live up to the agreements of the Helsinki accord and give these people the human rights and considerations they are due.

The article follows:

SOVIET HUSBAND'S VISA BATTLE GOES ON

So many of us take freedom for granted.

Not Feiga Shkolnik. Now 42, she has not seen her husband for more than half of the 15 years they have been married.

Her address: Jerusalem. His: Vinnitsa, a city of 300,000 in the Soviet Union. Isak Shkolnik, now 44, is what Americans call a "refusenik."

He has twice applied, twice been refused a visa to leave his native land. He has spent seven years in a Soviet labor camp; today he lives under the unblinking surveillance of Soviet police. Each time he wants to leave the city where he is employed as a metal worker, he must obtain a permit. Sometimes it is granted by police; sometimes refused.

Shkolnik's problems began in 1972 when he first applied for a visa for himself and his family. He wanted to go to Israel to begin a new life. Five days later he was charged with treason and anti-Soviet agitation and jailed. Ten months after that, he was tried and sentenced to the labor camp.

Mrs. Shkolnik and her daughter, Louiza, now 14, had no trouble leaving Russia.

"They practically threw us out."

Mrs. Shkolnik said in Omaha Tuesday, "I was very active in trying to have my husband released."

She is convinced her husband was sentenced solely to intimidate others in Vinnitsa, whose population is 10 percent Jewish, from applying for visas.

Now she works as an economist for the Israeli government. But here is a family apart. And there is no indication when it will be reunited.

Today Isak Shkolnik lives with seven other men in what is the Soviet equivalent of a boarding house. That is all his wife knows

of his quarters. She knows through what letters she receives that he remains under continuing scrutiny; that he must wait six months from his latest visa refusal before applying again.

She came to the United States earlier this month to publicize her family's plight. She had talked in six other cities before appearing Tuesday night at the Jewish Community Center. She was to leave today for Canada and more appearances.

"I have no peace of mind," she said in an interview. "I will do anything to help my husband and to bring my family together again."

She feels publicly surrounding her appearances will help. The Soviets, she said, still are conscious of their image; still interested in detente. She hopes those touched by her story, similar to others in the Soviet Union, will write their congressmen. They, in turn, can send the correspondence to her husband, she said.

"I think it is important to reaffirm Americans stand on human rights," she said. "These are not just Jewish cases—they are human cases."

She said recent publicity may be having an effect. Two nights ago in Dallas, she was able to speak to her husband by phone for the first time. She had tried daily for three months to no avail. But this time the call went through.

What was said? "I told him he must be strong," Mrs. Shkolnik said. "I told him not to give up hope—that many people in America were working for his release."

And she told him one more thing. She told him of her love.●

## THE SKIES ARE SAFE

● Mr. SYMMS. Mr. President, I regretted that PATCO members voted not to ratify the settlement terms agreed upon and signed by union leaders, the Department of Transportation, and the Federal Aviation Administration on June 22. Instead, PATCO and its members chose to defy existing Federal law and strike. I support the actions of the President in dealing with this illegal strike. It must not be forgotten that, under Federal law, all Federal employees who strike can be discharged and denied Federal benefits, and any union encouraging such activity can lose its right of representation. The President was correct in using the full force of the law.

In taking this position, I am not insensitive to the demands and the pressures inherent in the jobs air traffic controllers perform. Their professional abilities and competence deserve respect. However, other Government employees work under difficult circumstances, even, at times, under severe stress or at great risk. Federal law enforcement officers as well as all the members of the Armed Forces serve the Nation at peril to their lives, as the recent tragic accident on the U.S.S. *Nimitz* reminds us. But they are not permitted to strike nor should they be.

As one who frequently flies long distances to and from Idaho, I was naturally, personally, as well as professionally, concerned with the strike by the air traffic controllers. Despite allegations by PATCO union leaders that the skies would become dangerous, I had no real doubt about the ability of the airlines and the remaining personnel to manage essential traffic, but I confess to some apprehension about the situation. I think many fliers did.

The reality of the strike has been a real revelation. Air traffic has continued at a very high level, and has continued very smoothly. In the process, we have learned some valuable things about the nature of our air traffic control system, some things which will help us in the future operate more efficiently and economically.

It has been especially gratifying to find that safety has not been decreased by the strike. That fact was clearly evidenced in a recent article that appeared in the Wall Street Journal. To quote the story, "The skies seem as safe as, if not safer than, before."

Certainly, there have been some near misses. It is not even inconceivable that there may be an accident. But there were near misses before the strike, and there were accidents, sometimes terrible accidents. There is no evidence whatever that such accidents are more likely now, or that near misses are more common now.

Mr. President, I submit the article referred to for printing at this point in the RECORD, and I counsel my colleagues to fly reassured.

The article referred to is as follows:

[From the Wall Street Journal, Sept. 2, 1981]

SMOOTH FLYING—THE SKIES ARE SAFE, PILOTS AND EXPERTS SAY, DESPITE SOME PROBLEMS

(By William M. Carley and Richard L. Hudson)

(They cite flight cutbacks, other steps by the FAA; striking union disagrees. Thankyous now fill air.)

ABOARD TWA FLIGHT 320.—As the Trans World Airlines jet bored through the air over Cleveland at 37,000 feet, heading east for New York, a pair of ominous contrails appeared in the northeastern sky. Capt. Richard Thomas, a grizzled pilot who eight years ago narrowly escaped a midair collision, shifted in his seat and squinted.

Then the radio crackled, and an air-traffic controller began speaking: "TWA 320, Cleveland (control center). Traffic at your—coming about 10:30 (to TWA's front and left). Still about 19 miles out, southwest bound. A flight of two (Air Force) C-141s just now making 39,000 (feet) . . . ."

Captain Thomas: "Okay—TWA 320—we have 'em in sight."

Moments later, the two big Air Force cargo jets, bright silver in the blue sky, flashed by 2,000 feet overhead. The Air Force planes and TWA 320 had been skillfully guided by the controller to pass each other in safety. Turning to others in the cockpit, Capt. Thomas said, "That's the way it's been working—as smooth and safe as can be."

MAJORITY VIEW

Despite allegations by the air controllers' union that the skies have become dangerous, there's every indication that Capt. Thomas is right. The skies seem as safe as, if not safer than, before.

That's not to say there may not be some close calls, as there were before the Professional Air Traffic Controllers Organization called a strike Aug. 3. And there's still a chance, however infinitesmal, that there could be a jetliner collision. But talks with several pilots for TWA, whose routes span the nation, a visit to a control tower and interviews with safety experts all indicate that despite the dismissal of more than 11,000 striking controllers, the U.S. air system is operating at least as safely as it ever has.

"I don't really think there are any (major) problems," based on information collected so far, says Lloyd LaGrange, an expert in air-traffic control at the National Transportation Safety Board, an independent federal agency. Add Williams Slocum, a TWA captain based in Los Angeles: "Anybody who says it's unsafe up there is crazy. I wouldn't go up if it were unsafe," he adds as he heads for another flight.

SOME WORRIES

One caveat to those assurances involves pilots flying small planes under visual flight rules. VFR pilots are supposed to look out for other craft by themselves rather than depend on controllers. Some observers worry that because the system of controller guidance is limited, VFR flying may have increased—and possibly under conditions not quite so safe as before. And there is concern that light planes flying VFR might conflict with airliners under controller guidance, although controllers say they will guard against that danger.

Another worry centers on the nonstriking controllers currently manning radar screens. Even with supervisors and borrowed military controllers, the Federal Aviation Administration's control-room work force is at 60 percent of its prestrike size; and the FAA expects it will take 20 months or more to finish training new recruits. Short-staffing and long hours may start wearing on the workers, some fear. And many of the new controllers—such as military personnel from less active air bases—aren't as experienced at their new jobs as were their predecessors, Mr. LaGrange of the safety board says.

FAA officials recognize these concerns, but say they are heading off such problems by gradually reducing work hours and assigning new controllers to relatively simple tasks. However, PATCO, still seeking reinstatement of its members on the federal payroll, contends that the government's new controllers are making many mistakes not visible to the public—mistakes that will become serious if the weather turns bad or more planes start flying. The air-control "system is just not what it should be," Robert Poli, the union's president, said recently.

A NUMBERS GAME

The safety dispute has set off a numbers game. PATCO asserts that there have been 35 near misses, plus many additional less serious errors, since the strike began. But the FAA says it has received only 28 unconfirmed reports of near misses, down from 60 in the year-ago period. The National Aeronautics and Space Administration, which collects reports of hazardous air operations independently, says it has received only half the normal number since the strike began.

Even the union agrees that several FAA moves have promoted safety. The main one is a sharp reduction in flights—cutting the workload of controllers and pilots alike. Other factors include the agency's efficient deployment of its limited work force to control centers most needing help, and the manner in which pilots are cooperating with controllers.

The FAA has ordered airlines to reduce operations at 22 congested airports such as La Guardia in New York, O'Hare in Chicago and the fields at Atlanta, Boston, Washington, St. Louis and San Francisco. Total U.S. scheduled flights have been reduced about 25 percent, but the cuts average 50 percent at these airports during the peak hours, when the congestion and the dangers are greatest.

Under its latest plan for LaGuardia, for example, the FAA is proposing to order a 49 percent schedule cut during the busy hour beginning at 8 a.m. when lawyers are jamming the Eastern Airlines shuttle to Washington and businessmen are getting on American Airlines flights to Chicago. But by 10 a.m., when travel normally has fallen off,

the FAA-ordered reduction in operations shrinks to 33 percent. At 5 p.m., the evening rush hour, the reduction is 57 percent, but by 9 p.m., down again to 33 percent.

Because the system is operating with less congestion, controllers have less need to "stack planes near airports—keeping them circling until there's a chance to land. Nor do controllers have as much need to "vector"—direct—pilots on zigzag paths in order to wait for a chance to bring the plane down.

"You just don't get a lot of vectors (from controllers) like you did before," says Charles Hutchinson, who pilots a Boeing 727 for TWA. "If weather conditions are good they'll say, 'You can see the airport, go right in and land.'"

The reduction in flights means that the system is working more smoothly and is safer on high-altitude routes as well as around major airports. For example, pilots on transcontinental flights say the "trailing distances" between one plane and another following have been stretched to 30 or 40 miles from the normal 10.

All this has significantly eased the work load for both pilots and controllers. And that, aviation experts say, generally enhances safety.

GREATER COOPERATION

Another reason the system is working so well is greater cooperation between pilots and controllers, the militants who supported the controllers' union are out of the towers and control centers. In recent years, some controllers have staged slowdowns and used other harassing tactics to dramatize their pay and work-hour demands. The slowdowns have caused delays and other problems in air traffic and forced some planes to fly longer routes and at uneconomic altitudes.

In a dramatic case at O'Hare last year, a controllers' slowdown forced many jets to circle over Lake Michigan while waiting to land. A TWA flight from Kansas City to O'Hare was twice forced to land at Rockford, Ill., to pick up more fuel. And once some planes did manage to land at O'Hare, they were held out on taxiways, unable to get permission to come to the gates to unload. Because of such incidents, some pilots say they don't miss the militant controllers one bit.

"We had to fight for (desired) altitudes, we had to fight for routings, we had to fight for everything," says Raymond Steinbir, a TWA pilot based in New York. "It had almost become an adversary process," says Capt. Thomas, the pilot of Flight 320.

But now, airline pilots say, the harassment has ended. Indeed, they say controllers currently at work are bending over backward to do their jobs well. Organizations representing pilots of small craft agree. "Safety is probably higher right now" because working controllers "are busting their butts," says John Baker, president of the Aircraft Owners and Pilots Association.

POLITE TALK

The result has been a new sense of good will and cooperation in the air-traffic-control system. While the airwaves used to be filled with testy exchanges between pilots and controllers, on a recent day radio messages often ended with, "Thank you, sir," "Good day to you, sir," or Good afternoon." After one controller had deftly guided a United Airlines flight for hundreds of miles and then directed the pilot to radio the next control center, the pilot responded, United 1006—Okav, and you have a nice day."

While it's hard to measure the results, this kind of civility clearly encourages a smooth and safe system. Listen to this discussion in which a controller tells a pilot flying to New York that he will have to slow down at a certain point:

Controller: "I've got to get 30 miles (between planes) going in to LaGuardia—we've got some pretty rough (safety) restrictions in there."

Pilot: "We can slow down (earlier) if you like. . . ."

Controller: "210 knots?"

Pilot: "Okay, we can do it before if you need it."

Controller: "Okay, fine, if you can do it before, then go to 210 knots direct to (a certain navigational point) that will (also) save you some flight (distance)."

SMALL PLANES

There are, nevertheless, some concerns over safety during the strike. The principal one involves the small planes flying under visual flight rules. Such planes must operate under 18,000 feet so as not to conflict with jetliners and others using higher altitude.

Because light aircraft may not be granted permission to use the air-controller system, particularly at peak hours, the amount of flying under VFR is likely to increase aviation experts say. The increased congestion below 18,000 feet could lead to more collisions of light planes, which have long had a much higher accident rate than airliners anyway. The two midair collisions since the strike—one near San Jose, Calif., and the other in West Virginia—have both involved small craft flying VFR. In 1979 and 1980 combined, there were 36 such accidents.

Even more worrisome is the possibility that near an airport, a small plane flying VFR might collide with a descending airliner guided by controllers or flying VFR itself. Even before the strike, the dual control systems posed "a serious problem," an internal 1979 FAA study concluded.

Both airline pilots and controllers, however, are extremely sensitive to the dangers involved, especially since a Pacific Southwest Airlines jet ran into a small plane over San Diego and killed 144 in 1978. Today pilots and controllers are very cautious in dealing even with potential conflicts. As TWA Flight 320 descended over northern Pennsylvania heading for LaGuardia, for example, a blip representing a small plane flying VFR appeared on a controller's screen.

A37 IN THE WAY

Controller: "All right, folks, there's an A37 (a small military jet), so keep a sharp eye out there, he's out there duking (maneuvering) around VFR."

A United pilot: "Can you give more detail?"

Controller: "Okay, there's an airplane out there about 50 miles ahead of you, United 1006, an A37 has been flying around VFR . . . and he's making loops out there between 12,000 and 18,000. . . ."

One pilot: "As long as he doesn't have guns, we'll be all right."

Another pilot: "Maybe it's the Libyan air force."

Controller: "I'll keep you posted on the Dawn Patrol. . . . TWA 320, that A37 now at your 11 o'clock (to TWA's front and left) showing 13½ (thousand feet) southwest bound. . . ."

Capt. Thomas: "Okay, we'd appreciate anything you can say that would help us, we'll keep an eye out—TWA 320. . . . And I think I got him, about 10:30 (to TWA's front and left)."

Controller: "Affirmative, sir. On my scope looks like he's tracking a shallow right turn on your left side."

At that point the small plane appeared clearly, banking sharply away from the TWA jet's left side and about three miles away. A subsequent check with the FAA indicated that it was an Air Force National Guard plane performing maneuvers. It hadn't violated any regulations or endangered the airliner. TWA Flight 320 landed at LaGuardia routinely.

FATIGUE PROBLEM

In addition to the concern over small planes, there is worry that fatigue may take its toll on the curtailed controller work force. At LaGuardia, as in many towers, controllers have been working six days a week, eight to 10 hours a day, for four weeks. There isn't much time anymore for coffee breaks and lunch hours. Soon, the tower plans to reduce schedules to a 40-hour week; but even so, the workload on each controller will remain heavy until new recruits can be brought in. "It can get to anybody," says John Biddle, the deputy tower chief.

Another worry is the reliability of the FAA's equipment. Since Aug. 3, the aging central computers at the agency's cross-country control centers have been breaking down at a rate of 14 times a week, nationwide, instead of the normal 12, says Edmund Kennedy, a FAA official. He doesn't consider that worrisome, saying that "it's too short a period (since Aug. 3) to take a valid sample" and to conclude that the agency has mechanical problems. But he confirms union contentions that the FAA has delayed some routine maintenance on the computers and other equipment since the walkout began, although he says no important tasks are neglected.

In general, however, government and air-industry officials say the system continues to be safe. "I just put my sister and my nephew on a flight to San Diego," says Frank Bombace, the chief of the FAA's control tower at LaGuardia. "In no way is safety being compromised."●

## PROPOSED SALE OF AWACS TO SAUDI ARABIA

● Mr. LEVIN. Mr. President, while the formal debate on the proposed sale of AWACS and F–15 enhancement equipment to the Government of Saudi Arabia has not yet officially begun, there is already an ugly overtone to some of the preliminary discussions. I refer specifically to a line of argument—really a line of innuendo—which somehow suggests that the decision about the sale will not be made by the Congress of the United States but rather by an all-powerful Israeli lobby and that real issue that we will resolve is whether the Government of the United States makes foreign policy or whether it is made by the Knesset.

There are, Mr. President, a number of important and relevant issues which need to be fully aired and debated before a final decision on this package is made. Fortunately, however, this is certainly not one of them.

Despite that fact, the assertion of "foreign control" has already started to surface. I noted, for example, that Evans and Novack, in their September 21 column in the Washington Post, were suggesting that the issue comes down to a question of whether "the leader of Israel shows more political clout than the President himself." On the same date, the Post gave space to the Saudi Minister of Commerce who claimed that the decision of 50 Senators to cosponsor a resolution disapproving the sale demonstrated "the power of the Israeli lobby." And even Members of this body have used language which could be interpreted as implying that some of their colleagues are ignoring the critical question of whether this sale is "in the U.S. national interest, not that of another country."

I do not rise today to defend the reasoning of those of us who have made the decision to oppose this sale nor to impugn the intelligence of those who have decided to support it. Rather I rise to express my faith in the integrity of both groups. And in doing so, I would call the attention of my colleagues to two points.

First, according to the Secretary of State—a man not noted for pulling his punches or escaping difficult questions with diplomatic generalities—there has been no attempt by the Government of Israel to improperly influence this decision. Secretary Haig indicated on September 10 that "it was very clear that Prime Minister Begin recognized that while he has the right and the obligation to express his concerns, that this is a U.S. decision to make. During this visit, it was clear that the Prime Minister did not interpose himself in this process, and I do not believe he intends to do so."

Second, I would call the attention of my colleagues to the very clear fact that Senators are making decisions on this issue not on political pressures or "foreign" influences, but rather on the basis of the facts before them. If any evidence for this claim is needed, I would suggest that one might profit from a careful study of the way Senators voted on the 1978 decision to sell F–15's to Saudi Arabia and the stated intention of some of the same individuals to oppose this sale. My analysis of the 1978 vote and the list of cosponsors of the resolution of disapproval already filed on this 1981 sale indicate that of the 32 Members now serving who voted for the 1978 sale, six have already indicated their intention to oppose the current package. In this context, a recent Wall Street Journal story about the decision of one of our colleagues, Senator EAGLETON, may be instructive, and I ask that the article appear in the RECORD at the conclusion of my remarks.

Mr. President, my purpose today is simply to recognize that the sale proposed by the administration will lead to an important, and, I suspect, emotional debate. As we go into that debate, we ought to do what we can to focus on the issues which really matter. However one adds up the merits and demerits of the proposed sale, there are no merits to any suggestion that Members of this body will approach this issue with anything but a deep and sincere commitment to discover what course of action is in the best interests of the country to which we have all sworn allegiance.

The article follows:

[From the Wall Street Journal, Sept. 21, 1981]

POLITICIANS DON'T PLAY POLITICS ALL THE TIME

(By Albert R. Hunt)

WASHINGTON.—When Congress takes up the administration's controversial plan for new arms sales to Saudi Arabia this summer or fall there'll be a lot of talk about the powerful Israeli lobby.

The Israelis oppose the plan, especially the sale of the sophisticated radar planes called AWACS. It's widely assumed that many members of Congress, with an eye to Jewish votes and financial support at home, will be influenced more by pro-Israel political pressure than by the merits of the issue.

Already, one of the leaders in the fight against the sale is Sen. Thomas Eagleton. At some point, no doubt, someone will accuse the Missouri Democrat of buckling to the Israeli lobby.

The charge won't wash. In 1978, Mr. Eagleton voted for a hotly disputed sale of F15 jet fighters to the Saudis; he believed those planes would serve a legitimate defensive need while he sees the aircraft and equipment now offered as holding dangerous offensive potential. The Senator's 1978 vote preceded his re-election contest last year, and an officeholder is never more vulnerable to political and financial pressures than shortly before an election. This year, having just won re-election, Mr. Eagleton is more a political free agent than at any other time during his term; he could ignore the Israeli lobby.

The point is not whether Mr. Eagleton is right in his opposition to the Saudi arms sale now or in his support for the sale three years ago. Rather, it is that he and many of his congressional colleagues do decide some important issues according to what they think is right rather than on the political passions of the moment.

"The two biggest political lies," says the Missourian, are "one, to say a Senator never takes into account the political ramifications of a vote and secondly, almost an equal lie, is to say the only thing a Senator considers is the politics."

In an era of easy cynicism, Sen. Eagleton's second point isn't readily accepted. Even many knowledgeable observers tend to see purely political motivations behind most lawmakers' behavior. The reality is much less interesting. On scores of issues, a wide variety of politicians—Republicans and Democrats, liberals and conservatives—agonize over conflicting claims and genuinely try to come down on the side where they think the national interest lies.

Take the current battle of the budget. Many Republicans and some Southern Democrats harbor private doubts about some of President Reagan's spending and tax prescriptions. But they also think the administration is moving in the proper direction and many of its specific plans seems sensible. Thus the strong support the President is receiving in Congress is based as much on conviction as on any lock-step loyalty or political fear.

For their part, many mainstream Democrats realize the old politics of "tax and spend" is as bankrupt economically as it is politically. But they also truly believe the Reagan approach is too indiscriminate and that some of the specifics—particularly the tax-cut proposals—don't make any sense. So their resistance reflects sincere differences with the President as much as any caving-in to powerful constituencies.

"Ronald Reagan has performed an important political service," muses one House Democratic leader. "On domestic issues, at least, he has drawn a line and set the stage for a serious debate over the role of government." Politics will, and should, play a part in this debate but the issues to be decided transcend the politics of the moment.

If the administration ever gets its act together on foreign policy, an equally important debate is possible on that whole subject. And there is much more than short-term political calculation involved in the sharply differing views voiced on Capitol Hill and elsewhere about arms control, human rights and relations with the Soviets.

Certainly no self-respecting politicians will deny they are affected by political considerations. "If on 20 major issues you steadfastly oppose the prevailing opinion of your constituents you're probably in your last term," notes Sen. Eagleton. "But you do pick some issues that you think are important and on these issues you owe your constituents your judgment."

That's what Sen. Eagleton did on the 1978 sale of F15s to Saudi Arabia. "Many of my most devoted supporters and good friends in the Jewish community were strongly opposed to that sale," he recalled.

But Sen. Eagleton became convinced that the Saudis were an important ally and that the F15s were defensive weapons posing minimal risks for Israel. So, despite the urgings of his friends, he voted for the sale. In 1980, his support slipped a little in heavily Jewish areas of Missouri but he still carried them handily.

Viewing the sale now proposed, the Senator is convinced that the planned "enhancement" of the F15s with missiles and extra fuel tanks goes beyond defensive purposes. And he thinks the Israelis have legitimate concerns about the AWACS radar planes. "There's no way to make an AWACS just a defensive plane," he says. "It is what it is."

The issue is far from settled; the administration and some other Senators may effectively counter such arguments. But when Mr. Eagleton takes a leading role against the sale, it is not because he is the puppet of a powerful lobby. He and most of the other 99 Senators likely to decide the issue will vote the way they think is right.●

## PAST SHAME, PRESENT PRIDE

● Mr. EAST. Mr. President, today's Wall Street Journal contains an excellent column by Vermon Royster, in which Mr. Royster sets the record straight on a CBS documentary about race relations at the University of North Carolina. Mr. Royster is a UNC graduate, and does his alma mater proud in this column. I ask that the complete text be reprinted in the RECORD.

The article referred to is as follows:

[From the Wall Street Journal, Sept. 23, 1981]

THINKING THINGS OVER

(By Vermont Royster)

In the interest of full disclosure, I should explain straight away that I'm Tar Heel born, a graduate of the University of North Carolina, and I rise to the defense of my native state.

I begin with the miscellaneous collection of facts, chosen at random, about the progress toward integrating blacks and whites in the state's 16 institutions of higher education.

In the medical school at the University at Chapel Hill, 13 percent are black, a higher percentage than the national average or at Harvard medical school. Between the 1972–73 academic year and that of 1980–81 the total enrollment of all students in the system rose by 33.6 percent. The number of black students rose by 50.9 percent.

Of the state's 16 institutions some began in the days of segregation as all white, others all black. North Carolina Central University, for example, began as an all-black college. The University at Chapel Hill was all white.

Today at the UNR–CH, some 8 percent of the students are black. At NCCU more than 10 percent are white; in the NCCU law school, 40 percent of the students are white. Of the colleges which remain predominantly white, the increase in black enrollment is nine times greater than the increase in white enrollment. In the schools still predominantly black, the enrollment of white students increased by 193 percent between 1972 and 1980.

This miscellaneous collection of figures doesn't suggest that every one of the 16 institutions is ideally balanced between white and black students. It does suggest, I think, the enormous progress made in the racial mix in the past decade where the

doors of every institution are open to students of every racial or ethnic background.

You would have received no hint of this, however, if you tuned in Sunday morning, Sept. 13, to the CBS program presided over by Charles Kuralt. Your impression would be that North Carolina was still frozen in the segregation pattern of the early 1960s.

So lopsided was this presentation that a week later Mr. Kuralt tried to correct the impression, not by any admission that it was lopsided but rather by running parts of an interview with UNC President William Friday that previously had been omitted. It was a gesture to be appreciated. Aired without any explanation, it must have added to the confusion left on a viewer in Minnesota or Massachusetts.

For the distortion in the original program came both from what was on it and what was left out. One thing on it was some old shots of George Wallace, former governor of Alabama, blocking the entrance of blacks to that state's university. Its relevance to an examination of the situation in North Carolina today remained a mystery.

The program also contained some scenes from the campus at Chapel Hill followed quickly by some from the campus at NCCU. The pictures didn't show any white students at NCCU nor any black students at Chapel Hill. A viewer's impression would be that there were none such.

Lest you missed the message, the program concluded with voice-over sounds of students chanting "two, four, six, eight, we don't want to integrate." There was no explanation where all this chanting happened or that it was taken from 10-year-old soundtracks. A distant viewer might have supposed it all happened yesterday in North Carolina.

The omissions nailed down that impression. No figures were given of racial ratios today on any of the campuses, much less a comparison with a decade earlier. Dr. Albert Whiting, chancellor at NCCU and himself a black, was interviewed but what he had to say must not have fit the message. He wound up as a face on the cutting room floor.

Dr. Whiting's postmortem comment was that "If you are doing a story on segregation and the situation at predominantly black colleges, you really should include some comments from officials at black colleges." Surely a reasonable comment.

By running an extension of President Friday's remarks a week later, CBS did acknowledge it was a bit embarrassed by the shoddy journalism of its first program, and for that recognition it's to be complimented. But the rest of the program's errors of omission or commission were left uncorrected.

My main purpose in bringing up all this, however, isn't to berate CBS, deserved though that might be. My interest is that people outside the region have a truer appreciation than CBS gave them of what has been done in the South to improve black education, particularly in North Carolina. In the past decade, the state has spent nearly $100 million to upgrade the facilities, faculty and curriculum in its former black colleges. If some remain predominantly black, it's in part because many blacks prefer to do their undergraduate work in familiar surroundings. No law forces white students to attend predominantly black schools. The large proportion of white students at NCCU law school are there to get a legal education and they wouldn't be there if they didn't think that's what they'll get.

One reason North Carolina was singled out for attention by the federal government is that years ago it established more black colleges than other states. It therefore had more to integrate. In a sense it's been penalized for its forehandedness in educating its black citizens.

The centuries of racial discrimination, by no means limited to the South, remain a fact of shame. No one should pretend that for all the progress there isn't much more to be done in North Carolina as elsewhere.

But it's simply wrong to say that after a quarter-century of seeking to remedy the past, nothing has changed. As a Southerner, I'm proud of my region, my state and my alma mater, and I want everyone to know it.●

## INFLATION AND HIGH INTEREST RATES

● Mr. PRYOR. Mr. President, I should like to call to the attention of the Senate a resolution adopted at the 35th annual Meeting of the Southern Legislative Conference expressing the conference's concern about the economic policies of this Nation which affect the level of interest rates and about the effects of high interest rates on agricultural exports.

As most Members of this body know, the Southern Legislative Conference is comprised of State lawmakers and executive agency officials from 15 Southern States and Puerto Rico. It is one of four regional legislative conferences affiliated with the Council of State Governments, a national organization serving all State officials with headquarters in Lexington, Ky.

I am particularly proud that the 1981–82 conference chairman is State Representative John E. Miller and that the chairman of the Agricultural and Rural Development Committee and the drafter of this particular resolution is State Representative Charles R. Moore, both of my home State of Arkansas.

I know that my colleagues share my deep concern over the harmful effects of our present high interest rates, and the need to find new ways to curtail inflation while allowing interest rates to come down.

I ask that the resolution of the Southern Legislative Conference be printed in the RECORD.

The resolution follows:

RESOLUTION

URGING PRESIDENT REAGAN AND THE UNITED STATES CONGRESS TO INVESTIGATE ALTERNATIVES TO THE FEDERAL RESERVE BOARD'S PRESENT METHODS FOR CONTROLLING INFLATION

Whereas, the decision by our governmental leaders to embargo sales of American farm products to Russia had a lasting detrimental price effect on farm products by curtailing export volume; and

Whereas, the policy of the Federal Reserve Board, in an attempt to control inflation, is to create high interest rates; and

Whereas, farmers must borrow money to make their crops, and due to the present Federal Reserve Board policy the cost of such borrowed money is excessive; and

Whereas, the actions of the Federal Reserve Board have substantially strengthened the value of the American dollar against foreign currency, which in turn makes American farm products less attractive to foreign buyers; and

Whereas, all these factors continue to drive farm prices lower with no permanent relief in sight: Now therefore, be it

*Resolved*, by the Committee for Rural and Agricultural Development of the Southern Legislative Conference, That President Ronald Reagan and the United States Congress investigate alternatives to the present method used by the Federal Reserve Board to control inflation, which method is resulting in high interest rates, discouraging productivity, creating unemployment and leading to uncertainty for future planning for American businessmen and farmers.

Adopted August 19, 1981 by the Southern Legislative Conference, Charlotte, North Carolina.●

## TV'S TED TURNER

● Mr. SYMMS. Mr. President, many Americans resent the news monopoly exercised by the three major television networks. There often seems to be little alternative to the look-alike and sound-alike "media personalities" of CBS, NBC, and ABC. Fortunately, an alternative is developing, and if it is not generally available, its coverage is expanding and its influence is being felt, even by the Big Three themselves.

I refer, Mr. President, to Mr. Ted Turner's WTBS and the Cable News Network that originates with that same broadcaster. CNN is a 24-hour network that permits much more extensive and flexible coverage of news and opinion than is possible on ordinary television channels. The range of opinion that appears on CNN is a welcome change. CNN carries everything from Bella Abzug to Phyllis Schlafly, in true opinion programs, not the edited snippets that will appear on prime time TV news programs.

Mr. President, we should pay more attention to the innovative figures now starting to appear, thanks to technical innovation. For that reason, I would like to insert into the RECORD an interview with Cable Network News' Ted Turner, so that my colleagues can have some exposure to this intriguing and important figure. I ask that the interview be printed at this point.

The interview follows:

[From the Review of the News, July 8, 1981]

TV's TED TURNER

(By John Rees)

Over the decade since he purchased an independent UHF television station in Atlanta, Robert Edward "Ted" Turner has repeatedly made television history. In December 1976, Turner's WTBS became the first "Super Station" in the cable television field, beaming its signal via a satellite system to make its programs available to more American families than any other cable programmer. On June first of last year, Ted Turner was again impressing his industry when the Turner Broadcasting System started operation with the Cable News Network. The CNN provides live, all-news coverage 24 hours a day on cable systems across the country. This increases public awareness of breaking news stories and gives in-depth background to current stories which neither the 30-minute evening news programs nor the "magazine" format of the morning news shows can provide.

The Turner family has lived in Georgia since Ted's millionaire father moved them to Savannah when Ted Turner was nine. An enthusiastic student of history and the classics, young Turner attended military prep schools where he distinguished himself in debating, sportsmanship, and hijinks. At Brown University he majored in classics and was vice president of the debating union. After service in the Coast Guard he returned to Georgia as an executive with the family-owned Turner Advertising Company just before his father's death.

Becoming president and chief executive officer of the various Turner companies in 1963, Ted promptly demonstrated a fierce competitive drive and remarkable head for finance. Controversial, flamboyant and highly outspoken, energetic, and deservedly self-confident, Ted Turner has shown an uncanny flair for turning other men's sow's ears into his own silk purses. Last year he was awarded the Freedom Foundation's "Private Enterprise Exemplar Medal."

And Turner is as well known as a sportsman as he is for his communications companies. He bought the Atlanta Braves baseball team in 1976, and followed that by acquiring ownership of the Atlanta Hawks basketball team the next year, and the Atlanta Chiefs soccer team two years ago. A sailing enthusiast from age 11, he four years ago successfully defended the America's Cup.

Ted Turner, his wife Jane, and their five children live in Marietta, Georgia.

Q. Mr. Turner, tell us about your cable television operation. Who sees your programs and what do you offer that the other three networks do not?

A. The first of our two cable television programming services is WTBS, which started out as a local, independent UHF station in Atlanta. It was the first commercial television station to go on to the satellite and make itself available to cable systems across the United States. Now WTBS, the Super Station, is the most widely available cable program service in over 60 percent of all the cable households in the country. More and more people are choosing cable television. According to the Nielsen statistics, 20 percent of the homes in America now have it and this percentage is growing.

As for what we offer, WTBS is primarily an entertainment network. One of our specialties is to make available the quality older movies which express sound values. We have close to 3,000 movies under contract, including most of those made by John Wayne and Bing Crosby. We also carry many sports programs and offer the best of the older syndicated programs like Andy Griffith, Carol Burnett, and "Sanford and Son." We run a fair amount of news as well, and we don't run the offensive soap operas.

Q. How do you feel about the growing demand for less violence and more decency and morality in television programming?

A. We have been widely endorsed for our approach. In fact, one of our programs on the Super Station, WTBS, is by the Moral Majority and the Council for Decency.

Q. Tell us about your Cable News Network.

A. I think our CNN is the world's finest 24-hour all-news television service. We try to present a balanced, in-depth coverage of the news, including aspects like business news and medical news that are glossed over on the major networks. We are more like a newspaper of the air. We have a broad range of editors, some of them highly controversial. They range from Senator Barry Goldwater to Bella Abzug, from Phyllis Schlafly to Coretta King. I want to present a sort of Op-Ed page of opinions from both Conservatives and "Liberals" so that people can make their own decisions. And CNN can be received from Puerto Rico all the way to Alaska and Hawaii.

Q. Do you feel the other networks are not balanced in their news?

A. That's right: NBC, ABC, and CBS are unbalanced. We feel they are basically anti-business. And they spend too much time dealing with merely sensational matters because they are always in a rating race.

Q. How many people are watching and what is the break-even point for CNN?

A. The Cable News Network is already in nine percent of the homes in the U.S. We are approaching seven million homes. In another six months, we should be close to 15 percent of the homes in the country. Nine or ten million homes will be the break-even point.

Q. And the Super Station?

A. In another six months, WTBS will be in 23 percent of American homes.

Q. Is Atlanta a good base for communications operations?

A. It is a perfect place. The other networks come completely out of New York and Los Angeles. They are oriented towards big-city violence, slick sex, and things like that. Our networks come out of Atlanta and are more in line with Middle America. Our whole outlook on life is less cynical and less sensational and more pro-family. We bring diversity, representing more of the country; not just New York and Los Angeles where they are on cocaine half the time.

Q. What sort of resistance are you meeting from the established networks?

A. One of the reasons I am in Washington is to fight regulations against cable television development. The National Association of Broadcasting and several of the groups aligned with it are now trying to legislate us out of business. It's the old story: The monopolists in every field come to Washington and try to get regulations passed to make it impossible for their potential competitors to develop.

Q. Do you think Free Enterprise will prevail in the case of cable television and you will be allowed to meet the demands of the marketplace?

A. Do I think that we will be successful? Absolutely. We have already fought this same gang before the Federal Communications Commission and won. When we won, they went over the head of the F.C.C. to the House and Senate Commerce Committees, but we won there too.

Now the anti-cable group is going at it from a different angle. They have full-time lobbyists in Washington and batteries of lawyers trying to develop some new angle. Currently they are trying to work through the Justice Department and the Justice Commitees. They got the jump on us again by starting their campaign here in Washington while we were down in Atlanta paying attention to our business.

Q. You mentioned that one of the features of your cable television news network is providing information that other television news programs usually do not cover.

A. Business news is typical. The major print media and newspapers like the Wall Street Journal provide in-depth reports on current business news. But the Big Three networks do not because the percentage of the population involved in handling or investing money is too small an audience to interest them. We have news bureaus in New York, on Wall Street, and in Washington where we employ commentators. The business news comes on at 7 P.M. Eastern time, Monday through Friday.

Q. Obviously the Big Three networks means to hold onto their monopoly and have little good to say about CNN, but what has been the response from newspaper journalists? Do they think you will put the printed news out of business?

A. Journalists generally have applauded what we are doing, and were reasonable in pointing out any early rough spots. Our major innovation has been live coverage of important public events. We covered the Haig confirmation Hearings, for instance, from gavel to gavel.

Q. And you provide extensive political coverage?

A. Frankly, I think we had a very healthy impact on the 1980 elections. The better informed the voters are, the better the results in the elections. We are in a great position to inform people about the issues, nationally and internationally.

Q. Seeing someone like you take on the big networks has long been a dream of many of us. But the task seems so enormous. How did Ted Turner become so competitive?

A. I guess I was born with it. When I got my first sailboat I was 11. I couldn't sail, but I just kept trying out on the Savannah River in weather that drove everybody else in. They called me Turnover Turner because I was in the water so much.

Q. Are you still doing ocean racing?

A. I have temporarily retired from ocean racing because my work is requiring my absolute attention. I spend a little time on my company's sports teams, but most of it is devoted to working in the television field.

Q. I saw a report recently that said there is demand for soft-core porn on cable television. Is that going to be added to the Super Station format?

A. There are some cable programming services that offer R-rated movies, but I want no part of that. Though, frankly, there is so much suggestive, sleazy material on the over-the-air networks already that the sex doesn't bother me as much as the violence. What gets to me is that they are using the public airways to destroy morals and family virtues, and to incite violence. As for most of the Hollywood movies being made today—well, that's part of the reason I came up to Washington.

Q. What do you mean?

A. Last night we had a presentation to which we invited all the Members of the House and Senate to see some of the programs we have done reporting on movie and television practices. I have asked Congress to conduct an investigation into the three networks and the motion picture industry because I think these aspects of our media are doing their dead level best to destroy this country.

Current programming by the three major networks is out-and-out pollution. There needs to be a sense of responsibility at the highest network levels.

Q. Do you think the visual presentation of wanton violence and promiscuous sex has a more serious effect than similar presentations in printed material?

A. Those who work with children and young adults have found that what children see happening has a greater impact on their memories than what they read. Network television is the most powerful communications and propaganda medium that the world has ever seen, and I repeat, the programming it presents now is pollution. Our young people are watching programs daily which are molding their values to a far greater degree than what is taught in the home and in our schools. They are being poisoned.

Q. Is this deliberate?

A. That's hard to answer. It's just as harmful either way. You know, if you shoot somebody accidentally, they are just as dead as if you shot them deliberately.

But there is a growing body of evidence, which for the most part is hidden by the network news departments, that the television and movie industries are doing real harm to traditional values. I think this is the basic reason for the growing crime rate and the dissatisfaction with our institutions, the anti-military attitude, and so forth. The three major over-the-air networks are anti-religion, anti-business, and anti-family.

Q. What could Congressional Hearings do to help?

A. They would focus attention on the programming practices of the three networks and on the motion picture industry and review the evidence as to whether real harm is being done. Certainly the print media would cover it. Faced with the evidence, the American people would cry out for massive change in network programming and motion-picture releases. Middle America would like to see changes in which the good guy is glorified, not the bad guy; changes from indecency to decency, from immorality to morality. They

would like to see programming that appeals to the best in human nature instead of the worst.

Q. Are you looking for some sort of federal censorship board to determine what should be shown?

A. Just getting the issue out on the table would have some corrective effect because the networks would make changes to protect themselves. As for what actions should be taken afterwards against the monopolists, I would leave that to our elected officials. After all, ABC, NBC, and CBS hold their monopoly because of government regulation of the marketplace. When they abuse that monopoly it is public business.

Q. You must have some ideas on how the networks might be chastised if the evidence did prove wrongdoing?

A. First, we have to remember that the First Amendment guarantees free speech. But each of the networks owns five television licenses in the largest markets in the country. They were given those licenses free of charge and government defends them from competitors. But they were given those monopolies with the understanding and proviso and mandate that they would use their facilities in the public interest. I think it could be proved that they have not served the public interest but the public disinterest. Those monopolies should be taken away.

Q. What do you think of the sort of "information monopoly" that occurs when the major newspapers and television or radio systems keep acquiring more and more outlets in communications fields?

A. Well, it is no longer permitted for newspapers to own television stations in the same market. But of course they can own them in other areas. There have been suggestions from time to time that divestment be required. Personally, I know enough about what has been going on to think they should be required to divest.

Q. In this same general area, for example, time magazine has moved into the motion-picture industry, into cable television, into books, and of course into Washington with purchase of the Washington Star. Do you feel that is too much of a concentration of power in the sensitive communications industry for one company?

A. That is not a monopoly situation because, in all those areas, Time has strong competition. But certainly the trend is toward concentration. Unfortunately that's more or less the story of what's been going on in communications. Very few television stations in the top 50 market are owned by individuals any more. They mostly are owned by Establishment conglomerates like Westinghouse, General Electric, or Metromedia.

Q. Isn't it the same story in cable television?

A. It's happening now. We are supposed to encourage competition in America, but the Justice Department's antitrust group allows these mergers all the time.

Q. Does the network news monopoly have an adverse effect on CNN's news-gathering capability?

A. That is the reason we filed suit against ABC, CBS, and NBC for damages and relief from their violations of the U.S. antitrust laws resulting from their practice of "pooling" news coverage. In the CNN suit we also named the President, his chief of staff, and his deputy press secretary for violating CNN's right to equal access to cover the Presidential news conferences, trips, and activities.

Q. I believe the networks implied your suit was frivolous.

A. It's not a bit. All we want to do is cover the news completely and accurately. That is part of our First Amendment rights. No one should abridge our constitutional right to cover the news.

Q. Why did you make President Reagan a party to your suit? Are you suggesting that he, a former media professional, is hostile to complete coverage?

A. Our action is not aimed at the President himself, but at a relatively new White House policy, apparently developed by his staff, that seeks to limit access to news events to a select few. I think that flies in the face of everything for which America stands.

The three major networks should not be able to dictate the terms of our coverage, limit its scope, or combine their resources effectively to prevent CNN from competing with them. And the President's staff should not be able to deny CNN equal access to cover Presidential activities and White House events.

Q. Did you try to reach some sort of negotiated agreement with the Big Three regarding the White House pool before filing suit?

A. Our efforts outside the legal process to break this monopoly have been fruitless. For at least 15 years ABC, CBS, and NBC have been the principal participants in the market for the production of television news programming. They have enjoyed a monopoly over this market. No more.

Q. Some of us would like to see open competition in television to let the market decide, I know you are a competitor. Why do you work so hard? Is it the competition, money, happiness?

A. When people look back, the happiest times of their lives are when they got together with other people and did something. When people are excited and motivated, they'll work the hardest and have the most fun. The American system rewards that. You know the one area in which American society has failed is that we've conned people into thinking that if you're rich, you will be happy. I've seen poor people who were happy and wealthy people who were miserable. The happiness is in the work.●

## ORDER OF PROCEDURE

Mr. BAKER. Mr. President, the Chair a moment ago advised me that two rollcall votes had been ordered on tomorrow on the foreign assistance bill.

In order to accommodate those two rollcall votes and other legislative business that must be transacted tomorrow, I now propound the following statement and request:

After consulting with the minority leader, which I have now done, I will ask the Senate to proceed at 10 a.m. tomorrow to lay aside temporarily S. 1196 and proceed to the consideration of the continuing resolution, House Joint Resolution 325, assuming that resolution has reached the Calendar of Legislative Business as contemplated by the order previously entered.

## ORDERS FOR THURSDAY

Mr. BAKER. Mr. President, I ask unanimous consent that at 12:30 p.m. tomorrow the continuing resolution, if it is then pending before the Senate, be temporarily laid aside and that the Senate resume consideration of S. 1196, the Foreign Assistance Act.

I further ask unanimous consent that the two rollcall votes ordered today on S. 1196 be deferred until tomorrow at the hour of 1 p.m. and at that time they occur back to back with the first rollcall vote being 15 minutes in length and the second rollcall vote being 10 minutes in length.

Mr. President, finally, I ask unanimous consent that upon completing of the aforesaid voting the Senate return to the consideration of House Joint Resolution 325, the continuing resolution.

The PRESIDING OFFICER. Is there any objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, the request comports with the order that was entered I believe on yesterday.

The distinguished majority leader has consulted with the minority leader in accordance with the order.

The order provided that the majority leader could under those conditions call the matter up before the Senate on tomorrow at any time after consulting with the minority leader, provided that the subject matter had been placed on the calendar, and it appears that that will be done, the Appropriations Committee having acted today to report the continuing resolution.

The setting of the votes, it would seem to me, comes at a time which should accommodate most Senators. There was some brief discussion of that matter earlier today when the distinguished majority leader indicated he would like to set the votes on tomorrow at circa 10:30 a.m., and Mr. BAUCUS indicated it would please him if the votes could occur a little bit later than that. So I should think that the order which the distinguished majority leader is now presiding should accommodate Senators, and I have no objection.

Mr. BAKER. Mr. President, I thank the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have a few other housekeeping details.

## ORDER FOR THE RECOGNITION OF SENATOR WALLOP TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that tomorrow after the recognition of the two leaders under the standing order, the distinguished Senator from Wyoming, the chairman of the Ethics Committee (Mr. WALLOP) be recognized on special order for not to exceed 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a number of unanimous consent requests which bear a notation in my files that they had been submitted to the minority leader.

I shall state them now for the consideration of the minority leader and other Senators.

## ARMED FORCES PAY ACT OF 1981

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1181.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 1181) entitled "An Act to amend titles 10 and 37, United States Code, to increase the

pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "Armed Forces Pay Act of 1981".

PAY INCREASE OF 14.3 PER CENTUM FOR MEMBERS OF THE UNIFORMED SERVICES

SEC. 2. (a) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective.

(b)(1) Subject to the provisions of paragraph (2), each element of compensation specified in section 1009(a) of title 37, United States Code, shall be increased for members of the uniformed services by 14.3 per centum effective with the first pay period beginning after September 30, 1981.

(2) The President may allocate the percentage increase specified under paragraph (1) in the same manner and to the same extent the President is authorized under subsections (c) and (d) of section 1009 of title 37, United States Code, to allocate any percentage increase described in subsection (b)(3) of section 1009 of such title, except that the provisions of subsection (d)(2)(B) of such section shall not apply to this subsection or any action of the President under this subsection.

REENLISTMENT AND ENLISTMENT BONUSES

SEC. 3. (a) Section 308(e) of title 37, United States Code, is amended to read as follows:

"(e) Any unserved period of an enlistment (including any extension of enlistment) for which no bonus has been paid or for which no bonus is otherwise payable under this section may, under regulations prescribed by the Secretary concerned, be considered as part of an immediately subsequent term of reenlistment (or as part of an immediately subsequent voluntary extension of an enlistment) for the purpose of determining the eligibility of the member for a bonus under this section and for the purpose of computing the amount of such bonus.".

(b) Section 308a of such title is amended—

(1) by striking out "for a period of at least four years";

(2) by striking out "to a total of at least four years"; and

(3) by striking out "$5,000" and inserting in lieu thereof "$10,000".

SPECIAL PAY FOR UNUSUALLY HAZARDOUS DUTY OR DUTY PERFORMED UNDER UNUSUALLY SEVERE WORKING CONDITIONS

SEC. 4. (a) Chapter 5 of title 37, United States Code, is amended by adding at the end thereof the following new section:

"§ 315. Special pay: unusually hazardous duty or duty performed under unusually severe working condition

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is entitled to basic pay may be paid special pay, in the amount set forth in subsection (b) of this section, for any month during which the member performs duties that have been determined by the Secretary concerned to be—

"(1) unusually hazardous; or

"(2) performed under unusually severe working conditions.

"(b) Special pay payable under subsection (a) of this section shall be paid at the rate of $110 per month, in the case of an officer, and at the rate of $55 per month, in the case of an enlisted member.

"(c)(1) A member may not be paid more than one payment of special pay under this section for any month.

"(2) A member may not be paid special pay under this section for any period of service for which that member receives special or incentive pay under section 301, 301a, 301c, or 304 of this title.

"(d) In time of war, the President may suspend the payment of special pay under this section.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"315. Special pay: unusually hazardous duty or duty performed under unusually severe working conditions.".

DUTY REQUIRING AN ENGINEERING OR SCIENTIFIC SKILL DESIGNATED AS CRITICAL

SEC. 5. (a) Chapter 5 of title 37, United States Code, is amended by adding after 315 (as added by section 4) the following new section:

"§ 316. Special pay: engineering and scientific career accession bonus and continuation pay

"(a) In this section, the term 'engineering or scientific duty' means service performed by an officer holding a degree in engineering or science from an accredited college or university that requires a skill designated under regulations prescribed by the President as critical and that requires an engineering or science degree.

"(b) Under regulations prescribed by the President, an officer of an armed force who—

"(1) is entitled to basic pay;

"(2) has been certified by the Secretary concerned as having the technical qualifications for detail to engineering or scientific duty; and

"(3) executes a written agreement to serve on active duty for detail to engineering or scientific duties for a period of at least four years;

may be paid, in addition to all other compensation to which the officer is entitled, a bonus in an amount not to exceed $15,000. The bonus may be paid in a lump sum or in equal periodic installments, as determined by the Secretary concerned.

"(c) Under regulations prescribed by the President, an officer of an armed force who—

"(1) is entitled to basic pay;

"(2) is below the pay grade of O–7;

"(3) has been certified by the Secretary concerned as having the technical qualifications for detail to engineering or scientific duty;

"(4) has completed at least three but less than nineteen years of engineering or scientific duty as an officer;

"(5) is not serving a period of obligated service under subsection (b) of this section; and

"(6) executes a written agreement to remain on active duty for detail to engineering or scientific duty for at least one year, but no more than four years, of active service;

may, upon acceptance of the written agreement by the Secretary concerned, be paid, in addition to all other compensation to which the officer is entitled, an amount not to exceed $3,000 multiplied by the number of years, or monthly fraction thereof, of obligated service to which the officer agrees under the agreement. The total amount payable may be paid in a lump sum or in equal periodic installments, as determined by the Secretary concerned.

"(d)(1) An officer who does not serve on active duty for the entire period for which he has been paid under subsection (b) or (c) of this section shall refund that percentage of the payment that the unserved part of the period is of the total period for which the payment was made. Nothing in this subsection shall alter or modify the obligation of a regular officer to perform active service at the pleasure of the President. Completion by a regular officer of the total period of obligated service specified in an agreement under subsection (b) or (c) of this section does not obligate the President to accept a resignation submitted by that officer.

"(2) Subject to paragraph (3) of this subsection, an obligation to reimburse the United States imposed under paragraph (1) of this subsection is for all purposes a debt owed to the United States.

"(3) The Secretary concerned may waive, in whole or in part, a refund required under paragraph (1) of this subsection if the Secretary concerned determines that recovery would be against equity and good conscience or would be contrary to the best interests of the United States.

"(4) A discharge in bankruptcy under title 11 that is entered less than five years after the termination of an agreement under this section does not discharge the member signing such agreement from a debt arising under such agreement or under paragraph (1) of this subsection. This paragraph applies to any case commenced under title 11 after September 30, 1981.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"316. Special pay: engineering and scientific career accession bonus and continuation pay.".

RATE FOR MEALS PORTION OF PER DIEM FOR CERTAIN MEMBERS AWAY FROM DESIGNATED POST OF DUTY

SEC. 6. Section 404(b) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: "In prescribing such conditions and allowances, the Secretaries concerned shall provide that a member who is performing travel under orders away from his designated post of duty (other than a member on field duty or sea duty, as defined in regulations prescribed under section 402(e) of this title, or a member of a unit operating in an overseas area in a case in which the Secretary concerned has determined that unit messing is essential to the accomplishment of that unit's training and readiness) shall, whenever a per diem is authorized under clause (2) of subsection (d) of this section, be paid for the meals portion of that per diem in a cash amount at a rate that is not less than the rate established under section 1011(a) of this title for meals sold to members.".

TEMPORARY LODGING EXPENSES

SEC. 7. (a)(1) Chapter 7 of title 37, United States Code, is amended by inserting after section 404 the following new section:

"§ 404a. Travel and transportation allowances: temporary lodging expenses

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is ordered to make a change of permanent station to another station in the United States may be paid or reimbursed for subsistence expenses actually incurred by the member and the member's dependents during a period not exceeding four days while occupying temporary quarters incident to that change of permanent station.

"(b) Regulations prescribed under subsection (a) of this section shall prescribe average daily subsistence rates for purposes of this section for the member and for each dependent. Such rates may not exceed the maximum per diem rates prescribed by or under section 404(d) of this title for the area where the temporary quarters are located.".

(2) The table of sections at the beginning

of such chapter is amended by inserting after the item relating to section 404 the following new item:

"404a. Travel and transportation allowances: temporary lodging expenses.".

(b) Section 411(a) of such title is amended by inserting "404a," after "(d)-(f),".

ADVANCE PAYMENT OF CERTAIN TRAVEL AND TRANSPORTATION ALLOWANCES

SEC. 8. (a) Section 405(a) of title 37, United States Code, is amended by inserting after the second sentence in that section the following new sentence: "Such allowances may be paid in advance.".

(b) Section 406(a) of such title is amended by adding at the end thereof the following new sentence: "Travel and transportation allowances authorized by this section may be paid in advance.".

(c) Section 407(a) of such title is amended by adding at the end thereof the following new sentence: "An allowance payable under this section may be paid in advance.".

TRAVEL AND TRANSPORTATION FOR MEMBERS SERVING CONSECUTIVE ASSIGNMENTS OVERSEAS

SEC. 9. Section 411b(a) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "who is ordered to a consecutive tour of duty at the same duty station or" after "District of Columbia"; and

(3) by adding at the end thereof the following new paragraph:

"(2) If, because of military necessity, a member authorized travel and transportation allowances under this subsection is denied leave between the two tours of duty overseas, the member shall be authorized to use such travel and transportation allowances from his current duty station at the first time the member is granted leave.".

TRAVEL FROM ISOLATED DUTY STATIONS AND TRAVEL INCIDENT TO EMERGENCY LEAVE

SEC. 10. (a) Chapter 7 of title 37, United States Code, is amended by inserting after section 411b the following new sections:

"§ 411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service, while serving at a duty station abroad in an area specifically designated by the Secretary concerned for purposes of this section, may be paid transportation—

"(1) to another location abroad having different social, climatic, or environmental conditions than those at the duty station at which the member is serving; or

"(2) to a location in the United States.

"(b) The transportation authorized by this section is limited to payment for transportation of the member, and of each dependent of the member authorized to reside at the member's duty station, for one roundtrip during any continuous two-year tour and two roundtrips during any continuous three-year tour.

"§ 411d. Travel and transportation allowances: transportation for members stationed abroad and dependents incident to emergency leave

"(a) Under uniform regulations prescribed by the Secretaries concerned, roundtrip transportation for a member stationesd overseas and for dependents of the member authorized to reside at the member's duty station may be provided from the member's duty station to the United States or its possesions incident to emergency leave granted for reasons of personal emergency (or, in the case of transportation provided only for a dependent, under circumstances involving a personal emergency similar to the circumstances for which emergency leave could be granted a member).

"(b) Transportation under this section may be authorized only upon a determination that, considering the nature of the emergency involved, Government transportation is not reasonably available. Transportation authorized under this section shall be limited to the cost of Government-procured commercial roundtrip air travel from the international airport nearest the location of the member and dependents at the time notification of the emergency is received or the international airport nearest the duty station of the member and dependents in the overseas area—

"(1) to the international airport within the continental United States closest to the overseas airport from which the member or dependents depart; or

"(2) as determined by the Secretary concerned, to an airport within the United States or its possessions convenient to the uniformed service involved.

"§ 411. Travel and transportation allowances: travel performed in certain emergency situations

"Under regulations prescribed by the Secretaries concerned, a member of a uniformed service who is performing temporary duty away from his permanent duty station may be paid the travel and transportation allowances provided by section 404 of this title for travel performed from his place of temporary duty to his permanent duty station or to any other location, and return (if applicable), if such travel has been approved because of the serious illness or injury or the death of a dependent of the member. Travel and transportation to a location other than the permanent duty station of the member may not be paid under this section in excess of the amount for such travel and transportation to the member's permanent duty station, and return (if applicable).".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 411b the following new items:

"411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries.

"411d. Travel and transportation allowances: transportation for members stationed abroad and dependents incident to emergency leave.

"411e. Travel and transportation allowances: travel performed in certain emergency situations.".

UNIFORM ALLOWANCES AND ADVANCED PAY FOR MEMBERS OF THE ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM

SEC. 11. (a) Subsection (a) of section 415 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(4) upon reporting for the first period of active duty required by section 2121(c) of title 10, United States Code, as a member of the Armed Forces Health Professions Scholarship Program.".

(b) Section 1006 of such title is amended by adding at the end thereof the following new subsection:

"(i) Under regulations prescribed by the Secretary concerned, not more than one month's pay may be paid in advance to a member of the Armed Forces Health Professions Scholarship Program upon reporting for a period of active duty required by section 2121(c) of title 10.".

SPECIAL PAY FOR AIR WEAPONS CONTROLLERS ON AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) AIRCRAFT

SEC. 12. (a) Subsection (a) of section 301 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (9);

(2) by striking out the period at the end of clause (10) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new clause:

"(11) involving frequent and regular participation in aerial flight by an officer (other than a warrant officer) who is serving as an air weapons controller crew member, as defined by the Secretary concerned, aboard an airborne warning and control system aircraft, as designated by such Secretary, and who is not entitled to incentive pay under section 201a of this title.".

(b) Subsection (c) of such section is amended—

(1) by inserting "(1)" before "For the performance"; and

(2) by adding at the end thereof the following new paragraph:

"(2) For the performance of hazardous duty described in clause (11) of subsection (a) of this section, an officer is entitled to monthly incentive pay as follows:

| "Pay grade | "Years of service as an officer as computed under section 205 | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | 2 or less | Over 2 | Over 3 | Over 4 | Over 6 | Over 8 | Over 10 | Over 12 | Over 14 | Over 16 | Over 18 | Over 20 | Over 22 | Over 24 | Over 25 |
| 0-7 and above | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $200 | $110 |
| 0-6 | 225 | 250 | 300 | 350 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0-5 | 200 | 250 | 300 | 350 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0-4 | 175 | 225 | 275 | 335 | 400 | 400 | 400 | 400 | 400 | 400 | 370 | 340 | 310 | 280 | 250 |
| 0-3 | 125 | 156 | 188 | 206 | 400 | 400 | 400 | 400 | 400 | 400 | 350 | 300 | 300 | 275 | 250 |
| 0-2 | 125 | 156 | 188 | 206 | 250 | 300 | 300 | 300 | 300 | 300 | 300 | 300 | 300 | 275 | 220 |
| 0-1 | 125 | 156 | 188 | 206 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 250 | 200.". |

INCREASE IN NUMBER OF SENIOR RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIPS

SEC. 13. Section 2107(h) of title 10, United States Code, relating to financial assistance for specially selected members, is amended—

(1) by striking out "6,000" and inserting in lieu thereof "8,000"; and

(2) by striking out "6,500 and inserting in lieu thereof "9,500".

EFFECTIVE DATES

SEC. 14. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on October 1, 1981.

(b) The amendments made by section 7 shall take effect on April 1, 1982.

Amend the title so as to read: "An Act to increase the pay and allowances of members of the Armed Forces.".

Mr. BAKER. Mr. President, I move that the Senate disagree with the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon and

that the Chair be authorized to appoint conferees on behalf of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. LAXALT) appointed Mr. TOWER, Mr. JEPSEN, Mr. COHEN, Mr. QUAYLE, Mr. DENTON, Mr. STENNIS, Mr. EXON, Mr. HARRY F. BYRD, JR., and Mr. NUNN conferees on the part of the Senate.

## ORDER HOLDING H.R. 3136, THE OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENT ACT OF 1981, AT THE DESK

Mr. BAKER. Mr. President, I ask unanimous consent that the House message, H.R. 3136, the Overseas Private Investment Corporation Amendment Act of 1981, be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

## THE CULTURAL LAUREATE PROGRAM

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Resolution 118, a resolution commending the cultural laureate program, and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 118) commending the cultural laureate program.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution? There being no objection, the Senate proceeded to consider the resolution.

The question is on agreeing to the resolution.

The resolution (S. Res. 118) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 118

Whereas the Senate should seek means to advance the best interests of all the people of the United States; and

Whereas, in our history of taming a continent and building a great industrial society, our citizens have shown a continuing dedication to both the quality of life and excellence in achievement; and

Whereas, by the public recognition of achievement, our society reaffirms the greatness of our people and encourages continued striving toward that excellence in every walk of life which has made our country the most powerful nation in the world; and

Whereas there now exists a cultural laureate program which enables the people of each State and territory to honor fellow citizens for their outstanding achievements and provides for national recognition by the public of the exceptional accomplishments of the people; and

Whereas the cultural laureate program belongs to the people and operates without any requirements for either State or Federal funding: Now, therefore, be it

*Resolved*, That the Senate commends the cultural laureate program as being in the best interest of all the people and encourages establishment of the laureate in each of the various States and territories and in the Nation so that the people of the United States can fully and appropriately express their commitments to excellence.

SEC. 2. When the cultural laureate becomes truly national in scope, the Senate recommends public recognition of those citizens nominated by the people and selected for honor by groups of their peers to the end that all the people of the world shall know that the greatness of America is firmly based upon the achievements of individual Americans.

## DESIGNATION OF THE SQUARE DANCE AS NATIONAL FOLK DANCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 59, designating the square dance as the national folk dance of the United States. and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. J. Res. 59) designating the square dance as the national folk dance of the United States.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time at length, and the Senate will proceed to its consideration.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the RECORD show the following cosponsors:

COSPONSORS OF SENATE JOINT RESOLUTION 59

Senators Baker, Heflin, Baucus, Ford, Goldwater, Abdnor, Boren, Burdick, Garn, Huddleston, Inouye, Levin, Schmitt, Bumpers, Dixon, Moynihan, Nunn, Proxmire, Riegle, Sasser, DeConcini, Denton, Thurmond, Lugar, Cranston, Dole, Exon, and Domenici.

The PRESIDING OFFICER. Without objection, it is so ordered.

This a tremendous piece of legislation.

Mr. BAKER. A momentous piece, especially in view of the fact that the square dance is also the State dance of my native State of Tennessee.

Mr. ROBERT C. BYRD. Mr. President, I introduced this resolution some time ago and made an appropriate comment at that time. I wish to thank all cosponsors for the support that they have given to the manager.

I wish to thank the members of the Judiciary Committee for their cooperation and consideration.

I wish to thank the distinguished majority leader for moving to discharge the committee at this time and to proceed to the consideration of the resolution.

There are a goodly number of square dancers in town at this time coming from all parts of the United States, and I think this is a very appropriate moment to consider the resolution and to act on it.

Mr. BAKER. Mr. President, I wish to take this opportunity to commend the minority leader for his initiative in bringing this matter to the attention of the Senate and most especially for arranging to have the matter discharged and brought before the Senate at this time. I am delighted to join with him as cosponsoring this resolution and urging its adoption by the Senate.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader again.

The joint resolution (S.J. Res. 59) was considered, ordered to a third reading, read the third time.

The preamble was agreed to.

The joint resolution (S.J. Res. 59), with its preamble, was passed as follows:

S.J. RES. 59

Whereas square dancing has been a popular tradition in America since early colonial days;

Whereas square dancing has attained a revered status as part of the folklore of this country;

Whereas square dancing is a joyful expression of the vibrant spirit of the people of the United States;

Whereas the American people value the display of etiquette among men and women which is a major element of square dancing;

Whereas square dancing is a traditional form of family recreation which symbolizes a basic strength of this country, namely, the unity of the family;

Whereas square dancing epitomizes democracy because its dissolves arbitrary social distinctions; and

Whereas it is fitting that the square dance be added to the array of symbols of our national character and pride: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the square dance is designated the national folk dance of the United States of America.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## AUTHORIZATION FOR ENROLLING CLERK TO MAKE CHANGES IN SENATE JOINT RESOLUTION 4

Mr. BAKER. Mr. President, I ask unanimous consent that the enrolling clerk be authorized to make changes in Senate Joint Resolution 4 reflected on the attached copy of the bill, and I send the corrected copy to the desk.

The PRESIDING OFFICER (Mr. LAXALT). Without objection, it is so ordered.

## AUTHORITY FOR THE COMMITTEE ON VETERANS' AFFAIRS TO FILE A REPORT ON S. 266 NOT LATER THAN SEPTEMBER 29, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Veterans' Affairs be granted an extension of time and permitted to file a report on S. 266 not later than September 29.

The PRESIDING OFFICER. Without objection, it is so ordered.

## LEGISLATIVE PROGRAM FOR THE NEXT SEVERAL DAYS

Mr. BAKER. I would point out that the Senate will convene at 9:30 tomorrow.

May I ask the Chair is that correct, is that the order to that effect?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I point out that the Senate will convene at 9:30 a.m. tomorrow.

After the recognition of the two leaders under the standing order, the Senator from Wyoming (Mr. WALLOP), the distinguished chairman of the Ethics Committee, will be recognized under a special order for not to exceed 5 minutes.

I anticipate tomorrow there will be a request for time for the transaction of routine morning business which will be provided after the discharge of those times.

The Senate at 10 o'clock will be asked to begin consideration of the continuing resolution, assuming that that measure has reached the calendar at that time, which we anticipate. That will be done pursuant to the order previously entered authorizing the majority leader, after consulting with the minority leader, to proceed to the consideration of that measure in that manner.

At 12:30 p.m. tomorrow, assuming the Senate is then considering the continuing resolution, which I expect, under the order previously entered, the Senate will temporarily lay aside the continuing resolution and resume consideration of the foreign assistance bill, S. 1196.

At 1 p.m. tomorrow two rollcall votes will occur, the first to be 15 minutes in length to be followed immediately back to back or by a second of 10 minutes on the two measures on which the yeas and nays were ordered today.

At the expiration of the time for those two votes the Senate will resume consideration under the order just entered of the continuing resolution.

I anticipate that the Senate will be in late tomorrow. I hope we can finish consideration of the continuing resolution on Thursday. If we do not I expect we would resume consideration of that measure on Friday.

I hope we make good progress on the continuing resolution and that it will not be necessary to remain late on Friday or to consider the possibility of a Saturday session. I do not anticipate such a request at this time.

Mr. President, it is my hope we can begin consideration of the debt limit extension bill—I am speaking of the so-called larger of the two bills—on Monday. I will have further statements to make in respect to the schedule of the Senate as the other factors appear.

## ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further business to transact before the Senate. I will inquire of the distinguished minority leader if there is any other matter he wishes to take up at this time?

Mr. ROBERT C. BYRD. Mr. President, the distinguished majority leader is very thoughtful in asking the question. I have no other business.

Mr. BAKER. I thank the minority leader.

## RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I now move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m. on tomorrow.

The motion was agreed to; and the Senate at 6:36 p.m., recessed until Thursday, September 24, 1981, at 9:30 a.m.

# HOUSE OF REPRESENTATIVES—*Wednesday, September 23, 1981*

The House met at 10 a.m.

The Reverend Dr. James E. Gunther, Transfiguration Lutheran Church, New York, N.Y., offered the following prayer:

Good Lord, somehow, somewhere, something's gone wrong—in our families; in our Nation; and in our personal lives as representatives of all the people. We pray for divine wisdom, support, and guidance upon the Members of this House as they seek to deal with the growing unrest and lack of trust by the working classes, the disenfranchised, and the rich; the global concern and effects of extremely high interest rates on us all; the attempt to balance a national budget or stabilize a nation's economy on the backs of the neglected and the rejected, because we want to be true to our Creator and the great principles upon which our Nation has been built. Grant good Lord to each Member of the House of Representatives, of this great Nation, a tough mind and a tender heart that cares and is committed to liberty and justice for all—regardless of the cost. Because You have revealed Your will in Abraham, Isaac, Jacob, Mohammed, and Jesus Christ, our Lord. Amen.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 618. An act to convey certain interests in public lands to the City of Angels, Calif.; and

H.R. 2218. An act to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2903. An act to extend by 1 year the expiration date of the Defense Production Act of 1950.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 764. An act to provide for protection of the John Sack Cabin, Targhee National Forest in the State of Idaho; and

S. 1475. An act to extend the expiration date of section 252 of the Energy Policy and Conservation Act.

The message also announced that the Presiding Officer, on behalf of the minority leader, pursuant to Public Law 96-114, appointed the Honorable John Y. Brown, Governor of Kentucky, as a member of the Congressional Award Board, vice the Honorable John D. Rockefeller IV, resigned.

## REV. JAMES E. GUNTHER

(Mr. RANGEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RANGEL. I thank the Speaker for affording me this opportunity to welcome to this House Pastor Gunther. During the hard economic times that we are witnessing now, expect to continue in the future of this Nation, my community is blessed to have a spiritual leader whose church is one of those within my congressional district.

The beautiful thing about Pastor Gunther's stewardship is that he recognizes that not only do communities need spiritual leadership, but they need shelter, they need food, they need nutrition, and in all of these areas Pastor Gunther has given of his time, himself, and his church. He has constantly supported policies that would make life a lot better for the poor and disadvantaged of this Nation.

I am proud that he serves so well in my community, not only spiritually but in developing housing, in the Harlem Urban Development Corporation, and with so many worthwhile community organizations.

I thank him for his prayers, his thoughts, and the advice he shares with us today.

I thank the Speaker.

## FISCAL RESPONSIBILITY OF THE HOUSE

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time to give a brief report of the fidelity of the House to the goal of fiscal responsibility.

As of today, the Appropriations Committee has reported a total of 11 appropriations bills. The House has passed nine of them. One of these has passed in the final form of a conference committee report. One additional bill has been reported by the subcommittee but not reported by the full committee.

This accounts for the entire budget, save and except only for the military appropriations bill for the Department of Defense.

When we count all of these bills that have been reported by the full committee, and even the one reported by the subcommittee of the Appropriations Committee, eight of them already passed by the House, we come to the bottom line that in both mandatory and discretionary expenditures they are $3 billion, $552 million below the amounts requested in spending authority by the President in his March request to Congress.

The total of Presidential budget authority requests for these 12 categories of spending is $241.9 billion. House action on the same 12, which include the Labor-HHS bill still pending before the full committee, comes to a total of $238.4 billion.

So, independent of what happens in connection with the President's expected request of tomorrow night for further reductions below his original defense figures, already the House in every other expenditure, totaling them together, is $3½ billion below the aggregate request for spending authority that the President sent to us in March.

## CONVERSATION WITH THE PRESIDENT

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, if I could talk to the President today, I would like to say the following.

Mr. President, there are times when it takes a great deal of courage to change one's mind. You can demonstrate this courage on your television address to the Nation tomorrow night. There are two issues that you have been advised by your staff to support and fight for. One is to reduce benefits for those presently on social security, and the other is to insist on the sale of the AWACS to the Saudi Arabians.

Mr. President, both of these efforts will go down to defeat in the Congress. There is no joy in defeating the President of the United States on issues like these, particularly when there are other ways of solving the problems.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The American people will support their Government as long as they feel there is hope and they are being treated fairly.

Do not dodge the real solution to contain the budget, Mr. President. That solution is deferring the slanted and unreal tax cuts that you have asked for. Give us all hope, Mr. President, and change your mind.

## FAMILY FARMERS WANT FREE MARKET AND DECENT PRICES

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, the family farmers in North Dakota and across America are looking to Congress for a farm bill this year. They really want a free market and a decent price for their product. But unfortunately the market is not free and their product prices are painfully low.

The Senate passed a farm bill last week, but it is not a good farm bill and it will not provide the price supports that are necessary for family farms. I just cannot vote for that kind of legislation.

The word here is that the administration wants to keep support prices low and rely instead on the free market. Well, that is nonsense. There is not a free market in agriculture.

Our allies impose tariffs on our wheat and our Secretary of State, Mr. Haig, threatens our export markets, for foreign policy purposes. That is not market freedom.

Also, there are others who are meddling in farm policy here in Washington, D.C. Director of the Office of Management and Budget David Stockman would not know a razorback hog from a pickup truck. But from his budget perch, I think Mr. Stockman is playing a much larger role in shaping the farm bill than is the Secretary of Agriculture.

Mr. Speaker, I think the President ought to get Mr. Haig and Mr. Stockman out of agriculture policy and begin relying on his Secretary of Agriculture. And, I hope this Congress begins to draft a farm bill that makes some sense. Farmers are not looking for handouts. They just want a chance, and we should be passing a farm bill that gives them that chance.

## IT ALL COMES OUT OF THE SAME POCKETS

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, I was shocked to read in the papers the other day that the Reagan administration is considering a phaseout of the revenue-sharing program—a 10-year program in Federal-local cooperation that has more than proven its worth.

As my colleagues will remember, Mr. Speaker, revenue sharing was designed to correct the traditional imbalance between the taxing authorities of the Federal and local governments. By returning Federal revenues to the localities, the program did help to correct that imbalance—and it gave hard-pressed towns and cities in Connecticut and across the country a critical source of aid.

In my own district, Mr. Speaker, revenue sharing has made a $9.6 million annual difference in local property taxes. It has freed local taxpayers from an additional 1- or 2-mill yearly burden.

If we take away this program, sure as we are standing here, the burden will simply be shifted to the local property taxpayer and the taxpayers in the Waterburys, Meridens, Danburys, Trumbulls, and Seymours of our country will be squeezed just as hard in a different pocket.

The money all comes out of the same pockets, Mr. Speaker, the pockets of taxpayers in our towns and cities. If this Government is truly concerned about efficiency, about keeping programs that work, it should work to keep revenue sharing.

## SOCIAL SECURITY CUT IS WRONG

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SYNAR. Mr. Speaker, let me take a minute to comment on President Reagan's proposal to cut next year's social security cost-of-living adjustment.

First, I want to express my heartfelt belief that this cut is wrong. President Reagan has decided to delay his much-heralded speech announcing his new round of budget cuts until tomorrow—instead of tonight—while he and Dave Stockman decide what to do. We know they are considering cutting next year's social security cost-of-living adjustment, and I want to encourage Mr. Reagan to reject that ill-conceived idea. Thirty-six million senior citizens and handicapped persons have that COLA as their sole protection against inflation; their 1980 benefit averaged $341 per month; and this is a benefit they have earned.

Mr. Speaker, this COLA change is no delay as it has been advertised; it is as mean-hearted a cut as we have seen. This past Monday, I had the opportunity to discuss this cut with Mr. Robert Myers, Social Security Deputy Commissioner for Programs, at a House Select Committee on Aging subcommittee hearing. Let me quote from the official record:

Mr. SYNAR. But did you admit, for all practical purposes, that we are sweeping three months inflation under the rug and that the cost-of-living recipients will lose it once and for all and never retain it, right?

Mr. MYERS. That would be the effect of the proposal, yes.

## DEFENSE CUT WAY TOO SMALL

(Mr. ADDABBO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ADDABBO. Mr. Speaker, there are literally hundreds of worthwhile programs being cut back in the fiscal 1982 budget because of the decision of the administration to cut back in spending. Tomorrow night President Reagan will address the Nation with further proposals for cutting back Federal spending. We are told that in his remarks he will recommend a cut back in defense spending of 2 percent. That is a figure, Mr. Speaker, that I believe is way too small, both to satisfy the requirements of our national needs other than defense and in the defense system itself, which cannot efficiently absorb a $50 billion increase in spending in a 12-month period. A 2-percent decrease of the projected Reagan budget would still mean the single largest annual increase in defense spending in our country's history. I believe we could cut from $7 to $10 billion of that budget without harming vital programs, if we cut that budget by one-half of 1 percent and transferred those savings somewhere else. For instance, transferring that money to the Department of Labor to establish an economic conversion and plant or base closing fund, which would distribute moneys to official State and local economic development and planning agencies, we would create a major impact on civilian-oriented productive activity.

A program such as this would provide a cushion for thousands of American workers employed by companies whose contracts with any Federal agency are canceled, terminated, cut back, or transferred to other areas or where bases are closed. The loss of one-half of 1 percent in the defense budget would not effect greatly the Pentagon's abilities to buy paper clips but that vast amount of money is a literal lifeline for thousands of American workers. A similar case could be made in terms of education, or in benefits to elderly, disabled, or handicapped. The same could be said in hundreds of other programs, which have been cut back so that we may feed the ever-growing appetite of our military. The time has come to make sure that we consider all of our Nation's priorities, not just those which relate to military spending.

## UNITED STATES MUST HAVE STRONG CIVIL DEFENSE

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, I wish to call the Members' attention to the special order I have requested in the House on Thursday, October 1, on the subject of our Nation's civil defense. In the past 3 years this body has gone far to establish a firm foundation for civil defense as part of our overall defense strategy, but we are no where near complete. The U.S. Congress has recognized that our potential enemies do not subscribe to the policy of mutually assured destruction, so they are taking action to insure their survivability. We have not answered their resolve with our own commitment. Congress has said the United States must have a strong civil defense, but we have not completed our work. This body is still providing Americans only token civil defense funds. I am sure that the Members are concerned, as I am, that in the face of climbing budget deficits and promised defense spending reductions, this Nation's civil defense could be swept back into the closet.

I welcome active participation on Thursday, October 1, and in the future to keep civil defense a vital and necessary part of our defense spending.

## LET'S TAKE ANOTHER LOOK AT REAGANOMICS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, no sector of our economy has been hit harder by higher interest rates than the timber and housing industries. Both are teetering on the edge of financial calamity as we edge closer into the first Reagan recession.

I received a letter today from an insurance agency in Arkansas pleading with me to ask Congress to take another look at Reaganomics. The writer said that while he was once misled by the supply-side idiots which have surrounded the President, he can no longer agree with the premise of this administration "that capitalism without failure is like Christianity without hell."

□ 1015

## REAGAN ECONOMIC PROGRAM FAVORS THE RICH

(Mr. FROST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, a very interesting thing is starting to happen across the country. The general public, and even some Republicans, have awakened to the fact that President Reagan's economic program favors the rich rather than the poor and the middle class—something many of us in the Democratic Party have been saying for months.

The latest evidence of this awakening is the Washington Post-ABC poll which appears in today's edition of the Post. Those polls were asked a very straightforward question:

> Overall, would you say Reagan cares more about serving poor and lower income people, middle income people, upper income people . . . or would you say he cares equally about serving all people?

The answer is devastating. Fifty-two percent of those polled said President Reagan favors upper income people, and only 8 percent said he favors the middle class. Just 35 percent said he favors all people equally. Clearly the public now understands the effect of the massive tax cut that Congress passed this summer, which was skewed in favor of the wealthy. Even some Republicans in Congress are getting nervous about the administration's approach to taxes and budget cuts.

Congressman JIM LEACH, who chairs the Republican RIPON Society, released his Moderate Manifesto this week challenging many of the principles underlying the President's economic program. Representative LEACH said the tax bill is overly generous to the rich, and questions the thrust of the administration's domestic budget cuts.

Mr. Speaker, the President's economic program is clearly being viewed more critically now than it was in the past, and that reappraisal cannot be dismissed as partisan politics if Mr. Reagan's own party and the general public are questioning his commitments to all groups in our society.

## ADMINISTRATION'S BUDGET DEFICITS AND TIGHT MONEY POLICY ARE DRIVING AMERICAN SMALL BUSINESS INTO BANKRUPTCY

(Mr. FITHIAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FITHIAN. Mr. Speaker, the administration's big budget deficits and tight money policies are driving up interest rates and driving American small business into bankruptcy.

Shocking figures released earlier this month by Dun and Bradstreet demonstrate just how hard small business has been hit by economic policies being pursued by this administration.

> During the first eight months of 1981 11,076 American small businesses closed their doors for the last time, a staggering 317 businesses per week. The figure is half again last year's disastrous level.

> Not only are more businesses going under, they're going down carrying bigger debts. During the first quarter of 1981, liabilities carried by businesses which failed exceeded $1.6 billion, a 33-year high.

In the face of these disastrous economic statistics, we in Congress have no option but to get on with the job of balancing the Federal budget and—in so doing—bringing down high interest rates. Repealing the tax relief package for "Big Oil"—an integral part of the administration's tax program—is a good place to start.

## THE EUROPEAN COMMON MARKET ENGAGES IN PRICE DUMPING OF SUGAR

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, the most blatant example of price dumping occurring in world trade today involves one of the basic staples in the American diet—sugar. This year alone, the European Common Market will dump a total of 4.3 million metric tons of sugar onto the world market.

The Common Market does not operate under free market conditions. If the Common Market did not heavily subsidize sugar, the sugar industry could not compete on the open market. Only through an elaborate system of production subsidies can the Common Market stimulate production to satisfy its own needs and have an excess production of 4.3 million tons for the export market. These subsidies guarantee growers 27 cents per pound in their domestic market; that is approximately 16½ cents above the current world price. The Common Market has changed from a net importer of sugar in 1975 to the largest free market exporter of sugar in the world. This change was the direct result of Common Market policies of heavy price subsidies for their growers—price subsidies which allow the Common Market to dump excess sugar on the world market at prices well below the cost of production.

Sugar-producing nations have argued long and hard against marketing policies of this kind. In the United States, a petition is currently before the U.S. Trade Representative. This petition alleges that Common Market countries have unfairly increased their share of world export trade in sugar through heavily subsidizing their sugar exports. Common Market policies which unnaturally depress the price of sugar in the world and domestic market cannot be tolerated. Only if domestic growers of beet sugar and sugar cane are granted the modest loan program in the House bill will this important domestic industry be protected from the kind of price ma-

nipulation routinely practiced by the Common Market.

I urge my colleagues to support the sugar loan program in the farm bill.

## A SPECIAL ORDER CALL TO DISCUSS CURRENT ECONOMIC POLICIES AND HIGH INTEREST RATES

(Mr. BONKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONKER. Mr. Speaker, I want to bring to the attention of my colleagues that PAT WILLIAMS and I have called a special order this afternoon to focus the House on the grave problems that current economic policies and high interest rates are causing in the country.

For as we know all too well in the Pacific Northwest, the economic program is not working. The housing industry is at a standstill. Unemployment is rising—in some areas of my district it is reaching 30 percent.

This afternoon I will be putting into the RECORD statements from a broad spectrum of labor and business leaders outlining the disastrous effects of current policies. I have statements from small business in my State; from an unemployed woodworker in the Northwest; a letter from the national homebuilders expressing alarm and concern about today's deteriorating economic conditions and the effects of prolonged high interest rates.

It is altogether fitting that the House should focus its attention this afternoon on these problems. I would like to invite my colleagues, especially those who are concerned about high interest rates, housing and unemployment problems, to participate in this session.

## REAGAN'S HIGH INTEREST RATES: THE OBSTRUCTIONISTS STRIKE AGAIN

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, during consideration of the President's so-called economic recovery program, one of the terms that gained great popularity among the program's supporters was "obstructionist."

The obstructionists were those Members who dared utter any word or make any sign of resistance to the Presidential steamroller. It did not matter what the basis of their concerns or questions was. Any discussion of the program was obstruction aimed at frustrating the so-called mandate of the American people.

Well, questions that could not even be asked then are being answered now. It seems, after all, that when tax cuts plus defense spending hikes exceed budget cuts, the deficit increases, forcing increased Federal borrowing, and keeping interest rates sky high.

So the news is that Wall Street does not have faith in the President's program, that the big banks are keeping the prime rate around 20 percent, and that the housing industry is depressed.

I am really curious Mr. Speaker. Does the administration now consider those people obstructionists?

## HIGH INTEREST RATES ARE KILLING US

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, these high interest rates are killing us, and I would like to take just a few moments today to talk about a measure I have introduced aimed at bringing credit back to Earth.

As some of you may know, in the other body, Senator BENTSEN has introduced a resolution aimed at getting interest rates in this country back where they belong—down. Senator BENTSEN feels that a major reason for the dangerously high interest rates afflicting us today is the great amount of available credit which is sopped up by huge corporate mergers and market speculation.

I applaud Senator BENTSEN's efforts in this matter. He is a successful businessman, and for a smalltown boy from Mission, Tex., he's not a bad "shade tree economist," either.

And, Mr. Speaker, I happen to agree with him on this. Now, when giant companies absorb every drop of credit in sight, it only serves to worsen the hardship on people who really need loans. When Du Pont bought Conoco recently, the merger did not create any new jobs, it did not invest the economy with new vigor, it did not even create a more efficient business operation. But it did dry up a lot of capital, perhaps $4 billion worth, that could have gone to more productive purposes—to farmers, or homebuilders, to home buyers, or small business. These people, who would put the money back into the economy and meanwhile expand the job market and create usable services, cannot get loans because the money is not there, or is too expensive to borrow—driven up by the unwise lending practices of a few mammoth banks.

My resolution seeks to complement Senator BENTSEN's efforts to have the Federal Reserve pull a tighter rein on leading banks, to undertake a "jawboning exercise" aimed at convincing its members not to contribute to the inflationary spiral.

It is not our business to tell this or that company they should not own this or that other business. But now, at a time when thousands of small businesses are going under for lack of simple loans—now is not the time for us to be financing huge, unproductive corporate takeovers. You don't use your eggs for baking cakes when the family's got nothing for breakfast.

I hope many of my colleagues will lend their help in this by publicly or privately expressing their support.

## ECONOMIC SANCTIONS FOR DRUG TRAFFICKING

(Mr. CARMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARMAN. Mr. Speaker, I will today introduce a sense of the House resolution urging the President and Secretary of State to impose economic sanctions, including foreign aid limitations, on countries that allow the production and exportation of drugs to the United States.

Some months ago in my district I held hearings concerning crime on Long Island and in the New York metropolitan area. The testimony presented underlined the seriousness of a problem we all know is a national tragedy. Drug trafficking has reached epidemic and unacceptable level. This resolution is not a solution, but it does represent a major step. No law in this country will protect our children and families unless we can cut the supply at the source.

| Leading illegal drug producers | Amount of U.S. aid (in millions) | |
|---|---|---|
| | 1981 | 1982 |
| 1. Pakistan (proposed for 1982–86) | 0 | $3,260 |
| 2. Thailand | $24 | 50 |
| 3. Peru | 36.7 | 32 |
| 4. Burma | 4 | 7.5 |
| 5. Bolivia | 1 | 4.5 |
| 6. Colombia | 0 | 0 |

Passing this resolution will make a crucial step toward effective action, and if successfully implemented will provide an important stimulus necessary for the United States to spur drug exporting nations toward real efforts at control I urge your cosponsorship.

## FOR WHOM THE POST POLLS

(Mr. DREIER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, the Washington Post and ABC News recently conducted a public opinion poll concerning President Reagan's popularity. The Post reports today that what it called a strong plurality—47 percent—thinks the President has gone too far in his budget cuts.

But the poll itself shows that a strong plurality—49 percent—believes

the President is either doing the right thing or that even more cuts are needed.

Why the Post did not tell us on the front page of the plurality that favors the President is one of those journalistic mysteries laymen are not give to understand.

But even if a plurality was against the President—which it is not—it would be no surprise considering the well-financed propaganda war the Democratic leadership is waging.

They play partisan politics the way Van Cliburn plays the piano. They are virtuosos of criticism.

But the Democratic leadership has no program, no policy, no answers.

I hope the Post takes a poll on this question: "Would you like to see Jimmy Carter back in the White House?"

I rest my case.

## AIR TRAFFIC CONTROLLERS SHOULD BE GIVEN BACK THEIR JOBS

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, the air traffic controllers situation grows more intolerable with each passing day.

Contrary to administration and airline industry claims, the patchwork system is not performing. I know because I sat in a plane on the runway at La Guardia Airport yesterday for over 1½ hours. Consequently, I missed three important votes on the floor.

The administration has proven that it will not hesitate to exercise its authority to dismiss striking Federal employees. But it has also shown a demonstrable lack of foresight at the same time. How else can they explain the confusion and disorder that has been inflicted upon the traveling public or the disruption of the Nation's businesses.

The administration has confronted the union and apparently won. But the victory is a shallow one because the air traffic control system is nowhere near its prestrike efficiency or safety. That is why I urge the President to recall the striking controllers and resume negotiations immediately.

□ 1030

## DELAY IN SOCIAL SECURITY COST-OF-LIVING INCREASES FIRST PROPOSED BY HOUSE DEMOCRATS

(Mr. WALKER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, when President Reagan proposes the new round of budget cuts, I for one would hope that such cutting program does not include a delay in the social security cost-of-living increases next year, and that would be my recommendation to him.

But I think it is also important to realize where that proposal first came from, because it was language in the budget bill brought to this floor by TIP O'NEILL, JIM WRIGHT, and JIM JONES earlier this year that first proposed to the Nation that we delay the cost-of-living increase for 3 months for social security recipients next year. Hearing that same leadership now vilifying the President for considering such a proposal is to see a perfect example of talking out of both sides of one's mouth.

Mr. Speaker, I would hope the American people would recognize that the Democrats' protests on the subject of social security are too often classic cases of political double-speak.

## ECONOMIC WOES LAID ON PAST ADMINISTRATION

(Mr. LUNGREN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, as one listens to the 1-minute speeches, I think one has to be reminded of a criticism that is rendered against our educational system, and that is that we lack the real understanding and appreciation of history. Without such a historical vacuum, I do not see how it could be that Members could come to the floor and condemn this President's economic policies, forgetting for the moment that those policies are yet to go into effect.

By my calendar it is still September 23. The effective date for virtually the entire economic proposal is October 1. The speakers seem to be having some difficulty remembering a period of time when double-digit inflation was unheard of. I remember a spokesman for the previous administration saying to those of us who suggested that if we followed their proposals, we would have double-digit inflation that that was absurd, that we were trying to scare the American people.

So what have they wrought? They have given us 2 years of back-to-back, double-digit inflation, with a Democratic leadership in the House and Senate and a Democratic administration. Two years of back-to-back, double-digit inflation. We have never had that before in the history of the United States. And we have had the highest interest rates in the history of the Nation since the Civil War.

Now, did that come about during this administration? No, it was the previous administration.

Mr. Speaker, it took a long time to get us into that mess. It is going to take us more than the August recess to get us out of it.

## NEW IDEAS FOR INCREASING FOREIGN LANGUAGE SKILLS

(Mr. COLEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN. Mr Speaker, I think it goes without saying that America's foreign language capability is poor and getting worse. Stories and reports abound at our Nation's perilous position in defense, commerce, and intelligence gathering by not having adequately trained military personnel, businessmen, and attachés. Our business leaders are losing out to the Japanese and others because they lack the language skills to deal with them face to face. Ditto our military and intelligence people. And how many times have you read that the Iranian takeover of our Embassy in Tehran might have been avoided if our Embassy personnel were more in touch—that is, speaking with—the Iranians in the street. Does not it bother you that when you meet heads of state from other countries here in Washington or elsewhere that you cannot even say, "Hello, how are you?" much less converse in their native language, but that they speak perfect English, and maybe French, Spanish, Italian, German, and Japanese, too?

It is time for us to come out of our shell and catch up with the rest of the multilingual world. And we, as Members of Congress who are very visible and have many opportunities to meet foreign dignitaries, must increase our capability for language.

Through an agreement with the Foreign Service Institute of the Department of State, classes in foreign language study will be offered to Members of Congress. These classes will be held on Capitol Hill and a schedule arranged so that a maximum number of Members can be accommodated. I hope you will seriously consider learning or updating your knowledge of a second language. If you are interested, please call my office by Friday.

Perhaps we as a group can begin setting an example for others in our country to make an effort at crossing cultural lines and enriching our personal knowledge as well as that of our Nation.

## NO ALTRUISM SEEN IN SAUDI OIL POLICY

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, in defending its proposal to sell AWACS to Saudi Arabia, the administration has asserted that Saudi oil pricing "could be interpreted as subsidizing Western purchases of oil."

However, few other observers of Saudi oil pricing policy adhere to the belief that the Saudi's recent refusal to boost oil prices was an act of sheer altruism toward the West. Saudi oil price policy—according to Saudi Oil Minister Yamani himself—is motivated by Saudi economic interests only. A close look at the Saudi economy reveals that Saudi Arabia's long-term interests are based on a consistent but slow marketing of its vast oil reserves. As Yamani himself stated earlier this year, Saudi Arabia cannot allow the price of oil to rise so high that it will force increasingly conservation-minded energy consumers to develop alternate sources of fuel. The Saudis' determination to make the most money they can as fast as possible while protecting their enormous share of the oil market is also a rational policy for a regime whose own future is uncertain. One Saudi professor claims, "People feel they must race to make money before the oil is gone. They put it outside, in Brazil, in London, New York, so it will grow and if necessary they can join it."

In any case, Saudi oil policy can hardly be viewed as altruistic and deserving of military favors. If you believe that, in the words of the Wall Street Journal, "you're still waiting for the tooth fairy."

## E. MICHAEL ROLL POST OFFICE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the bill (H.R. 4431) to provide for the designation of the E. Michael Roll Post Office, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. PEYSER). Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4431

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, as soon as practicable after the date of the enactment of this Act, the Postmaster General shall—

(1) designate the post office located at 6400 Marlboro Pike, Forestville, Maryland, as the "E. Michael Roll Post Office"; and

(2) install in such post office, in a place in open view of the public, an appropriate plaque indicating the designation of the post office pursuant to this Act.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. FORD) is recognized for 1 hour.

Mr. FORD of Michigan. Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. HOYER).

Mr. HOYER. Mr. Speaker, at this time I would like to thank the chairman of my committee, the Committee on Post Office and Civil Service, the gentleman from Michigan (Mr. FORD), and the ranking minority member of that committee, the gentleman from Illinois (Mr. DERWINSKI), for the courtesies they have extended to bring this bill to the floor as rapidly as they have.

Mr. Speaker, I introduced this legislation calling upon the Postal Service to name its new facility in District Heights—Forestville after the late E. Michael Roll, the long-time mayor of District Heights, Md. I do this because of his tremendous work in the development of his community.

For 24 years Mike Roll led his city with a vitality not often seen in municipal government. It was he who provided the impetus for the postal facility, as he did for so many projects in his city. His achievements are many and it is a fitting tribute that we name the post office for him.

I know of no one in his community who was more loved or respected. He was always a source of inspiration for young people looking forward to a career in Government and politics, and he was an example of the kind of dedicated public leader we strive for in Government.

The realization of this honor unfortunatley will occur after his death.

I am very pleased, Mr. Speaker, that as a result of this bill a post office will be named in honor of E. Michael Roll—this is a fitting tribute to a great and good man.

Mr. Speaker, I yield back the balance of my time.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill H.R. 4431, now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. FORD of Michigan. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## RE-REFERRAL OF EXECUTIVE COMMUNICATION NO. 2099 TO COMMITTEE ON GOVERNMENT OPERATIONS

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from the further consideration of executive communication numbered 2099, and that it be re-referred to the Committee on Government Operations.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. WALKER. Mr. Speaker, reserving the right to object, I take this time simply to ask the gentleman what the nature of the executive communication is.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am pleased to yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, the communication, which transmitted draft legislation extending the period for payment of subsistence expenses to certain Government employees, amended provisions of the United States Code within the jurisdiction of the Committee on Government Operations. This request corrects the error in the referral.

Mr. Speaker, it would actually call upon us to take action within the jurisdiction of the Committee on Government Operations. We are trying to hand it back to the desk so it would go to the appropriate committee.

Mr. WALKER. Mr. Speaker, further reserving the right to object, this is acceptable to the minority, as I understand it?

Mr. FORD of Michigan. Yes, it is.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## INTELLIGENCE IDENTITIES PROTECTION ACT

Mr. MOAKLEY. Mr Speaker, by direction of the Committee on Rules, I call up House Resolution 223 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 223

*Resolved,* That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4) to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying certain United States intelligence officers, agents, informants, and sources, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Permanent Select Committee on Intelligence, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Permanent Select Committee on Intelligence now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. No amendment to the

bill or to said substitute shall be in order except germane amendments printed in the Congressional Record on or before September 22, 1981. At the conclusion of the consideration of the bill for amendment, the committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the usual 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 223 is the rule providing for the consideration of the bill H.R. 4, the Intelligence Identities Protection Act. It is a relatively simple rule, Mr. Speaker. It is an open rule providing for 1 hour of general debate. It makes in order the committee amendment in the nature of a substitute as an original bill for the purpose of amendment. And, Mr. Speaker, because the language in this bill must be written carefully in order to avoid any constitutional problems, the Intelligence Committee thought, and the Rules Committee agreed, that it would be a good idea to have amendments printed in advance in the RECORD. As a result, the rule requires that any proposed amendment must have been printed in the CONGRESSIONAL RECORD on or before September 22, 1981.

Mr. Speaker, the primary purpose of this bill, the Intelligence Identities Protection Act, is to impose criminal penalties on those who publish the names of our covert agents. Such exposure, Mr. Speaker, is a serious offense, which poses life-threatening risks to the agents themselves, in addition to the damage it does to the security interests of the United States.

One would hope, Mr. Speaker, that there would be no need for this kind of legislation. Unfortunately, that is not the case. Unfortunately, there are those who do seek to impede our intelligence activities and to endanger our agents. As a result of their publications, there have been attacks on those alleged to be our agents overseas and, in at least one tragic case, the attack caused someone's death.

In an effort to prevent the repetition of those kinds of circumstances, this bill imposes penalties on those who reveal the names of our covert agents. The penalties range from $15,000 and 3 years in prison to $50,000 and 10 years in prison, depending on the circumstances. They apply both to those who reveal agents' names after having had access to classified information, and to those who did not have direct access to classified information, if the exposure of the agents' names was done with the "intent to impair or impede the foreign intelligence activities of the United States."

The Intelligence Committee recognized, however, that in imposing these sanctions on the publication of information, they were legislating in a difficult area because of the potential for imposing on people's first amendment rights. The committee wanted to try to prevent future danger to our agents and their missions, but at the same time they wanted to be very sure not to abridge any constitutional rights. And, Mr. Speaker, they worked long and hard to do just that. The committee has struck a very careful balance; they have brought us a good bill that deserves our support.

Mr. Speaker, I urge the adoption of House Resolution 223 so that the House may proceed to the consideration of this bill.

□ 1045

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, the able gentleman from Massachusetts (Mr. MOAKLEY) has not only described the provisions of the rule but many of the major provisions of the bill itself. The Permanent Select Committee on Intelligence is highly respected. Each Member of the House appreciates the fine job done by the chairman and the ranking member, and in fact by each member of that committee. We have confidence in what they report out.

So today I urge the adoption of the rule and when the matter is discussed on the floor of the House, in the Committee on the Whole, I urge the Committee to go with the full Permanent Select Committee on Intelligence and pass the bill as recommended.

Mr. Speaker, I have no requests for time and yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. BOLAND. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4) to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying certain U.S. intelligence officers, agents, informants, and sources.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts (Mr. BOLAND).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4, with Mr. MOAKLEY, Chairman pro tempore, in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Massachusetts (Mr. BOLAND) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MCCLORY) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Chairman, I yield myself such time as I might require.

Mr. Chairman, first may I congratulate the occupant of the chair (Mr. MOAKLEY) for his explanation of the rule which brings this bill to the floor.

Mr. Chairman, H.R. 4, the Intelligence Identities Protection Act, the so-called names of agents bill, would criminalize the disclosure of the identities of undercover intelligence officers or agents. Different penalties and elements of proof are established depending on whether the defendant was a present or former Government employee who acquires information from authorized access to classified information or whether the defendant derived the information disclosed from nonclassified sources.

H.R. 4 has received a great deal of public attention since it first was considered by the Permanent Select Committee on Intelligence in the last Congress. There appears to be public approval of those provisions of the bill criminalizing the disclosure of undercover identities flowing from access to classified information.

The controversy and criticism center around the section criminalizing disclosure where the defendant has not has access to classified information. This section, section 601(c), is intended to reach activities of the Covert Action Information Bulletin and similar groups. They claim they can discover the identities of our undercover officers and agents by diligently studying previously published diplomatic lists and biographical registers and comparing and collating the information contained therein with other publicly available information, having had no access to classified information. They claim it is unconstitutional to prohibit their disclosures.

Many newspapers, while denouncing such articles, have also stated that the proposed legislation violates the first amendment. Unanimously this committee disagrees.

H.R. 4 is a carefully crafted limited solution to a grave problem. It re-

sponds to an evil the Government clearly has a right to prevent. It is narrow and precise in its scope so as to give notice of the proscriptions, and it does not sweep within its purview any activities protected by the first amendment.

The Permanent Select Committee on Intelligence has been very sensitive to constitutional claims. We recognize the first amendment implications. This committee has spent many hours reaching our consensus, crafting a bill that responds to the disclosure problem without sacrificing constitutional rights. We, as well as the Senate Intelligence Committee, have spent over 2½ years dealing with this issue.

The initial version of H.R. 4, which also authorized prosecution of those with no access to classified information, was introduced on the first day of this Congress.

What we have done since then is to limit the sweep of the provision in order to meet first amendment objections: It does not inadvertently cover normal reporting; it does not cover those investigating and disclosing intelligence agency wrongdoing; nor does it cover a group's efforts to determine if any of its members are informants.

The amendments which we adopted have reinforced the committee's intent, from the very beginning of our deliberations to reach those few miscreants who have taken it upon themselves to systematically destroy our intelligence community.

Thus, to successfully prosecute an individual who discloses the identities of undercover intelligence agents but who has had no access to classified information, H.R. 4 requires the Government to prove each of the following beyond a reasonable doubt:

That the disclosure was intentional;

That the covert relationship of the agent to the United States was properly classified information and that the defendant knew it was classified;

That the defendant knew that the Government was taking affirmative measures to conceal the agent's relationship to the United States; and

That the disclosure was made as part of an overall effort to identify and expose covert agents for the purpose of impairing or impeding the foreign intelligence activities of the United States through the mere fact of such identification and exposure.

A bill so narrowly focused threatens no one's first amendment rights; at the same time, it is the minimum necessary response to the obnoxious activities of those who make it a practice to ferret out and then expose our undercover officers and agents for the purpose of destroying our intelligence collection capabilities.

Mr. Chairman, I am aware that there exists concern among some Members about the constitutionality of section 601(c).

These concerns were well expressed and fully debated in the committee.

These concerns are honest ones and should be heard.

While I am not unmindful of them. I have been swayed in favor of H.R. 4 by the precautions which have been taken in its drafting and by the conviction, which I believe is shared by the overwhelming majority of the American people, that the activity which section 601(c) proscribes is a pernicious act that serves no useful informing purpose whatsoever.

Such activity does not alert us to abuses; it does not further civil liberties; it does not bring clarity to issues of national policy; it does not enlighten public debate; and it does not contribute one iota to the goal of an educated and informed electorate.

Whatever the motives of those engaged in such activity, the only result is the complete disruption of our legitimate intelligence collection programs, programs that bear the imprimatur of the Congress, the President, and the American people.

Such a result benefits no one but our adversaries.

Mr. Chairman, I am certain that the Members are fully aware of the many bills, most of them urgent, which must reach the House floor in the next weeks.

I believe that H.R. 4 is as critical a measure as any because of the much needed protections it will provide to the dedicated men and women who serve in our Nation's intelligence services.

Further, I believe that H.R. 4 is so drafted that amendments—be they termed strengthening or weakening—will unbalance its approach.

Accordingly, I will oppose all those amendments which I am aware will be offered.

I urge the Members of the House to consider carefully the matters before them today, but I urge that that consideration be in full recognition of the consensus which this bill represents and that all amendments be defeated.

I take this time, Mr. Chairman, to commend the chairman of the Subcommittee on Legislation, the distinguished gentleman from Kentucky (Mr. MAZZOLI), and his colleagues on that committee, the gentleman from Georgia (Mr. FOWLER), and the gentleman from Indiana (Mr. HAMILTON), as well as the ranking minority member, the gentleman from Illinois (Mr. MCCLORY), and the gentleman from Ohio (Mr. ASHBROOK), for the diligence and the work and the hours that all of them have put into this very sensitive piece of legislation.

Mr. Chairman, there will be some half dozen amendments that will be offered to this bill. It is the hope of the majority of the members on the Permanent Select Committee on Intelligence that those amendments would be voted down. But we bring to the floor a bill that has the consensus, the near unanimous approval of all of the members of our committee. It is a bill where consensus has been met with our colleagues in the Committee on the Judiciary. Last year this bill was referred to the Committee on the Judiciary. This year, because of the consensus between the members of the Permanent Select Committee on Intelligence and the members of the Judiciary Committee, this bill is brought to the floor without sequential referral.

So, Mr. Chairman, I ask the members of this committee to support the bill as reported by the committee and to reject the amendments that will be offered by members, one member on our committee, and other members who are concerned about some of the provisions, and particularly section 601(c) of this bill.

Mr. MCCLORY. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I am delighted to yield to the ranking minority member of the Subcommittee on Legislation of the Permanent Select Committee on Intelligence, the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. I thank the gentleman for yielding.

I just want to make a brief comment. First of all I want to commend the gentleman from Massachusetts (Mr. BOLAND), the chairman of our committee, for his very effective leadership, particularly on this issue, and for the manner in which the gentleman has delineated and described this legislation.

Particularly I want to commend the gentleman on his support of the House version of this legislation which, as the gentleman states, has been very carefully crafted following conversations which took place between members of our committee and members of the House Judiciary Committee as a result of which we were able to avoid sequential referral and thereby expedite the bringing of this measure to the floor of the House.

I certainly want to express support for that position and commend the gentleman for his support of it. I thank the gentleman for yielding.

Mr. BOLAND. I appreciate very much the comments of the distinguished gentleman from Illinois (Mr. MCCLORY).

Mr. Chairman, at this time I yield the remainder of my time to the distinguished gentleman from Kentucky, (Mr. MAZZOLI) chairman of the Legislative Subcommittee of the Permanent Select Committee on Intelligence, who has given so much of his time and effort to crafting this bill and bringing it to the floor today.

Mr. MAZZOLI. Mr. Chairman, I yield myself 7 minutes.

Mr. Chairman, let me thank the distinguished gentleman from Massachusetts (Mr. BOLAND) for his very kind words. We in our committee have all worked hard, and that is why we have a bill today which has the near-unanimous support of the committee, of the intelligence community, and of the academic community. I think on that basis it reflects clearly the leadership of the gentleman from Massachusetts who was with us when we began this effort 3 years ago, two Congresses ago, and he is here today. I want to thank him for his leadership and his willingness to pay the price for the bill.

Mr. Chairman, I rise in support of H.R. 4, the Intelligence Identities Protection Act. It is a carefully crafted piece of legislation which responds in an effective and precise fashion to a problem of tremendous importance to our national security.

The problem, of course, is the public disclosure, by those who have had access to classified information, and by those who have not, of the identities of undercover U.S. intelligence personnel.

Such disclosures have a direct and harmful effect on vital intelligence collection activities and on the well-being of the men and women in such activities.

The Permanent Select Committee on Intelligence has spent a good part of the last 3 years studying the issues involved with intentional disclosure of agent identities. The issues have been complicated by the dual nature of the problem.

On the one hand, there are former CIA employees, like Phillip Agee, who have had official access to sensitive information and who disclose the names of their former comrades and other intelligence personnel. There is very little, if any, argument against the proposition that such disclosures, by those who are violating a position of trust, should be criminal offenses. These cases are clear.

Further, there is general agreement that the Government be required to prove only the fact of such an intentional disclosure. This contrasts with current U.S. espionage laws which require that the disclosure be made with intent to harm the United States or that the information disclosed relate to the national defense.

What is not so clear and where the complications arise are instances where publications, such as the "Covert Action Information Bulletin," disclose the names of undercover intelligence agents where the information disclosed came from examination of public-source documents and observation of personnel movements rather than from official access to classified information.

This vexing problem commanded a great deal of attention of the Intelligence Committee. And, the constitutional issues involved were subjected to searching scrutiny.

Because this was such a controversial area, some felt we should avoid the matter entirely and report a bill dealing simply with disclosures made by those who have had official access to classified data such as disaffected former employees.

The committee concluded, however, that half a solution was really no solution at all and that the deleterious effect of public disclosure of agent identities was just as serious when the perpetrator was one who obtained the information from other than classified sources.

Furthermore, the committee could find no beneficial effect or socially or philosophically desirable results whatsoever to flow from such disclosures.

Therefore, it was determined to proceed with legislation that would respond to both aspects of this difficult problem by means of a narrowly, precisely, and carefully crafted approach so to avoid constitutional pitfalls and so to fully protect first amendment rights.

The bill before the House today is such a carefully crafted measure and it received broad bipartisan support in the Intelligence Committee.

It would establish criminal penalties for intentional disclosure, to unauthorized persons, of any information identifying a covert agent.

The term "covert agent" is defined to include:

Employees of an "intelligence agency" (defined as the Central Intelligence Agency, the intelligence components of the Department of Defense, or the foreign counterintelligence or counterterrorism components of the Federal Bureau of Investigation (FBI), whose identities are classified and who serve outside the United States or have so served within the previous 5 years.

U.S. citizens whose intelligence relationships to the United States are classified and who reside and act outside the United States as agents of, or informants or sources of operational assistance to an intelligence agency or who are acting agents of or informants to the foreign counterintelligence or foreign counterterrorism elements of the FBI.

Non-U.S. citizens whose intelligence relationships to the United States are classified and who are present or former agents of, or present or former sources of operational assistance to, an intelligence agency.

Under section 601(a), if the defendant had authorized access to the intelligence identity which was then disclosed the penalty is a fine of $50,000 or 10 years in jail, or both.

Under section 601(b), if the defendant learned, as a result of authorized access to classified information, the identity which was then disclosed, the penalty is a fine of $25,000 or 5 years in jail, or both.

In each case, the Government must prove that the information was disclosed intentionally, that the defendant knew that the information identified a covert agent, that the identity of the agent was classified, and that the United States was taking affirmative measures to conceal the covert agent's intelligence relationship to the United States.

Under section 601(c), If the defendant has had no access to classified information prior to a disclosure of covert intelligence personnel, the penalty is a fine of $15,000 or 3 years in jail, or both.

The Government, in addition to the elements previously mentioned in 601(c) cases, has to prove that the disclosure was part of an effort to identify and expose covert agents and that this effort was intended to impair or impede the foreign intelligence activities of the United States by the act of such identification and exposure.

Section 602(b) prohibits conspiracy charges or aiding or abetting prosecutions against those who have not actually disclosed information unless an intent to impair or impede the foreign intelligence activities of the United States can be proved, or unless the defendant has had authorized access to classified information.

Section 603 directs the President to establish procedures to insure the concealment of the identities of covert agents. Any department or agency so designated by the President must provide whatever assistance the President determines is necessary in order to maintain concealment of the identities of covert agents.

Mr. Chairman, I urge passage of this important legislation. It represents, I believe, a vote of confidence by the Congress for those dedicated employees of the clandestine service whom our Government sends overseas to collect vital information.

It also demonstrates to those foreign nationals who wish to aid our Nation's cause that the Congress of the United States is determined to protect their confidentiality and secret relationship with the United States.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I am happy to yield to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. I would like to ask a question regarding the effect of the amendment to section 601(c) adopted by the Intelligence Committee.

H.R. 4, as introduced, as I understand it, focused attention on the intent of the defendant in making a

disclosure. Not at the result caused by it. In committee, the language "by the fact of such identification and exposure" was added to section 601(c).

My question is: Does this new language change the focus away from the defendant's intent and rather create a "results test"?

Mr. MAZZOLI. The answer to the gentleman's question is no.

The gentleman is quite correct in his analysis of H.R. 4 as introduced—that it focused on the defendant's intent. The change made to H.R. 4 by the Intelligence Committee did not alter this at all. To have created a results test would have required changing section 601(c) to read:

Whoever intentionally impairs or impedes the foreign intelligence activities of the United States by disclosing the identities of covert agents. . . .

This we clearly did not do.

In sum, section 601(c) is only concerned with what a person intends in making a disclosure, not in what may or may not have been the result of his having done so.

□ 1100

Mr. McCLORY. If the gentleman will yield, I just want to thank the gentleman for his clarifying statement.

Mr. MAZZOLI. I have exhausted my time. I want to thank the gentleman from Illinois (Mr. McCLORY), who is the ranking minority member of our Legislation Subcommittee and a very active member of the full committee. Again I would just like to urge the sympathetic attention and unanimous support of the House for this very necessary piece of legislation.

Mr. Chairman, I reserve the balance of my time.

Mr. McCLORY. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Virginia (Mr. ROBINSON), the ranking minority member of the full Intelligence Committee.

Mr. ROBINSON. Mr. Chairman, I rise in full support of H.R. 4. It was my pleasure to push for the passage of similar legislation in the last Congress, when time stalled it, and I am most pleased that we now have the opportunity to take final action on it here on the House floor.

I would like to first join the ranking minority member, the gentleman from Illinois, BOB MCCLORY, in terms of expressing my appreciation at the complete cooperation, understanding, and willingness to help that has been exhibited by the gentleman from Massachusetts (Mr. BOLAND), who is chairman of this committee.

The time is long passed for the Congress to pass a law to punish those who, with malicious intent, jeopardize our Nation's security by disclosing the identities of our undercover intelligence agents. No other action that we could take at this time could be more helpful to our dedicated intelligence personnel, our own personnel, than its timely passage. And, similarly, it would be equally helpful to send a message to those of other countries, who cooperate with our intelligence services, that the United States has finally moved to protect their identities as well. You can imagine the impact that unauthorized disclosures have had on these very special relationships.

It makes little sense to call for better intelligence on one hand and then not take the steps needed to provide the fundamental protection required by those who are collecting that intelligence or working sensitive covert actions.

I was comfortable with the language of H.R. 5616, as reported last year, as I am with the language of H.R. 4 as introduced this year, which I was pleased to cosponsor with our distinguished chairman. The earlier version has now been strengthened by the addition of a clarifying amendment, which has just been discussed for the benefit of my colleagues through the colloquy of the gentleman from Illinois and the gentleman from Kentucky, this strengthening, clarifying amendment that focuses more directly on those who are callously and systematically engaged in an effort to do great harm to our intelligence operations by "naming names" and "names with places."

Mr. Chairman, this bill meets the critical test of constitutionality. A recent Supreme Court decision in Haig against Agee held that—

Agee's disclosures, among other things, have the declared purpose of obstructing intelligence operations and the recruiting of intelligence personnel. They are clearly not protected by the Constitution. The mere fact that Agee is also engaged in criticism of the government does not render his conduct beyond the reach of law.

The goal of the committee has been to produce not just a bill that is constitutional, but one that works to deter those who want to destroy our intelligence-gathering abilities.

Mr. Chairman, I join with our distinguished chairman, the gentleman from Massachusetts, and the other committee members who have worked so hard to develop a consensus on this bill—a consensus which very definitely is the product of the Legislative Subcommittee steered by Chairman MAZZOLI of Kentucky and ranking member MCCLORY from Illinois, and the other members of that subcommittee as already mentioned by our chairman.

H.R. 4 as reported by the full Intelligence Committee is a good and a fair approach to a difficult problem, and it deserves your support.

I urge its quick and favorable and long-overdue consideration.

Mr. McCLORY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 4, the Intelligence Identities Protection Act. This legislation—which is a direct outgrowth of a bill first proposed over 5 years ago by the distinguished Republican House leader (Mr. MICHEL)—is sorely needed to put an end to the activities of those who seek to subvert the security of our Nation by exposing the identities of our covert foreign intelligence agents.

Mr. Chairman, we would truly be derelict in our duty as the people's elected Representatives if we allow the existing abominable situation to go unrectified. The 1975 assassination of Richard Welch in Athens after being named as a CIA officer in Counter Spy magazine must not go unanswered. Last year's July 4 machinegun attack on the house of one U.S. Embassy employee in Jamaica, and the subsequent thwarted terrorist attack on another employee's home a few days later, after each was named as a CIA officer by Covert Action Information Bulletin editor Louis Wolf, must not go unanswered. And, the terrible harm to our national security caused by the wanton disclosures by misdirected and irresponsible individuals must not go unanswered. We must act now.

Mr. Chairman, this bill would punish those who engage in an effort intended to impair or impede U.S. intelligence activities and who further that effort by making a disclosure of the identity of one or more covert agents. However, this bill would not punish those who make any other statements, deliver any other speeches, or write any other articles aimed at impairing such activities—no matter how inaccurate or ill-advised.

In other words, Mr. Chairman, this bill would in no way affect the activities of those who seek to inform, not destroy.

Mr. Chairman, I cannot actually find any significant objection to achieving the goals embodied in the "Intelligence Identities Protection Act". The controversy surrounds the means employed.

The approach proposed by the Intelligence Committee—after extensive hearings, staff work, and committee debate—is three tiered. The first two tiers apply to individuals who gain access to information identifying covert intelligence agents through authorized or quasi-authorized fashion.

The third tier, section 601(c), would punish anyone who discloses an agent's identity. But only if the disclosures are made "in the course of an effort to identity and expose covert agents with the intent to impair or impede the foreign intelligence activities of the United States by the fact of such identification and exposure."

In the view of the Intelligence Committee, and with this I firmly agree, the intent requirement of section

601(c) provides the Government with a strong and effective new law—while well protecting legitimate journalistic endeavors and avoiding constitutional objections.

In studying section 601(c), it is interesting to compare it with existing law. As to the crucial issue of criminalizing the disclosure of information obtained other than from classified sources, section 798 of title 18 prohibits anyone from disclosing cryptographic information or any information obtained though communications intelligence. And, section 224 of the Atomic Energy Act (42 U.S.C. 2274) prohibits disclosure of atomic energy information. Both of these statutes apply to information no matter how obtained.

Mr. Chairman, there has been much discussion in the weeks leading up to this body's consideration of this legislation as to the relative merits of this bill's intent standard and the reason to believe standard presently embodied in the bill being considered in the other body. After a great deal of consideration of both bills. I have found H.R. 4 to provide the most effective tool for putting an end to the damaging disclosures of the identities of covert agents.

H.R. 4 and the bill being considered in the other body (S. 391) are actually very similar. However, while—as has been noted—H.R. 4 requires that an individual be shown to have acted with intent to impair or impede the foreign intelligence activities of the United States, S. 391's version would require a showing that the individual had "reason to believe" that such would occur.

On balance, "reason to believe," as in S. 391, is easier to prove than specific intent, as in H.R. 4, for the former is an objective test—that is, what would a reasonable person believe—whereas the latter requires proof of the actual state of mind of the person on trial—that is, what did the defendant, Joe Smith, really intend to accomplish by disclosing the agent's name. This, on the surface, seems to favor the Senate standard, but there are serious drawbacks to it—drawbacks which ultimately weigh against it decisively.

Under S. 391 a defendant would try to show that a reasonable person—and, therefore, he—would not have had "reason to believe" that U.S. intelligence activities would be impaired by his disclosure. Because reality is relevant to what a reasonable person—and, therefore, what the defendant—would or would not have "reason to believe," a valid defense, under the "reason to believe" standard could include a showing that the activities of U.S. intelligence agencies were substantially the same after the disclosure of the agent's identity as they were prior to it. This could force the Government to disclose a great deal of sensitive, classified information at trial notwithstanding the passage of last year's graymail bill—as the defendant would be able to force from the Government information in support of his position. For example: What was CIA doing in country X before the disclosure? What is CIA doing there now?

H.R. 4's intent standard, on the other hand, totally ignores the actual effect a disclosure might have had and therefore would not allow for such a defense because even if the disclosure had no effect on U.S. intelligence activities, this would not serve to disprove the defendant's intent. This would be analogous to a defendant charged with attempted murder pleading that the fact that the alleged victim is still alive proves that the defendant did not intend to kill him.

I believe that H.R. 4, on its own and read in the light of existing law, more than passes constitutional muster. In the end, of course, laws, to be fair, must be applied fairly. Only a law that is fair on its face and in its application can have desired social effects within constitutional bounds.

H.R. 4, as reported by the Intelligence Committee, is a good and fair approach to a difficult problem. Both the CIA and the Department of Justice believe that it can effectively meet the needs of our intelligence community. It deserves your support.

Mr. Chairman, I urge the House to pass H.R. 4—without amendment.

Mr. MAZZOLI. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Georgia (Mr. FOWLER), a very helpful member of our committee.

Mr. FOWLER. Mr. Chairman, I rise in support of H.R. 4, the Intelligence Identities Protection Act, as reported by the House Intelligence Committee. While the clear intent of this measure is to maintain vital U.S. intelligence-gathering capabilities and to penalize those who wantonly seek to weaken such capabilities by placing our intelligence operatives in jeopardy, most of the concern about H.R. 4 centers on the bill's potential impact on first amendment rights. Therefore, I will focus my remarks on that area.

It is my firm belief that H.R. 4 addresses a real and compelling problem, that it successfully passes the stringent tests which are properly applied to any attempt to legislate restrictions on freedom of expression, that it devises an appropriate and effective response to an identified problem, that it is not overbroad in its coverage, nor will it have a chilling effect on public discussion or criticism of intelligence operations and policy.

NEED FOR THE LEGISLATION

There is general recognition that U.S. human intelligence-gathering programs have suffered in recent years. This is partly attributable to administrative and budgetary decisions that have attempted to respond to changing circumstances and priorities for U.S. intelligence. Human intelligence-gathering capabilities have been also affected by the reaction against the abuses of authority within the executive branch which were uncovered by congressional and journalistic investigations in the early seventies. It is not clear what we in the Congress can or should do about these problems.

But, in the case of a third obstacle to our human intelligence programs there should be far less uncertainty. I am referring, of course, to those instances where the U.S. intelligence community has been subjected to a systematic effort, by certain individuals and publications, to expose the identities of its agents for the express purpose of hampering its ability to operate clandestinely overseas in the interest of our country.

To illustrate, former CIA agent Phillip Agee has written two books—"Dirty Work: The CIA in Western Europe" and "Dirty Work 2: The CIA In Africa"—which revealed the names of over 1,000 alleged CIA agents. Agee's magazine Counter Spy had similarly sought to expose American intelligence operatives and one of the individuals it identified, Richard S. Welch, who was a CIA station chief in Athens, Greece, was subsequently murdered in front of his home.

Covert Action Information Bulletin, which succeeded Counter Spy and which contains a separate section specifically devoted to naming names of covert agents, claims to have disclosed the names of over 2,000 CIA officers. In July of last year, the coeditor of the publication, Louis Wolf, publicly charged that Richard Kinsman and 14 other U.S. Embassy officials in Jamaica were CIA agents. Less than 48 hours later Mr. Kinsman's home was attacked by submachineguns and explosives.

Such disclosures would be reprehensible enough if the harm were limited to individual intelligence operatives. However, the continuing exposure of the identities of American intelligence agents has significantly damaged the ability of our intelligence community to fulfill its primary responsibility of supplying policymakers with detailed and accurate information about important developments abroad. This damage results from both the loss of experienced agents, through forced retirement or relocation, and the loss of confidence among potential sources of sensitive foreign intelligence information about our ability to protect their identities.

Current law is demonstrably insufficient in combating deliberate disclosures of U.S. intelligence identities. Former Attorney General Civiletti stated that:

Existing law provides inadequate protections to the men and women who serve our nation as intelligence officers. They need—and deserve better protection against those who would intentionally disclose their secret mission and jeopardize their personal safety by disclosing their identities.

The most telling proof of the need for the legislation before this House today lies in the fact that none of the willful disclosures I just mentioned have led to indictments under our espionage and other laws designed to protect classified information.

FIRST AMENDMENT QUESTIONS

As I stated at the outset, the major controversy surrounding H.R. 4 involves the issue of freedom of speech. This is as it should be, because there is no area requiring greater care in our duties as legislators than that of free speech, and I would hold with Jefferson that when we are faced with competing claims between governmental authority and a free press we should display a bias toward the latter.

But no right, not even first amendment ones, can exist as an absolute or in a vacuum. In the words of that great parliamentarian Edmund Burke:

Abstract liberty, like other mere abstractions is not to be found. . . . Liberty, too, must be limited in order to be possessed.

This viewpoint finds ample support in a multitude of judicial interpretations of the first amendment, spanning the entire history of our country.

The document "The Constitution of the United States of America, Analysis and Interpretation," prepared for the 92d Congress, states of the original intent of the drafters of the first amendment that—

Insofar as there is likely to have been consensus, it was no doubt the common law view as expressed by Blackstone.

On the question now at issue Blackstone wrote:

The liberty of the press is indeed essential to the nature of a free state; but this consists in laying no previous restraints upon publications, and not in freedom from censure for criminal matter when published . . . To punish . . . any dangerous or offensive writings, which, when published, shall on a fair and impartial trial be adjudged of a pernicious tendency, is necessary for the perservation of peace and good order, of government and religion, the only solid foundations of liberty.

Concurring in the case of Whitney against California (1927) Justice Brandeis concluded that free speech rights could be restricted "if the particular restriction proposed is required in order to protect the State from destruction or from serious injury, political, economic, or moral."

In the 1950 case of American Communications Association, CIO against Douds, the Supreme Court found:

Although the First Amendment provides that Congress shall make no law abridging the freedom of speech, press or assembly, it has long been established that those freedoms themselves are dependent upon the power of constitutional government to survive. If it is to survive it must have power to protect itself against unlawful conduct, and under some circumstances, against incitements to commit unlawful acts. Freedom of speech thus does not comprehend the right to speak on any subject at any time.

The Court provided more specific guidance in the 1966 case of Elfbrandt against Russell:

A statute touching (First Amendment protected) rights must be "narrowly drawn to define and punish specific conduct as constituting a clear and present danger to a substantial interest of the state." . . . Legitimate legislative goals "cannot be pursued by means that broadly stifle fundamental personal liberties when the end can be more narrowly achieved."

Finally, in Broadrick against Oklahoma (1972), the Court declared:

It has long been recognized that the First Amendment needs breathing space and that statutes attempting to restrict or burden the exercise of First Amendment rights must be narrowly drawn and represent a considered legislative judgment that a particular mode of expression has given way to other compelling needs of society.

I challenge anyone to claim that the systematic disclosure of overseas intelligence operatives does not present "a clear and present danger to a substantial interest of the state."

I challenge anyone in this Chamber to disagree with the House Intelligence Committee's finding with respect to the disclosures made by these publications:

The unauthorized disclosure of the names of undercover intelligence agents is a pernicious act that serves no useful information function whatsoever. It does not alert us to abuses; it does not further civil liberties; it does not enlighten public debate; and it does not contribute one iota to the goal of an educated and informed electorate. Whatever the motives of those engaged in such activity, the only result is the disruption of our legitimate intelligence collection programs—programs that bear the imprimatur of the Congress, the President and the American people. Such a result benefits no one but our adversaries.

TERMS OF THE BILL

The Intelligence Identities Protection Act addresses the vulnerability of our overseas intelligence operatives in two ways. First, it criminalizes the disclosure of their identities, and second it requires the President to develop more effective methods for preserving their cover. While the former provisions have drawn most of the attention, I believe that in the long run the portions of the legislation concerning improved cover, and the heightened attention to this area they will produce, will prove to be more significant in protecting our intelligence agents.

With regard to the criminal provisions, H.R. 4 establishes three categories of offenses for the intentional disclosure of information identifying covert operatives to unauthorized persons.

The first category includes those who have had authorized access to classified information specifically identifying a covert agent while the second group involves individuals who learn of a covert identity "as a result of having authorized access to classified information" though not necessarily to specific information identifying the covert agent. A person in either of these two categories is criminally liable under H.R. 4 if they intentionally disclose any information correctly identifying a covert operative to an individual not authorized to receive classified information. Furthermore, they must know that the information will in fact identify the agent and that the United States is making an effort to conceal that identity.

Penalties for the first category, those who have had access to specific classified information identifying the intelligence operative, would be a fine of up to $50,000, imprisonment for up to 10 years, or both. For the second category, the penalties would be somewhat lighter, up to a $25,000 fine and/or 5 years imprisonment, because it is assumed that they have violated a lower level of public trust than those who had direct, authorized access to intelligence identities.

The main controversy surrounding this legislation centers on the third category of offense, which covers those cases where the offender did not have authorized access to classified information. Since this group could encompass anyone who revealed the name of an American intelligence official—including journalists—special care had to be given to protect first amendment rights of free speech.

The committee did this by limiting criminal liability in the third category to those who disclose agents' identities in the course of an effort to identify and expose covert agents, which effort is intended to impair or impede U.S. foreign intelligence activities by the fact of such identification and exposure. In addition, to fall into this category an individual would also have to meet the standards of proof established for the first two categories: That the disclosure correctly identifies a classified covert identity, that the disclosure is intentional, that the discloser knows that the revealed information will in fact identify the intelligence agent, and that the discloser knows that the U.S. Government is taking affirmative action to conceal the agent's identify.

Penalties for this category of offender are less severe than for the other two: Up to $15,000 in fines or up to 3 years imprisonment, or both.

Let me be very clear that the committee's intent in this area was not to criminalize exposes by legitimate journalists, nor revelations by whistle-

blowers, nor efforts by newspapers, churches, or universities to determine whether, in violation of their own policy, an employee is also an intelligence agent. What was intended was to provide some narrowly constructed statutory protection for overseas U.S. intelligence officials against systematic disclosures by certain publications who have undertaken to uncover and publicize wholesale lists of individuals whose only crime seems to be their association with U.S. foreign intelligence operations.

The two major remaining sections of the Intelligence Identities Protection Act define the intelligence operative whose identities are to be protected and establish the defenses that are available for an individual charged under the terms of the bill.

Briefly, the following intelligence identities are covered by H.R. 4 protection: Officers or employees of a U.S. intelligence agency whose identity is properly classified and who are serving, or have served within the past 5 years, outside the United States; U.S. citizens inside the United States whose identity is properly classified and who are agents of, informants, or sources of operational assistance to the foreign counterintelligence or counterterrorism operations of the FBI; U.S. citizens outside the United States whose identity is properly classified and who are agents of, informants, or sources of operational assistance to a U.S. intelligence agency; and non-U.S. citizens whose identity is classified and who are present or former agents of a U.S. intelligence agency or who are informants or sources of operational assistance to a U.S. intelligence agency.

Finally, defenses to prosecution are established to include: Cases where the United States has publicly acknowledged or revealed the intelligence relationship in question; nonparticipation in the actual disclosure of the information identifying a covert agent, except where the individual acted in the course of an effort to identify and expose covert agents with the intent to impair and impede U.S. foreign intelligence or has authorized access to classified information; and cases where the information in question is transmitted to the House and Senate Intelligence Committees.

CONCLUSION

An effective intelligence-gathering capability is as important as, and in some cases more important than, Armed Forces in protecting our national security.

Accurate information on events overseas, whether it involves weapons developments by potential adversaries or decisions affecting the price and availability of a critical resource like petroleum, is an invaluable aid in formulating our foreign and defense policies. Incorrect information, on the other hand, can lead us to make costly and sometimes dangerous mistakes.

As is true of two pieces of legislation reported recently by the Intelligence Committee and enacted by the Congress last year, namely the Classified Information Procedures Act and the Intelligence Oversight Act, the Intelligence Identities Protection Act is an attempt to enhance the ability of our intelligence community to perform its assigned role in a manner consistent with our national interests and values.

I urge a favorable vote on H.R. 4.

□ 1130

Mr. McCLORY. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. ASHBROOK), a distinguished and valuable member of the Select Committee on Intelligence.

Mr. ASHBROOK. At least before I say what I am about to say.

Mr. Chairman, a few minutes ago my friend and colleague, the gentleman from California (Mr. ROUSSELOT) said, "Give me a very brief description of why you are offering your amendments and the difference with the committee version."

My response to him was the difference is that my amendment would knock out of the American Civil Liberties Union compromise in the language of this bill. It is just that simple.

I would give the gentleman five good reasons why we should not support H.R. 4 as it stands now. Five good reasons why we should support either the Senate version or my amendments to bring H.R. 4 up to speed.

First, I will lay it out flat. The language that I object to is American Civil Liberties Union language. Our committee accepted this as a compromise. I understand that. The compromise was necessary, they think, because we are so anxious to get a bill that protects the agents that we would even make that kind of compromise with the ACLU to get H.R. 4 passed.

I will not make this compromise and I hope the Members of this body do not. If anybody wants to take this charge to task, I can give them chapter and verse, where the language came from and how it got there. We have the ACLU internal documents. There is no doubt in my mind, I will say it factually, it is not our language, it is theirs.

The President of the United States supports and prefers the language that I have offered and supports the Senate version which is identical.

I hope most of the Members got the letter that I sent out last night which contained the President's own letter. That letter states that—

Any change to the Senate version would have the effect of altering this carefully crafted balance. I cannot overemphasize the importance of this legislation. I hope I can have your support in reporting S. 391 without amendments.

The third point I would make is that the people who know the most about it, the Central Intelligence Agency, support and prefers the Senate language. A letter is used by the opposition that indicates the CIA would accept the compromise language. True, but read the letter carefully. It says they prefer Senate 391. The operative word is "prefer."

For the Association of Former Intelligence Officers, the group that knows the most, those that are out in the field and—I for one am sick and tired listening to people at the top. Listen to those in the field, listen to those who live with the law out in the trenches. They want S. 391. They want my amendments. That is the fourth reason.

Fifth, talk to the wives, the families of those who have been out in the field, who have had their families, their homes, their husbands, attacked by agents of enemy powers, as a result of a disclosure of names of their loved ones.

I put a letter in the RECORD last night—unfortunately it did not get printed because I made a mistake, I put too much extraneous matter in, which I often want to do.

I included a letter by Mrs. Sheila Kinsman in my remarks, a three-page letter, pleading and imploring the Members of Congress to pass the most stringent language possible to protect people like her husband who was the target of attack in Jamaica after the disclosure of his name by the enemies of our country, not just the CIA, who we are talking about today and trying to provide good language which will insure their prosecutors.

Five good reasons why either Senate 391 or my amendments to H.R. 4 are necessary. I support H.R. 4 with amendments. But, to repeat, I see no reason whatsoever that the Members of this body should accommodate what we think is right to the requests, the demands or whatever we want to call it of the American Civil Liberties Union. We simply should not let Jerry Berman, and not let Morton Halperin, have that kind of influence on this body.

I understand how it was done. I recognize why it was done. And in my remarks, if my colleagues will read my dissenting opinion in the committee report, it is very clearly shown exactly how it happened.

On July 13, 1981, Halperin and Berman visited the CIA Headquarters building in Langley to discuss a compromise on the names of agents bill in exchange for modifying the language in section 501(c) which is now 601(c). They promised that their supporters would not try to delay this bill.

Three days later, our committee met and adopted the compromise as laid out by the American Civil Liberties

Union. It was done in good faith—I understand why—because there is a desire to protect the agents, there is a desire to make sure this bill is not again delayed. Very possibly it would have been delayed had not that concession been made. We don't have to ratify that concession and we should not.

I did not agree to that compromise. I did not agree to it then, I do not agree to it now, and I hope the majority of this body will support my amendment.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

I want to say very forthrightly to the gentleman, as far as the language in this legislation is concerned, I am not aware of the gentleman's statement of its origin with the ACLU. I do know that in my conversations with representatives of the CIA that they have indicated that they would support this language, and I likewise have a letter from the Association of Former Intelligence Officers, just dated yesterday, which states that they support the early enactment of H.R. 4.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has expired.

Mr. McCLORY. Mr. Chairman, I yield 1 additional minute to the gentleman from Ohio (Mr. ASHBROOK).

The letter states they support the early enactment of H.R. 4 either with the version in H.R. 4 or S. 391.

So that I am very anxious to cooperate with them, too, and I feel that they are satisfied with the language in the House bill.

Mr. ASHBROOK. My colleague very carefully and properly made a distinction which I do not make. He said they support it. He also knows what they prefer. Will he state to the Members of this body what they are on record as saying, what they prefer? They prefer the Senate language, do they not, in the same letter the gentleman received? It indicates they prefer Senate 391? The gentleman has the letter in front of him, I would say to my colleague.

Mr. McCLORY. In the letter that I have they just state that they are concerned about the importance of this legislation and they urge the early enactment of either S. 391 language or H.R. 4 language.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Georgia.

Mr. FOWLER. I thank the gentleman for yielding.

Would my distinguished colleague from Ohio not agree—as I think we can agree—that the CIA recognizes the acute nature of this problem, which all of us are attempting to address, and the CIA, and all of our defense establishments, prefer that version which will stand constitutional muster?

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has again expired.

Mr. McCLORY. I yield 1 additional minute to the gentleman from Ohio (Mr. ASHBROOK).

Mr. FOWLER. If the gentleman will yield further, I would like to refresh the memory of my colleague in the well with the testimony, before our committee of the former CIA counsel, Daniel Silver, and I quote:

It is from my point of view as a lawyer clear to me that without a specific intent element a statute that applied to someone who dealt only with unclassified information and phenomena would have serious constitutional problems, but this bill which your committee has very carefully drawn avoids those problems.

The specific intent was put in there not because of who suggested it or who proposed it after 2 years of debate, but to try to meet constitutional strictures, and that is why a specific intent standard is preferred by this committee, the majority of our committee, rather than "reason to believe"——

Mr. ASHBROOK. If I may reclaim my time, laying his opinion against that of the Attorney General of the United States, the President of the United States, the person most responsible for discharging the law, indicates the Attorney General advises him the Senate version of this legislation is legally sound from a constitutional standpoint.

The CIA counsel says it is legally sound from a constitutional standpoint. They indicate both versions.

I would acknowledge the gentleman's version is and I hope the gentleman will not try to say S. 391 is not constitutionally sound because all of the sound authorities, the Attorney General, the CIA, our staff, virtually everyone that has dealt with both of them say both versions are sound. I hope the gentleman would not try to indicate that is not the case.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has expired.

Mr. MAZZOLI. Will the chairman advise the gentleman from Kentucky of the time remaining.

The CHAIRMAN. The gentleman from Kentucky (Mr. MAZZOLI) has 11 minutes remaining.

Mr. MAZZOLI. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. ASHBROOK).

Mr. FOWLER. If the gentleman will yield further, in response to my friend from Ohio, I believe that the overwhelming weight of the testimony from experts in the field, both constitutional scholars and those within our Nation's intelligence agencies, whom we are trying to protect, evidenced serious concerns that the standard that the gentleman from Ohio proposes would not meet constitutional tests because it would criminalize disclosures of information derived from unclassified sources by people who have not had access to classified information on the basis of a negligence standard, a standard most often used for torts.

□ 1130

In my statement, I attempted to trace the constitutional history, the case history of precedents requiring specific intent when we criminalize first amendment activity.

I would simply urge that it is as a result of the committee's 2 years of deliberations on this matter under the leadership of Chairman BOLAND and subcommittee Chairman MAZZOLI.

Mr. ASHBROOK. Mr. Chairman, if my colleague will let me take the last 15 seconds, we clearly cannot discuss it in 1 minute. We will under my amendment.

Mr. MAZZOLI. Mr. Chairman, I yield such time as he may consume to a distinguished member of our subcommittee, the gentleman from Indiana (Mr. HAMILTON).

Mr. HAMILTON. Mr. Chairman, I rise in support of H.R. 4, the Intelligence Identities Protection Act.

Mr. Chairman, most Americans are shocked and dismayed when they see:

A former CIA employee previously entrusted with classified material publicly revealing the names of covert CIA agents; or

When they learn of the various groups of our citizens who systematically try to ferret out and publish the names of agents in order to harm U.S. intelligence activities.

One such group, publishing the Covert Action Information Bulletin, operates within a few steps of the Capitol, and regularly runs a feature titled "Naming Names," revealing 10 to 20 agents per issue.

However, Americans are even more shocked and dismayed when they learn that there is basically no criminal statute to specifically prohibit the unauthorized release of such classified information. Prosecuting under the general and vague espionage laws would require the Government to reveal additional sensitive information, and thus may itself cause additional harm to our intelligence capabilities.

The result has been a hesitancy by the Justice Department to prosecute, and that unfortunately has led to a significant increase in the publication of books, newspapers, and magazines purporting to disclose the names of U.S. covert intelligence agents. It has been estimated that over the past few years, more than 2,000 such names have been publicly revealed, and yet

not even one individual has been imprisoned for releasing any of them.

Disclosure of the names of agents may take many forms:

From the disgruntled former CIA officer who decides to turn on his fellow workers, to the respected reporter who may identify an agent incidentally in the course of a legitimate exposé on newspaper reporters working covertly for the CIA.

In this bill, H.R. 4, we are not proposing that every individual revealing an agent's identity under any circumstances be subject to criminal penalties. Such an across-the-board prohibition would have a chilling effect on free speech and would no doubt be unconstitutional.

Rather, we are restricting the legislation only to three types of unauthorized disclosure:

First, disclosure by Government officials and others entrusted with access to classified information that identifies covert agents;

Second, disclosure by those with access to classified information that allows them to discern such identities; and

Third, disclosure by those without access to classified information who are in the business of ferreting out and naming names in order to disrupt U.S. intelligence activities.

The bill does not apply to casual discussion, political debates, legitimate journalism, and the like.

Although the committee was unified in pursuing this goal, it proved extremely difficult to find precise language to do exactly what we wanted. The section addressing those in the business of naming names without access to classified information, section 601(c), presented the major difficulties.

On the one hand, we wanted to make the language narrow enough so that we did not also make criminal, for example, the actions of legitimate journalists. On the other hand, we did not want to make the language too narrow so that groups like the publishers of the CAI Bulletin could easily sidestep the law by simply redescribing or restructuring what they are doing.

The task provided especially troublesome: Since the time the committee first took up trying to draft such language some 3 years ago, we probably have seriously considered more than 15 different versions of this section. The versions all involved subtle changes in emphasis. We changed the language from:

Talking of patterns of activities to talking of efforts;

From talking of harming the effectiveness of covert agents to talking of harming the effectiveness of U.S. intelligence activities; and

From talking of purposes to talking of intentions.

The language that we finally agreed on in H.R. 4 as reported strikes a reasonable balance, and I believe that Chairman BOLAND and subcommittee Chairman MAZZOLI should be congratulated. In essence, our final language in section 601(c) properly focuses only on those in the business of naming names by requiring:

That they must be engaged in a general effort to identify and expose covert agents;

That the disclosure must be intentional, consciously and deliberately willed; and

That they must have a specific intent to harm U.S. foreign intelligence activities by the disclosure.

I believe that this language and the expanded legislative intent in our committee report is a good and reasonable attempt to include under the law those we wanted to include, and exclude those we wanted to exclude. No one would maintain that our language is infallible or that it is precisely what everyone wanted. However, it presents a reasonable compromise.

Our full committee accepted it by a clear majority vote, and the Judiciary Committee found it acceptable enough not to request sequential referral;

The CIA has found it acceptable and the Justice Department says that it could satisfactorily prosecute under it;

Legal scholars before the committee testified that it appears constitutional; and

Even outside groups on divergent ends of the political spectrum who publicly murmur about the bill have said privately that they could live with it.

Today we will hear criticism on both sides: Some may argue that we have drawn the language too tight; others that we have not drawn the language tight enough. I believe that we have carefully weighed the alternatives and that we have finally arrived at a proposal that strikes a reasonable balance:

We have drafted language that makes illegal, disclosure by those entrusted with access to classified material or by those in the business of naming names in order to harm U.S. intelligence; and

We have carefully avoided being overzealous and possibly ensnaring unintentionally those we do not wish to catch, that is, legitimate journalists or whistleblowers.

Mr. Chairman, I urge the adoption of H.R. 4.

Mr. MAZZOLI. Mr. Chairman, if the gentleman from Illinois will indulge the gentleman from Kentucky, I would like to yield 2 minutes to the distinguished gentleman from California (Mr. EDWARDS), and then get back into the regular order.

Mr. EDWARDS of California. Mr. Chairman, I rise in opposition to H.R. 4. The bill creates three new criminal offenses. The first two prohibit persons who have had authorized access to classified information from revealing the identity of certain covert intelligence agents. I support the effort to punish those who would abuse their positions of trust to the detriment of the lives and safety of our intelligence agents overseas as well as U.S. national security interests.

On the other hand, the third category, section 601(c) of the bill, however well intentioned in its effort to prevent exposure of our covert agents, tramples on protected first amendment freedoms. For the first time in American history, the publication of information obtained lawfully from publicly available sources would be made criminal.

I recognize and applaud the efforts made by the Intelligence Committee to narrow the scope of section 601(c) to keep it within constitutional bounds. Nevertheless, it is my firm belief, which is supported by many noted constitutional experts, that no amount of tinkering can rehabilitate a law which criminalizes constitutionally protected freedoms of speech, press, and political expression.

Moreover, the bill allows no exception where disclosures are aimed at revealing illegal activity. Oversight of our intelligence activities, traditionally exercised by all the American people, the press, and the Congress will instead be relegated solely to the two already overburdened Intelligence Committees. Recent events concerning the disturbing activities of the top echelons of the CIA demonstrate that greater accountability is necessary rather than less.

The best solution is to concentrate our efforts to improve the cover provided the CIA, and any other covert agents operating on our behalf overseas, not to create criminal penalties which stem the flow of information only to our own public and do little to protect our agents from hostile powers overseas.

I urge you to vote against this bill.

And, Mr. Chairman, I ask unanimous consent to revise and extend my remarks.

I firmly believe officers, employees, and sources that operate covertly on behalf of American foreign intelligence must be protected from harm and exposure. I share the alarm of my colleagues arising from callous and irresponsible disclosure of names of covert agents. However, I believe that the goal of maintaining secrecy and minimizing risk of harm can be achieved by less onerous means.

The portion of H.R. 4 which I question is section 601(c). This section is aimed primarily at private citizens and the press who gain knowledge of agent identities from either public or classified sources. In both instances, first

amendment interests are compromised.

The Intelligence Committee attempted to alleviate the adverse impact on the first amendment by adopting language that narrows the intent requirement. Criminality hinges on a finding that the identification was made "knowingly," with "an intent to impair or impede the foreign intelligence activities of the United States" and "in the course of an effort to identify and expose covert agents," and by adding a requirement that the disclosure intend "to impair or impede the foreign intelligence activities of the U.S. by the fact of such identification and exposure." While I applaud the committee's efforts, I remain convinced that no amount of tinkering can render this section constitutional, as long as it seeks to criminalize publication of information already in the public domain. These judgments all are highly subjective, thereby leaving the door open for less cautious officials to level this provision at a broad class of individuals, many acting within the Constitution.

The requisite intent can be inferred whenever the publication exposes and thereby diminishes the effectiveness of an intelligence agent or activity. Further, the intent requirement itself may have "the effect of chilling legitimate critique and debate."

In addition, it is clear that the name need not actually be revealed to constitute "identifying information." In some circumstances, simply noting the agent's title and location may be sufficient to reveal his identity. Thus, the number of details that must be omitted, and the consequent loss of credibility, is also a vague, expandable concept.

Finally, the concept of "in the course of an effort" offers no real protection. As a Society of Professional Journalists witness noted during the debate on this bill last year, "a journalist who is assigned to cover the intelligence community on a regular basis may indeed establish a pattern of reporting the names of agents or sources in the course of legitimate coverage of the CIA."

Furthermore, even if the revelation was a single story or a single incident, it is not clear that the act of investigating the story and preparing to publish it are insufficient to meet the Government's concept of "effort." The Department of Justice repeatedly has emphasized that the effort need not consist of a pattern of disclosure, but rather may be simply a pattern of acts with a purpose of disclosing.

I am not alone in this view. Distinguished constitutional scholars from around the country have also criticized section 601(c) and its predecessors as being both unwise and unconstitutional.

Consider this from Stephen Saltzberg of the University of Virginia Law School:

When it comes to punishing people who have figured out the identity of an agent on the basis of information available to the public, I think there are enormous problems to overcome. In fact, they cannot be overcome when all is said and done.

I recognize that the intent element of Section [601(c)] is the thread of hope for saving the statute, but in my view the thread is not strong enough. To punish people who want to impair or impede the foreign intelligence activities of the United States is to threaten anyone who favors a cutback in foreign intelligence gathering, or controls on the manner in which information is gathered; and it is a threat that cannot withstand scrutiny under the First Amendment. If a person does research in the library or archives and learns that *X* has been involved in intelligence work in Iran or Afghanistan, and the person believes that the nature of the work is not suitable for our government, can this person's mouth be closed by a statute like Section [601(c)]? Is it really permissible to prevent people from trying to get the government to change its ways by publicly disclosing what has been going on in order to criticize it? I doubt it. The line between an intention to impair the intelligence activities of the United States and an intention to seek a modification of the intelligence activities of the United States is one that is too fine for me to perceive.

Of course, the First Amendment involves balancing of interests. The need for the United States to protect its officers and agents is surely real and great, but the First Amendment is at its strongest when people are speaking out against the government, criticizing what it and its agents are doing. And I think the balance here will be in favor of speech.

Section 601(c) prohibits publication of identifying information even if the reporter or private individual derived the identity or identities wholly from public sources. This includes disclosures based upon inferences drawn from the Government's own nonclassified documents; it includes the publication of "common knowledge" as to who is a CIA agent or source in a particular area; it includes the revelation by an organization, such as a missionary church, newspaper, or university, based on its own internal investigation, that some of its members—contrary to the organization's policy—have acted as sources for the CIA; it includes republication of disclosures made by others. The limit on how public this information must be before prosecution will is left to the discretion of political appointees.

Moreover, section 601(c) criminalizes disclosures under a wide variety of circumstances. Try as the House Intelligence Committee did to limit the bill, I still believe it will forbid both wanton and callous disclosures as well as those that serve a socially useful purpose. It will create an unprecedented dilution of the notion of what constitutes freedom of speech and the press by criminalizing the utterance of publicly available information without a showing that the national security is at stake; indeed, there is no requirement that any adverse impact be felt by reason of the disclosure in order to constitute a crime.

I am also concerned about the wide range of individuals covered by this legislation. I believe this overinclusiveness adds to the constitutional problems of this bill.

A covert agent is defined to include not only intelligence officers or employees serving covertly outside the United States, but also anyone who is a "present or former agent of, or a present or former informant or source of operational assistance to an intelligence agency."

"Informant" is defined broadly as "any individual who furnishes information to an intelligence agency in the course of a confidential relationship protecting the identity of such individual from public disclosure." It is clear, therefore, that thousands of individuals fit this description, and that the bill is primarily a source protection bill for the CIA and the FBI. Regardless of the merits of their need for protection, the breadth of the definition broadens the restraint of free speech.

Furthermore, it is not clear that protecting the identity of sources, who may be in no greater peril than any other law enforcement informants, weighs as heavily against the need for open discussion of American foreign affairs as does the protection of employee identities.

Indeed, the original position of the Attorney General, when this bill's predecessor was under discussion last Congress, was solely to protect from harm the "men and women who serve our Nation as intelligence officers." Likewise, the FBI Director, in seeking FBI coverage, originally spoke only of "employees."

This expanded purpose should alert us to the danger of future additions to the definition of disclosures that impair American intelligence activities. Congress could criminalize the disclosure of many other matters derived from public information, such as the content of the covert activities themselves, the methods used, and so forth. The fact that those activities may have been in clear violation of American law or policy would be no defense. How will the line be drawn when so much information relevant to public debate arguably could impair or impede intelligence activities or foreign relations or national defense?

For these reasons, I believe this coverage is vastly overbroad, and fundamentally at odds with a free society. It is also unnecessary. Section 601(c) simply misses the mark—it aims the arsenal of the criminal law at the entire populace. But all the available

evidence indicates that the true culprit is the combination of sloppy secrecy procedures and unauthorized disclosure of classified information.

In other words, section 601(c) of the Intelligence Committee bill attacks a phantom problem—private citizens culling through public documents and sources. It thereby diverts attention from the real heart of the problem, which, as the CIA itself admitted, is "the disclosure of sensitive information based on privileged access * * * by faithless government employees * * *." This problem can be dealt with by punishing those employees and former employees who breach their trust by revealing identities or by providing assistance to others in identifying covert agents.

Moreover, if indeed it is possible to glean identities from public information or documents, then it is the responsibility of the CIA and the President to remove those indicators from the public domain and to improve the procedures for insuring effective cover. Criminalizing disclosures stemming from sloppy secrecy procedures, on the other hand, will only tend to lull the Agency into inaction. Surely if private citizens have been able to infer identities from public sources, so, too, has the KGB.

As the House Permanent Select Committee on Intelligence act "compelled to note that provisions for the concealment of intelligence operative are not fully adequate. The burden must be on the executive branch generally, and the intelligence community in particular, to remedy this situation."

Accordingly, the committee adopted a provision requiring the President to promulgate procedures that will help to rectify this situation. I believe this course of action will be more productive and certainly less destructive of free speech.

Never before has a criminal sanction been attached to this kind of speech. The CIA insists that it is necessary, but it is the responsibility of Congress, as well as the courts, to determine whether such a measure is constitutional or whether a less onerous alternative will deal adequately with the problem.

In conclusion, I believe this bill is dangerous not only for what it forbids directly, but also, for the precedent it creates.

Today we ban the disclosure of identities. Tomorrow, there will be talk of banning disclosure of covert actions themselves. Why not? The logic is the same—the preservation of effective foreign intelligence efforts.

If the American people are denied information, they are denied the power that the Constitution says resides with them. Preventing that is what the first amendment is all about.

Ultimately, it is the respect and protection we afford free speech that distinguishes this country from the nations within which the CIA secretly operates. If a free society is sacrificed for a better intelligence system, we have compromised our very goal.

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman for his statement. I understand the gentleman's position.

Mr. Chairman, I reserve the balance of my time.

Mr. McCLORY. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. YOUNG), a member of the committee.

Mr. YOUNG of Florida. Mr. Chairman, I rise in support of H.R. 4.

I will even support it stronger if it includes the amendment to be offered by my distinguished colleague, the gentleman from Ohio (Mr. ASHBROOK).

I would like to just make a few points in support of this legislation. You know, when the Committee on Intelligence meets in open session which it does occasionally, more often than not, representatives of the Soviet Union are there in the room observing what it is we are doing and talking about. On the Appropriation Committees dealing with defense, the same thing happens. In the Armed Services Committee, the same thing happens.

The point is that the Soviet Union is able in open sessions to send its operatives into this Congress to get for nothing information that we make available to the general public. They not only cover the meetings, they come in to pick up copies of our publications usually without cost. They visit offices on Capitol Hill and they learn for nothing things about us that we have to spend millions of dollars to learn about them. We have to put people's lives at risk to learn about them and what their plans are for us and our future.

Our security is important and the information that we obtain through these intelligence operations are important to that security.

The point is, Mr. Chairman, that we have to have an effective intelligence operation and the protection of the identities of those people who perform that vital service is extremely important if we are going to succeed.

One of our allied nations sent representatives here about a year ago to meet with members of our committee to determine what we believe the future of our intelligence community to be. Are we going to protect our agents, are we going to protect secrets? Their concern was not so much about how does that affect the United States, but how does that affect them. If we let out too much information, if we allow agents to be exposed and to be exposed to this risk, what kind of a risk are we creating for them back in their own countries?

I say, Mr. Chairman, that it is important that we have the cooperation of our friendly nations and our allied nations, because they also have effective intelligence operations. This legislation is extremely important not only to the security or our Nation, but to guarantee the continued cooperation of our allied nations and the preservation of an effective intelligence community.

Mr. Chairman, I would like to close with this comment.

There are those of us who serve on the Select Committee on Intelligence who have different philosophical viewpoints from one end of the spectrum to the other; but I can say, Mr. Chairman, that every member of that committee approaches the responsibility and the security of our Nation in a very mature fashion, in a very responsible fashion.

Yes, we do have some disagreements at times, but the disagreements are not political. They are never personal. Those disagreements are what members honestly and truly believe to be in the best interests of the United States of America and the security of our Nation and the security of our people.

I am very proud to have the opportunity to work with people like the gentleman from Massachusetts (Mr. BOLAND), the gentleman from Kentucky (Mr. MAZZOLI), the gentleman from Virginia (Mr. ROBINSON), the ranking member on our side, and the gentleman from Illinois (Mr. McCLORY), as well as every other member of our committee.

We bring to you a piece of legislation that I think deserves the unanimous support of this House of Representatives.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Chairman, I want to compliment the gentleman from Illinois (Mr. McCLORY), the gentleman from Kentucky (Mr. MAZZOLI), for this excellent piece of legislation, along with the gentleman from Massachusetts (Mr. BOLAND) and the gentleman from Virginia (Mr. ROBINSON).

This legislation is long overdue. I think they have done a great job.

I certainly hope the Members will give it the strongest support, because we need this kind of legislation on the statute books.

Mr. Chairman, the primary purpose of this measure is to enhance the protection of U.S. intelligence operatives working under cover. Such legislation is of compelling urgency as there are individuals, including former U.S. intelligence officials, who are busily and systematically engaged in efforts to destroy our intelligence capability by disclosing the identities of those clan-

destinely employed by the various U.S. intelligence agencies.

An episode in Jamaica illustrates what I am talking about. In July of last year, the homes of our Embassy's First Secretary in Jamaica and an AID employee were fired upon shortly after the American editor of Covert Action Information Bulletin claimed in a press conference that these U.S. officials and 13 other Americans, as well as Jamaicans, were connected with the CIA. Not only were the names of these individuals disclosed, but also their home addresses, telephone numbers and auto license tag numbers. Fortunately, unlike the CIA station Chief in Athens who was killed in December 1975 after his cover was blown in a similar fashion by the magazine Counter Spy, the American officials and families involved in the Kingston attack survived unscathed. It was a close call, however, as two of the bullets penetrated the bedroom window of one of the children who was providentially away at the time.

With that as backdrop, it is little wonder that our human intelligence collection efforts are in serious jeopardy around the world. Self-preservation is a very basic instinct and why should anyone want to be associated with an intelligence community that cannot provide adequate protection for those it asks to undertake dangerous assignments of significant national security import?

In evaluating the merits of this legislation, I find former CIA Director William Colby especially persuasive when he, while participating in an American Enterprise Institute panel discussion of intelligence matters, observed that:

The journalists believe they should protect their sources. I think our Nation should protect its sources. We need a discipline over our employees to make sure that, when they undertake to keep the secrets they are going to learn when they go to work for intelligence, they darn well keep them. If they violate that trust, they should be subject to criminal action. There are thirty-odd statutes in our criminal code that punish government officers for revealing information they learned during the course of their work—the Agricultural Department employee who reveals the crop statistics, for example, and a variety of others.

Our national secrets and the officers who serve their country are entitled to that same protection from someone who reveals them. The soldier does not mind the enemy shooting at him, but he certainly does not want a fellow American shooting at him. The intelligence officer does not mind the threat and the danger from the enemy or the foreign country, but he cannot accept the possibility that some American can freely reveal his name and endanger him.

Finally, I would like to address briefly the first amendment questions of this bill that have been raised by some of my colleagues, especially with respect to criminalizing disclosures of undercover intelligence identities by individuals who have never been affiliated with the U.S. Government. Of special concern in this regard are journalists. This bill was drafted with great care and sensitivity to this issue and I believe has resolved it in a responsible and constitutionally acceptable manner. Such individuals can only be prosecuted under this legislation when it can be clearly demonstrated that the disclosure occured in the context of a practice of identification and disclosures intended to impair U.S. intelligence capabilities.

This means that to be criminally culpable, one would have to be engaged in the business of naming names like the publishers of the aforementioned Covert Action Information Bulletin or Counter Spy. This approach makes eminently good sense and is consistent with the point made by Justice Oliver Wendell Holmes (in the famous Espionage Act decision of 1919) that—

The first amendment * * * obviously was not intended to give immunity for every possible use of language * * * the most stringent protection of free speech would not protect a man in falsely shouting fire in a theater and causing a panic.

Also very relevant in this connection are the remarks of Zechariah Chafee, a leading defender of free speech during his 37 years at the Harvard Law School and the uncle of the distinguished Senator from Rhode Island who introduced the Senate version, S. 391, of this bill. In a book entitled "Free Speech in the United States," the elder Chafee wrote that:

The true boundary line of the First Amendment can be fixed only when Congress and the courts realize that the principle on which speech is classified as lawful or unlawful involves the balancing against each other of two very important social interests, in public safety and in the search for truth. Every reasonable attempt should be made to maintain both interests unimpaired, and the great interests in free speech should be sacrificed only when the interest in public safety is really imperiled, and not, as most men believe, when it is barely conceivable that it may be slightly affected. In war time, therefore, speech should be unrestricted by the censorship or by punishment, unless it is clearly liable to cause direct and dangerous interference with the conduct of the war. Thus, our problem of locating the boundary line of free speech is solved. It is fixed close to the point where words will give rise to unlawful acts.

In sum, Mr. Chairman, what we have before us is practical, commonsense legislation that addresses a problem of paramount national security importance while carefully insuring no genuine civil liberties are infringed upon. I, therefore, urge its immediate passage. It is the least we can do for those who literally put their lives on the line for us.

Mr. McCLORY. Mr. Chairman, I yield 3 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I would like to express my deepest appreciation to Chairman MAZZOLI, to the ranking minority member, the gentleman from Illinois (Mr. McCLORY), and to the chairman of the full committee, the gentleman from Massachusetts (Mr. BOLAND), and to the ranking minority member (Mr. ROBINSON) and to all the members of the committee for the efforts they have made in order to do this.

Mr. Chairman, I rise in support of this bill for which the clear purpose as stated by the committee is to prevent the disruption of legitimate, important intelligence operations, and to criminalize those disclosures which clearly represent the conscious and pernicious effort to eliminate the effectiveness of U.S. intelligence operations.

Despite great technological advancements in information gathering by our intelligence community, a very significant portion of information collection relies upon live informants.

This human intelligence effort is increasingly threatened by the deliberate disclosure of the identities of our undercover agents. Publication of the names of these agents not only extinguishes the effectiveness of these agents, but endangers their lives as well.

Recently we have witnessed the gruesome illustration of the urgent need for criminal penalty for this type of disclosure. The most infamous example was the identification in "Counter Spy"—published by former CIA employee, Phillip Agee—of Richard S. Welch as the station chief for the CIA in Athens, Greece. Shortly after this divulgence, Welch was assassinated. The most recent example, was the identification in 1980 by covert action information bulletin—another anti-intelligence publication initiated with Agee's assistance—of 15 CIA agents serving Marxist Jamaica. Again, the disclosure precipitated a machinegun attack on the home of the CIA station chief.

It is clear that without some legislative action to restrict these disclosures, agents will continue to be exposed to murder as a result of the actions of those bent on total elimination of the intelligence-gathering capacity of the U.S. Government.

Let there be no doubt that this is the aim of the propagators of such publications and supporting organizations. In 1978, a national conference was held by the campaign to stop government spying, where objectives were announced to continue worldwide publication of intelligence information, suits directed against Government agencies and private companies whose security departments cooperate with law enforcement agencies and intelligence agencies and to make use of the Freedom of Information Act for forced disclosure of intelligence information.

Our Nation's intelligence operations enable us to provide countermeasures to protect our people, and are thus an integral part of our defense strategy. We must act decisively to protect our intelligence community from assault, and in this vein I am pleased with the swift action of the House Committee in reporting this legislation, H.R. 4 contains provisions which would not limit prosecution to those individuals having or having had direct or indirect access to classified information, but is carefully drawn to include anyone who deliberately exposes covert agents with the intent of destroying U.S. intelligence goals. This is a necessary component of effective legislation because it would clearly stipulate that the outright objective of exposing intelligence personnel is contrary to important national interests.

I have sponsored legislation which would also provide criminal penalties for anyone who falsely identifies an individual as an intelligence agent, and I support the inclusion of this provision. Enactment of such a measure would put a halt to the insidious efforts of anti-intelligence sources to dismantle U.S. information gathering with the threat of exposure. Further, I believe that injunctive relief should be included in the bill to give the Attorney General power to take action to stop imminent publication of such identification.

I applaud the committee on their efforts to deal sternly with those who would endanger the lives of those who serve in sensitive intelligence positions, and urge the House to adopt the measure.

Mr. McCLORY. Mr. Chairman, will the gentleman yield to me?

Mr. RUDD. I will be glad to yield.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding.

The gentleman as a former FBI agent, I am sure, will be interested in the fact that this legislation also covers FBI agents who operate under cover when they are engaged in counterintelligence activities. It will secure their protection, as well as our CIA agents or other intelligence agents who operate under cover overseas.

Mr. RUDD. I am sure that information is of great concern and gives a great deal of delight to all the people engaged in intelligence activities. I have sponsored legislation like this every year that I have been in Congress. It has been a little more direct with regard to penalties and punishment for violations of the law.

Again I want to applaud the committee in their efforts to deal strictly with those who would endanger the lives of those who serve in sensitive intelligence positions on behalf of the security of our Nation.

Mr. Chairman, I urge the House to adopt the measure.

Mr. MAZZOLI. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I want to thank the gentleman for yielding.

I understand the very difficult job that the committee had to assume. They have seen something that is very reprehensible and attempted to find an answer. Unfortunately because the problem they are trying to correct is so reprehensible, they have overstepped constitutional bounds.

The gentleman from Ohio says that section 601(c) is the work product of the ACLU. I want to say as one who usually supports ACLU positions, whether it is their work product, or not, I oppose it.

The committee language allows an incursion on first amendment rights in section 601(c) which for the first time in our history would have private citizens prosecuted for disclosing information already in the public domain. That is such a horrendous step toward violating the first amendment, that no matter who thought of it, whether it is the ACLU or the committee or anyone else, we ought not to have any part of it. I think if that section were to be adopted, what happened at Watergate where the information of prior CIA identification of some of the burglars was disclosed could probably be prosecuted. If section 601(c) is adopted, you would have members of the clergy who discovered that people within their denomination were CIA agents prosecuted if they disclosed it, even if they discovered it quite on their own because it was a matter of public information.

I think the thing to do is not to make this section even worse. The thing to do is to strike it.

I think that the gentleman from Ohio gives the ACLU much more credit than it deserves. Given what Mr. Meese has had to say about the ACLU, to suggest that the ACLU can walk into the CIA headquarters and get them to agree to language which should be adopted by the House of Representatives goes beyond the realm of reasonable imagination.

I thank the gentleman for yielding to me.

□ 1145

Mr. MAZZOLI. I thank the gentleman for that statement.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. WORTLEY).

Mr. WORTLEY. Mr. Chairman, I rise in support of H.R. 4 the Intelligence Identities Protection Act. I strongly support enactment of legislation to provide criminal penalties for the unauthorized disclosure of the identities of those who engage or assist in the foreign intelligence activities of this country. This Nation's intelligence apparatus is our firstline defense. The national security of the United States depends upon the strength and vitality of that apparatus. This strength and vitality is being sapped. The very lives of the individuals involved in these activities on behalf of the United States may be in jeopardy as a result of the unauthorized disclosure of the identities of our intelligence officers, agents, and sources. Legislation of this type is critically important to deter and punish those who make it their business to make such unauthorized disclosures.

This legislation is long overdue. Extensive hearings before the House and Senate Intelligence and Judiciary Committees have documented the damage these unauthorized disclosures have had on our human source intelligence collection capabilities. Director William J. Casey, of Central Intelligence, in testimony before the Senate Judiciary Subcommittee on Security and Terrorism in May testified that—

> These unauthorized disclosures have resulted in untold damage, and, if not stopped, will result in further damage to the effectiveness of our intelligence apparatus, and hence the nation itself.

This body's own Permanent Select Committee on Intelligence in its report on H.R. 4 attests to the utter uselessness of these disclosures:

> The unauthorized disclosure of the names of undercover intelligence agents is a pernicious act that serves no useful informing function whatsoever. It does not alert us to abuses; it does not further civil liberties; it does not enlighten public debate; and it does not contribute one iota to the goal of an educated and informed electorate.

The only purpose it serves is to disrupt our legitimate intelligence collection programs. Effectively, such a result benefits no one but our adversaries.

Mr. Chairman, as a newspaper publisher and editor, I bring a special perspective to this debate. Opponents of this legislation have been heard to say that its enactment will have a chilling effect on first amendment rights. In my opinion, neither the House nor the Senate version of this legislation constitutes an assault upon the first amendment. Indeed, the U.S. Supreme Court in Haig against Agee found the conduct proscribed by this legislation to be "clearly not protected by the Constitution." The Intelligence Identities Protection Act would not inhibit public discussion and debate about U.S. foreign policy or intelligence activities, and would not operate to prevent the exposure of illegal activities or abuses of authority. Disclosures of intelligence identities by persons who have not had authorized access to such information would be punishable only under specified conditions, which have been carefully crafted and narrowly drawn. The act does not apply

to anyone not engaged in an effort or a pattern of activities designed to ferret out and expose intelligence personnel. It is instructive to look at all of the elements of proof required in a prosecution under subsection 601(c). The Government would have to prove each of these elements beyond a reasonable doubt.

Mr. Chairman, consideration of the carefully and narrowly drawn prohibition in the Intelligence Identities Protection Act, in light of the clear and present danger to our Nation's intelligence capabilities resulting from unauthorized disclosures of intelligence identities, leads inescapably to one conclusion. The legislation we are considering fulfills the urgent need to increase our efforts to guard against damage to our crucial intelligence sources and methods of collection, without impairing civil and constitutional rights.

Mr. Chairman, I urge passage of this much needed legislation.

Mr. McCLORY. Mr. Chairman, I yield 2½ minutes to the gentleman from Virginia (Mr. WHITEHURST), a member of the committee.

Mr. WHITEHURST. Mr. Chairman, I rise in support of the Intelligence Identities Protection Act, H.R. 4.

Mr. Chairman, each and every day of the year some of the true patriots of our country are at work, clandestinely, throughout the world uncovering information necessary to keep our leaders informed of important world events—before they happen. They must toil under extremely difficult conditions to produce in an extremely difficult job. And, they do so often at risk to their safety—indeed, their lives.

Unfortunately, there are a group of miscreants who have taken it upon themselves to greatly increase these risks by exposing the identities of our covert intelligence agents.

Mr. Chairman, what is needed is legislation designed to act with the precision of a highly skilled surgeon—to cut out the malignant cells of Phillip Agee and others of his ilk while leaving untouched the healthy activities of the fourth estate. The bill reported by the Intelligence Committee is up to the task and that is why I have chosen to support it.

H.R. 4 is a good piece of legislation born of extensive committee hearings, deliberations, and consultations with the CIA and Department of Justice. Both of these agencies believe H.R. 4 to be an effective measure.

H.R. 4 would make it a crime to engage in an ongoing effort intended to impair U.S. intelligence activities and to further that effort by disclosing the identities of covert agents—nothing more; nothing less.

This bill would in no way inhibit free debate over the policies underlying our foreign intelligence activities, or over the activities themselves. H.R. 4 would not impose sanctions against those who criticize the CIA, no matter how unwisely. H.R. 4 simply is designed to protect our covert intelligence agents from having their identities publicly brandished by those who seek to destroy the security of our country.

A delicate balance has been struck in this legislation, through long and painstaking effort.

Mr. Chairman, the reservation of constitutional guarantees has been honored as we strove to reduce the vulnerability of the lives of our intelligence officers, agents, and informers whose work is essential to the national security.

Mr. Chairman, for these reasons I urge support for H.R. 4.

Mr. McCLORY. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, I think the debate on this measure has been very illuminating. I am confident that there is overwhelming support for the legislation. I hope that the discussion of the provisions of 601(c) will not distract us from the intent of the committee or from the intent of all who are supporting this measure.

I disagree with the amendment that will be offered by my colleague, the gentleman from Ohio (Mr. ASHBROOK). I think employing the word "intent" is better, though the expression "reason to believe" is a valid one. I think "reason to believe" relates more to the subject of negligence than it does to a criminal offense. I think that in a criminal statute such as we have here that we should use the expression "intent."

As far as the persons covered by this, I think that all persons should be covered. However, we are putting forth this legislation primarily to get at those who make a business of disclosing the names and the identities of covert agents and who capitalize on that and profit from it. And we certainly want to end that promptly.

Now, I do not think we should exempt any particular category. Reference has been made to the clergy. I have a great respect for the clergy and other professions and activities. But to exempt any particular individual merely because of the activity in which he or she happens to be engaged I think would be a distortion of our whole concept of criminal law.

I hope that we can keep our eye on the objective of this legislation and pass it promptly and send it to the President.

Mr. MAZZOLI. Mr. Chairman, I yield myself the remainder of my time.

I would just sum up by saying I endorse everything that was just said by the gentleman from Illinois. I believe that the House would do a good service for the country and for the intelligence community were it to vote out the bill exactly as it is before us today without any changing amendments.

I have a lot of sympathy for the amendments that will be offered. We debated them carefully in the committee, as the gentleman from Florida (Mr. YOUNG) said. These are offered by serious individuals who have the best interests of their Nation at heart, as they view it. On a given day, under a given set of circumstances, many of these could be supportable. But we have before us a bill which has the input of all sides of the philosophical spectrum and political spectrum. It does indisputably help the CIA and the other intelligence communities solve a very vexing problem, and that is, how do you deal with publications who name names and, therefore, blow identities and destroy effectiveness of our agents.

While the gentleman from Ohio (Mr. ASHBROOK) might argue at some point that the CIA prefers other language, it is indisputable that they say this language, which is before the House today, will do the job that they know has to be done. They have, and their colleagues in the intelligence community have, fought the good fight and have been more patient than they needed to be these years, waiting for some solace, and waiting for some relief, and this is the relief before us.

They do want this bill, they do want this kind of relief. I think we can speed it to them and speed it to the Nation if the House votes up this bill as we see it before us today.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I want to commend the gentleman from Kentucky and the gentleman from Illinois for their summation.

I have just a couple of points before we get into the amendment stage.

As has been said here, this bill is a consensus reached not alone by members of this committee, not alone by members of the Judiciary Committee, but by the intelligence community, by the CIA, and also by some distinguished constitutional scholars whose opinion is that this particular bill, H.R. 4, would pass constitutional muster. There is a serious question among constitutional scholars as to whether or not S. 391, the Senate bill, with the standard of reason to believe, would pass that muster.

Therefore, I would hope that the entire membership of the House, those whose staffs are following this debate on television, would carry the message to their Members that this particular bill, H.R. 4, is the bill that has reached a consensus.

I am not sure that it is agreed to by the ACLU. I think probably TED WEISS knows more about that than I

would, and his indication is that he does not believe the ACLU backs this bill. I am not sure it does itself.

Mr. WEISS. If the gentleman will yield, I did not say that. I said the ACLU probably feels that if this does not happen, something worse will. I am speaking for myself, saying it is too bad they have accepted it.

Mr. BOLAND. I accept the correction. I think the ACLU would prefer this to S. 391. I am sure Morton Halperin would prefer H.R. 4 to S. 391, the Senate bill.

But the fact of the matter is that some of the distinguished constitutional scholars, such as Philip Kurland of the University of Chicago Law School, who specifically states that without this kind of specific intent standard, which is built into H.R. 4, the bill would be unconstitutional.

Therefore, my plea to the membership of this House is that they back this bill as we have reported it. It is backed by the intelligence community. The CIA backs H.R. 4. Sure, it prefers S. 391, and I guess the Attorney General of the United States prefers S. 391, because it would be easier to prosecute under S. 391, and that is the constitutional objection.

Mr. Chairman, I would hope that the membership would follow the leadership of the gentleman from Kentucky (Mr. MAZZOLI) and the gentleman from Illinois (Mr. MCCLORY), who spent so much time on this bill, and defeat all the amendments that were offered to H.R. 4, and we can get along with a bill which, when challenged in the courts, will be held constitutional.

Mr. HYDE. Mr. Chairman, I am pleased to rise in vigorous support of H.R. 4, the Intelligence Identities Protection Act.

The Committee on the Judiciary, of which I am a member, considered the predecessor of H.R. 4 last year, following a sequential referral from the Intelligence Committee, and favorably reported that bill by a stunning majority. I would like to commend the members of the Intelligence Committee for their hard work and thoughtful effort in connection with this bill in the last Congress and in this one. After careful consideration, I am convinced that a compelling need has been shown for legislation of this nature and I believe that it is constitutional.

What is the compelling need—the clear and present danger—which this bill is intended to meet, Mr. Chairman? As my colleagues from the Intelligence Committee have described so eloquently, the dangers arising out of these disclosures include demoralization within our intelligence agencies, discouragement of potential sources of information, and impairment of our national defense and foreign policy efforts. We must be willing to protect our agents and their families with the most effective methods available to us under the Constitution and I am firmly committed to that endeavor.

Mr. Chairman, the first amendment is not absolute—for any of us. No special exception is made for children who want to pray in public schools or for Members of Congress who want to give golden fleece awards. However, the danger that the bill addresses must be distinctly identified and compelling, and the means to combat it must be narrowly drawn and necessary. These tests are best illustrated by Justice Holmes' famous observation that no one has the right to yell "fire" in a crowded theater. By the same token, Mr. Chairman, no one has the right to risk the lives of our agents and our national security by disclosing the names of covert agents.

Mr. Chairman, after 2 years of work by Members on both sides of the aisle, this bill is so finely tuned and narrowly drawn that the Governmen't burden of proof is substantial, as it should be. If the defendant has not had authorized access to classified information, it must prove, beyond a reasonable doubt, not only that the defendant had a special state of mind, but that the disclosure was made in the course of an effort to identify and expose covert agents. No prosecutions for conspiracy, aiding and abetting, or misprison of a felony are authorized unless the disclosure was part of an effort. The Government's public disclosure of the covert relationship is a defense. Finally, the bill provides an avenue for whistle blowers by exempting from prosecution communications to congressional intelligence committees.

Is this the least restrictive means that we can use, Mr. Chairman, to get at the evil we have identified? I believe that it is. Our concern is with protecting the identities of our agents—the discloser's employment circumstances are irrelevant. The damage done is the same, whether the defendant had authorized access to classified information, or not. There is, and, or course, there ought to be, ample room for free and robust public debate on our intelligence policies without injecting the names of our covert agents into that debate. This minimal limitation on free speech and press is indeed proper when compared to the overriding and fundamental national interest to be served—providing for the common defense.

Mr. Chairman, if any of my colleagues have lingering doubts about the constitutionality of this bill, I commend to their attention the recent Supreme Court case of Haig against Agee. The respondent in that case was a notorious discloser of agent's names, a fact which the court repeatedly emphasized in its opinion. In rejecting the argument that the first amendment prevented the Secretary of State from revoking his passport for these activities, which created a serious danger to our national security, the Court observed:

> These disclosures, among other things, have the declared purpose of obstructing intelligence operations and the recruiting of intelligence personnel. They are clearly not protected by the Constitution. The mere fact that the respondent is also engaged in criticism of the Government does not render his conduct beyond the reach of the law.

Mr. Chairman, an enlightened editorial, which appeared last year in the Washington Star, one of the few newspapers able to see beyond its own narrow self-interest on this issue, suggested that:

> Congress should do whatever is necessary, taking due but not paralyzing heed of constitutional scruples to protect our covert * * * agents. Otherwise it would be well to admit that we are too paralyzed by constitutional scruples to conduct an effective foreign intelligence system in this dangerous world, and stop asking our people to risk their lives in its service. We cannot have it both ways.

Mr. Chairman, we cannot have it both ways. I reject the absolutist approach to the first amendment which has been advanced during the debate on this type of legislation as a threat to our national security, and ultimately, to all of our precious liberties. Last year, we heard suggestions that an effort to pass this legislation was merely a hysterical reaction to attacks upon our agents in Jamaica. Mr. Chairman, let me emphasize to these critics, 1 year later, that this is not an emotional reaction. It is a firm commitment which some of us have made to protecting the brave men and women who serve us so well.

I urge my colleagues to lend their support to prompt passage of H.R. 4.

● Mr. FIELDS. Mr. Chairman, as a cosponsor of the Intelligence Agents Identity Act of 1981, I support the passage of H.R. 4 as a means to strengthen our national intelligence capability.

A crucial element of an effective national security policy is the ability to collect and analyze high-quality intelligence information. The need for a sophisticated covert intelligence infrastructure becomes more critical as U.S. interests abroad expand. Notwithstanding the variety of technical components used by the intelligence community, there remains a need to employ traditional human resources. Without the human element contributing to the intelligence system, the United States would not have the proper insight into the plans of foreign governments it confronts or international problems it must face. As the United States seeks to improve its national security strategy, a network of clandestine operators to carry out covert activities in important situations is a fundamental prerequisite.

Further, the identities of these individuals must be protected for their personal safety and to insure the credibility of the entire operation.

Intelligence agents are faced with the constant consequences of exposure. Because espionage is a criminal activity in many countries, our agents must face the threat of expulsion or imprisonment. Their safety is further threatened by terrorist actions directed against them.

Last year, on the Fourth of July, terrorists opened fire on the home of Richard Kinsman, a U.S. Embassy employee living in Kingston, Jamaica. Bullets ripped through the bedroom window of Kinsman's daughter. Fortunately, no one was injured.

This attack came within 24 hours of an announcement by Louis Wolfe of the Covert Action Information Bulletin. Wolfe had just disclosed the names of 15 people he claimed to be CIA agents. In addition, he revealed their addresses, phone numbers, license plate numbers and the type of car they owned.

Yet not all who are victims of ignoble crusaders such as Louis Wolfe are as fortunate to survive. Richard Welch, an attaché at the American Embassy in Athens, was gunned down in 1975 while returning from a Christmas party. This murder followed an article in the Athens News tagging Welch as a CIA station chief. The information in the News story had earlier been printed in Counterspy magazine, published by ex-CIA employee Phillip Agee.

Like Wolfe, Agee has no qualms about revealing the identities of covert U.S. agents. For Agee, these disclosures play a necessary role in his ongoing struggle for socialism in the United States.

U.S. intelligence officers are leading the fight against terrorism on the international front. To arbitrarily disclose the identities of these individuals serves to render American credibility abroad worthless. These unauthorized exposures result in a variety of consequences including a loss of expertise in the intelligence field, erosion of morale for the families of these officers, and a general deterioration in the quality of U.S. foreign policy.

We as a nation can no longer tolerate this breach in national security. Our responsibility is to the men and women whose lives are jeopardized daily in their struggle to protect freedom and democracy in the United States. Regardless of the motivating forces behind men like Phillip Agee, the end result is a disruption in the legitimate intelligence-gathering program. No longer should these agents be subjected to additional threats of violence stemming from arbitrary disclosures. The very nature of their profession mandates a life of adversity and perilous hazards. Individuals who have served their country in this dangerous and frequently fatal capacity should be sheltered from the misguided efforts of these ignoble crusaders.

Toward this end, I urge the adoption of H.R. 4, which will criminalize the disclosures of intelligence identities. We must now take firm action to protect not only the integrity of these agents but also to protect our national security from further treasonous disclosures.●

● Mr. DERWINSKI. Mr. Chairman, I support this legislation. We have delayed far too long in providing a law, first drafted almost 6 years ago, to protect American citizens abroad from attack and possible murder. I am referring, of course, to American intelligence employees and agents—and their families—who, it has been amply demonstrated, quickly become the targets of terrorists when they are openly identified by their fellow citizens. No one in my opinion has the right to mark a fellow citizen for murder.

It is claimed that part of this bill may be unconstitutional. I do not think so. In the first place, it is not the compilation of previously published information which would be outlawed by this legislation, it is the publicized conclusion that such data demonstrates an intelligence connection. As a matter of fact, the bill would not make it a crime to reveal information previously published by the U.S. Government and, in any case, the law would require that research by itself would not be sufficient to convict.

This publicized conclusion, it should be remembered, could subject the person so identified, accurately or falsely, to physical attack and could, at least, negate the work he was sent abroad by his Government to do. This is the activity that this bill would criminalize and only if there were intent to "impede or impair" the intelligence effort of the United States. No right is absolute if lives are endangered. This principle has been recognized by the courts.

Even before the attack on the home of the CIA chief of station in Kingston, Jamaica, on July 4, 1980, Cord Meyer, a former intelligence officer himself, wrote of some of the dangers inherent in the unchecked open identification of our intelligence employees. In a newspaper column dated June 7, 1980, Meyer described one of the unfortunate results of the public exposure of American intelligence personnel by the Covert Action Information Bulletin:

(T)his ongoing exposure of CIA officials involves a massive hemorrhage that is far more damaging than the potential leakage of operational details from an excessive number of congressional committees. The assassination of the CIA station chief in Greece, Richard Welch, in 1975, shows how tragic can be the consequences of the fingering of CIA officials abroad . . .

But even if more assassinations do not result from the continuing exposures that the Bulletin plans to make in subsequent issues, the damage done to the careers and usefulness of those identified is irreparable.

Meyer pointed out:

For their own protection they can no longer serve in many corners of the world where terrorists flourish and many governments will no longer accept them as members of American diplomatic missions once they have been so openly identified.

The author stated, correctly, I believe—

The real loser is the American public whose security will steadily be eroded by the loss of so much carefully trained talent from the front lines of the long struggle with the KGB and its allies.

Meyer concluded:

No other democratic country attempts to conduct intelligence abroad with so little protection for its career officers.

This legislation is something many of us here have favored since the mid-1970's after Richard Welch, CIA chief of station, was murdered in Athens, Greece. Meyer, in his column cited above, had this to say:

Let us hope that we don't have to wait for a replay of the Welch assassination to shock the Congress and the administration into making the legal and procedural reforms that seem so obviously necessary.

This was written before the Kingston attack where, fortunately, no one was killed. That assault, nonetheless, serves as a reminder of something which has seemed "so obviously necessary" for so long to so many of us. The Congress should do the right thing now and pass this bill.●

● Mr. MICHEL. Mr. Chairman, the tragic murder of CIA agent Richard Welch in Athens in 1976 focused our attention on the jeopardy that such individuals are placed in through public identification.

Thus, in 1976 and again in 1977, I introduced legislation to provide for the personal safety of those persons engaged in furthering the foreign intelligence operations of the United States.

In introducing such legislation during the 95th Congress, I said that the problem was most urgent and that we had to take positive actions to protect the lives of our agents.

I feel as strongly about this matter now as I did then.

Our intelligence agents have become the actual or potential victims of what might be called literary hit men who use a book or a magazine article to do their dirty work. It could just as easily be an assassin's bullet, because the results are tragic.

These literary hit men have put the lives of American intelligence officials in jeopardy. Agent Welch died because of such an exercise in irresponsibility.

I just want to say that I am glad we have this chance to protect those whose work means so much to our national security.●

The CHAIRMAN. All time for general debate has expired. Pursuant to the rule, the Clerk will now read the substitute committee amendment recommended by the Permanent Select Committee on Intelligence now printed in the reported bill as an original bill for the purposes of amendment. No amendments are in order except germane amendments printed in the CONGRESSIONAL RECORD on or before September 22, 1981.

The Clerk read as follows:

H.R. 4

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Intelligence Identities Protection Act".

SEC. 2. (a) The National Security Act of 1947 is amended by adding at the end thereof the following new title:

"TITLE VI—PROTECTION OF CERTAIN NATIONAL SECURITY INFORMATION

"DISCLOSURE OF IDENTITIES OF CERTAIN UNITED STATES UNDERCOVER INTELLIGENCE OFFICERS, AGENTS, INFORMANTS, AND SOURCES

"SEC. 601. (a) Whoever, having or having had authorized access to classified information that identifies a covert agent, intentionally discloses any information identifying such covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such covert agent and that the United States is taking affirmative measures to conceal such covert agent's intelligence relationship to the United States, shall be fined not more than $50,000 or imprisoned not more than ten years, or both.

"(b) Whoever, as a result of having authorized access to classified information, learns the identity of a covert agent and intentionally discloses any information identifying such covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such covert agent and that the United States is taking affirmative measures to conceal such covert agent's intelligence relationship to the United States, shall be fined not more than $25,000 or imprisoned not more than five years, or both.

"(c) Whoever, in the course of an effort to identify and expose covert agents with the intent to impair or impede the foreign intelligence activities of the United States by the fact of such identification or exposure, discloses, to any individual not authorized to receive classified information, any information that identifies a covert agent, knowing that the information disclosed so identifies such covert agent and that the United States is taking affirmative measures to conceal such covert agent's intelligence relationship to the United States, shall be fined not more than $15,000 or imprisoned not more than three years, or both.

"DEFENSES AND EXCEPTIONS

"SEC. 602. (a) It is a defense to a prosecution under section 601 that before the commission of the offense with which the defendant is charged, the United States had publicly acknowledged or revealed the intelligence relationship to the United States of the individual the disclosure of whose intelligence relationship to the United States is the basis for the prosecution.

"(b)(1) Subject to paragraph (2), no person other than a person committing an offense under section 601 shall be subject to prosecution under such section by virtue of section 2 or 4 of title 18, United States Code, or shall be subject to prosecution for conspiracy to commit an offense under such section.

"(2) Paragraph (1) shall not apply (A) in the case of a person who acted in the course of an effort to identify and expose covert agents with the intent to impair or impede the foreign intelligence activities of the United States by the fact of such identification and exposure, or (B) in the case of a person who has authorized access to classified information.

"(c) It shall not be an offense under section 601 to transmit information described in such section directly to the Select Committee on Intelligence of the Senate or to the Permanent Select Committee on Intelligence of the House of Representatives.

"PROCEDURES FOR ESTABLISHING COVER FOR INTELLIGENCE OFFICERS AND EMPLOYEES

"SEC. 603. (a) The President shall establish procedures to ensure that any individual who is an officer or employee of an intelligence agency, or a member of the Armed Forces assigned to duty with an intelligence agency, whose identity as such an officer, employee, or member is classified information and which the United States takes affirmative measures to conceal is afforded all appropriate assistance to ensure that the identity of such individual as such an officer, employee, or member is effectively concealed. Such procedures shall provide that any department or agency designated by the President for the purposes of this section shall provide such assistance as may be determined by the President to be necessary in order to establish and effectively maintain the secrecy of the identity of such individual as such an officer, employee, or member.

"(b) Procedures established by the President pursuant to subsection (a) shall be exempt from any requirement for publication or disclosure.

"EXTRATERRITORIAL JURISDICTION

"SEC. 604. There is jurisdiction over an offense under section 601 committed outside the United States if the individual committing the offense is a citizen of the United States or an alien lawfully admitted to the United States for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act).

"PROVIDING INFORMATION TO CONGRESS

"SEC. 605. Nothing in this title shall be construed as authority to withhold information from Congress or from a committee of either House of Congress.

"DEFINITIONS

"SEC. 606. For the purposes of this title:

"(1) The term 'classified information' means information or material designated and clearly marked or clearly represented, pursuant to the provisions of a statute or Executive order (or a regulation or order issued pursuant to a statute or Executive order), as requiring a specific degree of protection against unauthorized disclosure for reasons of national security.

"(2) The term 'authorized', when used with respect to access to classified information, means having authority, right, or permission pursuant to the provisions of a statute, Executive order, directive of the head of any department or agency engaged in foreign intelligence or counterintelligence activities, order of a United States court, or provisions of any Rule of the House of Representatives or resolution of the Senate which assigns responsibility within the respective House of Congress for the oversight of intelligence activities.

"(3) The term 'disclose' means to communicate, provide, impart, transmit, transfer, convey, publish, or otherwise make available.

"(4) The term 'covert agent' means—

"(A) an officer or employee of an intelligence agency, or a member of the Armed Forces assigned to duty with an intelligence agency—

"(i) whose identity as such an officer, employee, or member is classified information, and

"(ii) who is serving outside the United States or has within the last five years served outside the United States;

"(B) a United States citizen whose intelligence relationship to the United States is classified information and—

"(i) who resides and acts outside the United States as an agent of, or informant or source of operational assistance to, an intelligence agency, or

"(ii) who is at the time of the disclosure acting as an agent of, or informant to, the foreign counterintelligence or foreign counterterrorism components of the Federal Bureau of Investigation; or

"(C) an individual, other than a United States citizen, whose past or present intelligence relationship to the United States is classified and who is a present or former agent of, or a present or former informant or source of operational assistance to, an intelligence agency.

"(5) The term 'intelligence agency' means the Central Intelligence Agency, the foreign intelligence components of the Department of Defense, or the foreign counterintelligence or foreign counterterrorist components of the Federal Bureau of Investigation.

"(6) The term 'informant' means any individual who furnishes information to an intelligence agency in the course of a confidential relationship protecting the identity of such individual from public disclosure.

"(7) The terms 'officer' and 'employee' have the meanings given such terms by sections 2104 and 2105, respectively, of title 5, United States Code.

"(8) The term 'Armed Forces' means the Army, Navy, Air Force, Marine Corps, and Coast Guard.

"(9) The term "United States', when used in a geographic sense, means all areas under the territorial sovereignty of the United States and the Trust Territory of the Pacific Islands.".

(b) The table of contents at the beginning of such Act is amended by adding at the end thereof the following:

"TITLE VI—PROTECTION OF CERTAIN NATIONAL SECURITY INFORMATION

"Sec. 601. Disclosure of identities of certain United States undercover intelligence officers, agents, informants, and sources.

"Sec. 602. Defenses and exceptions.

"Sec. 603. Procedures for establishing cover for intelligence officers and employees.

"Sec. 604. Extraterritorial jurisdiction.

"Sec. 605. Providing information to Congress.

"Sec. 606. Definitions.".

Mr. MAZZOLI (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be consid-

ered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment which has been printed in the RECORD in accordance with the rule.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: Page 3, strike out lines 11 through 21 and insert in lieu thereof the following:

"(c) Whoever, in the course of a pattern of activities intended to identify and expose covert agents and with reason to believe that such activities would impair or impede the foreign intelligence activities of the United States, discloses any information that identifies an individual as a covert agent to any individual not authorized to receive classified information, knowing that the information disclosed so identifies such individual and that the United States is taking affirmative measures to conceal such individual's classified intelligence relationship to the United States, shall be fined not more than $15,000 or imprisoned not more than three years, or both."

Mr. ASHBROOK. Mr. Chairman, I rise in strong support of this amendment.

But before I present the arguments for this amendment, let me comment on the statement of our very fine chairman, the very distinguished gentleman from Massachusetts (Mr. BOLAND). If there were any doubt where the ACLU stands, I would be glad to share with him their draft memo on our bill and Senate 391. As a matter of fact, I am inclined to think Mr. Berman and Mr. Halperin could almost serve on the Rules Committee. They have it all figured out. They go through the whole scenarios.

There game plan scenario states "When the Senate Judiciary Committee considers the legislation on September 15, a motion will be made to substitute the House language." Think of that. Their impertinence in trying to coordinate the legislative process. They know exactly what they are doing. They have it all on course—A, B, C, D, and E. I guess this is part E of A, B, C, D, and E of their legislative scenario. They have known what they have been doing all along.

The only addition I would make under revisions as to his remarks—maybe our chairman would like to add that language—he said this bill reflects the input of many people. But what the gentleman forgot to mention is that it also has the input of the people who are against not only this bill but would scuttle our intelligence activities. It reflects their input, too. And that is precisely what we are trying to throw out by the passage of my amendment.

My amendment is favored by President Reagan. My amendment is favored by the CIA. My amendment is favored by the Justice Department. I make those categorical statements that cannot be rebutted.

Sure, they will accept, can live with, and will work for the language in H.R. 4 as amended. But they prefer and favor the language of the Senate bill and my amendment. That is the crucial point.

□ 1200

The amendment that was just read substitutes the exact Senate language of S. 391 for the compromise language of the House Intelligence Committee report. During the hearings of the House Permanent Select Committee on Intelligence on April 7 of this year, Richard Willard, counsel for the Attorney General—counsel for Intelligence policy, I might add—speaking on behalf of the Justice Department said that both House and Senate versions of the bill—"would pass muster in terms of both due process and first amendment constitutionality."

Now the hearing of whether or not the Senate language and the language I have in this amendment would pass constitutional muster has been drawn across this body time and time again, but the Attorney General believes it is constitutional. Let me point out something most interesting. For those of you on the other side, the Carter Justice Department thought it was constitutional. The former administration on the record before our committee of saying that the language of my amendment and S. 391 is constitutional and, however, they preferred it. So, I am not springing something on you out of the well of this House.

Last year, in the House Intelligence Committee bill, the language that I am now offering as a substitute was supported by your President, your administration, your Attorney General. Ask yourselves, what has changed in the meantime? Certainly we do not have a more liberal President in the White House. That is not what has happened. What has happened is exactly what I said; as a part of passing this bill we allowed outside groups to have too much input. I am very unhappy at my own CIA Director, Mr. Casey. Why in the world he let those two men even come to Langley to talk over compromise language with the attorneys at the CIA—I look upon that as darn near a security breach. Why in the world they made those concessions I will never know.

Let us be honest about it; the Carter administration, the Reagan administration, the CIA, the President, everyone, the former agents, everyone who knows anything about this prefers the Senate language and the language of this amendment. I say that without contradiction.

Mr. Willard went on to support the Senate language rather than H.R. 4.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I will be glad to yield.

Mr. McCLORY. I thank the gentleman for yielding. I would not want to concur in the gentleman's statement——

Mr. ASHBROOK. I understand that.

Mr. McCLORY. As I understand it, the only communication I have seen from the White House is a letter——

Mr. ASHBROOK. Signed by the President.

Mr. McCLORY. Directed to a Member of the Senate in which they expressed support for the Senate language.

Mr. ASHBROOK. Right.

Mr. McCLORY. And without amendment. But, there was no comparison. I will say quite forthrightly to the gentleman that I have conferred by telephone both with the White House and with the Deputy Attorney General, and I find no expression there with regard to preference for the Senate language over our language. As a matter of fact, they are in support of our legislation and our language, and whatever is resolved in the conference I think they are going to be satisfied with. They are anxious for prompt enactment of the legislation.

I thank the gentleman for yielding.

Mr. ASHBROOK. My colleague is absolutely right, and his last statement that they do want prompt enactment of this language, but he has got the letter signed by the President of the United States in front of him. How can he stand before this body and say that he does not? It is right over there, and I assume the gentleman has it.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(By unanimous consent, Mr. ASHBROOK was allowed to proceed for 3 additional minutes.)

Mr. ASHBROOK. The language is very clear. The President says he prefers Senate 391. Is there any doubt? He signed the letter. It is from the White House. The Attorney General is on record as favoring the same thing.

Mr. McCLORY. If the gentleman will yield further, I do not think the letter that I have seen says that he prefers S. 391 over H.R. 4. What he says is, he prefers S. 391 without amendment over some other variation, but it is not a variation which might be in the House bill.

Mr. ASHBROOK. My friend has been around here. He knows exactly what they are talking about is the language of this amendment. The testimony which I will go on to read, the testimony all talks about this language. We know that. Let us not engage in games. The Senate version is preferred again by President Reagan on the basis of the letter he signed, the CIA on the basis of their statement, the Justice Department on the

basis of their statement. My colleague is not going to try and dilute that. They will accept what he is talking about, but they prefer this language.

Mr. McCLORY. If the gentleman will yield further, I do question that, and I do question the Senate language. Frankly, from my study of it—and I made an extensive study of it—I think the House language is preferable, and I tried to find some deficiency in it, or some loophole. I have not found one, for there is not one there.

Mr. ASHBROOK. Let me recapture my time, and I will show the gentleman the first deficiency. Mr. Willard, in supporting the Senate language, said:

> The specific intent requirement can serve to confuse the issues in an actual prosecution to the point where the Government could be unable to establish the requisite intent beyond a reasonable doubt.

I would say that is about as specific objection to the language that the gentleman is now wrapping himself around as anyone could make. The specific intent requirement can serve to confuse the issues in an actual prosecution.

That by the chief officer who is going to make the prosecution under either H.R. 4 or S. 391, or a compromise version of both. What could be more specific than the chief law enforcement officer of the United States saying the gentleman's language could confuse the issues in an actual prosecution to the point where the Government could be unable to prove the requisite intent? I agree with him 100 percent, and that is why I support this language.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I think it would be helpful to all of us to have this letter from the President, at least one paragraph, read so that we all know what it is. In this letter dated September 14, 1981——

Mr. ASHBROOK. Fairly recent.

Mr. YOUNG of Florida. President Reagan signed, it says in the third paragraph:

> Attorney General Smith advises that the Senate version of this legislation, S. 391, is legally sound, both from a prosecution perspective and in the protection it provides for constitutional rights of innocent Americans. Any change to the Senate version would have the effect of altering this carefully crafted balance.

Mr. ASHBROOK. And we are also talking about a change in H.R. 4. We are talking about a change, let me repeat, from what the Carter administration wanted, what the Carter Attorney General wanted, what the CIA wants, what the Attorney General of the United States now wants, and what the President of the United States wants.

On that I rest my case, and I yield back the balance of my time.

Mr. MAZZOLI. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, first let me emphasize to the Members of the Congress who are here in the House today, and those who are monitoring activities, that the amendment we will vote on at some point, that has been offered by the gentleman from Ohio, is a very important amendment. It may well determine the general tenor of the rest of the day toward this bill, so I would hope that they would monitor this particular part with some care.

Let me suggest a few things. One is that I do oppose the gentleman's amendment. I am sure it is offered, as all of his amendments are, in good faith, and backed up by significant study, but it was considered by our committee. We were aware of the existence of the Senate bill with its different standard, a negligence standard—"reason to believe" that something might result in injury to United States intelligence activities. But, having full knowledge of that, the committee, I believe with just one nay, voted in favor of the bill before the House today.

The gentleman from Ohio suggests that various administrations, including the last one, supported the Senate version. I would like to quote the former General Counsel of the Central Intelligence Agency, who, in connection with the hearings we had, said:

> It is from my point of view as a lawyer clear to me that without a specific intent element—

I might parenthetically say that specific intent element is in the bill before us today. He goes on—

> That without a specific intent element, statute that applied to someone who dealt only with unclassified information and phenomena would have serious constitutional problems. But this bill which your committee has very carefully drawn avoids those problems.

Mr. Silver was referring to the H.R. 4 of the last Congress, which had a double intent standard, so I would think this statement of his referring to today's version would certainly apply.

Mr. ASHBROOK. Mr. Chairman, will my colleague yield?

Mr. MAZZOLI. I will be happy to yield.

Mr. ASHBROOK. Is it not historically correct to say that we had a unanimous report of the entire House Select Committee on Intelligence on H.R. 5615 last year?

Mr. MAZZOLI. Yes.

Mr. ASHBROOK. And the language that was in H.R. 5615 in 1980, which we unanimously supported, is the language which we had before these amendments were offered, and changed H.R. 4. Is that not correct?

Mr. MAZZOLI. It is, and I would also suggest to the gentleman it has a specific intent standard which the gentleman himself supported last year, and I think the evidence was very clear that it, and H.R. 4 today, would solve the problem that was confronting the Intelligence Agencies; that is, their inability through the Department of Justice, to sanction those who in their own misguided way want to "name names." The specific intent standard does solve that problem. The gentleman supported it last year. He, I am sure in good faith, cannot support it this year.

Mr. ASHBROOK. Is it not the adding of the phrase, "by the fact of such identification," that changed the language of H.R. 4?

Mr. MAZZOLI. Well, I would answer the gentleman, it does not change the question of specific intent. We still have to prove in the bill before the House today, H.R. 4, an effort to identify and expose covert agents with the intent to impair or impede the foreign intelligence activities of the United States. We have simply added "by the fact of such identification and exposure."

Mr. ASHBROOK. Will the gentleman yield further?

Mr. MAZZOLI. Certainly.

Mr. ASHBROOK. In listening to what my colleague said, maybe we are in agreement. Maybe he agrees that the words, "by the fact of such identification," do not necessarily belong in H.R. 4, and we can get along without it.

Mr. MAZZOLI. I did not say that. I suggested it does not alter the specific intent. I thank the gentleman for his comments.

Before yielding to our chairman, I would also further quote from a former General Counsel of the Central Intelligence Agency from this year, where he referred to an earlier version of the bill. The same gentleman, who was at that time still General Counsel, said on September 20 of this year:

> I have personally a great deal of optimism that a prosecution could be carried forward successfully under either version of the bill.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 5 additional minutes.)

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, let me emphasize again that I would hope the Members of the House, those who are present here and those who are monitoring this on television, would keep their eyes on the ball. The bottom line is with respect to H.R. 4, that this is a bill which was reached after a consensus with a number of Members and

committees on the House side, and also with the Intelligence community and with the people downtown.

As the gentleman from Ohio states, the Senate bill, S. 391, may be preferred by some to H.R. 4. We understand that. But, the problem I think that we have before us is whether or not we are going to get a bill which is going to pass constitutional muster. As the gentleman from Ohio has said—and he says it correctly—indeed last year H.R. 5615, that bill was not going to be taken up by the Senate. So, we had no opportunity at all to get any bill by last year.

I am sure that if we were in the same position this year, we would have the same difficulty, but we are not in the same position because we have reached a consensus here, a consensus which clearly indicates to all of us who support this bill—and we have spent, as the gentleman from Ohio knows, 2½ years on it, as has the Senate—I would think the constitutional lawyers on our committee have a right to their own opinion on whether or not our bill can stand constitutional muster better than the Senate version. That was the opinion of the members of our committee.

Again let me state that we had no opportunity to pass a bill last year because the Senate was not going to take up their bill, S. 191, even though H.R. 5615, our bill, was ready to go to the House floor. We had no opportunity to pass a bill last year, and here we are, arrived at that point in time where we can get a bill by; and not only do the members of this subcommittee believe, the members of the full committee, but it is the belief of the CIA, the Intelligence Committee, that this bill is a bill of the highest priority.

□ 1215

Well, if it is, we ought to get on with the business of passing this bill to which they have no objection. The administration prefers the Senate bill, as the gentleman from Ohio said, and probably the past administration preferred the Senate bill. But we are faced with the problem of whether or not we are going to get a bill by in this session of the Congress that is going to be tested in the courts and where the constitutionality of the bill will be sustained.

Mr. Chairman, I think we ought not to lose sight of that. We ought to keep our eye on the ball, and I plead with the Members of the House to remember that when we vote on this amendment.

Mr. MAZZOLI. Mr. Chairman, let me reclaim my time.

I believe I heard the gentleman from Illinois (Mr. McCLORY), the ranking minority member of our subcommittee, indicate in the colloquy with the gentleman from Ohio that as early or as recently as today that the gentleman spoke with the Deputy Attorney General who indicated, I believe, if I understood the gentleman correctly, that there is at this point today no preference expressed by the Department of Justice between the gentleman's approach, which is a "reason to believe," and our approach, which is specific intent. I would yield to the gentleman for a clarification of that.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding, and I will state that it is my understanding, that the Attorney General supports the bill that we have before us now, the language that we have before us. Insofar as resolving differences between our language and that in the Senate bill, the Attorney General seems satisfied to have it worked out by us in conference.

I might say that I do not agree with the gentleman from Massachusetts (Mr. BOLAND) as to the language which we had in the bill in the last Congress. I think we had the intent language in the bill in the last Congress. I am personally strongly in support of requiring that the element of intent should be contained in the bill, and that such an intent must be proved.

I think that intent is an appropriate part of a criminal statute. The language, "reason to believe," I understand to imply negligence, and this is not a negligence-type statute.

Mr. MAZZOLI. Mr. Chairman, I would like to yield to the gentleman from Massachusetts (Mr. BOLAND), who, I am sure, has something to add.

Mr. BOLAND. Mr. Chairman, I thank the gentleman for yielding.

The gentleman from Illinois (Mr. McCLORY) states it correctly, and he is right. The point I want to make, the important point I want to make is that the Senate was not about to take up any legislation last year in this area, and that is what we were faced with. So I would hope the Members would keep that in mind when we vote on this amendment.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has expired.

(On request of Mr. ASHBROOK, and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 3 additional minutes.)

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. Mr. Chairman, I will yield to the gentleman shortly, but if I could have just a few seconds, I suggest—and really I think the gentleman from Massachusetts (Mr. BOLAND) has said it earlier—that we have got to keep our eye on the ball. The gentleman from Kentucky really believes the "ball" to be the Central Intelligence Agency and all components of the intelligence community, and we had it clearly set forth in testimony this year when the bill was before us that with the language, "specific intent," it would serve their purpose of protecting their people abroad.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I thank the gentleman for yielding.

Again I want to set the record straight, particularly as far as the statement of the gentleman from Illinois (Mr. McCLORY) is concerned. I laid in the RECORD specific statements made in the past week or 2 weeks, statements in black and white by the President and the Attorney General.

My friend, the gentleman from Illinois, is now talking about a telephone call to an undisclosed person who said something to him that now gives him an understanding of their position. Note that, just an understanding. What understanding?

Let me ask the Members of this body which statements they want to put the most confidence in. What some undisclosed spokesman said in a telephone call that my friend from Illinois, a very honorable gentleman, interprets for us but is not in black and white or what I put in the RECORD in black and white very openly and candidly.

Second, let me address something my good friend, the committee chairman, said, but let me first lay on the record my admiration for the gentleman from Massachusetts (Mr. BOLAND). I think one of the finest things the Speaker of this House did when this Select Committee on Intelligence was established was selecting a gentleman, a legislator, and a patriot like the gentleman from Massachusetts, Mr. EDDIE BOLAND, as the chairman, and I will back down to no one in my admiration for him. But one thing I think my good friend has overlooked—and I say this with a wistful feeling—is that one of the problems in this country when we talk to the people is the literal takeover of lawmaking by the Supreme Court. Time and time again we hear people complain about the Supreme Court and the Federal judiciary.

Every court decision has indicated that the Congress of the United States is a valid part of the lawmaking purposes, indeed constitutional determinations. The determination of this body of a constitutional issue carries weight with the Supreme Court, and we should not back down simply because some lawyer or some scholar from Chicago says this might not be constitutional. We have the right on the record to say that we believe our actions are constitutional.

Past courts of all administrations have given high priority to what we in this Chamber determine to be constitutional, and we should not allow ourselves to be scared on this issue. As a

matter of fact, we ought to reassert ourselves.

I happen to think this is an area where we should tell the court that we happen to believe this is constitutional, we put it in front of you, we believe you should agree with us, and we believe you will. So let us not allow that fear of a constitutional test to prevent us as legislators from doing what we think is right. Let us perform our duties as a coequal branch of Government.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 3 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, I have asked for permission to proceed for 3 additional minutes since I did yield to several Members in order to help them make continuous statements, and I will not ask for any further time.

Let me just briefly speak to a couple of points. One is that I agree with the gentleman from Ohio (Mr. ASHBROOK). I am never one to be stampeded or disposed to act simply because someone tells me something is unconstitutional. If I had proceeded without interruption, I would never have mentioned the word "constitutionality." My opposition to the amendment is not based alone on the question of constitutionality. That is something that we have to take a stand on and let the chips fall where they may.

My observation is based on statements that we had last year. I mentioned the Central Intelligence Agency's General Counsel, and I would quote the statement from the Deputy Director of the CIA in last year's emergency measure:

> Finally, a statute which requires proof that unauthorized disclosures by those who have not had an employment or other relationship of trust with the United States—

And this is the area we are talking about, section 601(c)—

> were made with specific intent to impair or impede the Nation's foreign intelligence activities, this requirement would be for the protection of those who might claim they had made a public disclosure for this legitimate purpose, although I believe Congress did determine if there are any specific purposes and made a provision for them.

So last year the Deputy Director was in favor of a specific intent standard.

I would simply say again, to use our chairman's very apt description, let us keep our eye on what we are really trying to do here. We are trying to pass a bill, first and foremost. We are trying to pass a bill which solves a problem, and the problem has been delineated. That is the reprehensible and heinous crime of divulging information on people who were posted under cover. We want to do it in an effective, efficient, and, hopefully, trim and legal way.

I think that what we have before the House has done specifically that. It has recognized the problem, and we have moved to answer the problem with tools which had the broad support and so-called consensus that any bill has to have in order to pass. We need not require only constitutional muster, but we also must pass this through the Congress for it to become a bill which the President signs.

Mr. Chairman, I strongly urge my friends in the Chamber and those who are monitoring the proceedings with respect to the amendment offered by my friend, the gentleman from Ohio (Mr. ASHBROOK), who is a very valuable member of this committee, to oppose his amendment.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I think it is extremely awkward, may I say, to oppose an amendment offered by a distinguished and respected colleague, and I do not intend to get into any spirited debate with him or tc make any charge or to respond aggressively to any countercharges.

I do want to say that insofar as I can tell from a letter which he has from the President of the United States addressed to a single Member of the Senate, it makes no reference to H.R. 4 and it makes no comparison between the Senate bill and the bill that we have before us now.

May I state publicly that when a recommendation comes from the ACLU, I regard it with high suspicion. I am just automatically opposed to something that that organization might recommend for us to act upon. So, the fact that the statement has been made that some language here originated with the ACLU causes me to question the language which is there.

I have tested this language; I have challenged it; and I have looked for some hidden meaning that might be there that is not disclosed on the surface. I have not been able to detect it. I have subjected it to scrutiny by counsel, and we have not been able to detect any hidden, uncertain meaning there that might protect any person who would deliberately or intentionally disclose the name of a covert agent, thus jeopardizing his mission or impeding or impairing his intelligence activities.

So the language which I have seen and discussed as a representative of the committee with members of the Committee on the Judiciary and which has been worked out and which has enabled us to avoid sequential reference to the Judiciary Committee is language which I believe is constitutional and which will carry out the objectives of this legislation and which will enable us to move forward to punish those who disclose the names of covert agents who operate in behalf of our intelligence agencies, and I believe that we will provide for the quick and prompt punishment of persons who violate the provisions of this measure.

I do not think anybody should be exempted or that anybody should be excused. While it is directed primarily at scrubby publications which undertake to make it their business to deliberately disclose the names of covert agents, it would affect anybody who would make any such disclosures intentionally and who would intend to impair or impede our intelligence activities in that manner.

I think the language we have here is preferable, from the way I have studied it, and I believe that sincerely. I believe that in the last analysis the conference will decide that this is the best and the Attorney General's office will decide it is the best and the intelligence agencies will decide it is the best. But at this moment that is the decision we have to make.

Mr. Chairman, we have heard extensive debate on this amendment. I have tried to debate it directly and meet the challenges forthrightly, and I think that we have the good will of all concerned the way it is. So I hope the amendment is defeated.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I agree with my friend 100 percent. In the areas of difference that the gentleman and I have had over the years, our differences have been very, very narrow, and this is one of the very few.

My colleague raised a question for the record, and I think the record ought to have the other side of it. He raised the question that the reason to believe standard is equivalent to a negligence standard. It is the opposite. I think the record ought to show that, and I am not continuing with the idea of engaging in heated debate.

I think it is not equivalent. If you examine all the elements of proof required under subsection 601(c), it is clear that reason to believe does not mean that a negligent disclosure of an identity would be a criminal offense.

Second, the individual making the disclosure must know that the information he discloses does in fact identify a covert agent.

The person making the disclosure must also know that the United States is taking affirmative measures to conceal a covert agent's classified intelligence affiliation. Moreover, the disclosure must be in the course of a pattern of activities intended to identify and expose covert agents. Those are the important words, in my opinion.

Finally, the person making the disclosure must have "reason to believe" that his activities would impair or impede foreign intelligence activities in the United States.

All of these elements must be proved. An individual making an unauthorized disclosure under these circumstances can hardly claim negligence.

I would say that, Mr. Chairman, in all honesty, without engaging in heated debate, in response to what my friend, the gentleman from Illinois (Mr. McCLORY), has said as a very valuable presentation.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. McCLORY) has expired.

(By unanimous consent, Mr. McCLORY was allowed to proceed for 3 additional minutes.)

Mr. McCLORY. Mr. Chairman, first of all, I want to say that, with regard to the pattern of activities language, I was actively involved in opposing that language because it could require proof of repeated disclosures. I feel that a person should be subject to the penalties of this statute if they disclosed one name—even if they do it just once. It should not have to be a pattern. The bill should require just one disclosure, as far as I am concerned, and then it should be punished.

If we leave the language "pattern of activities" in there, we are going to have to prove a series of or a pattern of this type of activity, and I think that should not be in the bill.

Let me just state this further. The amendment offered by the gentleman from Ohio (Mr. ASHBROOK) would force the Government to make public at the trial more classified information than is currently required by the language which we have. The amendment would create this problem because it changes the focus of the bill from what the defendant intended to what he had reason to believe.

As to the "reason to believe" standard, it becomes relevant as to what effect the disclosure had or would have on our intelligence activities. This "results test" necessarily forces the Government to reveal what the agent whose cover was blown was doing in the country where he had been assigned, and what his replacement is doing there now. However, this information would not have to be released, because it would be irrelevant, under this bill as reported.

□ 1230

And, last year's "graymail bill" would not solve this problem because that law only protects irrelevant information from disclosure at the trial.

I think we have a good, sound bill here, and I hope it can be enacted in the form as presented by the committee.

Mr. FOWLER. Mr. Chairman, I move to strike the requisite number of words and rise to speak against the amendment.

I take the floor not to prolong this debate; but I want to rise to support the opposition of the gentleman from Illinois (Mr. McCLORY), to this amendment and to try to point out some specifics that I think have been overlooked in this debate.

I frankly do not see the relevance of what the other body did or the Senate committee did or what they might not have done: what is significant is what the House in our deliberations over the last 2 years has done, working closely together, not as partisans but working closely to try to do one thing and that is the terribly difficult task of balancing the need to protect our intelligence agents abroad and the need to so draft the legislation that we will protect first amendment rights, protect people who have no access to classified information, who might, for whatever reason, somehow reveal the name of an intelligence agent of this country and, therefore, be criminalized under this legislation.

The amendment before my colleagues that we have been arguing, submitted by the gentleman from Ohio (Mr. ASHBROOK) does not deal with the first category, those people who have had authorized access to classified information. None of those are covered by the Ashbrook amendment.

The Ashbrook amendment does not cover the second group of individuals in our bill who learn of a covert identity as a result of having authorized access to classified information. That is not covered.

The only thing that the Ashbrook amendment attempts to do is to change the standard on people who have had no access to classified information, who may be revealing unclassified information, but who, if inadvertently or in jest name the name of someone who happens to be in the employ of our country in a covert capacity, could be prosecuted under this section.

I could be at a cocktail party under the Ashbrook amendment and just say in jest, "John Ashbrook is a covert operative of the CIA." If there was a John Ashbrook operating in the covert intelligence service of this country and I got it right accidentally, under the Ashbrook amendment, if we adopt it, I could be prosecuted, assuming the other elements of the bill were proved, because under a negligence standard as the gentleman from Illinois (Mr. McCLORY) has eloquently pointed out, I could be prosecuted if I ought to know, if I ought to have a reason to believe that a John Ashbrook was in the employ of our country. That could not happen under a specific intent standard. There would be no specific intent shown if I had made that statement.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I will be glad to yield to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. The agent from Ohio would like to point out that my good friend, when he speaks, I listen, but I think he has missed the first five words of the amendment. The point that he has not made is it says, "Whoever in the course of a pattern of activities."

Now, you could not just be at a cocktail party and make one statement if there were not a pattern of activities. A pattern would include seeking out the information, endeavoring to get it. You just cannot make one quick statement and that would not suffice for a pattern of activities. The cases, the language is very clear. It has to be a part of a course of action or a pattern of activities. So a casual statement of that type standing alone, without the pattern that showed there was Agent Ashbrook getting the information, he sought it out, he got it illegally, he got it illicitly, an entire pattern that would have been developed before that language would cover that example.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

(By unanimous consent Mr. FOWLER was allowed to proceed for 3 additional minutes.)

Mr. ASHBROOK. If my colleague will continue to yield, I hope my colleague will acknowledge that point. That is the way it was written.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the chairman of the committee, the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. On the very point of negligence, which has been raised by the gentleman from Ohio and by the gentleman from Illinois and the gentleman from Georgia, let me read from the hearings a statement of Richard K. Willard, who is counsel to the Attorney General for Intelligence Policy. My distinguished friend and colleague from Ohio (Mr. ASHBROOK) likes to quote Mr. Willard. Let me quote him with respect to this area.

The gentleman from Georgia (Mr. FOWLER), of course, has agreed to this, as has the gentleman from Illinois (Mr. McCLORY).

On page 36 of the hearings he says:

> The "reason to believe" standard would permit prosecution of an individual who can be shown either to have known of and disregarded the risk of harm or who can be shown either to have known of and disregarded the risk of harm or to have been negligent in overlooking the evident consequences of his actions for U.S. foreign intelligence activities.

That is a quote from a letter from Richard Willard to Mr. MAZZOLI.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I am delighted to yield to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. I thank the gentleman for yielding. I think the gentleman has underscored a deficiency in this legislation when he describes his cocktail party scenario of identifying John Ashbrook as a CIA operative. My colleague will remember Mr. Hammer and Mr. Pearlman were murdered in their hotel in El Salvador just about a year ago and there are many who suspected they were murdered because they had been falsely identified as CIA agents.

Mr. FOWLER. If I may reclaim my time, that is an important area about false and misleading information. I think we are going to get to that. But if I may reclaim my time from the gentleman at this time, let me say to my friend from Ohio that I do not have it before me or I would read to him the testimony in answer to his question about my example.

It was plain from our hearings that one revelation to expose a covert agent, if it were done in the right manner and if there were specific intent to disclose that agent and dispose that agent, it would constitute an effort, a pattern.

That is why the specific intent language is needed, because we do not want to wait for all of this heinous activity to continue forever. If it is apparent that there is a specific intent of a person to point out and compromise every agent that we have in the employ of this country, we do not want to wait on some negligence standard as to who should have known or why. That is why the two sections have to come together.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

(By unanimous consent Mr. FOWLER was allowed to proceed for 3 additional minutes.)

Mr. FOWLER. Since the gentleman from Ohio and the gentleman from Georgia and all of us share the same goal, I only ask that the gentleman in his consideration, and our colleagues in this body will remember that it is this section and this section alone to which the gentleman's amendment applies. We are dealing with unclassified information or information that is published by someone who never had access to classified information. That is the only thing covered by this section, as I am sure the gentleman will agree. That is why in this section and this section alone one has to have specific intent if one is to balance those equities that we are both trying to balance and get at the source of the problem, those who are doing in our intelligence services by this deliberate attempt at exposure, but also to protect someone, whether it be myself, an American journalist, a member of a church, or John Q. American who happens to repeat the name of an American agent, with no pattern or practice or deliberate intent to compromise our intelligence services by so doing.

Mr. ASHBROOK. Will my colleague yield further?

Mr. FOWLER. I yield to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. What my friend has said, if you take it in the context of where he started and where he ends, it is quite interesting because he started by saying my language would make prosecution very easy for a person who casually at a cocktail party might mention the name of John Ashbrook as an agent. Where he is ending is saying we want to make it as tough as possible. The gentleman thinks intent is tough. I think reason to believe is tough. But it is a rather unique argument he is making.

First he said you could have overprosecution. Now we are saying, to listen to the gentleman, that intent makes it easier to prosecute, and my language makes it harder to prosecute.

I would say to my good friend from Georgia (Mr. FOWLER): Which way is it; does my language make it harder to prosecute or easier to prosecute?

Mr. FOWLER. I would say to the gentleman from Ohio that what we are after is not easy prosecution or hard prosecution but accurate prosecution.

Mr. ASHBROOK. We would agree on that.

Mr. FOWLER. Constitutional prosecution.

The Supreme Court over and over again, and I cited the majority of the cases in my remarks during the general debate, has said that when you are in this area, first of all the statute has to be very narrowly drawn because you are running up against our privilege of free speech under the first amendment. They have, second, said that you need to show a specific intent. That is the constitutional standard to criminalize any activity.

Again, the gentleman from Illinois (Mr. MCCLORY), I submit, is absolutely right in describing the gentleman from Ohio's amendment as a negligence standard.

The CHAIRMAN. The time of the gentleman from Georgia has again expired.

(By unanimous consent Mr. FOWLER was allowed to proceed for 3 additional minutes.)

Mr. FOWLER. Again we are not talking about people who have had any access to classified information. We are going to get them and get them good under this bill, which I support and the gentleman supports. But if the Ashbrook amendment carried, we are talking about either unclassified information in the public domain or from the mouth of somebody who has never had any access to any classified information. Therefore, the offender would not have to intend a bad result. He would not even have to know that a bad result might occur.

But the gentleman's standard is that he should have known that a bad result would occur.

Mr. ASHBROOK. If it were a part of a pattern of activities.

Mr. FOWLER. I do not think we ought to look at prosecutorial standards. Of course, the easiest way to get into court is not what we are looking for here. What we are looking for here and what the gentleman is looking for is a constitutional standard that punishes the wrongdoer and yet protects an individual who has never been in the CIA, who has never had any access to any classified information, who may be repeating a name he has heard by picking up one of those journals that we are trying to do something with.

To apply a "reason to believe," negligence standard, I submit to the gentleman from Ohio, whose record in support to constitutional measures I not only recognize but admire, would simply seriously jeopardize the plight of those that have no part in being covered by this bill.

(At the request of Mr. ASHBROOK and by unanimous consent Mr. FOWLER was allowed to proceed for 2 additional minutes.)

Mr. ASHBROOK. If my colleague will yield, in talking about both the constitutional tests that must be mustered and talking about the standing of intent and the reason to believe, the most recent decision of the Supreme Court, June 29, 1981, Secretary of State Haig against Agee, accepted the very standard I am talking about.

On page 29 let me read nine lines of what the Court says in a direct quote:

□ 1245

Long ago, however, this court recognized that "No one would question but that a government might prevent actual obstruction to its recruiting service or the publication of the sailing dates of transports or the number and location of troops."

Citing Near against Minnesota, 1931.

Mr. FOWLER. That is classified information.

Mr. ASHBROOK. I quote:

Agee's disclosures, among other things, have the declared purpose of obstructing intelligence operations and the recruiting of intelligence personnel. They are clearly not protected by the Constitution. The mere fact that Agee is also engaged in criticism of the government does not render his conduct beyond the reach of the law.

They apply the "reason to believe" standard, not the "direct intent" standard.

I am inclined to think either one is constitutional, either one passes muster. I go back to the Department of Justice and what they have said, prosecutions and probably convictions would be much easier to obtain if we have the standards that I have.

I believe the standards of my colleague, the gentleman from Georgia, are fine. I think they are too prescriptive. And all I am saying is that both would meet the constitutional standard.

The Supreme Court has recently accepted the standard I am talking about, has done it time and time again. Let us not make it more difficult. That was the last point that the gentleman made. The gentleman did not want to make it more difficult. And I would suggest to my friend, the gentleman from Georgia, he is making it more difficult, and I say that most honestly.

Mr. FOWLER. If I may attempt to wind up, I say to my friend, the gentleman from Ohio, that I would be almost persuaded—it is a great hymn; I will not sing it for you—almost persuaded, if you were applying your standard to 601 (a) and (b), where we would be applying a standard of a test of such reason to believe to people who have access to classified information.

But I submit there is a whole history of the cases, distinguished from the Haig case because they were talking about classified information:

Elfbrandt against Russell, 1966:

A statute touching (first amendment protected) rights must be "narrowly drawn to define and punish specific conduct . . ."

The CHAIRMAN. The time of the gentleman from Georgia (Mr. FOWLER) has expired.

(By unanimous consent, Mr. FOWLER was allowed to proceed for 2 additional minutes.)

Mr. FOWLER. Broadrick against Oklahoma, 1972:

It has long been recognized that the first amendment needs breathing space and that statutes attempting to restrict or burden the exercise of first amendment rights must be narrowly drawn and represent a considered legislative judgment that a particular mode of expression has given way to other compelling needs of society.

Why? Because we are talking about John Q. Citizen, who has not been in the employ of our country in a clandestine or covert operation, who has not had any access to any confidential or classified information. And that is why, in the amendment that the gentleman from Ohio (Mr. ASHBROOK) has offered, you have got to have specific intent in this section.

You could make an argument in the first two sections of the bill that are almost persuasive. But there is no room under the Constitution, and there is no quarrel with the CIA, there is no issue of liberalism versus conservatism or ACU's versus ACLU's. We are trying simply to balance the equity of John Q. Citizen in being able to speak out without the danger of being hauled into court when he has had no access to any classified information whatsoever.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the distinguished gentleman from California.

Mr. EDWARDS of California. I thank the gentleman for yielding, and I compliment the gentleman from Georgia on his lawyerlike and scholarly presentation. I agree with him and I urge that the Ashbrook amendment be defeated.

I have indicated in my earlier remarks my opposition to H.R. 4. That opposition is premised upon my firm belief that any legislation which seeks to criminalize the publication of information which is already in the public domain is unconstitutional.

The efforts of the Intelligence Committee to narrow the criminal intent required for criminal prosecution are a vast improvement over the standard of proof now under consideration in the Ashbrook amendment. Such a broad intent standard would have a chilling effect on the free and open political expression guaranteed by the first amendment.

If we are to pursue such legislation at all, we should proceed very carefully and in the least intrusive manner possible. This should be the case whenever the prospect of censorship or any restriction of free speech is involved, particularly when the content of the speech is political in nature. At the very least, a narrow specific criminal intent standard is necessary and I applaud once again the efforts of Chairman BOLAND and the entire Intelligence Committee for their efforts to narrow the broad reach of this bill.

Mr. FOWLER. I thank the gentleman.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I would just make one 10-second addition, and that is, of course, the Agee case was not a criminal case. So I think there is a difference in the standards that the Supreme Court might be looking at.

Mr. FOWLER. I thank the gentleman.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Ashbrook amendment.

Mr. Chairman, the question about the cocktail party scenario intrigues me, to a great extent. Really, the person who inadvertently or jokingly or in a lighthearted fashion says something about a CIA agent or mentions a name, we are concerned about that person or that breach of security, whether it is intentional or not. But, really, what we are after today are the Phillip Agees of the world, the ones who have a pattern of attempting to divulge and disclose in an attempt to damage the United States.

The gentleman from Ohio (Mr. ASHBROOK), I think, when he quoted from the opinion of the U.S. Supreme Court in the case of Haig against Agee, made the point that either of these languages are going to be constitutional. There does not seem to be any problem there. But whether Agee falls under 601(a) or 601(c), I do not think that really becomes a big problem. Agee has already expended all of his information under 601(a). The information that he obtained as a former CIA agent, he has already told the world all about that. That is not the problem. The problem today with Mr. Agee and the people of his like are described in that same opinion handed down by the Supreme Court on June 29. Let me read a couple more sentences from that, from page 2:

"In 1974, Agee called a press conference in London to announce his "campaign to fight the United States CIA wherever it is operating." He declared his intent "to expose CIA officers and agents and to take the measures necessary to drive them out of the countries where they are operating." Since 1974, Agee has, by his own assertion, devoted consistent effort to that program, and he has traveled extensively in other countries in order to carry it out. To identify CIA personnel in a particular country, Agee goes to the target country and consults sources in local diplomatic circles whom he knows from his prior service in the United States Government. He recruits collaborators and trains them in clandestine techniques designed to expose the "cover" of CIA employees and sources.

Well, Agee does this because of what he announced in a press conference in London in 1974, when he announced his campaign to fight the U.S. CIA wherever it is operating.

I submit, Mr. Chairman, that Mr. Agee's activities, as described by the U.S. Supreme Court, fall under section 601(c), not 601(a), because he is doing things now that he did not learn when he was an agent of the Central Intelligence Agency.

But I believe it is important, as our chairman has said, to keep our eye on the ball, what it is that we are doing here today. And what it is that we are doing today, Mr. Chairman, is announcing, for all of the world to see, a declaration of this Congress, and that is that we are going to protect the security of our Nation, that we are going to do it by protecting the security of those who serve our Nation. And that is what we are doing in H.R. 4, and that is what we would do with H.R. 4, as amended by the gentleman from Ohio (Mr. ASHBROOK).

Now, there are different opinions as to which one is the stronger approach. I tend to believe that the Ashbrook

language is stronger. The Director of the Central Intelligence Agency believes the Ashbrook language is stronger. The President of the United States believes the Ashbrook language is stronger. A spokesman, a Mr. Renfrow, from the Carter administration, believed that basically the Ashbrook language was stronger. Dr. Roy Godson, an associate professor of government at Georgetown University and the director of the Consortium for the Study of Intelligence in a paper prepared for publication believes the Ashbrook language is stronger and constitutional and should be supported. His and other expert opinions support the stronger language.

I think it is important that we make that declaration as strongly as possible today, that we intend to protect those who are protecting us. We make that declaration not only to our adversaries in the world but also to our allies who are working with us as we attempt to protect ourselves. But I think it is extremely important, Mr. Chairman, that we make that declaration today for the agents, the men and women who serve in the intelligence community, for their families, for their spouses, for their children, for those people who do not care what the intent was, they do not care about all of the international politics; what they want most is the protection of the husband or wife who is involved in protecting our country. That is what we have got to do today, to make that strong declaration.

If there is anything we could do for the morale of the people who serve us in these operations believe me, this declaration on our part today is it. It will do an awful lot to improve and to boost that morale, to make them willing to go out and do the things they need to do to risk their lives, to take chances, in the protection of our great country. I believe we are going to make that declaration today whether we go with H.R. 4 as written today, or with H.R. 4 as amended by Mr. ASHBROOK. But I believe we make that declaration much stronger if we adopt the Ashbrook amendment, put in the strong language. It is constitutional and it is supported by those who would be affected by this law. And, remember, we are not talking about the person at the cocktail party who innocently and even mistakenly might mention someone's name in jest or in joking. We are talking about the Phillip Agees of the world who for the purpose of removing the influence of the United States of America from the international scene is doing his utmost to identify agents, to reduce their ability to do their jobs.

Mr. DORNAN of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Ashbrook amendment.

Mr. Chairman, I rise to vigorously support the amendment offered by the gentleman from Ohio (Mr. ASHBROOK). I would like to give a little historical background as to why I believe this stronger Ashbrook amendment is needed.

I appreciate the scholarly and the legalistic approach in this body to any issue that involves the greatest of our rights, the first amendment to the Bill of Rights, freedom of speech.

But what we are talking about now is also a life-and-death issue. We are speaking about bringing before the bar of justice American citizens who actually work to get fellow Americans murdered.

Isn't it obvious that the Phillip Agees of this world are so clever that in the future they will read weak statutes and then not speak themselves but get some young man or young woman, a U.S. citizen, corrupted in their early years by any of the false ideologies that we see touted across our country, and use that person as a cat's paw to do their dirty work—someone who has no background dealing with classified information or who has never even been in a government job where they would have had the opportunity to come across classified information. Then, that young traitor "plays dumb" about releasing information to get American intelligence officers murdered.

When I came to this Congress 5 years ago, on the first occasion I had to go over to the CIA headquarters building in Langley I noticed several impressive things. (And, frankly, I am surprised that the overwhelming majority of my fellow colleagues have never been over there to the CIA for information.) When you approach the CIA building through the main entrance, you can't help but see a statue out in front of a young American who, 205 years ago yesterday, gave his life, the full measure of devotion, serving his country as an intelligence officer. He was a Yale graduate only 21 years of age. Capt. Nathan Hale was captured by his foes in one of the very first intelligence missions of our country during our Revolutionary War.

This statue on the CIA grounds is one of three exact copies of the one standing in "the yard" at Yale. Another is in front of the New York City Hall, the fourth right here in front of our Justice building out on Constitution Avenue. Many of us drive by that memorial to Nathan Hale every morning. It reminds me whenever I gaze upon it of the most striking memorial over at CIA headquarters, The Roll Call of Honored Dead.

When you walk into the CIA building, moved by the image of young Hale, his hands tied behind his back, denied a Bible by his captors, at the moment he uttered his final proud statement that rings out still, at least in our high school and grade school American history classes, "I regret that I have but one life to give for my country," you see in the main hall entrance on the wall to your right the gold stars of 38 modern Nathan Hales that have given their lives for their country, for us. Startling is the fact that less than half of the stars have names next to them. The majority of these American heroes go unknown as heroes even to their families, to most of their own colleagues, to their college pals, their high school friends. They die unheralded by a grateful Nation. Imagine this. Their own mothers and fathers, do not know why or how they died out there, in some hostile corner of this world, trying to glean the intelligence data to keep the free world free. What an amazing sacrifice these heroes make for us in total anonymity. And we know that some of them are fingered for death by fellow Americans who bear the loathsome title of traitor.

□ 1300

Between my first visit to Langley in 1977 and my last one a few weeks back three golden stars of heroic sacrifice went up on the wall. And those three new stars like the majority do not have names next to them. Who were they? Did we in Congress somehow fail to protect them? So three Americans unknown to this House die and we cannot praise them on this floor or strike medals for them, we cannot honor their mothers and fathers, their widows and children will receive no letters from us. These courageous intelligence agents simply fade into oblivion.

Of course Richard Welch's name is up on the wall, his gold star of honor among those of his colleagues, and we know beyond a doubt he was fingered for murder in Greece by the cowards we intend to stop with this strongly worded Ashbrook amendment.

This debate today, as scholarly as it may be, reminds me of many debates we have had in this House, by the good men and women who serve here, who in trying to protect freedom of speech, soften the law so badly as to give the criminals virtual immunity thereby destroying the intent of what we were debating about in the first place.

Let me give several instances. We passed unanimously in this House, in my first year, a bill to do something about the particular offensive crime of child pornography. But we so crippled what we were trying to stop by putting on so called first amendment protections——

The CHAIRMAN. The time of the gentleman from California (Mr. DORNAN) has expired.

(By unanimous consent, Mr. DORNAN of California was allowed to proceed for 4 additional minutes.)

Mr. DORNAN of California. That no pervert has ever been prosecuted under the law we created. Ever.

To be more specific with a crime much more like what we are discussing now in the intelligence field, I recall submitting several Dornan amendments and supporting several Ashbrook amendments years ago to stop the incredible flow of high technology to the Soviet Union. Some of our amendment language of knowing what was being done, "a pattern of intent to get around the law," and so forth, was exactly parallel to the intent of what Mr. ASHBROOK is trying to put into law today. We heard the same misguided arguments then. The result was eunuch law. So the Soviet Union steals or buys technology from our country such as super computer technology with all the software involved, and secret electronic technology that by overwhelming vote in this Congress we tried to deny them. The net result of always watering down proper restrictions on criminal activity that we here put into law, is to render those laws utterly useless. I heard on the evening news a few weeks ago for instance that the illegal leakage of high technology to the Soviets is a multibillion-dollar scandal. And it involves major spy cases in my own district rich in aerospace defense knowledge. Again as a result of long tortured debate in the House, we ended up with nothing and a situation far worse by emboldening traitors with our crippled law.

I submit to all of the distinguished Members who have worked so hard on this, particularly on section 601 (a) and (b), where we are all in agreement that what we may have here is a case of "not invented by the committee." This is what I find is most annoying in the Pentagon. When new defense ideas come before the Pentagon planners, if it is not an idea originated by someone on the Pentagon payroll, they react "sorry, not invented here."

We should not have that attitude here in Congress. Those of us not on a given committee can sometimes immeasurably strengthen committee bill language.

I think the language of the gentleman from Ohio (Mr. ASHBROOK) does just that. This ugly new type of American traitor who betrays our agents in the field whether that traitor serves in the Government or not, or had access to information or not, must be stopped. I believe Phillip Agee is a hard core traitor, every bit as deserving of disgrace as Benedict Arnold.

When he uses some young man or woman to do his dirty work for him, we should be able to bring that person to justice.

I asked the former CIA Director, and the current Deputy Director of the CIA to please try and declassify the files of some of the 38 Gold Star cases of men who died in our intelligence services. Maybe if we get some of these cases declassified and find that some died because of Agee-type informers more of you will see the wisdom of the Ashbrook amendment. My case is weakened here today because I cannot point to specific men in the current decade other than Dick Welch who died because someone targeted them for death to accomplish a political goal.

So, I ask my colleagues please give us the strongest language possible here. Again with all due respect to the other side of this debate I hope you do not prevail. We want the toughest language we can possibly get to stop this new phenomenon in our country of fellow Americans arrogantly, flagrantly traveling around the world disrupting intelligence gathering activities. It is hard enough to recruit people in this field as it is after all of the demagogy in both Houses attacking a noble profession going all the way back to Biblical times. Every country in history that was a serious nation had intelligence forces. It is a necessary and respected profession.

I am a member of the Association of Former Intelligence Officers and I know their strong feelings on this amendment. As our country suffers under a crime wave now, because of the same attempts at legal niceties and inadvertent protections for criminals, let us for once give the benefit of the doubt to the men and women who are targeted for assassination. Rather than talk about hypothetical cocktail parties let us look at what is really out there * * * people moving around the world relishing in getting their Americans murdered. I urge you to vote yes on this excellent Ashbrook amendment.

Mr. KRAMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Ashbrook amendment. Listening to the debate I have heard the arguments that have been made about the chilling effect on free speech, especially in the case of an individual inadvertently discussing an agent, and then subjecting himself to possible harsh penalty. As a former prosecutor, I really do not believe the arguments hold water when we again look at the specific language with which we are dealing.

In fact, if anything, an argument can be made, I think very convincingly, that the Ashbrook language falls very strongly on the side of the civil libertarians and does in fact present a very difficult standard and burden of proof which has to be met, because if we go through it and look at the four separate elements, one must show in order to prove guilt under the language: First, a pattern of activities intended to identify and expose agents. One instance is not going to be sufficient. You have to be actively engaged in a pattern of activities.

Second, you have to act with a belief that those activities would indeed impair or impede our intelligence activities. In other words, if you do it as an innocent bystander, who has really no awareness of what he is involved in, you cannot be held accountable under the Ashbrook language. Third, you have to disclose the information. And fourth, when you disclose the information, you have to know that the Government of the United States has a real interest in concealing the declared agent's intelligence-gathering activities.

So you have not only, one, engaged in a pattern of activities, you not only, two, have to have a reason to believe that the activities would impair or impede, but you also have to know when you disclose the information that the United States is actively trying to conceal that individual's identity.

I would submit that that language certainly obviates any possibility that you are going to hold accountable any innocent third party or bystander that just happens to get himself caught up in a scenario unaware of what he is doing.

If anything, I think this language perhaps could be argued to be overly broad because it does not go so far as to make accountable anybody who discloses an agent's identity with an intent to impede intelligence gathering activities. It could have gone that far, but it does not.

So I think that for all civil libertarians, there is plenty of protection in the Ashbrook language and I hope that the committee will see fit to adopt the amendment.

Mr. MAZZOLI. Mr. Chairman, we have had a very interesting and thorough debate, but I think it is very nearly time for a vote. I see the gentleman from California wishes some time, but I think that we have aired the issue from every angle. It has been healthy and I hope and expect that we will very soon come to a vote.

Mr. LUNGREN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as one of those individuals who cosponsored the original version of this legislation, and then as a member of the Committee on the Judiciary who was, frankly, as many others, not consulted on this, I had to cancel three different meetings and take about the last 2 hours to review the material on this subject. Strangely enough, I think I come out for the very first time in not supporting an Ashbrook amendment here on the floor.

I have some concerns about this amendment and the section at which it is directed. I think it is somewhat of a mixed bag. We are talking about 601(c). The language entertained in the Ashbrook amendment itself, does, as mentioned by the previous speaker, talk about a "pattern" of activities as opposed to what we have in the law before us "in the course of an effort."

Why is that important? I think that is important because in an effort to make it tougher and more stringent it may actually weaken it because the amended language takes more than one action. It takes a pattern. And in that sense I think it creates another loophole.

Although that might be the language in the Senate bill, I think we adopted preferable language in the House version that we have here.

Second, I think the objectionable language in section 601(c), the one that creates a loophole, is the language that says "by the fact of such identification or exposure." It is my understanding that the gentleman from Ohio (Mr. ASHBROOK) has another amendment that he would offer that will knock that point out and retain the rest of the language section 601(c).

To me that is the most objectionable part of 601(c) as it is written at the present time.

I think we must remember that in this section of the bill we are not talking about those people who have an access to classified information. These are people who are common everyday citizens; even though some of them may be members of the press, they are not required to be by this section.

In that context I do not believe it is too much for us to at least require that specific intent be proven.

I think there are other elements in the amendment that protect us from creating loopholes, but at the same time, I think the amendment offered at this time goes a little bit too far. In fact, the amendment does present a problem itself when it refers to a pattern. Because there it does, in fact, require more than one action, more than one activity, but at least two, and I think that in and of itself creates some difficulties.

So for those reasons, I would ask that we not support this particular Ashbrook amendment, although I am in hopes that he will offer the second one as indicated earlier.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank the gentleman for yielding.

I make my colleague one very definite promise, I will offer plenty of amendments the rest of this session the gentleman may not want to support.

Mr. LUNGREN. I do not think that is true.

Mr. ASHBROOK. But I do hope that the gentleman will support this one.

I think the gentleman missed one key point. It only requires one disclosure. It does not require a pattern of disclosures. It only requires one disclosure, and the reason to believe standard, as far as proving the intention of the person who makes the dislosure, is much easier for prosecution than the requirement of intent.

The Attorney General has said, and I will quote again the specific intent requirement—we are not talking about intent, we are talking about specific intent—

The specific intent requirement can serve to confuse the issues in an actual prosecution to the point where the Government could be unable to establish the requisite intent beyond a reasonable doubt.

I say to my colleague and friend, he is a very perceptive legislator. I hope he will take another look at it. I do believe this is one of the Ashbrook amendments that he should support and I will give him a chance later in the session for a number of Ashbrook amendments that he would not even think of supporting.

Mr. LUNGREN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 226, noes 181, not voting 26, as follows:

[Roll No. 217]

□ 1315

The Clerk announced the following pairs:

On this vote:

Mr. Guarini for, with Mr. Hoyer against.

Mr. Nelson for, with Mrs. Collins of Illinois against.

Messrs. DE LA GARZA, ANTHONY, and PORTER changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1330

The CHAIRMAN. Are there other amendments to the bill?

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment on page 3 which was printed in the RECORD in accordance with the rule.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: Page 3, after line 21 insert the following new subsection:

"(d) Whoever intentionally discloses to any individual not authorized to receive classified information any information that purports to identify a U.S. official overseas as a covert agent, under circumstances that place a person in imminent danger of death or serious bodily injury, shall be fined not more than $25,000 or imprisoned not more than 5 years or both."

Mr. ASHBROOK. Mr. Chairman, many of the names listed by CovertAction Information Bulletin and CounterSpy are not CIA officers but other Americans serving their country overseas. CounterSpy listed some in Iran and these false identifications were used against our diplomats.

Jesse Jones an AID employee in Jamaica was falsely identified as a CIA officer by Louis Wolf of CovertAction Information Bulletin.

His home was attacked by armed gunmen. We have the responsibility to protect our CIA officers, but we must also protect other American Government officials who are the targets of the animals let loose by the Agee apparat.

I encourage the Members to support this amendment.

Mr. MAZZOLI. Mr. Chairman, I rise in opposition to the gentleman's amendment.

This was, as the gentleman accurately said, one of the many amendments which the subcommittee had before it and considered carefully during the writeup and markup of the bill, and which the full committee also considered. But we made the judgment and made the agreement that this addition, as proposed by the gentleman, would make the bill too broad in its coverage and potential. Even though none of us could agree that identifying wrongly or mistakenly some individual was correct conduct, certainly it renders that individual just as impotent to act in the capacity of intelligence as correctly identifying them, and we still said or felt as a committee that this was going beyond the regular bounds of this kind of a bill. It, in effect, makes it a crime to basically call somebody a bad name.

Now, the gentleman's amendment which earlier was approved does seem to set up what the gentleman from Kentucky feels is a negligence standard. And if we further broadened the coverage of that section, then I do believe we have gone beyond the bounds of a correct bill.

I would simply say that this is not sponsored by or supported by the intelligence agencies, nor is it urged upon us by the Department of Justice. As a matter of fact, both of them have misgivings about this kind of approach.

We had testimony before us by the legal academic community and they, in answer to the gentleman from Illinois who propounded a question, suggested that the language as proposed by the gentleman would constitute a problem. The bill which is before us is to protect national security interests and the lives of people who are pursuing national security interests. I certainly have nothing but the height of disregard for those who would name names which are either accurately named or inaccurately named, because the end product is about the same. But I worry about the addition of the gentleman's amendment for fear of making this bill too broad in its coverage and more or less a bill which would be transgressing the kind of legal standards which have been built up in the past for this kind of conduct.

Therefore, I would urge the House to reject the gentleman's amendment and to support the committee position.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I would be happy to yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

Mr. Chairman, it is true, as the gentleman says, that this is another subject. What we are trying to do through this legislation is to protect persons who operate undercover, covert agents, and this would expand the legislation into another area where there are false accusations made with respect to Americans serving overseas. I am not saying it is something that should not be covered by law. Perhaps it should be. But in an identities bill such as we have before us, it seems to me this is an inappropriate subject.

Mr. MAZZOLI. As the gentleman has correctly said, all of the effort of the committee through its many hours and weeks and years, really, of work has been to develop a focused, coherent, fairly targeted, limited application bill, limited to the kind of conduct which I have earlier called heinous and outrageous, which is to name names of U.S. citizens or non-U.S. citizens who are in an intelligence capacity. The gentleman's amendment would expand the coverage of the bill. It would be, I think, beyond the purpose of the bill we have before us.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank my colleague for yielding.

Mr. Chairman, once in a while on the floor we ask the question of whether or not at some future time this subject could be taken up. I know the answer in advance is "yes," because I know most members of our committee would want to protect those Americans who are not covered by this bill. I tend to agree with my colleague.

On the grounds that it probably would add one more area to weigh it down, I would not press for a vote, with the understanding that at some future time we would look at this matter.

Mr. MAZZOLI. I would certainly agree with that. I think the gentleman could state to the House that the gentleman from Kentucky was one of many who, during the markup, suggested that this was an area which ought to be looked into, but because we are trying to limit the scope of our bill, we thought we would put it off to a later date. I think the gentleman makes a very constructive suggestion that the amendment not be pressed to a vote, and the gentleman from Kentucky gives assurance to the gentleman from Ohio that we will in due course have hearings on this subject and see if it fits into the realm of legislation.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the chairman, the gentleman from Massachusetts.

Mr. BOLAND. I appreciate the gentleman yielding to me.

Is the gentleman from Ohio going to withdraw the amendment?

Mr. ASHBROOK. Yes.

Mr. Chairman, I ask unanimous consent that the amendment may be withdrawn, with the assurance from both the chairman and the chairman of the subcommittee that it will receive action in the future.

Mr. MAZZOLI. I thank the gentleman.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

AMENDMENT OFFERED BY MR. WEISS

Mr. WEISS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Before the gentleman proceeds, the Chair would like to inquire of the gentleman from New York if this is a germane amendment in accordance with the rule.

Mr. WEISS. It is, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. WEISS: On page 4, after line 21, insert the following new section:

SEC. 602 "(d) It shall not be an offense under section 601 to transmit or disclose information previously available from public sources or unclassified materials."

Mr. WEISS. Mr. Chairman, the legislation contains certain defenses and exceptions because in the good judgment of the committee there are situations where there ought to be defenses to prosecution. If the disclosure is made, for example, to the Select Committee on Intelligence of the Senate or to the Permanent Select Committee on Intelligence of the House of Representatives, it should not be considered an offense, obviously, and the legislation so states in section 602(c).

Section 602(a) says that it is a defense to prosecution if before the commission of the offense with which the defendant is charged, the United States had publicly acknowledged or revealed the intelligence relationship.

The amendment which I have offered very simply says that where the disclosed material was previously available from public sources or unclassified materials its disclosure would not subject one to prosecution.

I think the amendment makes good sense from the point of view of those who are enthusiastic about this legislation as well as those who are concerned about its constitutionality.

Mr. Chairman, it seems to me that if we are primarily interested in providing protection to covert agents from those who would disclose names gained from classified materials which they gained access to either as employees, as former employees, or even outside of Federal employees, would want to safeguard the legislation from constitutional attack.

The clearest way of doing that is to make sure that violations or offenses which clearly overstep the bounds of rationality are excepted from the compass of the legislation.

Now, look at how the legislation as amended reads.

If one is a private citizen and if one picks up information which has been in the public domain which is not classified, which may never have been classified, even where one has never had anything to do with anyone who ever had access to classified information, and one repeats it, one has committed a crime.

□ 1345

I think that that is such a violent assault on the first amendment rights of American citizens that there is not a chance in the world that it will sustain constitutional challenge.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I will be happy to yield to the gentleman from Missouri.

Mr. SKELTON. Is this gentleman not speaking about two separate instances, the first instance being where it is in the public domain and the second instance being where it is unclassified?

Let us give the gentleman a first instance. For example, a situation where person A, a friend of person B, person A makes this secret material part of the public domain one way or the other, and then person B makes it his disclosure. Is the gentleman giving person B a defense when really he should not have it?

Mr. WEISS. I do not think so. What we are aiming at is a situation where the material is open to the world at large. It is unclassified material that is in the public domain and along comes someone now and says, "that was done with reason to believe it would damage the intelligence capacity of the United States."

I think that is awfully dangerous.

Mr. SKELTON. I thank the gentleman for the clarification.

Mr. WEISS. I think those who support this legislation most strongly ought to be the first to want to remove the danger to its constitutionality. I do not think I have anything further to add, Mr. Chairman. The amendment should speak for itself and I hope that those who are most concerned about the breadth of this legislation, as well as those who are least concerned, will vote for this amendment.

Mr. McCLORY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, clearly this legislation is intended to protect the lives and the safety of intelligence agents who operate undercover, and whether the information is secured from public sources or private sources or is classified or unclassified material, if the intent is to impair and impede our intelligence activities and places in danger the life or safety of an intelligence agent operating undercover, then we intend that this legislation should cover that.

It seems to me that if we would provide an out because of information having been published, even published overseas, for instance, which was one of the excuses offered by some who wanted to thwart this legislation, then it seems to me that we would frustrate the very efforts which we are undertaking here today with this legislation.

So that, I think that any effort to circumvent the intent of the legislation through this amendment or otherwise would be very destructive to what we are endeavoring to do here today, and I hope the amendment will be soundly defeated.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I just rise for a few seconds to join the gentleman. Certainly, had the original amendment of the gentleman from Ohio not carried, I could argue much more strongly against the amendment of the gentleman from New York. Now, because of the change of standards of proof the thing is muddled up, but I still feel and I join the gentleman in urging that we keep the bill clean, we penalize people that name names. I still feel that criticism of a national policy, of misguided intelligence policy, could have been undertaken by a serious journalist or by a national critic, and without violating the bill as reported. We now must take even more care.

So in the end, I believe that the gentleman's amendment should be defeated and the bill left as it is before the House today.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WEISS).

The question was taken; and on a division (demanded by Mr. WEISS) there were—ayes 3; noes 38.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. BENNETT

Mr. BENNETT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair would inquire of the gentleman from Florida, Is this a germane amendment?

Mr. BENNETT. It is published on page 21471 of the CONGRESSIONAL RECORD of September 21.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. BENNETT: Page 3, after line 21, insert the following:

(e) Whenever, in the judgment of the head of any department or agency engaged in foreign intelligence or counterintelligence activities, any person is about to engage in conduct that would constitute a violation of this Act, the Attorney General, on behalf of the United States, may make application to

an appropriate United States district court for an order enjoining such conduct. Upon a showing that the safety or well-being of any officer, employee, or citizen of the United States would likely be jeopardized or that irreparable damage to United States foreign intelligence or counterintelligence activities or foreign affairs functions would be likely to result if such conduct is carried out, a permanent or temporary injunction, restraining order, or other order may be granted. Any proceeding conducted by a court under this subsection for the purpose of determining whether any information constitutes the type of information described in this Act shall be held in camera.

Mr. BENNETT. Mr. Chairman, I rise to offer an important amendment to the Intelligence Identities Protection Act. I believe I was the original sponsor of this type of legislation during the 96th Congress. I have twice testified before the Select Committee on Intelligence, stressing the urgency of congressional action to close dangerous loopholes in our laws. These loopholes endanger not only the lives of intelligence agents and officers all over the globe, but the very security of this Nation as well. Stemming from those hearings, the select committee has performed a very commendable act in framing legislation that addresses the realities of a very dangerous and unpredictable world. It is those very realities, however, which compel us to take this legislation a step further than was taken by the committee.

Specifically, the legislation which I have offered is found on page 21471 of the September 21, 1981, CONGRESSIONAL RECORD.

The amendment I offer to the Intelligence Identities Protection Act will prevent the dangerous situations which the other provisions of this act seek to address, and will do this before they actually occur. Specifically, this narrow and carefully worded amendment would empower the U.S. district court to issue an injunction following an in-camera hearing to prohibit any person from compromising the identity of an intelligence officer should such action imperil that officer's safety or the conduct of U.S. foreign policy.

The significance of this extremely important provision is that it empowers the Federal Government, under carefully designed parameters, to stop those who seek to compromise our national security before the damage is actually inflicted. To pass the Intelligence Identities Protection Act without this amendment I offer today would be reminiscent of the old American parable about closing the barn door after the horse has run away. We are today addressing a basic problem confronted by our intelligence community. I say we should solve it once and for all. Certainly, the provisions of the bill which I originally introduced came informally from the CIA itself and this amendment was included.

Under the narrow parameters of this amendment, a restraining order could only be issued when the safety of an intelligence officer is jeopardized or when the foreign policy of the United States faces "irreparable damage." The courts have repeatedly and consistently affirmed the Government's right to protect itself from such dangers. As recently as 11 months ago, the U.S. Supreme Court reiterated in a case upholding the CIA secrecy agreement that the Government, "has a compelling interest in protecting both the secrecy of information important to our national security and the appearance of confidentiality so essential to the effective operation of our Foreign Intelligence Service." That is *Snepp* v. *U.S.*, 444 U.S. 507 at 509 (1980).

Less than 2 years ago, the U.S. district court issued the same kind of injunction authorized in my amendment to prevent publication of an article on homemade hydrogen bombs which both endangered national security and would have provided potential terrorists with a blueprint for disaster. That is *United States* v. *Progressive, Inc.*, 467 F. Supp. 990 (1979).

My amendment clearly falls within that narrow area so critical to national security which the courts have consistently defined as necessarily exempt to the rule against prior restraint.

Mr. Chairman, we cannot watch idly while those who wish us ill seek to unravel the Intelligence community, on whose shoulders so much of national security rests. I urge passage of this important amendment. I think it puts the legislation in a stronger position than it is now. I think it would be helpful to our national defense and helpful to individuals who might otherwise be in danger.

Mr. MAZZOLI. Mr. Chairman, I rise to oppose the amendment offered by the gentleman from Florida.

Mr. Chairman, I rise with the greatest of respect to my friend from Florida, who is one of the leading Members of this House and a man who has done much to forward his Nation in times of distress. I understand fully what the gentleman has said, and I share with him the kind of frustration and even a sense of antipathy toward those who would do anything, however high their motive, which had the end product of impairing and impeding the national intelligence activity of this free Nation.

However, having said that, the gentleman from Kentucky must with respect oppose the amendment because it would subject the bill to what then I would have to say would be certainly extra constitutional scrutiny, and that would be the possibility of being an unlawful prior restraint on the issuance of information. I understand as a member of the committee that this was not supported nor requested by any of the intelligence agencies, nor by the Justice Department. We of course, in connection with the kind of evil persons with whom we are dealing, who make these revelations, wanted to be sure we approach that problem, and made sure they were acts of commission, but at the same time do it in a way that would not cause people to believe that we have taken illegal action. We therefore consulted the Pentagon Papers case, Mear against Minnesota, all of the cases of consequences that have been decided in the United States on prior restraint, and crafted our bill within those bounds.

With respect to the gentleman, it would appear that having studied the amendment, it would push the bill beyond those bounds into what could be possibly an unconstitutional prior restraint, and I think it would jeopardize the bill's opportunity to do the things which we want to do, that is, to penalize those people who insist on divulging the names of our undercover agents.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding, and I want to concur with the gentleman's statement. Although the amendment of the gentleman from Florida is well intended, I think it would not pass the same constitutional scrutiny which other provisions of the bill will. I think that it is not a good amendment, and I with reluctance oppose it.

Mr. BENNETT. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Florida.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

(At the request of Mr. BENNETT and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. BENNETT. As far as the desire of the CIA is concerned, they were the ones that sent me this. I did not write this language myself. It came from the CIA—not officially, but came years ago from the CIA as something they wanted. As far as the legality of it is concerned, I have cited a Supreme Court case and a Federal supplement case. The gentleman has cited no case. This amendment provides no unusual procedure. It is done many times.

Furthermore, if this particular provision of the law would fail, just this provision of the law would fail, it is in no way connected with the rest of the bill, so if it is unconstitutional it would fail alone.

Second, I have cited Supreme Court decisions and the gentleman has cited nothing.

Third, it does come from the CIA.

□ 1400

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman from Florida (Mr. BENNETT) for his statement, and I would certainly yield to his legal scholarship. I would never want to engage him in a battle of knowledge in-depth on constitutional subjects.

I would only suggest to the gentleman that we have studied this issue over months and months, and we had no statement—and I will yield to other Members to address this subject if they wish—and at no point did we have any significant testimony or statement of urgency by any member of the intelligence community nor by the Justice Department representatives that this was the way to go. Each of them in every way felt that the bill we have before us would basically solve the problem, and I think it does.

Mr. Chairman, I would again, with respect, urge the committee to defeat the gentleman's amendment.

The question is on the amendment offered by the gentleman from Florida (Mr. BENNETT).

The question was taken; and the chairman announced that the noes appeared to have it.

Mr. BENNETT. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Florida (Mr. BENNETT) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. SOLOMON

Mr. SOLOMON. Mr. Chairman, I offer an amendment which has been duly printed in the RECORD pursuant to the rule.

The CHAIRMAN. The Clerk will report the amendment.

Mr. SOLOMON. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The amendment reads as follows:

Amendment offered by Mr. SOLOMON: Page 7, strike out lines 4 through 25 and insert in lieu thereof the following:

"(4) The term 'covert agent' means—

"(A) a present or former officer or employee of an intelligence agency, or a present or former member of the Armed Forces who is or was assigned to duty with an intelligence agency—

"(i) whose past or present identity as such an officer, employee, or member is classified information, and

"(ii) who is serving outside the United States or has within the last five years served outside the United States;

"(B) a United States citizen whose past or present intelligence relationship to the United States is classified information and—

"(i) who resides and acts outside the United States (or who resided and acted outside the United States) as an agent of, or informant or source of operational assistance to, an intelligence agency, or

"(ii) who at the time of the disclosure is or was at any time acting as an agent of, or informant to, the foreign counterintelligence or foreign counterterrorism components of the Federal Bureau of Investigation; or

Mr. SOLOMON. Mr. Chairman, first of all, let me just say to the committee chairman, the subcommittee chairman, and our ranking minority members on this side of the aisle, as well as all the members of our committee, that I just want to commend them for an excellent job. I think this is long overdue, and we should have passed this legislation long ago.

However, I do feel that there is one inequity that we really must deal with. If we are going to put some teeth back in our CIA, if we are going to have a counterintelligence operation which is going to be as strong as our potential enemies, I think we have to do everything in our power to give them that opportunity.

□ 1415

Mr. Chairman, this amendment in no way expands the scope of this legislation. It does not add or subtract from the constitutionality of the bill. What it does is put our CIA on an equal or superior basis with any other foreign intelligence operations in this world. I think we owe it to the American people to give them this kind of protection. I would certainly hope all of our colleagues would support this legislation.

The committee has not acted firmly enough to protect the identities of former intelligence agents and operatives from unauthorized disclosures. My amendment would extend the protective coverage of this legislation to include former agents and operatives of the intelligence community.

The majority of these former agents have already served the United States at considerable personal risk, and to my mind, there is absolutely no possible justification for exposing them to danger at this point by excluding them from the protection provided by this legislation.

There are also presuasive counterintelligence reasons for maintaining the cover of former agents. In many instances the individual's contacts and sources may still be in place and active. Such a network may have been passed on to the individual's successor and should the former agent's relationship be revealed, the entire network may be compromised. Accordingly, in those cases where such a relationship remains otherwise concealed and where the United States continues to take affirmative measures to keep it concealed, unauthorized disclosures of such relationships should warrant attachment of criminal liability.

By protecting former agents, my amendment will strengthen this legislation in three vital ways:

First, it will protect former agents from possible harm as a result of the disclosure of their true identities and even save their lives.

Second, it will protect active operatives who may have assumed the former agent's position; and

Third, it will protect the entire intelligence network which may have been established by a former agent and passed on to the former agent's successor.

The Central Intelligence Agency would like to see my amendment enacted and in response to my request for their comment on my bill H.R. 7400, which contained an identical provision as the amendment at hand, the agency counsel said:

Through efforts such as yours we hope to strengthen and improve the intelligence apparatus that is so vital for the protection of our Nation's security. As you know, the CIA has been engaged in a consistent effort to have each of the various proposals of your bill enacted into law.

Mr. McCLORY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I rise in reluctant opposition to the amendment. I know the amendment is well intended but I might say that in the 3 years of hearings that we had on this legislation this amendment was never even proposed. It seems to me that this goes far beyond the scope of the legislation as we have intended it here and would create a new type of crime which the Federal Government would be involved in.

What we are trying to do here is to protect the identities of covert agents who are operating on behalf of our country and to protect them against assassination or against their identity being disclosed because our national security is involved. It seems to me that with that intent and with that purpose of this legislation we should limit the scope of the legislation to covert agents who are operating in behalf of our CIA or other intelligence agencies or, FBI agents who operate

under cover with regard to their counterintelligence activities.

I have full sympathy for former intelligence officials and I think we should protect them. I am sure that they are protected under many laws—local, State, and Federal laws—that we have now. But to include them in this legislation, it seems to me, diverts our attention from what we are undertaking to do here and would establish a new criminal statute that would impose obligations on the Federal Government with regard to an activity which is beyond the scope of the legislation.

Mr. SOLOMON. Mr. Chairman, will the gentleman from Illinois yield?

Mr. McCLORY. I yield to the gentleman from New York (Mr. SOLOMON).

Mr. SOLOMON. I understand the reasoning behind my good colleague and I know he does not want to upset the applecart. I know that the reason that many of our good, patriotic Americans such as the gentleman from Massachusetts, the gentleman from Kentucky and all of them are opposing some of these good amendments is because we do not want to upset the applecart.

But let me just ask. I thought the reason behind this legislation was to provide protection for our network of counterintelligence agents. Let me just point out a hypothetical example which may not be so hypothetical. Suppose we had an agent who was performing in a counterintelligence purpose in a foreign university as a professor. Suppose he left that professorship and came back to the United States and retired. Suppose we replaced him with another agent in the same capacity as the professor in that university and all of a sudden we reveal the former CIA agent's identity; then he is connected with the other and it blows the whole cover for the whole network of operations.

That is what my amendment is intended to correct. I see no difference between an agent and a former agent and I think the merit therefore should be to enact this legislation with the amendment in the legislation.

Mr. McCLORY. I will say to the gentleman I imagine there are a great many covert agents, intelligence officers who operated under cover who themselves disclosed their identity after their service was terminated and their identity became well known. As has been pointed out, we are endeavoring to protect the covert agents even when their identity is publicly disclosed. Former officials who are in retirement and who are no longer rendering any active service in behalf of our Nation, no longer involved in espionage on intelligence gathering or other activities related to our national security are just plain not covered in this legislation. I think this amendment is out of place here.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words and very briefly rise to speak in opposition to the gentleman's amendment.

I certainly understand what the gentleman from New York (Mr. SOLOMON) is trying to do. Certainly it speaks well for him that he worries about the ultimate situation of our intelligence people who reach retirement age.

But as the gentleman from Illinois has said, the point and purpose of the committee bill, and the committee's bill before the House today, is to protect those agents, employees, assets, sources, who are in some jeopardy in the event that their name or identity is disclosed. We could have named everybody in the CIA or the DIA and said, "Look, any of those names are classified and anytime somebody puts one in print then they are going to be sanctioned." We decided, and I think correctly so, to narrow the focus to those agents who might suffer some injury in the event that their names were disclosed.

The gentleman's amendment, the point that the gentleman pushes with his amendment came before the committee and I think, as the gentleman from Illinois (Mr. McCLORY) has said, we had in the 3 years I have worked on this bill no real strong evidence that former officers, retirees, people who, as the gentleman said, served abroad and have come back home are in a position of jeopardy or danger that we certainly understand is the case of those who are currently working actively and are involved in foreign assignments under cover.

So we, by matter of choice, and with an effort to limit the coverage of our bill to make sure we go against the people we really want to go against, we limited the coverage of the bill to active officers and U.S. citizen agents. In the case of intelligence employees as the gentleman knows, "covert agent" includes those who serve overseas and have come back home within the last 5 years. So if the individual is a U.S. citizen and he is an actual employee of an intelligence agency and has had a post abroad and comes back home, his identity is protected for 5 years.

In the event of a person who is with the Central Intelligence Agency who is in the normal run of things retired, the committee felt that that would not normally reach the situation of danger in the event of his name being disclosed.

Mr. SOLOMON, Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from New York.

Mr. SOLOMON. I understand what the gentleman is talking about, but I wish the gentleman would just look at page 2 of the bill on line 18 where we talk about "the United States is taking affirmative measures to conceal." if the gentleman looks over on page 3, line 7, it continues that language, that "the United States is taking affirmative action to conceal." Line 18 it continues. I do not change that language.

What I am saying is that if the United States is still taking action to conceal that former CIA agent's identity, then it ought to be a crime the same as it is if he is an agent or if he falls within that 5 years, because sometimes the cover can continue much longer than the 5 years. All my amendment does is include them through such time as the United States is taking affirmative action to conceal, and that is what they want.

Mr. MAZZOLI. Without saying my statement would be inclusive, I would suggest that in most cases where an individual's identity is still being protected and where the Government is taking affirmative measures to conceal such agent's identity, that person probably has an active role and involvement with the agency at this time, in which case that person should be included, and is included, as a covert agent.

In the true case of retirement they probably have outlived the purpose for which they were originally posted abroad or at home.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. I would say to my colleague I understand how we want to move this bill along. I agreed earlier not to present an amendment because the subject matter can be taken care of later, and also because it would have expanded what we are trying to accomplish here. On that agreement I withdrew. We have an immediate need for legislation for an urgent need in a narrow legislative action.

I think we are not really expanding the basic coverage in this amendment by the gentleman from New York (Mr. SOLOMON). As a matter of fact, let me pose a question. I happen to believe we might have an ambiguity in the bill which we did not intend to be there. In the bill we talk about current intelligence officers. We should also talk about protecting former CIA officers. Quite often we are also talking about protecting their assets. One might expose a former agent who was a CIA operative in Paris and the simple fact of exposing him, even though he is a former agent, would automatically trigger problems for his assets, the people he met with, the people he had lunch with every day.

We should cover that situation. But the way the language is written it is almost a two-stage operation. If you expose a former CIA officer, you also have to show that in doing that you

are exposing his assets or an agent or someone he worked with overseas.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

(At the request of Mr. ASHBROOK and by unanimous consent Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. I yield to the gentleman.

Mr. ASHBROOK. I understand the position of the majority that we do not want any amendments to the bill. I am just wondering if our colleague from New York has not pointed out something that is very important and if we do not, in fact, have an ambiguity in the bill.

Mr. MAZZOLI. I would certainly accept the gentleman's general description. I mean that in the sense that it makes us discuss a problem.

But in the 3 years we have worked with this, and I have been on the subcommittee each time, I really cannot recall that the intelligence agencies said that this was really something that was a problem. What was a problem was Welsh in Athens and what has been a problem was what happened in Kingston, Jamaica, and what has been a problem has been what occured in Mozambique, but not agents who have come back home and who have retired and who were in a sense doing other things.

Obviously there are at least two former CIA agents now who are in the headlines for having gone on to other things. I would certainly suggest that those people, if they were acting under cover at some point, should not have any kind of further protection from the government for what they do now.

What I would like to comment upon is the gentleman's remarks about networks. The contention is that when you reveal, you may endanger the network. You know that within the coverage of covert agents we have included a non-U.S. citizen who is in the United States now and did occupy a covert position for us abroad, who has, for example, family that is still in the old country, or vulnerabilities in returning home if exposed. That person can be protected; that person does come under the coverage of the bill. So we are not unmindful of that kind of network problem.

But we felt, and I think correctly so, that we needed to limit the scope to that kind of network and to eliminate as being too extensive the coverage of retired CIA or other intelligence personnel. Those people are, or were, professionals. They use clandestine tradecraft to conceal their recruitment and running of agents. Revealing the identity is unlikely, therefore, to expose any network of agents.

Mr. ASHBROOK. If my colleage will continue to yield for one point, he might convince me to relax my concern. Is it my colleague's understanding that it is the intention of this legislation, where the U.S. Government endeavors to protect the identity of a former agent who has retired, to protect this agent? It is important not only to protect the agent but the assets and the work that he might have accomplished or have been engaged in throughout the world. Wherever the Government has endeavored to protect that agent, even though he is retired, is that that situation covered by the bill the gentleman from Kentucky has written?

Mr. MAZZOLI. Yes, but I am not sure that answers the problem.

Mr. ASHBROOK. Because if it is, it would easily answer most of the questions my colleague has raised.

The CHAIRMAN. Time of the gentleman from Kentucky has again expired.

(By unanimous consent Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Certainly where the United States is taking affirmative measures to conceal an agent's identity, that certainly works in behalf of saying that that agent still had an active role to play, some active connection with the U.S. Government. But it was not the committee's intent, in candor to the gentleman, that we continue this relationship indefinitely if, for example, the method of maintaining the cover here or maintaining the security of this information is just simply something out at Langley, some sort of a book. I think there has to be an active relationship that still exists between a U.S. citizen and the U.S. Government before that individual would still qualify as a covert agent who would then come under the coverage of the bill in the event that that information is disclosed.

But, again, if the Government is taking active steps to maintain the sanctity of that information, then that could well establish the fact that this individual has a continuing relationship with the Government. But, again, I do not think that would extend to a retiree, to a person who once had a clandestine role in intelligence, who had just come back home to retire.

Mr. ASHBROOK. I thank my colleague for that very honest answer. That would have been my appraisal, too. It is one of the reasons that, on balance, I would favor the amendment of the gentleman from New York, because I think it is very important to protect the former agents, to protect the assets and contacts that he had, the ongoing work that he had that was not necessarily terminated simply because of his retirement. We should vote yes on the Solomon amendment to help complete the job we started by the adoption of my stronger language just a few minutes ago.

□ 1430

I think my colleague from New York has a very good amendment and a very good point.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. SOLOMON).

The question was taken; and on a division (demanded by Mr. MAZZOLI) there were—ayes 25, noes 14.

RECORDED VOTE

Mr. MAZZOLI. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 313, noes 94, not voting 26, as follows:

[Roll No. 218]

□ 1500

The Clerk announced the following pairs:

On this vote:

Mr. Nelson for, with Mrs. Collins of Illinois against.

Mr. MOAKLEY and Mr. ROSE changed their votes from "aye" to "no."

Messrs. AuCOIN, OTTINGER, VOLKMER, and PATTERSON changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. ZABLOCKI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time for the purpose of a colloquy. Several of our colleagues expressed a concern regarding the relationship between the Peace Corps and the intelligence community.

Mr. Chairman, because of the importance of a complete separation between the Peace Corps and intelligence activities to the integrity of the Peace Corps and to the safety of volunteers, I would like to clarify with the subcommittee chairman of the Committee on Intelligence the portion of the committee report concerning the Peace Corps.

My understanding is that the committee strongly reaffirms its support of the executive branch policies which have governed the relationship between the Peace Corps and the intelligence community agencies for more than 20 years; that is, the Peace Corps should not be used or appear to be used as cover for any intelligence activities.

I interpret the language of the committee report with reference to any executive branch contemplation of any changes in the foregoing policies in no way as inviting the executive branch to contemplate such changes. My understanding is that the committee determined not to add a provision exempting the Peace Corps from the legal obligation to provide intelligence cover only because: First, the executive branch assured us that a statutory exemption was unnecessary; and second, we did not want other agencies to seek such exemption based on such Peace Corps precedent. Thus, we view the language in the committee report as an admonition to the executive branch of the committee's disposition that the foregoing policies should not be disturbed, as a warning to the executive branch that no changes in the foregoing policies may be implemented without prior notification to the committee and as telling the executive branch of the committee's strong predisposition to disapprove any proposed changes in such policies.

Are these the subcommittee chairman's understandings?

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding, and very definitely they are the understandings of the chairman and of our committee and I would like, with the gentleman's indulgence, to read directly from our report to which the gentleman referred, on page 19. In reference to a letter which William J. Casey, the Director of the Central Intelligence Agency, sent to Mrs. Ruppe, who is the Director of the Peace Corps, stating his opposition to the use of the Peace Corps for cover and the letter is quoted in our report, then follows this committee language:

It is the committee's belief that based on assurances of the Director of the Central Intelligence Agency, the President will not suggest any changes in the traditional distance which has separated the Peace Corps and the intelligence operation.

Nevertheless—

This is I think important. I will just read one more paragraph and make mention that this is in line with what the chairman of the Committee on Foreign Affairs has said.

Quoting from our report:

Nevertheless, should the intelligence community contemplate a change in this policy—

The policy of distance between the Peace Corps and the intelligence community—

at any time in the future, the committee would consider such a contemplated change to be a "significant anticipated intelligence activity" which must under law be reported to the committee before it is implemented. The committee would question seriously any such change in policy.

Mr. ZABLOCKI. I thank the gentleman.

Mr. Chairman, I hope the President, when signing this legislation, would take the opportunity to reaffirm these policies.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, after witnessing the happenings of this day, one might think with some justification that if an amendment were offered to strike the first amendment to the Constitution of the United States, that it would probably carry.

Section 601(c) of this bill, especially with the adoption of the Ashbrook amendment, presents an incursion into the first amendment perhaps unparalleled by any piece of legislation in our Nation's history during peacetime.

Never before has the publication, by a private citizen, of information that is already in the public domain been made a punishable offense.

Perhaps the only saving grace is that there has been such constitutional overreaching that is unlikely that this piece of legislation can withstand a constitutional challenge; but for the dignity of this House, for its own self-respect, I would hope that we would defeat this bill and allow the committee to report out at least the bill which it originally had in mind. Mr. Chairman, the Intelligence Identities Pro-

tection Act, H.R. 4, presents serious constitutional problems and should be rejected by the House.

Section 601(c) strikes directly at the heart of the first amendment. Its broadly sweeping prohibitions have been denounced as unconstitutional by more than 60 law professors, who had urged that a similar provision in last year's bill be deleted. This section makes it a crime for a private citizen to publish any information that identifies covert agents—even if the information was obtained from nonclassified materials readily available to the public. Unlike other sections of the bill, it is not limited to persons who have or have had authorized access to classified information. It applies to journalists, academics, and all other persons who disclose identifying information, even where the disclosure is made in the context of news reports, scholarly publications, or enforcement of regulations of private organizations.

The scope of the bill extends well beyond the protection of the identities of undercover CIA agents. The definition of covert agent now includes present and former CIA agents, FBI agents, informants, and sources of operational assistance to intelligence agencies, whether abroad or in the United States. Clearly, such a broad definition exceeds the bill's original purpose of protecting the lives of covert CIA operatives working abroad.

The first amendment guarantees that, "Congress shall make no law * * * abridging freedom of speech or of the press." However, section 601(c) will have such a chilling effect on newsreporting, academic research, and other individuals' activities in this area that these fundamental rights will be seriously impaired. Would, for example, journalists investigating the Watergate scandal have felt free to report the CIA connection of some of the burglars if this provision had been in effect at the time? Or would a church official who discovered that a CIA agent was posing as a missionary feel free to divulge that person's identity to purge the church's own ranks? Under section 601(c), both of these actions would subject the individuals to prosecution and possible jail sentences and/or fines.

Recognizing that section 601(c) posed severe threats to the first amendment, the Intelligence Committee incorporated language that attempts to make this provision constitutionally acceptable. The section purported to criminalize only disclosures made with "intent to impair or impede the foreign intelligence activities of the United States." It also requires that the disclosure be made "in the course of an effort to identify and expose" covert agents.

Although well intentioned, even these limitations in my judgment were entirely inadequate. The standards are unconstitutionally vague and require subjective judgments which might vary according to the political climate at home or abroad. For instance, the "intent" requirement could have been met whenever a publication disclosed and consequently diminished the effectiveness of an intelligence activity. The Justice Department has conceded that such a requirement "may itself have the effect of additionally chilling legitimate critique and debate on CIA policy because general criticism of the intelligence community could seem to corroborate an 'intent to impair or impede'."

The additional requirement that the disclosure be "in the course of an effort to identify and expose" offers no further protection. As the witness from the Society of Professional Journalists observed before the committee: "* * * a journalist who is assigned to cover the intelligence community on a regular basis may indeed establish a pattern of reporting the names of agents or sources in the course of legitimate coverage of the CIA." Nor is it hard to imagine a strong argument being made that the research and investigations made for even a single story is a sufficient "effort" to fall within the strictures of the statute.

Of course the Ashbrook amendment has now wiped out the "intent" requirement and substituted a standard calling only for "reason to believe" that intelligence activities would be impaired or impeded.

Section 601(c), especially with the adoption of the Ashbrook amendment, presents an incursion into the first amendment perhaps unparalleled by any piece of legislation in our Nation's history during peacetime. Never before has the publication of information that is already in the public domain been made a punishable offense. Never before has the disclosure of information unrelated to national security matters, that would neither injure the United States nor give any advantage to a foreign power, been made a punishable offense.

According to its sponsors, the Intelligence Identities Protection Act was originally intended to protect the lives of American undercover agents serving abroad from those few individuals and publications who used classified information to expose the identities of agents, regardless of the possible jeopardy and risks that could have resulted. That, I believe, is an important goal, but not one that should be accomplished at the sacrifice of our most basic constitutional rights. I reject the theory that we cannot have "both an ongoing intelligence capability and a totality of civil rights protection." We must instead heed the warnings of Justice Douglas, who wisely proclaimed that protection of free speech is "essential to the very existence of a democracy."

I urge my colleagues to join me now in helping to defeat this bill. It is our first duty as elected Representatives to uphold the Constitution and protect all our citizens from this kind of dangerous encroachment on their fundamental rights.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take 5 minutes. It had been my intention to vote for the committee's bill with one change, and that would have been an amendment that was going to be offered by the gentleman from Ohio (Mr. PEASE) which would have required the word "lawful" or "legal" to be inserted in front of the words "foreign intelligence activities of the United States."

As was pointed out by the Senate Intelligence Committee in their original report, there were many unlawful activities by our intelligence agencies and, of course, those of us who were on the Committee on the Judiciary during the impeachment investigation can affirm that that was indeed the case.

Certainly we should not impair the ability of the news media or any citizen to reveal the names of agents engaged in unlawful activities, whether they are intelligence agents or any other employees of the United States. And yet, this bill, as amended by the Ashbrook amendment, would make it a crime to do so.

In my opinion, the bill as amended is clearly unconstitutional. If the House does not see fit to reject this bill, there is no way under the rules, of correcting the error, because the Senate bill contains the same language as the Ashbrook amendment. If the House should pass this bill and it should be reported to the President for signature, those of us who believe in the Constitution should urge the President to veto the bill, so that we might start over and report out a bill that is sound.

Let me just point out one other thing. I think that the activities of someone like Phillip Agee, in deliberately setting out to undermine our intelligence agencies, are absolutely reprehensible, and it seems to me that they ought to be curbed. But let me also point out that he has declined to come back to the United States, and anybody who is really intent on sabotaging our intelligence agencies would not be deterred by this kind of legislation because he can stay outside of the country, and this law could not reach him.

So, what we are doing is making it impossible, without the risk of prosecution, for the news media or individual citizens, or even Members of Congress, to reveal abuses and corruption and violations of the law in any intelli-

gence agency by any agent if such revelation would identify or expose any agent. It seems to me that would be a tragedy. If it does become law, we must hope that the courts of the United States would rule it to be, as I believe it would be, clearly unconstitutional.

□ 1500

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as the gentleman from Kentucky has stated, we are coming to the end of the debate on this bill. There are several things that I want to say.

First of all, I want to express the hope that there will be strong support for the legislation in its amended form.

Furthermore, I want to say quite candidly, that I did work hard to bring this measure to the floor at this time and did enter into agreements with the chairman of the subcommittee and the chairman of the full committee with respect to language that was embodied in this bill which has now been amended by the Ashbrook amendment. I agreed to support that amendment as contained in the committee bill and to oppose the Ashbrook amendment primarily so that we could avoid sequential referral to the Judiciary Committee. We undertook to make the language acceptable to members of the Judiciary Committee who otherwise would have scheduled hearings on this measure, delayed its enactment, and would have certainly revised the text of the bill in some way which would be different from the bill as we have it here.

I want to state to the majority side particularly that I did everything I could to support the committee bill in the form in which it was brought to the floor. I talked to the White House. I talked to the Attorney General's Office and I have discussed it with the leadership on our side to get the maximum vote in support of the committee bill.

We failed in that. We failed in that on this amendment. I do not want to dispute the fact that the Ashbrook amendment may be an improvement. It may be a stronger amendment. I did not prefer it. I preferred the committee bill the way it was; but the House has spoken and it seems to me that what we have to do here is to provide legislation that the Congress is enacting and not legislation which may be recommended by the White House or the Attorney General or the CIA or anybody else. It is our business and our action.

We have now taken this action and it seems to me we are providing a good piece of legislation which is needed and which we want to see enacted as promptly as possible.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I am happy to yield to the gentleman from Ohio.

Mr. ASHBROOK. I merely would add to what my colleague has said my particular support and respect for the work the gentleman accomplished. He did precisely what he said. We made sure it came out on the floor.

I have been on the committee for many years. We often know that committees make decisions, make agreements to get bills to the floor. That was made.

The gentleman was an honorable person. He stuck to his agreement 100 percent. I congratulate the gentleman from Illinois for his work in getting the bill to the floor.

I think we may have improved it. I hope we have improved it. At any rate, we have no differences now. Let us support the bill.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(At the request of Mr. MAZZOLI, and by unanimous consent, Mr. McCLORY was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I am happy to yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I just simply would like to make a few comments. One is to thank the gentleman in the well for his work. Certainly the gentleman has been indefatigable in pursuing this bill for the 3 years that we have been colleagues on the committee.

Once again I want to express my appreciation to the gentleman from Massachusetts whose leadership and willingness to get into the subject and move it along is the reason we are here today. I want to thank the gentleman.

Also I think I would like to suggest that the gentleman join me in expressing our thanks to our staff on the minority and the majority side, because this is very intricate and very difficult and tough legislation. It is tough to understand. These men and women have helped us a great deal.

Lastly, and even though I oppose the gentleman from Ohio and oppose the gentleman from New York in their two successive amendments, and feel that the bill that the committee reported out was the very best edition, I certainly am enthusiastically in support of H.R. 4.

I recognize that some Members will have differences of opinion, but I hope that we will have a very long and positive vote for the bill to among other things indicate to our intelligence people that their work is appreciated and their security is very important to us.

Mr. McCLORY. Perhaps now with section 601(c) being in the precise form of the Senate bill, we can send the House bill over there and they can enact our bill and get this to the President's desk for signature at an extremely early date.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to tell the House that this committee has worked its will this afternoon. It is not my will. I have difficulty with the bill as it now stands. When one brings this kind of a bill to the floor, when we have had some consensus on the bill with respect to committees of the House and also with respect to Members in this House, I think there is an obligation on my part to support that position. I have done that and the committee has done it, I think, and our side has done it to the best of our ability.

Again, this bill gives me great trouble in its present form. I can understand the position of those who supported the amendment that was offered by the distinguished and able and persuasive gentleman from Ohio. We spent many long hours on the committee and in hearings on this bill together over the past few years. I can appreciate his position.

I also appreciate the fact that the administration had a preference for the Senate bill 391 which includes the language that was offered by the gentleman from Ohio.

My own position is that I cannot support this bill on final passage. I do not intend to do it.

We will leave it that, in the final analysis, it is going to pass anyhow. We will get to conference, and as a conferee I am not going to try to disrupt the rather significant opinion of the membership of this committee or this House; but we will leave to the conferees their best judgment what will be done in conference.

I suppose that one can say from what has transpired here today and what the feeling will be in the Senate, perhaps we are looking at H.R. 4 in its final form as it was passed today.

But in any event, Mr. Chairman, I intend to vote against final passage of this bill.

Mr. ASHBROOK. Mr. Chairman, I rise to support H.R. 4 with amendments. This bill is long overdue. For the past 8 years, a small group of anti-American extremists have been engaged in spying on Americans to identify those who are engaged in gathering intelligence for our country. Some, like Phillip Agee, are former employees of the CIA. Others, like Louis Wolf, come out of the New Left anti-establishment movement. They have united with the aim of disrupting our intelligence capabilities. As we know, without adequate intelligence, our policymakers will be blinded in a hostile environment.

In 1968, the KGB began the program of exposing American intelligence officers. The assignment to do this was given to the East German and Czech intelligence services. The product of their labors was a book called, "Who's Who In The CIA," by Julius Mader, printed in English in East Germany in 1968.

Ladislav Bittman, a former official of the Czech Intelligence Service who worked on the book, testified before the House Intelligence Committee on February 19, 1980, that only about half the names in the book were real CIA officers. The rest were put in to disrupt other U.S. Government activities.

When the Tupamaro terrorists murdered an AID employee, Dan Mitrione, the Cuban Communist newspaper "Granma" justified the murder on the grounds that he had been listed in the Mader book. The listing was one of the false identifications.

In 1973, the focus of the exposure activity shifted to the United States with the publication of the magazine "Counter Spy." Since then, much of the campaign to identify and expose U.S. covert agents has centered around Phillip Agee, a renegade former CIA officer who openly admits his close ties to the Cuban Government and Communist Party.

Agee is affiliated with a publication called "Covert Action Information Bulletin." He was formerly associated with the publication "Counter Spy." Both of these magazines are actively engaged in attempting to identify and expose U.S. covert agents. They also are extremely active in promoting Soviet and Cuban propaganda lines. "Covert Action Information Bulletin," for example, reprinted a Soviet forgery of a purported U.S. Army document that pretended that the United States supports terrorism. Despite worldwide exposure by the United States of that document as a forgery, it was disseminated in our own country by Phillip Agee and his cohorts. "Counter Spy," in addition to naming alleged U.S. covert agents, has published a whole series of propaganda articles closely following the Soviet and Cuban line attacking not only the United States, but each of our allies such as Turkey, Israel, and so forth.

Although it has been 6 years since the CIA chief of station in Athens, Richard Welch, was murdered after his name was exposed in CounterSpy, we have done nothing to stop this kind of irresponsible naming of names. The House Intelligence Committee has been working on the bill for 2 years, but last summer's violence against American diplomats in Jamaica has called public attention to the urgent needs for this legislation. On July 2, 1980, Louis Wolf, Phillip Agee's associate in the CovertAction Information Bulletin, held a press conference in Jamaica in which he identified 15 Americans as CIA officers. He not only listed names, but home addresses, license plate numbers, and the descriptions of their cars. A number of his identifications were incorrect; however, gunmen attacked the homes of two of those named. Richard Kinsman, the victim of the first attack, is the first secretary of our Embassy in Kingston. Mr. Kinsman's home was attacked by persons using a submachine gun and grenades. Shortly thereafter, gunmen attacked the home of a young AID employee, Jesse Jones. The gunmen exchanged fire with police officers who have been assigned to protect the Jones' home after the attack on the Kinsman home. Mr. Jones, who is in no way connected with the CIA, has left the Government service, rather than risk his own life and the lives of his family in the light of the violence. Mr. Jones is now suing Louis Wolf and Convert Action Information Bulletin.

These are posters put up in Jamaica right after Louis Wolf named the American diplomats as alleged covert agents. You will notice on one poster we have the pictures of some of these people, including Kinsman and Jones. On the other poster, we have the home addresses, license plate numbers, and descriptions of cars. While Wolf disclaims responsibility for the posters, they are identical to the press release that he distributed in Kingston, Jamaica.

Last year, the House Intelligence Committee unanimously reported out H.R. 5615 after careful consideration. However, now the bill has been considerably weakened by an amendment suggested by the ACLU and the Center for National Security Studies. As a result, I would prefer the Senate language in place of 601(c), which says it is sufficient for the defendant to have reason to know that it would impede or impair the intelligence activities of the United States.

It is my intention to offer an amendment to bring the House language closer to that of the Senate which I believe is a more appropriate solution to the problem and which protects constitutional rights while penalizing those who knowingly jeopardize the lives and effectiveness of our covert agents. I also intend to introduce an amendment that would make it a crime to knowingly jeopardize someone's life by identifying a person as a covert agent. This would protect real covert agents as well as those falsely identified.

Phillip Agee wrote in the introduction to the book, "Dirty Work," coauthored with Louis Wolf.

> Once the list is fully checked, publish it. Then organize public demonstrations against those named—both at the American Embassy and at their homes—and, where possible, bring pressure on the Government to throw them out. Peaceful protest will do the job. And when it doesn't, those whom the CIA has most oppressed will find other ways of fighting back.

This open invitation to violence against Americans both intelligence officers and other diplomats makes it imperative that we protect our overseas personnel from this kind of attack.

I urge my colleagues to support this bill's passage to assure both our intelligence personnel and our enemies that we intend to protect those whose job it is to provide us with the vital information needed for American security.

The CHAIRMAN. Are there any other amendments to be offered? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. PANETTA) having assumed the chair, Mr. PICKLE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4) to amend the National Security Act of 1947 to prohibit the unauthorized disclosure of information identifying certain United States intelligence officers, agents, informants, and sources, pursuant to House Resolution 223, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BOLAND. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 354, nays 56, not voting 23, as follows:

[Roll No. 219]

□ 1515

The Clerk announced the following pairs:

On this vote:

Mr. Nelson for, with Mrs. Collins of Illinois against.

Until further notice:

Mr. Nichols with Mr. Weber of Ohio.

Mr. Scheuer with Mr. Hollenbeck.

Mr. Danielson with Mr. Railsback.

Mr. Fary with Mr. McCloskey.

Mr. Moffett with Mr. Pashayan.

Mr. Hoyer with Mr. Siljander.

Mr. Savage with Mr. Derwinski.

Mr. Carney with Mr. Daub.

Mr. Courter with Mr. Frenzel.

Mr. Rinaldo with Mr. Lowery of California.

Mr. SCHUMER changed his vote from "yea" to "nay."

Mr. PRICE changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 4, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

## PERSONAL EXPLANATION

Mr. PEPPER. Mr. Speaker, I unavoidably missed the vote on rollcall 217. If I had been present, I would have voted "aye."

## PERSONAL EXPLANATION

Mr. SAM B. HALL, JR. Mr. Speaker, I would like the RECORD to reflect that I was absent yesterday, and had I been present, I would have voted "yea" on rollcall vote number 215, and I would have voted "nay" on rollcall vote 216.

## PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATIONS BILL, FISCAL YEAR 1982

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on the bill making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies and for other purposes for fiscal year ending September 30, 1982.

Mr. CONTE reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

## REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1805

Mr. BONIOR of Michigan. Mr. Speaker, I ask unanimous consent that my name be removed as cosponsor of H.R. 1805.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

## AUTHORIZING APPROPRIATIONS TO THE NATIONAL SCIENCE FOUNDATION

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolu-

tion 183 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 183

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1520) to authorize appropriations for activities for the National Science Foundation for the fiscal year 1982, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the bill as an original bill for the purpose of amendment, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI, are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. I thank the Speaker.

Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 183 provides for the consideration of H.R. 1520, a bill to authorize appropriations for the activities of the National Science Foundation for the fiscal year, 1982.

The rule provides for one hour of general debate to be equally divided between the chairman and the ranking minority member of the Committee on Science and Technology.

The resolution further makes in order consideration of a committee amendment in the nature of a substitute now printed in the bill as an original bill for purposes of amendment under the 5-minute rule. It waives all points of order against that substitute for failure to comply with the provisions of clause 7, rule XVI (governing germaneness).

It is an open rule allowing any germane amendment to be offered to either the bill or substitute and allows members to demand a separate vote on such amendments adopted in the Committee of the Whole after the Committee has risen and reported the bill to the House.

The rule provides for one motion to recommit, with or without instructions.

H.R. 1520 authorizes $1.16 billion for the activities of the National Science Foundation. Established by the National Science Foundation Act of 1950, its purpose is to promote scientific research that can lead to economic growth and productivity, and improvement of the American quality of life.

This is done through a system of grants, contracts, and other agreements with universities and other research organizations. All awards are made on a competitive basis.

Given the national requisite for improving productivity and economic growth, the mandate of the National Science Foundation is directly complementary to the pursuit of those goals.

To meet this mandate, the committee has recommended restoration of funding for science and engineering education, research equipment and facilities, and social/behavioral studies.

It has also recommended termination of the ocean margin drilling project.

Mr. Speaker, while I understand that there are differences regarding priorities and total funding figures, I know of no opposition to this rule and I urge its adoption.

I yield to the gentleman from Mississippi.

□ 1545

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to the gentleman from Georgia.

Mr. LEVITAS. I would like to inquire of the gentleman from Michigan concerning the waiver of the point of order. In listening to the Clerk read the rule, I heard that there was a waiver of any point of order based, I think, on rule XVI. I wonder if the gentleman can explain to me what the purpose of that waiver is and what its consequences are.

Mr. BONIOR of Michigan. Well, the waiver is of clause 7, rule XVI, or the germaneness rule. It relates to section 9 of the National Science Foundation Authorization Act, 1982, which relates to the establishment of special commissions under the National Science Foundation Act of 1950.

It is a nongermane change of permanent law, and it is to an authorization for 1982.

Mr. LEVITAS. I thank the gentleman for his response.

Mr. BONIOR of Michigan. Mr. Speaker, I reserve the balance of my time.

Mr. LOTT. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, I rise today in support of this rule, which will allow the House to work its will on the National Science Foundation authorization bill. And I might add that this bill needs a lot of work before it leaves this body.

While I favor this resolution and urge its adoption, I cannot support the bill in its present form.

H.R. 1520, which this resolution would make in order, authorizes appropriations totaling $1.16 billion for this agency during fiscal year 1982. This figure represents an increase of over $64 million over the authorization level for fiscal year 1981 and, more significantly, is $127 million more than the amount recommended in the President's budget proposal.

The Committee on Science and Technology, which reported this legislation by a vote of 23 to 17, added $65 million for science and engineering education, $26 million for behavioral and social sciences, and $30 million for research instrumentation and other narrowly focused cross-directorate programs. It will be our responsibility under this rule to decide whether these budget-busting figures should be a priority during this time of necessary fiscal restraint.

This open rule will allow members of the Committee on Science and Technology to offer amendments which will reduce the authorization level to the approximate figure suggested by the administration. After careful consideration of this amendment and attention to the debate, I believe the Members of this House will see the wisdom, at this point in our economic history, of cutting back on some of this bill's well intentioned but low priority expenditures.

Mr. Speaker, I have no request for time and I yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. DYMALLY).

Mr. DYMALLY. Mr. Speaker, I rise in support of this measure. I agree with the gentleman from Mississippi, it does not meet all the requirements, for different reasons, of course. There is not sufficient funds for minorities and women in the bill, but given the circumstances under which we operate, it seems to me the bill addresses some of the critical needs of this country.

Science and technology, in my judgment, are the wave of the future in America and indeed across the world, and given the kind of competition that we face, we ought to be increasing the funds for science and technology. So, I am pleased to join in supporting passage of this measure.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. FUQUA. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1520) to authorize appropriations for activities for the National Science Foundation for the fiscal year 1982.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. FUQUA).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1520, with Mr. ECKART in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida (Mr. FUQUA) will be recognized for 30 minutes, and the gentleman from Kansas (Mr. WINN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, the bill before us, H.R. 1520, provides authorization of appropriations for fiscal year 1982 for the National Science Foundation. The House has already approved the overall appropriations for the Foundation. We are here today to authorize that funding and to determine the distribution of funding among the various programs and activities of the Foundation.

The committee voted earlier this year to recommend a budget level for the Foundation at $192.8 million below the administration's original request and $127.1 million above the revised request. The bill reported and now before us reflects that recommendation, and authorizes funding at $1,160.7 million. This figure was arrived at after much thought and considerable debate. It represents, I believe, a balanced and fair distribution. I would also note that this figure is well within the budget guidelines and the reconciliation levels agreed to by the House.

Mr. Chairman, our committee has been especially concerned this year with the overall health of our basic science and engineering research programs. As you are aware, Federal responsibility for basic R. & D. resides with the National Science Foundation. In looking at the Federal budget overall, we note that the administration is suggesting a $5.6 billion increase in defense R. & D. spending while nondefense R. & D. spending will decrease by $0.4 billion. The Foundation in particular is being asked to sustain an overall decrease of 6 percent in current dollars from its original fiscal year 1981 appropriated level.

The targeted reductions in the economic sciences, the social and behavioral sciences, the innovation and intergovernmental programs, as well as the international cooperation activities, are of major concern to our committee. Understanding the origin and indicators of our current economic dilemma is certainly a subject that warrants as much analysis and research as we can bring to bear. Similarly, the human factors in innovation, productivity, and safety are areas in which we need much more understanding. Blindly destroying our scientific ability in these areas, risks wasting our technological achievements in the physical sciences.

Among the many economies the committee achieved, it also voted to reduce the ocean drilling and antarctic research programs by $12.5 million, reflecting a view that the ocean margin drilling program could be deferred.

Mr. Chairman, I am well aware of the renewed call for maintaining a stringent and austere budget throughout the Federal Government. The bill we have before us, again, is $193 million below that originally requested and represents an increase of less than 6 percent over the amount originally appropriated last year. If we consider an estimated 10-percent inflation, we will actually see a reduction in the Foundation's overall programs. I am not pleased to impose such a limitation; but, I believe, that the current need for budgetary restraint dictates this limitation.

Mr. Chairman, I urge my colleagues to support the committee's recommendation and vote favorably for the bill as reported.

Mr. Chairman, at this time, I would like to yield to the distinguished chairman of the Subcommittee on Science, Research, and Technology, the gentleman from Pennsylvania, (Mr. WALGREN), who has worked very diligently and hard in trying to bring this bill to the floor.

I also want to commend the ranking minority member, Mrs. HECKLER, and the other members of the subcommittee for the fine work that they and the staff have done in order to bring this bill to the floor.

For further elaboration and explanation of the bill, I yield such time as he may consume to the distinguished chairman of the subcommittee, Mr. WALGREN.

Mr. WALGREN. Mr. Chairman, I appreciate the chairman of the full Science and Technology Committee yielding to me.

Both Houses of the Congress, with their appropriation and authorization committees working in close coordination, have worked hard to bring in a reasonable budget for the National Science Foundation. In all cases, we have accepted the administration's view that exceptional budget restraint was needed. On the other hand, all of us have witnessed the critical role that the National Science Foundation plays in the long-run level of investment and economic growth in our society. Scientific progress is the ultimate base of our ability to compete in world markets, to maintain a technical edge in national security and solve threatening global and environmental problems.

The budget we support today strikes a balance among the various priorities that we have all wrestled with. But it differs from the administration proposal in some important respects. Most importantly, it maintains a modest but significant effort by the National Science Foundation in science and engineering education. Both minority and majority have sensed that it was a serious mistake by OMB and the administration to propose economies that eat away at our technological "seed corn" through the elimination of our effort with science and engineering education.

I understand an amendment will be proposed to revise the committee proposal by holding to the OMB total, but still restoring some effort in science and engineering education. I welcome the realization that the administration made a serious mistake in eliminating the educational activity in the first place. But the problem is we can only hold to that original OMB course by robbing other programs meeting extremely serious needs, needs which were realized by OMB and the administration in the first place.

So, it comes down to a situation where you cannot have it both ways. I trust that our colleagues will realize that we have struck a reasonable balance in trying to foster some effort in essential efforts of the National Science Foundation which can make a great investment and contribution to our future.

I appreciate the privilege of chairing the subcommittee on Science, Research, and Technology and the opportunity to work with the chairman of the full committee in bringing this authorization to the floor. I yield back the balance of my time.

□ 1545

Mr. WINN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is really gratifying to speak to this legislation, the fiscal year 1982 authorization for the National Science Foundation. It has not been that long ago that I was accused of destroying the Foundation because

the authorization was not included in the reconciliation bill. At that time, I stated that that was not true, but it was to no avail. I am happy to report that the Foundation is alive and well today and that this legislation will authorize in excess of $1 billion for fiscal year 1982.

As a member of the Science and Technology Committee for the past 14 years, I have grown to appreciate the great promise that these programs hold for the future of our country. The basic research and educational programs which NSF supports are primary contributors to maintaining the health and vitality of the scientific and technological enterprise. As a consequence, I have been and continue to be a strong supporter of the National Science Foundation.

Unfortunately, though, there seems to be an erroneous principle which implies that the only way you can support the Foundation is if you add more money into the budget. I cannot accept this principle. The minority members of the Science and Technology Committee have been very dedicated to supporting the President's economics package and will oppose any bill which is in excess of the President's request. This legislation falls into that category. H.R. 1520 authorizes $1.161 billion, which is $127 million above the Reagan budget. This increase was opposed by the minority in the committee and at the appropriate time my colleague, Mr. WEBER, will offer an amendment which will bring it back down to the Reagan budget level of $1.034 billion.

Since the President's budget request was submitted, I have received innumerable letters stating that the administration was being unfair to NSF and obviously had something against their programs. Then, the logic followed that anyone that supported his budget was in the same category.

I feel compelled to remind people that we are facing a national crisis. If Federal spending is not brought under control, we won't have to worry about NSF support of the universities because there won't be any universities.

In spite of the serious economic problems we face, the administration has looked favorably upon NSF when compared with other agencies. For example, when compared to 1981, the Department of Commerce was reduced by 12 percent; Education by 9 percent; HUD by 12 percent; Interior and Labor by 13 percent; and EPA by a whopping 53 percent. But the National Science Foundation budget, as requested by the President, is approximately 1 percent above the fiscal year 1981 appropriation. Some people will say that a 1 percent increase is rather meager. Under most circumstances, I would agree; but when we are fighting for the very survival of the Nation, it seems pretty generous.

This bill, as currently presented, is 14 percent above the fiscal year 1981 appropriation. This growth is unrealistic, especially in light of the further cuts that will be required to keep the deficit under control.

In closing, let me congratulate and thank the chairman, Mr. FUQUA, and Mr. WALGREN for their cooperation in bringing this legislation to the floor. Obviously, we are in disagreement, but it has always been handled in a fair and equitable fashion.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WINN. I am glad to yield to the gentleman from Pennsylvania (Mr. WALKER), a member of the committee.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

I just want to congratulate the gentleman on what I think is a very moderate and very significant statement, because he makes the point quite clearly that many of us who favor a reduction in the spending level of this bill back to the President's budget request do feel strongly that the work of the NSF is extremely important, and I feel strongly that it is an agency that deserves to be continued.

The gentleman also makes the point, and, I think, rather meaningfully, that we are really talking about spending over $1 billion for NSF even if the Weber amendment is adopted to cut $127 million out.

Mr. WINN. Mr. Chairman, the gentleman from Pennsylvania (Mr. WALKER) is exactly correct. If we adopt the Weber amendment, we are still spending $1.033 billion; which is still a healthy budget.

Mr. WALKER. Mr. Chairman, I think that is an important point.

I would say finally that I think the gentleman, at the beginning of his statement, keyed on an important point as well. There were an awful lot of baseless charges when we considered the budget legislation here on the floor. One of those baseless charges was that somehow we were doing in the NSF with that action. The gentleman made the point on the floor—and a number of others did also at that time—that we were going to bring the NSF bill to the floor under the regular procedures of this House. That is precisely what is being done today, and it does assure the survivability of NSF under the appropriate process.

Mr. Chairman, I think the gentleman's statement was an excellent one, and again I thank him for yielding.

Mr. WINN. Mr. Chairman, I thank the gentleman from Pennsylvania (Mr. WALKER) for those comments.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. WINN. I am glad to yield to the chairman of the committee.

Mr. FUQUA. Mr. Chairman, I appreciate the gentleman's yielding.

I do want to say for the record, make no mistake about it, that the gentleman from Kansas (Mr. WINN) has always been a very loyal and vigorous supporter of the National Science Foundation, and at no time have I ever been aware that he has made any effort to do anything but support in every way possible the National Science Foundation. I want to thank the gentleman for the fine work he has done in helping bring this bill to the floor.

Mr. WINN. Mr. Chairman, I thank the gentleman from Florida (Mr. FUQUA) for his kind remarks, and I want to add that this would be an easy time for me to say to some of those Members on the other side of the aisle, "See, I told you so," that we would be having an NSF authorization bill coming up. But I am sure they did not want to hear those remarks at the time we were discussing the issue. We have the bill here before us.

I think those Members who want to do everything they can to bring the budget back to a realistic figure without cutting the NSF can support the Weber amendment that will be offered shortly. My contention is that we can live very well within this amendment.

For some reason or another, NSF and some of the scientific community have gotten the word around that the President has something against them and against their actions. There is nothing in these figures that will show that. If anybody will closely study the figures, he will see that it is just a matter of priority and a matter of opinion on where moneys should be spent and how much money should be spent.

The CHAIRMAN. The gentleman from Kansas (Mr. WINN) has consumed 9 minutes.

Mr. WINN. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. Mr. Chairman, during the appropriate time of the amending process I will offer an amendment to this bill to reduce it by $127 million down to the administration's request. While I cannot support the amount authorized by the Science and Technology Committee, I did want to take this time as the ranking member during general debate to express my support for the National Science Foundation and for the fine work of the Foundation.

I also wish to express my thanks and support for the work of our committee chairman, the gentleman from Florida (Mr. FUQUA), and our subcommittee chairman, the gentleman from Pennsylvania (Mr. WALGREN). Working with these gentlemen on the subcommittee and the committee has been a real pleasure for me, and their dedication to the National Science Foundation is

without question, even though we disagree on the impact of this particular cut.

Mr. Chairman, throughout the appropriation and authorization process, both the gentleman from Kansas (Mr. WINN) and myself have been attempting to lower the funding for the National Science Foundation to the level proposed by the Reagan administration. We feel that this is not an unfair level and that the Foundation will be able to function quite adequately with well over $1 billion and an increase of $11 million over the appropriated amount from fiscal year 1981.

I want to make it clear that these efforts reflect my strong belief that a reduction in Government spending is a fundamental part of our efforts to restore some vitality to the Nation's economy. These attempts to hold the budget to a lower level than the Science Committee originally authorized should not be interpreted as an anti-science attitude. The National Science Foundation does important work in supporting our national science and technology base. This is reflected in the administration's budget request for the Foundation. NSF was one of the few agencies in the Federal Government that was actually proposed to receive a small increase rather than the rather large cuts that many other agencies suffered.

Based on the extensive hearings that our subcommittee and full committee held on the Foundation's authorization request, I do not believe that NSF will suffer greatly at the authorization level recommended by the administration. I reject the idea that this level of spending is a false economy. I reject the idea that any vital programs of the Foundation will be irreparably harmed. I am confident that this Congress will continue to support the work of the National Science Foundation, as I do. At the same time we cannot ignore the fact that the Foundation's budget is only part of the much larger Federal budget and that to reduce Federal expenditures to a responsible level we must of necessity impose some limitations on the growth of all agencies' budgets.

● Mr. MOFFETT. Mr. Chairman, the Reagan administration's proposals for severe cuts in the 1982 budget of the National Science Foundation (NSF) will greatly accelerate the decline of basic research in both the hard sciences and the social sciences of the Nation. The Reagan budget slashes funding that is critical across a wide range of programs—from desperately needed upgrading of scientific measuring instruments to maintenance of university administered computer information systems that are used constantly by Government agencies. Some programs have been eliminated entirely, while others are cut by 30–75 percent. These are short-term savings which will cost hundreds of times as much in the long run, as our scientific base of research and knowledge declines.

1. IMPACT OF BUDGET CUTS ON BASIC RESEARCH IN HARD SCIENCES

Before examining the Reagan cuts in detail, I want to note how the U.S. has fallen behind other nations with regard to research and development, training of scientists and engineers, and basic research, over the past fifteen years. Between 1968 and 1978, the U.S. commitment to R. & D., as a percent of the Federal budget, declined by 34 percent. Basic research funds, during the same period, fell by 20 percent. As a percent of GNP, R. & D. funds declined by 20 percent; basic research by 24 percent.

By contrast, consider what our competitors accomplished. For the 1968–78 period, R. & D. as a percent of GNP increased as follows:

[In percent]

| | |
|---|---|
| (1) Soviet Union | +15 |
| (2) West Germany | +16 |
| (3) Japan | +20 |

Similar declines have occurred with regard to U.S. training of scientists and engineers. During 1968–78, the ratio of scientists and engineers in research and development to the labor force fell by 13 percent in the United States. By contrast, it rose dramatically in the cases of our competitors:

[In percent]

| | |
|---|---|
| (1) Soviet Union | +55 |
| (2) West Germany | +59 |
| (3) Japan | +62 |

Our performance has been particularly dismal when compared to Japan. Between 1963 and 1977, Japan trained as many engineers as did the United States, although Japan has only roughly one-half the U.S. population. During 1963–77, in Japan, 20 percent of the college degrees awarded were in engineering, and 40 percent of the master degrees. In the United States, the figure for both types of degrees for the same period was 5 percent.

In Japan, moreover, engineers are considerably more integrated into the decisionmaking sectors of the society than in the United States. For example, only one-half of the engineers in Japan actually enter engineering professions. The other half become civil servants or industrial managers. Indeed, one-half of the Japanese civil servants have engineering degrees.

Given these statistics, it is hardly surprising that between 1963–77, Japan doubled its share of world trade, while the U.S. share declined by 25 percent. Moreover, the Japanese Government and industry leaders have made the decision to beat the United States in the computer and computer-related fields by the end of this century. They are investing far more heavily in quality control, and research and development than are comparable U.S. industries. One comparison of U.S.-made computer chips with Japanese chips found that the U.S. chips failed at a rate 900 percent higher than the Japanese ones. Although the United States still has the lead in the computer chip industry, one need only look at stereos, radios, cameras, and televisions to appreciate how quickly a lead can evaporate resulting in nonexistent or ailing industries.

The response of the Reagan administration to this crisis in our knowledge and technological base has been to either obliterate or substantially dismantle key research and education efforts. For example, one of the most important areas in which the United States must make a major effort is to improve scientific instrumentation—the quality of measuring instruments in university research laboratories across the Nation. Without high quality instruments, advances in scientific research become impossible. The Reagan NSF budget cuts entirely the $75 million which was to start rebuilding the instrumentation facilities at major universities. Yet a recent major study of the research facility needs of universities, undertaken by the Association of American Universities (AAU), found that over the next 3 years, $765 million would be required just "to sustain the current level of activity" in research. This means maintenance and replacement of excessively aged research equipment. Without this $765 million, research at major university labs will deteriorate in quality and innovativeness even further.

Federal support for upgrading of research and development facilities has been declining for more than a decade. Indeed, Federal support has only gone to certain major national facilities for the past decade, and even then in inadequate amounts. In 1965, Federal grants for research and development plant peaked at about $120 million a year. In 1979, this had fallen to roughly $35 million. The result has been that an increasing amount of the instrumentation and other equipment at major research universities has become antiquated: In the 15 major research universities, the average age of instrumentation is more than double that found in industry labs.

There is a general consensus in the scientific community that the decline in the quality of instrumentation is a major obstacle to further research advances. A botanist at the University of Maryland stated:

> More and more of our faculty have had to turn away from the cutting edge of science in the last 10 years due to the unavailability of chromatographic equipment, spectrometers and computerized equipment of various kinds. This lack of equipment, labor and even routine supplies of all kinds has forced a number of our faculty into descriptive biology of the 1920s caliber. Our ability to do

research at even the 1960 level diminishes each year due to the lack of funds for modernization.

If we were to meet the minimum projected needs of our major universities over the next 3 years, the $765 million figure, that would still only be equal to what we currently spend on the Pentagon every 36 hours. Yet for that 36 hours' worth of defense spending we could at least keep these universities at their present levels. Without it, we seriously jeopardize our scientific knowledge base.

2. IMPACT OF BUDGET CUTS ON BEHAVIORAL AND SOCIAL SCIENCE RESEARCH

In addition to the cuts in instrumentation and other facilities, the Reagan NSF proposals will severely impact the social sciences, humanities and behavioral sciences. Some budgets will be eliminated, while others are cut as much as 75 percent. This despite the fact that the NSF is the only major source of funds for basic research today, in the Government, in many of these fields.

The Reagan plan cuts the budget for the Biological, Behavioral, and Social Sciences Directorate of NSF by over $26 million, to $172 million. Even at the $198 million envisioned in the Carter 1982 budget, this was a 10-percent cut in the funds for BBS. If the Reagan proposals are confirmed, the BBS directorate will suffer a 27-percent decrease in funds, when inflation is taken into account, in just 1 year.

These moneys fund a vast variety of projects, many of which have had a direct impact on American life. For example, BBS moneys helped Nobelprize winner Dr. Lawrence Klein to develop statistical models which are now used at all levels of government, in banking, and in international agencies. We are not talking about millions of dollars going to study the lives of monks in selected Italian monasteries during the Middle Ages.

A comparison of the Carter and Reagan Social Sciences Division budgets will show how deep the Reagan cuts are:

SOCIAL SCIENCES DIVISION BUDGET

[In thousands of dollars]

| | Carter | Reagan |
|---|---|---|
| Economics | 14,000 | 3,700 |
| Geography | 1,800 | 450 |
| Sociology | 4,800 | 1,200 |
| Measurements, methods, and data resources | 7,000 | 1,800 |
| History and philosophy of science | 1,900 | 500 |
| Political science | 4,300 | 1,000 |
| Law | 1,500 | 400 |
| Regulation and policy analysis | 4,000 | 1,000 |
| Decision and management science | 800 | 0 |

These kinds of cuts seriously threaten some of the most important computer information banks in the country which are used constantly by such Government agencies as OMB. Large portions of the budgets of the National Bureau of Economic Research (NBER), the National Opinion Research Center (NORC), and the Institute for Social Research (ISR) come from NSF.

According to Harvard Statistician Frederick Mosteller, one of the leading scholars in his field, the Reagan cuts will destroy one-quarter to one-half of the basic research being done in social science in the United States. For example, the ISR maintains and updates the most complete set of data on the voting patterns and attitudes of Americans in existence. Half of its annual $15 million budget comes from NSF.

President Reagan's personal pollster, Richard Wirthlin, often utilizes the computer files at ISR. Similarly, the NBER receives about one-third of its budget from NSF. NBER is the official monitor of the economy, and decides when we are entering a recession. Its analyses are accepted throughout the economic and financial community.

Ironically, the architects of the Reagan cuts at OMB had to go to ISR for information on income trajectories, in order to evalute its own budget projections. OMB also uses ISR data for presentations on social trends for White House officials. ISR has been tracking more than 5,000 American families for the past 14 years, keeping a record of their economic behavior. It is the most extensive longitudinal study of its kind in the world. Yet it may come to an end, as a result of the 75 percent cut in the Social Sciences Division. Experts estimate that it would cost at least $10 million just to start it again, once cut off.

These are just a few of the thousands of vital research projects which will either be totally eliminated, or seriously impaired, by the President's NSF budget.

SUMMARY

The United States cannot expect to adequately compete in today's world, unless it is willing to match the commitment to research and development, basic research and education that our rivals make. We cannot understand the changes affecting our society unless we collect data on them. For every dollar that we save now in the NSF budget, there will be a cost of hundreds, perhaps thousands, in the future. Three hundred million dollars—the amount cut by the Reagan administration—is only one two-thousandth of the Federal budget, and barely one six-thousandth of the GNP. Yet we are far more concerned about protecting the subsidies for peanuts and sugar than about the scientific, economic and educational future of the Nation. This is not merely an unwise method by which to save money, it is a dangerous one which surely will affect adversely many future generations of Americans.●

● Mr. MARKEY. Mr. Chairman, one of our Nation's most important and valuable resources is its extraordinary ability to advance its capabilities and knowledge in science and technology for the benefit of the American people and those of the whole world. This growth is only made possible by the dedicated research and study of many different groups of specialists. In order to conduct essential research, many of these scientific and technological specialists need the support of funding from the National Science Foundation. Some have criticized the distribution of these funds. The decisions as to who should receive Government backing, and for what purpose, are constantly under attack. Although I believe that it is necessary to keep such funding under close scrutiny, I also believe that many of the judgments passed on these programs' merits are unfounded.

Unfortunately, misconceptions are created when the projects being funded by the National Science Foundation reveal their findings. The misconception is created because the research's true purpose and value is not seen, and sometimes not appreciated, for long periods of time. For example, the scientific research by Dr. Enders of Harvard University in the 1930's, involving the study of virus growth in monkey kidneys, was initially not considered significant to the welfare or benefit of the American people. Twenty years later, however, it was Dr. Enders' research that played a major role in the development of the polio vaccine.

The history of science is filled with unseen and unrecognized payoffs. The study of bread mold behavior led to the development of the practical uses of penicillin and the study of bats' ability to fly in dark caves led to the development of radar. There are countless examples that would further illustrate this.

Too often scientific jargon hides the project's true purpose and confuses the public's understanding of the research's merits. The fact remains, however, that the National Science Foundation needs the funds necessary to support the further advancement of scientific and technological studies. The value of the research should not be underestimated. Had such an attitude been taken in the past, our Nation would be vastly lacking in the knowledge we now utilize to maintain our relatively high standard of living. As a Representative from a State which contains several major scientific and technological institutions, such as Tufts, Harvard, and MIT, I have a particular appreciation for the potential detrimental effects on these institutions that would result from a lack of funds.

I advocate full funding for the National Science Foundation. Our support is greatly needed in order for the Foundation to operate proficiently. Its ability to sponsor special research

projects has substantial effects on our economy, our society, and our national security. Support for basic scientific research must continue to be a national priority.●

● Mr. GOLDWATER. Mr. Chairman, as a firm supporter of American scientific and technological strength, I have long supported adequate funding for science and engineering research. After carefully reviewing expert testimony, I worked with other science and technology committee members to propose NSF funding levels that would strengthen our science and engineering research departments and yet remain consistent with the administration's requests. That $1.0336 billion proposal reflects a funding emphasis in those NSF programs deemed high priority; namely, cross directorate programs and the science and engineering education programs. The science and technology, committee is particularly concerned over the lack of proper research equipment and the need to encourage students in science and technology related careers.

The current bill, however, is more than $127 million over what many of us on the science and technology committee felt was reasonable. We are faced with a faltering economy, largely due to excessive Federal spending, which the current administration is trying to correct. President Reagan has been direct with the public in his aims and firm with the Congress in his purpose. I am a dedicated supporter of many of the administration's policies, and I therefore cannot support the present funding levels which are contained in this legislation.

Mr. Chairman, none of our choices are easy, and my vote should not be unjustly construed as an anti-science vote, but if we are to support the mandate of the American people in support of a strong economy, we must make those hard choices.●

● Mr. BIAGGI. Mr. Chairman, I rise in support of this legislation before us, H.R. 1520, legislation to extend for 1 year the authorization for the National Science Foundation. This bill, which provides for $1 billion for activities of the NSF, is critical to our scientific and technological research conducted across this Nation. These funds will provide for ongoing research in the areas of physical sciences, engineering, as well as biological and behavioral sciences, which depend on these funds to carry out work in the national interest.

My strong support for the work of the National Science Foundation is underscored by the importance of its funds to my own city of New York. Albert Einstein College of Medicine, one of the premier health care and health research facilities in this Nation, depends heavily upon NSF funds to augment its own research efforts. Currently, the NSF funds 17 critical research projects at Einstein totaling $1 million dollars. Continued funding of these efforts, in the areas of anatomy, genetics, biochemistry, cell biology, pediatrics, pharmacology, and physiology, is essential in order to continue this work.

Scientific and technological research in this Nation have given us stunning examples of what the human mind can produce given the proper tools: our space program, our vast telecommunications system, our success in treating cancer patients and those with other diseases that were at one time always fatal, as well as our national defense, which is second to none in the world in its capability and technology.

I urge my colleagues to join me in support of this legislation so that our dreams of today can be made into reality tomorrow through strong support of scientific research and the work of the National Science Foundation.●

● Mr. DYMALLY. Mr. Chairman, I rise in strong support of the well-reasoned committee request for National Science Foundation funding which we have before us today. My colleagues on the committee have carefully balanced the needs for budget restraint this year with the very real need to maintain the technological vitality of this country and its people. An investment in that vitality is largely an investment in the future of our Nation, not a current expenditure of the kind we are all trying hard to limit.

Why should we support the long-range health of science and the scientific and technical skills of our people? It is for the same reason that we all work hard to send our children to school and college: We hope that the fruits of knowledge and the inventiveness of trained minds will help us solve some of the age-old problems of hunger, disease, poverty, and environmental stress that have so long plagued human life. Our support for science, and training in its skills, is another expression of that faith in the capacity of the human mind.

In every aspect of my work I try to reaffirm that faith. Human resources are our greatest and most important resource and we must strengthen them. I especially value the efforts the Science Foundation is making to insure that all of our people have access to science and technical training. The fruits and power of science should be available to minorities, blacks, Hispanics, and the American Indian, just as they are to any other element of society. Women belong in the science and engineering talent pool just as do men. Our society needs all the science and technology skill we can possibly muster; we cannot afford to allow an exclusion of so many talented individuals from our roster of scientists and engineers.

The committee bill maintains the strength of important initiatives to strengthen the role of minorities and women in science and engineering. I wish it did more, but I cannot support any attempts to cut back on these efforts. I commend our chairmen, DON FUQUA, and DOUG WALGREN, and ranking minority member, MARGARET HECKLER, who have worked hard with me on these initiatives. They have my full support on the committee bill.●

● Mr. SHAMANSKY. Mr. Chairman, I would like to voice my strong support for the National Science Foundation authorization under consideration. American developments in science and technology have been central to the strength of our Nation. Our scientific advances have increased productivity, created new products and markets, and improved the health and knowledge of our citizens and countless people around the world.

Today we are in danger of losing our advantage in the areas of science and technology. In Japan there are 400 engineers and scientists per 10,000 people, compared to 70 per 10,000 in this country. Our education programs in science and engineering are more important than perhaps ever before. Therefore, I am particularly happy to see that the NSF authorization under consideration includes a reasonable authorization for science and engineering education.

We in Congress must have vision; we must not forget the future when we wrestle with the problems of the present. Our economic future and national strength require a firm commitment to science and the benefits it has and will continue to provide.●

Mr. WINN. Mr. Chairman, I have no further requests for time.

Mr. FUQUA. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant the rule, the Clerk will now read the substitute committee amendment recommended by the Committee on Science and Technology now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 1520

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "National Science Foundation Authorization Act for Fiscal Year 1982".

SEC. 2. There are authorized to be appropriated to the National Science Foundation, for the fiscal year 1982, the sums indicated for the following categories:

(1) Mathematical and Physical Sciences, $295,400,000.

(2) Engineering, $102,600,000.

(3) Biological, Behavioral, and Social Sciences, $198,100,000.

(4) Astronomical, Atmospheric, Earth and Ocean Sciences, $253,200,000.

(5) Ocean Drilling Programs, $14,000,000.

(6) Antarctic Research programs, $69,600,000.

(7) Scientific, Technological, and International Affairs, $56,400,000.

(8) Cross-Directorate Programs, $13,200,000.

(9) Program Development and Management, $63,200,000.

(10) Science and Engineering Education, $75,000,000.

SEC. 3. Appropriations made under authority provided in sections 2, 4, and 7 shall remain available for obligation, for expenditure, or for obligation and expenditure for periods specified in the Acts making the appropriations.

SEC. 4. Besides the sums authorized in sections 2 and 7, there are authorized to be appropriated to the National Science Foundation, $16,500,000 for the fiscal year 1982 for a special program for modernization of research equipment and facilities.

SEC. 5. If the total amount of appropriations made by any Act for program activities included in section 2 and section 4 for the fiscal year 1982 is less than the total amount authorized to be appropriated for those activities by section 2 and section 4, the amount available from such appropriations for any particular program activity shall bear the same ratio to the amount authorized to be appropriated for that activity by section 2 and section 4 as the total amount of the appropriations made by such appropriation Act for all included program activities bears to the total amount authorized to be appropriated for those activities by section 2 and section 4, except to the extent specifically otherwise provided in the text of the Act making the appropriations for the program activities involved.

SEC. 6. From appropriations made under this Act, not more than $5,000 for fiscal year 1982 may be used for official consultation, representation, or other extraordinary expenses at the discretion of the Director of the National Science Foundation. His determination will be final and conclusive upon the accounting officers of the Government.

SEC. 7. Besides the sums authorized by sections 2 and 4, not more than $3,500,000 for fiscal year 1982 are authorized to be appropriated for expenses of the National Science Foundation incurred outside the United States, to be drawn from foreign currencies that the Treasury Department determines to be excess to the normal requirements of the United States.

SEC. 8. Funds may be transferred among the categories listed in section 2, so long as the net funds transferred to or from any category do not exceed 10 per centum of the amount authorized for that category in section 2. The Director of the Foundation may propose transfers to or from any category exceeding 10 per centum of the amounts authorized for that category in section 2. An explanation of any such proposed transfer must be transmitted in writing to the Speaker of the House, the President of the Senate, the Senate Committee on Labor and Human Resources, and the House Committee on Science and Technology. The proposed transfer may be made only when—

(1) thirty calendar days have passed after submission of the written proposal, or

(2) the chairman of the House Committee on Science and Technology and the chairman of the Senate Committee on Labor and Human Resources have each written the Director to the effect that the respective commitee has no objection to the proposed transfer.

SEC. 9. (a) The text of section 9 of the National Science Foundation Act of 1950 is amended to read as follows:

"(a) Each special commission established under section 4(h) shall be appointed by the Board and shall consist of such members as the Board considers appropriate.

"(b) Special commissions may be established to study and make recommendations to the Foundation on issues relating to research and education in science and engineering.".

(b) Section 6 of Public Law 95-99, the National Science Foundation Authorization Act, fiscal year 1978, is deleted.

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. WEBER OF MINNESOTA

Mr. WEBER of Minnesota. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEBER of Minnesota: On page 4, line 24, strike "$295,400,000", and insert in lieu thereof "$257,100,000".

On page 5, line 2, strike "$198,100,000", and insert in lieu thereof "$152,300,000".

On page 5, line 8, strike "$56,400,000", and insert in lieu thereof "$37,700,000".

On page 5, line 9, strike "$13,200,000", and insert in lieu thereof "$000,000,000".

On page 5, line 13, strike "$75,000,000", and insert in lieu thereof "$59,900,000".

On page 5, line 20, strike "$16,500,000", and insert in lieu thereof "$20,000,000".

Mr. WEBER of Minnesota (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. WEBER of Minnesota. Mr. Chairman, this amendment I am offering will establish a fiscal year 1982 authorization level for the National Science Foundation in line with the President's March request. That total is $1,033,600,000. The bill that the Science and Technology Committee reported out is $127 million over the President's request. Clearly, this type of excessive spending is inappropriate when we are all trying to reduce Federal expenditures and produce a fiscally responsible budget.

This amendment is not just a rubberstamp of the administration's request. Substantial reallocations have been made among the various directorates while maintaining the integrity of the Foundation's programs. One of the areas of budget concern where money is added substantially above the administration's request is science and engineering education. I am certain that many Members have heard from constituent groups on cuts in this area. Testimony before our committee has indicated the importance of both undergraduate and graduate programs to our Nation. The original request was for only $9.9 million. My amendment would increase that figure to $59.9 million.

My amendment also adds $20 million into cross directorate programs to be used for instrumentation. The funds designated for instrumentation address a problem that has existed since the midseventies. Equipment in universities has not kept pace with state of the art or new technological changes, the result being that the median age of university equipment is about double that of industry. From our extensive subcommittee hearings it became apparent that $20 million was a minimum funding level for what some experts estimate to be a $2 to $4 billion problem.

Obviously, to keep the budget within the request, funds had to be taken from some other areas. The major reductions are in the mathematical and physical sciences directorate, which remains at its fiscal year 1981 level, and the biological, behavioral, and social sciences directorate. Within the biological, behavioral and social sciences directorate it is my intent by this amendment to protect the biological programs to the extent possible—as reflected in the administration's request.

Mr. Chairman, I want to take a minute to discuss the appropriations aspect of the National Science Foundation. I am certain that in the debate over this amendment we will hear the opponents toss about appropriations figures for this or that program, claiming that our authorization figures are irrelevant or out of phase with what the House has agreed on in the appropriations bill for the National Science Foundation. This is simply not the case. The other body has yet to agree to the appropriations conference report and, as we all know, there is a strong possibility of a veto of that appropriations bill in any case. However, our Science Committee has conducted thorough hearings on the National Science Foundation request during the authorization process. With the adjustments proposed by this amendment I am confident we will have a responsible authorization bill to set policy for the Foundation.

I am certain, Mr. Chairman, that the Science Foundation would like the larger budget figure as reported in this bill. That should surprise no one. But, I am equally as certain that our hearing produced no evidence to show that the President's request for the National Science Foundation was not a workable level. As much as I support the Foundation's scientific endeavors, I feel we must support the President's economic package. This still provides

the National Science Foundation with an increase over last year's appropriation. The only path to national economic recovery is support of a comprehensive plan to restrain Federal spending. Adopting this amendment will provide some of that needed restraint without harming vital programs.

□ 1600

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I am happy to yield to my colleague, the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. I thank the gentleman for yielding. I just wanted to thank the gentleman for his statement and indicate I certainly am going to support the gentleman's amendment. I think the points the gentleman made at the end are clear reason for this House to support the gentleman's amendment.

We know that the President is going to go on television tomorrow night asking for additional budget cuts.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. WEBER) has expired.

(At the request of Mr. WALKER and by unanimous consent Mr. WEBER of Minnesota was allowed to proceed for 2 additional minutes.)

Mr. WALKER. If the gentleman will continue to yield, as I understand it, all the gentleman is trying to do is keep the level of spending as authorized by this House in concert with what the President put forth in a budget in March. So really what the gentleman is asking this House to do is to live up to our obligation to try to move forward a balanced budget by keeping our budgets in line with the President's March request.

I think this is a very worthwhile amendment. I think it goes precisely in the direction we need for the economic recovery of this country, and I congratulate the gentleman for offering it.

Mr. WEBER of Minnesota. I thank the gentleman for his comments and for his work on the committee. Of course the gentleman is exactly correct. This has been the level of funding that the President called for many, many months ago.

Again, as the gentleman pointed out, this still represents an increase over last year's funding, but it is, indeed, a good test of this Congress' ability to cut the budget and impose budgetary restraint without hurting people who are truly in need.

Mr. WINN. Mr. Chairman, will the gentleman yield?

Mr. WEBER of Minnesota. I am happy to yield to the distinguished ranking member from Kansas (Mr. WINN).

Mr. WINN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the gentleman's amendment. In my opinion, this amendment, which brings the NSF budget back to the Reagan level, is a very constructive and realistic approach. The total budget is the same as the administration's, but the distribution of those funds has been substantially changed to comply with the Congress priority. For example, science and engineering education has been an area that has been in need of support for some time. The Weber amendment will provide nearly $60 million for that area as compared to $10 million in the President's request.

Mr. Chairman, let me say that there is nothing that I would enjoy more than providing a sizable, real growth for our science programs. But quite frankly, there just is not enough money to go around. We are going to be forced to make some hard decisions which will, in the short term, be painful. But if we do not make those decisions, we will die a slow and lingering death. There are far more meritorious programs available than we have money. I do not believe that it is wise for this body, in light of the additional budget reductions, to pass an authorization bill which is over the original request.

Therefore, I support the amendment and encourage my colleagues to do likewise.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

(At the request of Mr. WINN and by unanimous consent Mr. WEBER of Minnesota was allowed to proceed for 2 additional minutes.)

Mr. WINN. If the gentleman will continue to yield, I would commend the gentleman from Minnesota (Mr. WEBER) for his outstanding work.

Mr. WEBER of Minnesota. I thank the distinguished ranking member of the committee for his support of the amendment.

Mr. DUNN. Mr Chairman, will the gentleman yield for a question?

Mr. WEBER of Minnesota. I yield to the gentleman from Michigan (Mr. DUNN).

Mr. DUNN. The gentleman and I have served together on the committees and I would ask the gentleman a question. Would the gentleman agree with the statement that the main direction the committee as a whole is trying to take Government spending as it pertains to the science and technology area into the areas of far-out, advanced research? Would the gentleman agree that was the main bend of the committee rather than doing near-term research? Would the gentleman agree with me?

Mr. WEBER of Minnesota. I think the gentleman is correct. The thrust of the Reagan administration policy with regard to scientific funding generally, and this goes to the DOE budget as well, is to subsidize longer term research.

Mr. DUNN. Would the gentleman also not agree that one of the things we talked about and were in agreement in the committee is that there is a bigger role for universities to play in that kind of research and that we should perhaps take some of this research out of the hands of bureaucrats? Would the gentleman agree with that?

Mr. WEBER of Minnesota. I would certainly agree with the gentleman, primarily because of constraints because of tremendous inflation.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

(By unanimous consent Mr. WEBER of Minnesota was allowed to proceed for 2 additional minutes.)

Mr. WEBER of Minnesota. The gentleman points out a very serious problem which is simply the lack of available research funding.

I would point out, though, since my friend has asked me about it, that the major reason why we have seen a dropoff in both private and public support for research has been the inflationary economy we have lived in for the last many years. Of course, the general thrust of the Reagan economic program, which my friend has been a supporter of, is to try and control that inflation. Once we have done that, we will help solve a variety of problems, including the inability of both private industry and the public sector to find research funds.

Mr. DUNN. The gentleman is correct, I have been a supporter of the Reagan program. But, still, in terms of this bill in front of us, I wonder, with the limited dollars we have available, if this is not a real good use of the funds, particularly in the university community, to stimulate that turnaround in the economy. There are so many things there in the committee that I feel very strongly we voted for that should not have been in, and there is enough play. The numbers we are asking for do not seem to be that far over the total Reagan package that it is not a good idea and, therefore, respectfully I rise in opposition to the gentleman's amendment.

Mr. WEBER of Minnesota. I thank my friend for his comments and, as always, the gentleman is a strong proponent of NSF funding and makes a good argument. Frankly, I guess we would have to respectfully differ. A lot of people come to me, as I am sure to all of us, and say, "This is a good program, do you not agree," and absolutely I have to agree. Many of the programs in the NSF are good programs. But we reach a point, as you as a private businessman I am sure know, where you cannot fund all of the good

programs, and that may be the case with the Federal Government today.

Mr. DUNN. I appreciate the gentleman saying that and I thank him.

Mr. WALGREN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to say at the outset that we all have tried to strike the right balances in this legislation. I think that the contribution of the gentleman from Minnesota (Mr. WEBER) has been one of the most constructive, conscientious efforts that I have seen in any of the several committees I have served on. I do think this is a question of hard choices, as the gentleman from Kansas (Mr. WINN) points out.

I think it is important to realize that we are not funding everything that we might possibly desire. The Carter administration came in with a funding request for fiscal year 1982 that was 23 percent above the funding level for fiscal year 1981. We reduced that funding increase to something in the range of 5 percent.

□ 1610

So we are trying to make those hard choices and strike the balances that any reasonable person, I think, would make.

Where I cannot join my friend, the gentleman from Minnesota, is in the assumption that we should accept the overall figure originally submitted by the administration for the NSF budget. Our hearings revealed that the figure allotted to NSF was arbitrary and unreasonable to say the least.

It turns out that the overall figure developed by OMB—and I would bet my bottom dollar that President Reagan never saw this figure in its entirety or any of its constituent parts before it was delivered by OMB. Sadly, the overall figure was determined without consultation beyond OMB. It was arrived at without consultation, even, with the head of the President's transition team for the National Science Foundation, Dr. Fletcher from the University of Pittsburgh. It was arrived at without consultation with any of the National Science Foundation's board. And it was arrived at without consultation with the Director of the National Science Foundation. Rather this figure we are asked to accept without question was delivered to the National Science Foundation with literally 24 hours for the Director to respond.

OMB was terribly arbitrary in its elimination of educational programs, international efforts and programs for women and minorities. How limited a view went into the development of that number.

The problem we now face is that you cannot take an unreasonable ceiling and make reasonable allocations to all the programs included within it. You have to take critical support away from areas that even the administration truly supports. That is the problem with the reductions in the math and in the behavioral sciences that the gentleman from Minnesota is forced to recommend if we are to reasonably treat the other objectives of National Science Foundation programs.

So I feel that we do have balance on our side. Although I recognize the reasonableness with which the gentleman has approached this, it seems to me that it is a better balance that we have struck in the committee's program.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. WALGREN. I yield to the gentleman from Minnesota.

Mr. WEBER of Minnesota. I appreciate the gentleman's interest in the National Science Foundation.

I would just like to verify one point on which we do, obviously, have some disagreement on the level of funding. But the reduction that I have proposed in the physical and mathematical sciences to accommodate some of the other programs which we have increased over the Reagan level was indeed based on some testimony before the gentleman's subcommittee. Granted, there may be disagreement with that. But it was not a figure just picked out of the air. There was testimony that indicated that the Director could sustain those cuts. Would the gentleman agree with that?

Mr. WALGREN. The gentleman is correct.

Mr. WEBER of Minnesota. I thank the gentleman.

AMENDMENT OFFERED BY MR. FUQUA TO THE AMENDMENT OFFERED BY MR. WEBER OF MINNESOTA

Mr. FUQUA. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. FUQUA to the amendment offered by Mr. WEBER of Minnesota: Strike the dollar amount proposed to be inserted on page 4, line 24 and insert "$285,400,000".

Strike the dollar amount proposed to be inserted on page 5, line 2 and insert "$184,600,000".

Strike the dollar amount proposed to be inserted on page 5, line 8 and insert "$46,400,000".

Strike all of the words proposed to amend the dollar amount on page 5, line 9.

Strike the dollar amount proposed to be inserted on page 5, line 13 and insert "$35,000,000".

Strike all the words proposed to amend the dollar amount on page 5, line 20.

Insert at the end the following: "On page 4, line 25, strike the amount "$102,600,000" and insert "$100,400,000"."

Mr. FUQUA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment to the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FUQUA. Mr. Chairman, I offer this amendment in an attempt to more realistically bring the level of authorization down to a level more in line with what has been agreed to by the Appropriations Committee and by this House in the conference report.

As has been pointed out, when the committee in its deliberations reported the bill out, the HUD-Independent Agencies Appropriations Subcommittee that handles those appropriations and chaired by Mr. BOLAND had not come to the floor. When it was on the floor at a level of $1,103,000,000, there was an effort made at that time to reduce those funds below that figure to this scarce level as the Weber amendment does.

This House by a recorded vote of 264 to 152 rejected that amendment and maintained the level that the Appropriations Committee had recommended at that time.

What my amendment does is bring it down approximately $75 million below what was reported by the House Committee on Science and Technology from $1,160,000,000, and down to $1,085,000,000.

Now, we still have to go to conference with the Senate. I do not know what is going to happen to the conference report on appropriations that has been agreed to by the House. But I do know that to take the authorization down to the level that has been proposed by the gentleman from Minnesota will certainly do damage to the National Science Foundation, for several reasons:

First, it does damage to many of the programs by bringing them below the level that they were funded, even in the last year. And, second, it is way below what this House has agreed to on two occasions.

I would also like to point out an article that appeared in the Washington Post this morning, quoting William M. Agee, chairman of the board of Bendix Corp.—and I do not think you could classify Mr. Agee as a wild-eyed spender—where he pointed out, and I quote: "Government-supported research should be increased, not cut," and "we should send a strong message to the country that science, technology, and innovation have the highest priority."

And he further said: "Any cuts of any consequence in this area are damaging."

Likewise, as has been referred to by the distinguished chairman of the subcommittee, the gentleman from Pennsylvania (Mr. WALGREN), Dr. James Fletcher, the former and distinguished Administrator of the National Aeronautics and Space Administration, and who headed the Reagan transition team for NSF, talked in testimony before the committee about the unreasonable curtailment of social and be-

havioral sciences. He was talking about the lack of criteria used by OMB in some of the reductions they made on instrumentation, and he said that the overall budget should be at approximately $1.2 billion. This amendment is way below that level.

So I think we have people, who are not members of the same political party that I choose to be, recommending that basic research is a very essential area and that we should try to maintain a strong level of funding. And I think we do that in the amendment that I have offered. Certainly we should not go to the level that has been proposed by the gentleman from Minnesota (Mr. WEBER), who is a very fine and conscientious member of our committee. I do think the prudent thing to do at this time would be to adopt the amendment that I have offered that brings it down to a level approximately $75 million below what was reported out of the House Science and Technology Committee, and below what was originally approved on a rollcall vote for the Appropriations Committee.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Pennsylvania, a member of our committee.

□ 1620

Mr. ERTEL. I thank the gentleman for yielding.

I know he is very interested in the science and technology field and especially NSF. I would have a question in relation to reconciliation which, of course, was a major fight in this House and as adopted was the administration position.

In the amendment that the distinguished chairman proposes, does the amount fall within the limits established?

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has expired.

(At the request of Mr. ERTEL and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. ERTEL. If the gentleman will yield further, I would ask the distinguished chairman does the amount that he is proposing in his amendment fall within the reconciliation limits?

Mr. FUQUA. It certainly does. It is well within the reconciliation budget that was adopted by the House and also agreed to by the Senate. So it is well within those figures.

Mr. ERTEL. The reconciliation position was accepted by the President, as I understand it; is that correct?

Mr. FUQUA. That is correct.

Mr. ERTEL. So we are well within what the President has recommended for the National Science Foundation at this point?

Mr. FUQUA. That is correct; and particularly as was maintained in the reconciliation process.

Mr. ERTEL. So from that I would take it it would be the administration's position that they do not want to destroy the science and technology and research of the United States, but they want to at least come up to reconciliation and we have not even come up quite that high yet?

Mr. FUQUA. We are still below that figure, I might point out to the gentleman.

Mr. ERTEL. I thank the gentleman. I would support his amendment.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Massachusetts, who is the chairman of the Appropriations Subcommittee that has this budget.

Mr. BOLAND. I thank the gentleman for yielding.

I can understand the position of the gentleman from Minnesota (Mr. WEBER) in offering his particular amendment. As the gentleman indicated, the National Science Foundation ought to be willing to take its cuts as other agencies and departments of the Government have to take them. And it is taking them. It is taking something like a 25-percent reduction from the original request submitted in January.

So, the figures that were referred to by the distinguished chairman of the committee are correct. The gentleman from Minnesota would reduce the NSF authorization to $1,033,000,000.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has again expired.

(By unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. BOLAND. If the gentleman will yield further, as I understand it, the amendment of the gentleman from Minnesota would reduce the authorization to the same figure that would have resulted, if the amendment offered by the gentleman from Kansas (Mr. WINN) on the NSF appropriation bill had been adopted? Is that correct?

Mr. FUQUA. That is correct.

Mr. BOLAND. That amendment was defeated rather substantially on the floor of the House.

I think all of us recognize the fact—I certainly do—that the 1982 budget request is still a floating number—and could change in the next few days, perhaps as a result of the President's speech to be delivered tomorrow night.

But I want to remind the Members of the House and this committee that whatever agreement reflecting the new budget amendments is worked out on the HUD bill—does not mean that we on the Appropriations Committee will not choose to give higher priority to the Foundation. I think we ought to recognize that. Perhaps the gentlemen on the other side of the aisle do.

We may want to cut other portions of the HUD bill. This is a real possibility. We may make a real effort to hold partly harmless the Foundation and reduce other agencies instead. I think that is a position I would try to sustain, if it is possible to do so.

This has not been an easy year for either the authorizing or appropriations committees. But the members of the Science and Technology Committee have done their best with some of the same problems shared by our committee. This is a responsible amendment; it is one the House can support. It is consistent with the appropriations conference, and it is one that I urge each of you to vote for.

Investment in basic research is essential to our Nation's technological leadership and economic health. All one needs to do is look at what the Japanese are doing to support basic research—and it should leave little doubt about the need to fund science and science education adequately.

If we fail to support science—we will lose any ability to compete in world markets. We will lose our technological lead. And we will lose our military lead. It is just that simple.

So, I would urge this body to provide the fexibility that the gentleman from Florida seeks in his amendment to the amendment which would authorize $1,085,000,000. As I understand it, this is still $75,000,000 below the amount in the bill as reported? Is that correct?

Mr. FUQUA. That is correct.

Mr. BOLAND. And well below the amount assumed in the first concurrent resolution on the 1982 budget?

Mr. FUQUA. The gentleman is correct.

The CHAIRMAN. The time of the gentleman from Florida (Mr. FUQUA) has again expired.

(By unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. BOLAND. If the gentleman will continue to yield, on that basis it would seem to me that the amendment to the amendment offered by the gentleman from Florida ought to be adopted. It is a very reasonable amendment and I thank the gentleman for yielding.

Mr. LOTT. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

I would like it to be noted I am rising in support of the amendment of the gentleman from Minnesota.

If I understand it correctly, the National Science Foundation was not part of the reconciliation in the House. There was, as I understand it, some cap placed on it in the Senate; but when we went to conference that whole issue was taken out. So NSF was in fact not in reconciliation and the Members need to know that.

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Florida.

Mr. FUQUA. I thank the gentleman for yielding.

The gentleman is absolutely correct, but it is still within the reconciliation criteria that had been brought on the floor of the House and does not exceed those numbers.

Mr. LOTT. I thank the gentleman for his comments.

I would like to say, of course, that the distinguished chairman does an outstanding job working with our distinguished ranking member, the gentleman from Kansas, on this very difficult legislation, and I do not mean in any way to reflect on their effort, but I would like to get my colleagues to look at what we are talking about here.

What are the programs within the National Science Foundation authorization? We are talking about mathematical and physical sciences, biological and behavioral and social sciences, U.S. Antarctica program, scientific technological and international affairs, cross directorate programs, program directorate and management, science and engineering education, special foreign currency. That is all fine and well and good, but the gentleman from Minnesota is trying to bring this authorization down to the level of the President's budget request.

We are talking about having to make reductions in various programs which we have already passed and we hope we are going to be able to find some other places where we can make savings, and I know the gentleman from Florida would support that effort to try to move toward a balanced budget.

I just have to ask in my own mind if we cannot do it within the National Science Foundation, where are we going to do it? We are asking so many programs, so many agencies, so many departments, so many people, to take some reductions in the level of expenditure and yet, the National Science Foundation cannot bear its share and the amendment, I might add, by the gentleman from Minnesota, actually still would leave this bill about $11 million above last year's authorization level.

The gentleman is trying to put this thing in the proper perspective to bring down authorizations because we always use these arguments, well, look, this is supposed to be the ceiling, but they come to the floor and then we get around to exceeding these floors in the appropriations process.

We had this on the State Department authorization last week. The argument was made it was only $800 million over what the President asked for in the authorization, $800 million. Maybe a few million here, and it just goes on and on.

I would urge my colleagues to let us get these bills at least down to the President's budget request. If not here, then where. I would urge the defeat of the amendment that would cut the amendment of the gentleman from Minnesota in half. Let us get these bills under control and I think we need to begin with the National Science Foundation.

Mr. GREGG. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment of the gentleman from Florida and in support of the amendment of the gentleman from Minnesota.

I sit on the subcommittee which has the National Science Foundation as one of its areas of responsibility and I would, like other members of the committee, like to congratulate our leadership on this committee.

The gentleman from Pennsylvania (Mr. WALGREN) and the gentlewoman from Massachusetts (Mrs. HECKLER) have done a great job and it has been an enjoyable committee to be on.

I happen to agree with the amendment presented by the gentleman from Minnesota (Mr. WEBER). I think it is time that we face the reality that we are going to have to make the hard decisions on all these various budgets that come through here, even of agencies like NSF which have a long strong history of delivering services to the country, if we are going to bring inflation under control and going to deliver the type of budget which is necessary in order to bring inflation under control.

We are looking at, at least a $42 billion deficit in 1982, where there is talk that there will be a higher deficit. For us to go over the original budgetary figures which arrived at a $42 billion deficit is to admit we cannot maintain our own fiscal house and we cannot bring under control the spending of the Federal Government.

Therefore, I support this amendment; $1,003,000,000 is a considerable amount of money to put into the National Science Foundation. We heard testimony from Dr. Slaughter that he felt his Foundation would be able to operate in a very effective manner with this sort of funding.

□ 1630

In fact, he felt that the funding levels were acceptable.

We have reapportioned this money within the terms of the directorate so that we are not at the original Reagan figures as they were originally introduced into the committee.

The amendment presented by the gentleman from Minnesota (Mr. WEBER) has suggested that we put an additional approximately $20 million into the science and education directorate and has also reallocated within other directorates of the National Science Foundation.

So considerable thought has gone into this. It has not just been an across the board mish-mash of cuts. It has been an attempt to try to identify where we need the money and where we can best spend the money.

I do have to oppose the amendment of the chairman of the committee, the gentleman from Florida (Mr. FUQUA), because I feel that once again it is over the President's proposal. Let us face it, we are going to have to make these hard decisions again and again over the next few months in order to bring spending in line with income in this Congress and we might as well start here.

Mr. McGRATH. Mr. Chairman, I move to strike the requisite number of words.

I rise in support of the amendment of the gentleman from Florida because I am deeply concerned about adequate funding for programs which are vital to the scientific and technological advancement of our Nation.

It is not an easy task to make cuts in the National Science Foundation; these programs are extremely important in continuing educational opportunities and research in science and technology related fields.

The amendment provides for a certain amount of flexibility within the NSF budget, while still making necessary reductions indicated by our present fiscal situation. The funding level is below that which was passed by the Appropriations Committee. It provides $184.6 million for the biological behavioral and social sciences, which is identical with the ceiling approved in the appropriation's conference report. The funding for science, technological and international affairs provides some additional moneys for innovation, international and intergovernmental programs.

This is a responsible amendment which does not tear the heart out of the National Science Foundation, and I urge my colleagues to support it.

Mr. DUNN. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the Fuqua amendment.

Mr. Chairman, I wonder if I might have the attention of the honorable chairman of the committee.

Mr. Chairman, in committee discussions, one of the big problems facing this country was the lack of engineers that we were graduating and the equipment that they have to use. I believe, and correct me if I am wrong, that most experts would agree that we should be graduating approximately six times the number of engineers that we are currently graduating. Is that approximately what the gentleman remembers?

Mr. FUQUA. Mr. Chairman, if the gentleman will yield, the gentleman is correct. There is a great concern in this country about the number of engineers that will be required for American industry, and for our colleges and universities in the future. This is one of the most serious problems that we are trying to address in this bill.

Mr. DUNN. If we are going to begin on the road to Reagan economics, particularly in Michigan, if we are going to be able to revitalize our economy, our country needs first-rate engineers and first-rate equipment.

Could the gentleman explain to me the difference in the level in the gentleman's amendment, as opposed to the Weber amendment as it pertains to that particular area?

Mr. FUQUA. Well, in the amendment that I have offered, we provide $35 million for this activity.

Now, we have got to negotiate with the Senate to try to arrive at a final figure.

I might say that the Appropriations Committee was allowed only $27 million, so we are slightly above the appropriation level; but some of this money we are using in other areas, particularly in the cross directorate and that we can fund some of the other programs.

The Weber amendment also provides money for this, I might add, but it takes it out of the physical science areas that severely cripple some of the other areas that we think are very central.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. DUNN. I will be glad to yield to the gentleman.

Mr. ERTEL. I thank the gentleman from Michigan for yielding.

I think the gentleman has hit a very important point. When we understand that the appropriation level for science and engineering is $27 million and then look at the Weber amendment—and I know it is well-intended—it allows or authorizes $59.9 million. It does not matter how much we authorize, if the appropriation level does not go above that $27 million; so what have we done, we have cut back the appropriations by $32 million.

What the Weber amendment does then, since we do not have the appropriation for the money, it takes from the mathematical and physical sciences, which under the Fuqua amendment would be $285 million and under the Weber amendment would reduce that to $259 million. Now, when you cut that authorization level down, basically what you have done is cut it out of that engineering and science factor, if you will, even though it is not in science and engineering education. You have cut it out of mathematical and physical sciences where people are getting grants to go on for advanced research and other kinds of activities.

So what you are really doing is cutting very severely into our engineering efforts in this country. If we can remember, the Japanese are putting out more engineers from their colleges than we are and they have about one-half of our population. If we are ever going to get back into the arena of international science and international engineering, we have got to go with the Fuqua amendment, because I am afraid that the Weber amendment has really cut us back very dramatically in these areas.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. DUNN. I yield to my colleague, the gentleman from Minnesota.

Mr. WEBER of Minnesota. Mr. Chairman, I thank the gentleman.

I have to disagree fairly vigorously with the opposition that has been put forward on this particular point. Throughout the entire testimony before our subcommittee and our committee, if there was one area that was identified as a clear and crying need, it was the science and engineering area. It is for that reason that at the subcommittee level and at the committee level and through the appropriations process and now in this authorization amendment, we have structured our amendment to try to protect the science and education directorate.

The fact is that we do not have an appropriation bill today. It is entirely possible that we will not have one because of a Presidential veto.

For that reason, I reject the notion that this authorization process we are going through here is an irrelevancy. That is why it is an important point to make.

Furthermore, the amount of money that we have targeted for this important program is actually in excess of the amount that would be permitted under the Fuqua amendment by nearly $20 million.

Furthermore, in testimony before our subcommittee, the mathematical and physical sciences where we have made some reductions, I found no testimony which related that money directly to any of the engineering needs that our high technology industries are so desperately facing today. Those needs are served by particularly the graduate fellowships that the chairman has been so instrumental in devising and the other programs that are in the science and engineering directorate.

Our amendment protects that actually better than the amendment of the chairman.

So I have to reject the notion that this does permanent damage to that directorate.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent, Mr. DUNN was allowed to proceed for 2 additional minutes.)

Mr. DUNN. Mr. Chairman, I would ask the gentleman, how can he say it does not have any effect when in terms of the equipment used, the gentleman is saying that this number is reduced. How can the gentleman make a statement that this does not have any effect on the quality of the engineers that we are graduating?

Mr. WEBER of Minnesota. Mr. Chairman, if the gentleman would yield, the equipment that the gentleman is talking about is dealt with in the cross directorate program. That is the second area where we have provided substantial protection for the NSF budget.

If I can take just a couple minutes to lay this out, I think it is important again that we talk about exactly what has happened programmatically with the Reagan budget. The Reagan budget called for reductions in funding within different directorates in the NSF, actually in only three major areas, the biological, the behavioral and social sciences, instrumentation in the cross directorate, and the science and education engineering programs.

We have structured this amendment to take care of two of those areas critically. The cross directorate instrumentation, which the gentleman just referred to is one area where we restored nearly $20 million; the science and engineering education area is the second major area where we have addressed it actually better than the Fuqua amendment did.

The only area where we have actually maintained the Reagan cut and, indeed, gone somewhat further, is in the area of the biological, behavioral and social sciences.

I do not dispute there is some value to those programs, but that is what we should be talking about here today. If we are being asked to break the back of the Reagan budget in this area, it is not because of science and engineering needs, it is not because of instrumentation in our universities, it is to protect programs in the biological, behavioral and social sciences.

Now, some Members may wish to do that, and we should talk about those programs and tell Members exactly what it is that they are being asked to fund.

Mr. DUNN. I thank the gentleman.

Mrs. HECKLER. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the Fuqua amendment.

Mr. Chairman, I think it is quite obvious to all of us that since we are debating this issue before the next Presidential statement on budget priorities, that we are operating in somewhat of a vacuum. We have to operate on the basis of the testimony before the Sci-

ence and Technology Committee and the information before us today; we cannot prejudge what the President may say in the future. What the President says tomorrow evening may make us reexamine many of our priorities and reassess all of our appropriation bills and, indeed, the budget itself; but, to do so during today's consideration of the National Science Foundation authorization would put the House in the hands of conjecture and speculation.

Today we have to deal with the facts as we know them.

□ 1640

The fact is, the chairman of the Science and Technology Committee has offered a reasonable, responsible, realistic compromise.

Certainly we have heard a great deal of testimony to the effect that we need more funding for the Foundation's programs. In fact Dr. Fletcher, who was the head of the Reagan transition team for the National Science Foundation, suggested that the minimum funding level for NSF should be $1.2 billion, a figure well above anything we are suggesting today.

In terms of the question of engineering, there was a great deal of testimony on the lack of engineers to meet the needs of high technology and related industries. High tech firms represent one of the highest growth industries in America today.

The fact is that the Weber amendment will totally eliminate one of the most promising programs for the development of engineering expertise, this is the women and minorities program, which is targeted to developing the talents of the under-utilized human resources represented in the low numbers of women and minorities in scientific and technological careers.

Mr. FUQUA. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I yield to the gentleman.

Mr. FUQUA. I want to thank the gentlewoman for the statement she is making and for the hard work she has rendered on the committee, and elaborate on the point she just made about women and minorities. The amendment that I have offered provides for funds for the programs that we have had for women and minorities. It is certainly a very vital program and one that we should continue to pursue so that we can attract women and minorities into the science field more than we have in the past.

I thank the gentlewoman for her leadership in these areas.

Mrs. BOGGS. Mr. Chairman, would the gentlewoman yield?

Mrs. HECKLER. I would be very happy to yield to one of my favorite colleagues.

Mrs. BOGGS. I, too, would like to add my accolades to the gentlewoman and join with the chairman, Mr. FUQUA, in this regard. It is one of the most important programs that we have in the scientific field. I think that all of us have to recognize, as the gentlewoman has so long done, that unless this whole Nation, particularly this generation, is literate in science, that they are not going to be able to make any kind of value judgments in the social or economic, political or moral fields.

So I congratulate the gentlewoman for her insistence upon this program.

Mrs. HECKLER. I thank the Congresswoman from the great State of Louisiana for her remarks and her extremely ardent advocacy of equal rights. In the case of the Foundation's programs directed to women and minorities the argument is not an "equality" issue. Programs for women and minorities are important not simply to redress problems of past discrimination. These programs are important because they represent a lost resource for the Nation; a resource so high in demand that American industry is crying for help.

That resource is properly educated and trained personnel for scientific and technological professions. Let me give you one example. High tech and other industries are suffering tremendous productivity loss due to a lack of engineers. Since women represent less than 2 percent of the number of Ph. D.'s in engineering, they represent a potential doubling of available engineers. When blacks and other minorities are included, the increase is even greater. According to the Congressional Research Service, women comprise 51.3 percent of the U.S. population but only 9.7 percent of the total scientists and engineers in the Nation. If America is going to continue to excel in scientific and technological fields, we simply must continue programs that encourage the entry of women and minorities.

In terms of educating and training qualified engineers fast enough to meet this country's demand, the women and minorities programs at NSF promise quick results. This talent pool simply cannot be ignored.

Now, the gentleman from Minnesota, whom I very much respect, has spoken of the need for science and engineering education. He seeks to increase funding in this division at the Foundation. But in fact the education division is one of the programs which has produced poor results. Testimony brought before the committee indicates that the education division needs reorganization and new priorities. Until this is done it is doubtful that more money will produce more results. And while there is a need to increase the number of scientists and engineers, I think it is foolhardy to take money from ongoing research programs in the math and physical sciences as well as the biological, behavioral, and social sciences at a time when the Appropriations Committee has put a ceiling on the amount of money that can be spent in that category. There is no possibility that the money he seeks to add to this category can be used with the cap that the Appropriations Committee has already placed on education funding.

In regard to the proposed cuts in the biological, behavioral, and social sciences, it was made quite clear to the committee, after days and weeks of hearings, that we must insure America's knowledge base in these fields.

This division of the Foundation contains some of the most vital research going on in America today. My subcommittee (Science, Research, and Technology) has just completed 6 days of hearings on innovation and productivity, and we heard expert testimony from the General Accounting Office, Harvard University, MIT, the American Productivity Center, Westinghouse, Bell Labs, Sony, United Steelworkers, Working Women, and others. Their testimony was in agreeement with Dr. Rahn, vice president and chief economist of the U.S. Chamber of Commerce when he testified that,

> Increasing numbers of top executives acknowledge greater management responsibility for the Nation's poor productivity showing in recent years. They also detected a widespread belief that workers will respond to greater involvement in decisionmaking on the job.

Other research endeavors confirm the chamber's findings. Issues like motivation, communication, and organization, so crucial to solving management/union/labor problems, are all a part of the behavioral and social research now taking place at the Foundation. We simply cannot afford to eliminate this research.

The CHAIRMAN. The time of the gentlewoman has expired.

(By unanimous consent, Mrs. HECKLER was allowed to proceed for 2 additional minutes.)

Mrs. HECKLER. The need for continuing the behavioral and social assessment of human productivity and the human questions related to high technology, has to be one of the major priorities. The American Association for the Advancement of Science, the National Academy of Sciences, and the National Science Board have all made statements strongly supporting continued funding for this field. This is the area of study where concepts like gross national product, econometrics, geography, and demographics were developed.

Research in the behavioral and social sciences cannot be fully supported by the private sector and the market economy. The direct monetary returns from such research are often not immediate and predictable, and its benefits are not usually viewed as pro-

prietary returns on corporate investment. For rigorous, methodological, serious basic research, the National Science Foundation is one of the only sources for funds in this area.

I hope my collegues will give the Science and Technology Committee flexibility in dealing with the Senate on the basis of the figure that is suggested by the chairman of the committee and those of us on this side of the aisle who support him on a bipartisan basis.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I would be happy to yield to the gentleman.

Mr. WEBER of Minnesota. I thank the gentlewoman for yielding.

I would like to first of all thank the gentlewoman for the leadership she has shown on our subcommittee and her continuing promotion of the very worthwhile programs she is referring to.

I would just point out that there is no prohibition on the National Science Foundation from utilizing funds in my amendment that are put in for the cross-directorate to fund the program she has talked about. I recognize full well there is a trade-off that needs to be made.

The point we perhaps disagree on is, I think, that every nickel of that will probably have to be used for instrumentation.

Mrs. HECKLER. I would simply like to respond that due to the way the gentleman's amendment is offered, I do not think the instrumentation funds can be used for anything else since they are locked in section 4 of the bill, not in section 3 with the cross-directorate program. In regard to the need for increased funding for instrumentation, I fully agree with the gentleman. However, the problem is much bigger than $20 million. In fact, Dr. Keyworth, the President's current advisor on science, has said the need is over $1 billion. So what we are talking about here is a token gesture of $20 million in the direction of an important, but much larger problem. But it is this gesture of providing equipment that would deny the opportunity for the development of the human potential embodied in women and minorities that is clearly available at the universities across America today. So that rather than doing the token thing in instrumentation, I think it is time to do the human thing and develop the talents and resources of well over one half of our society, women and minorities, who have not been brought into the mainstream of the scientific and technological arena.

I yield back the balance of my time.

Mr. HILER. Mr. Chairman, I move to strike the requisite number of words.

I rise in opposition to the amendment and support the amendment of the gentleman from Minnesota.

I am not a member of the Science and Technology Committee. Therefore I am not going to talk about the merits of any of the particular aspects within the budget of the Science and Technology Committee on the NSF. But I would operate on the basis of the overall funding level.

I was sitting in my office listening to much of the discussion going on. I heard things like we are operating in a vacuum, we should wait until tomorrow night, we are going to destroy opportunity for people, and it is only going to have a 1-percent increase.

I would say that the financial community has already said what they think of the spending cuts we have enacted. They said we need to enact more, not less. We do not have to wait for the President to get on TV tomorrow night to know that we have to cut more spending. I think by waiting we are just putting off the day of reckoning.

We talk about the failure, if we do not proceed with the full level of funding recommended by the committee or the level recommended by the chairman, the gentleman from Florida (Mr. FUQUA) that somehow we are going to take away opportunity. I would ask: What kind of opportunity do many of our citizens have today with the economic situation we find?

In 1979 there were 500 new homes constructed in my district. This year there will be less than 100. Those people who were building those homes would love to have a 1-percent increase in their income.

I think the time has come when we have to start cutting. We are going to have to cut deep. It is going to hurt. To put off the day of reckoning for a speech tomorrow night or next week or the budget in 1983 or the budget in 1984 is total irresponsibility.

I rise in fullhearted support of the gentleman from Minnesota, because I think he is right on line.

Mr. WEBER of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. HILER. I yield to the gentleman from Minnesota.

Mr. WEBER of Minnesota. I thank my colleague for yielding.

I think the gentleman has served to refocus the debate. Actually, the dollar figures that separate the Fuqua amendment from the Weber amendment are not quite as significant as the broader question of what is the message we are sending to the financial markets? What is the statement we are making about the future of economic policy in this country?

The financial markets are watching this administration. We have had a lot of discussion in this debate about the passage at one time of this appropriation at a higher level. Well, since that time we have all gone home, listened to our constituents, come back here and observed happening the very things my friend, the gentleman from Indiana, is talking about. We are sending a message to the financial community by this vote. The message is going to be either this Congress is going to take the strong, positive steps to restrain spending, bring the budget under control and help retract the Government from the credit markets, or that we are not going to make that kind of statement. I commend my colleague.

Mr. WALGREN. Mr. Chairman, will the gentleman yield?

Mr. HILER. I would be happy to yield to the gentleman.

Mr. WALGREN. Mr. Chairman, it would seem to me about the message we are sending to the financial community, there are two interpretations. One message we would be sending the financial community, if we are to reduce the spending in this area, is that we will not have investment in this country; we will not have a sufficiently trained work force in this country to compete with the Japanese; that we will not be on the leading edge of technology.

□ 1650

I do believe there is a basic question here before us, and that is, is all Government spending negative? Is it all detrimental, or are there certain kinds of Government spending that are extremely essential for our economy? The fact of it is that we are focusing on perhaps the type of Government spending that almost all would agree is investment-related and helpful from an economic standpoint.

So, I think we ought to send a message to the financial community. It ought to be the message Mr. Agee of the Bendix Corp., says; that is, that we are not going to cut the effort to keep ahead in science and technology in this country.

I thank the gentleman.

Mr. HILER. In all due respect, the chairman of the board of Bendix will not be voting on budgets this year, and in all likelihood will not be going back to his district to hear about the high interest rates and unemployment. I would suggest that that is what the Members of Congress must do, and it is their responsibility to do that.

I think what we have to send to the financial community today is, send a message that we are going to get a handle on spending, we are going to make these tough decisions. As the gentleman from Minnesota said earlier in this discussion, all of us have had hundreds of people come to our offices to talk about why it is that their programs cannot be cut. Yes, we can cut in others, but we cannot cut here.

The time has come when we have to make the tough decisions, and to avoid making those decisions to the tune of $127 million I think is going to send exactly the wrong message to the people who play a tremendous role in setting interest rates in this country.

Mr. DUNN. Mr. Chairman, will the gentleman yield?

Mr. HILER. I will be happy to yield.

Mr. DUNN. Mr. Chairman, I would just like to ask the gentleman, and I think we have turned the focus of the debate; the debate is not whether you and I are against the Reagan program. You and I are both strong supporters of that. As a member of the construction industry, the gentleman asked the question before about whether we would like to have a 1-percent increase. Most of us would settle for 50 percent of what we had last year, so the gentleman is correct.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

(At the request of Mr. DUNN and by unanimous consent, Mr. HILER was allowed to proceed for 2 additional minutes.)

Mr. DUNN. The issue is not whether or not you or I support budget cuts in total, but whether or not this is a good place to do it. I would challenge the gentleman that if we are not going to continue in this country the programs of basic research at the university level, we are not going to be able in the end to stimulate this kind of economy.

Mr. HILER. If we do not begin to get the budget deficit down by lowering spending, we will not have to worry about having the economic stability where the future engineers will have the jobs.

● Mr. HOLLENBECK. Mr. Chairman, I rise in support of the Fuqua amendment to the Weber amendment.

As I noted in the additional views I placed with the report accompanying the National Science Foundation authorization bill, H.R. 1520, I am greatly concerned about adequate funding for a number of important NSF programs. These include the science and engineering education, economics and behavioral sciences, and the international programs. These areas are extremely important to provide the necessary trained manpower for our engineering and scientific needs. In addition, they give us a better understanding of the means to utilize and bring technology into the mainstream of commerce both nationally and internationally.

While I am generally supportive of the President's overall budget levels in other areas of science, there is not sufficient flexibility in the requested NSF budget to allow enough resources to be devoted to these important areas. Maintaining the administration's overall level will seriously undermine the Foundation's natural science programs.

The particular distribution of cuts made in the Weber amendment will prove very dangerous for our Nation's continued scientific and technological vitality.

Mr. WEBER proposes to take $38 million from the Division for Mathematical and Physical Sciences below what the President recommended. This alone is a serious threat to basic research.

The Weber amendment also cuts $20 million below the administration request for the Division of Biological, Behavioral, and Social Sciences. This reduction threatens ongoing research programs in medical sciences, economics, biophysics, neurobiology, and social research.

Furthermore, the budget reduction in the Scientific, Technological, and International Affairs Division seriously jeopardizes current and future multilateral scientific exchanges so important in the international scientific arena.

Over the past few years there has been only a 2-percent increase in the overall budget and I believe that this is not the time to cut further into the physical sciences.

The Fuqua amendment restores some funds to those critical areas I noted while being restrained in its total figure. With a level below last year's authorization, I feel that our distinguished chairman has provided us with a fiscally conservative yet viable budget for the National Science Foundation.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. FUQUA) to the amendment offered by the gentleman from Minnesota (Mr. WEBER).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. WEBER of Minnesota. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1710

The CHAIRMAN. Three hundred and eighty-three Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Minnesota (Mr. WEBER) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. Five minutes will be allowed for the vote.

The vote was taken by electronic device and there were—ayes 245, noes 161, not voting 27, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Nelson for, with Mr. Daub against.

Mr. FINDLEY and Mr. SILJANDER changed their votes from "aye" to "no."

Mr. WORTLEY changed his vote from "no" to "aye."

□ 1720

So the amendment to the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. WEBER), as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 401, noes 5, not voting 27, as follows:

□ 1730

Mr. PORTER changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, I move to strike the last word.

(By unanimous consent, Mr. WRIGHT was allowed to speak out of order.)

□ 1740

LEGISLATIVE PROGRAM

Mr. WRIGHT. Mr. Chairman, I take this time for two purposes: First, to give Members a little preview of what is planned for the coming week.

There will be a pro forma session on Friday, made necessary by the need to bring forth on Monday the continuing resolution which we hope will be ready by that time.

There will be no votes on Tuesday of next week, it being a Jewish holiday.

We would hope not to schedule votes on Wednesday, pending completion of the continuing resolution.

On Thursday it is anticipated that we shall begin immediately at 10 o'clock and spend the day or such part of it as is necessary to bring to final passage the Labor, Health and Human Services appropriation.

Once having done that, that will complete 10 of the annual appropriations bills having been passed by the House.

TRIBUTE TO SUGAR RAY LEONARD

Mr. WRIGHT. Now, I say, there was a second purpose for which I seek recognition.

We in this Chamber and in this arena have participated in verbal combat of one kind and another and there are skilled masters of that art before me. There is another form of athletic enterprise which has been recognized since early in the human race.

I lay claim now that Nat Fletcher is gone to being the world's foremost authority on boxing and while there have been many good champions and a number of very great champions, I hold that there have been only a very few truly great, greats of all time. By that I would define that rare combination of an individual who is capable of the boxing skills of a dancing master, who knows, as is scripturally told us, that it is better to give than to receive, and who does not do a lot of receiving, but who on the other hand has the power of a great puncher in either fist.

I think there have been four all time great champions. One of them was before my time, but I rely on my father's recollection of him, Jack Johnson, a heavyweight.

The second, I would name a man named Sugar Ray Robinson, whom I saw and delighted in seeing.

The third, I think, probably is Mohammed Ali, and the fourth—now, Joe Louis—I meant to say that there are five truly outstanding. I have never been good at counting, as was evident earlier this year when you guys ran over us this year; but there are five. Joe Louis was undoubtedly one of them; but that leaves one, and I think that fifth niche has been filled by a contemporary, a man named Sugar Ray Leonard.

The CHAIRMAN. Are there any additional amendments? If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ECKART, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 1520) to authorize appropriations for activities for the National Science Foundation for the fiscal year 1982, pursuant to House Resolution 183, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WINN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 262, nays 149, not voting 22, as follows:

[Roll No. 223]

NOT VOTING—22

| | | |
|---|---|---|
| Alexander | Fary | Pashayan |
| Ashbrook | Hawkins | Santini |
| Bolling | Hyde | Savage |
| Coelho | McCloskey | Weaver |
| Danielson | Moffett | Weber (OH) |
| Daub | Montgomery | Wylie |
| Derwinski | Nelligan | |
| Edwards (CA) | Nelson | |

□ 1800

The Clerk announced the following pairs:

On this vote:

Mr. Edwards of California for, with Mr. Daub against.

Until further notice:

Mr. Weaver with Mr. Ashbrook.
Mr. Fary with Mr. Wylie.
Mr. Alexander with Mr. Pashayan.
Mr. Coelho with Mr. McCloskey.
Mr. Nelson with Mr. Hyde.
Mr. Santini with Mr. Derwinski.
Mr. Moffett with Mr. Weber of Ohio.
Mr. Hawkins with Mr. Nelligan.
Mr. Danielson with Mr. Savage.

□ 1800

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days during which to extend their remarks, and to include extraneous material, on the bill, H.R. 1520, just passed.

The SPEAKER pro tempore (Mr. HOWARD). Is there objection to the request of the gentleman from Florida?

There was no objection.

## PERSONAL EXPLANATION

Mr. GARCIA. Mr. Speaker, yesterday I was delayed from voting on House Joint Resolution 220, House Concurrent Resolution 183, and H.R. 1953. I was delayed because the plane was on the runway for 2 hours waiting for clearance for takeoff.

Had I been present, I would have voted "yea" on House Joint Resolution 220.

On House Concurrent Resolution 183, the National Rugby Team of South Africa should not play in the United States, I would have voted "yea."

On H.R. 1953, Council on Environmental Quality authorizations, I would have voted "yea."

## PERSONAL EXPLANATION

Mr. PEPPER. Mr. Speaker, I unavoidably missed the vote on rollcall No. 221. If I had been present, I would have voted "aye."

## REQUEST FOR PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORATION TO SIT ON THURSDAY, SEPTEMBER 24, 1981, DURING 5-MINUTE RULE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be permitted to sit on September 24, 1981, during the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. KRAMER. Mr. Speaker, reserving the right to object, I would like to ask the gentleman what items are going to be considered and whether or not the minority members of the subcommittee and full committee have been consulted.

Mr. BONKER. If the gentleman would yield, the subject matter is H.R. 4503, Water Pollution Act Amendments of 1981, and it has been cleared

by the ranking minority member, the gentleman from California (Mr. CLAUSEN).

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. KRAMER. I yield.

Mr. ROUSSELOT. Is this absolutely essential? Is this hearings only? If somebody can answer, is it hearings only?

Mr. OBERSTAR. Mr. Speaker, if the gentleman will yield, as a member of the Public Works Committee I would be happy to respond to the question.

Mr. KRAMER. Certainly, I yield.

Mr. OBERSTAR. This is markup on the Water Pollution Control Act amendments, requested by the administration; legislation which is important to continue the Federal Water Pollution Control Act. It has been reported out of subcommittee and is being taken up in full committee. We anticipate a relatively short markup period, and the ranking minority member of the committee is on the floor and could respond further.

Mr. CLAUSEN. Mr. Speaker, I did not hear the gentleman's request. Was it to get unanimous consent to mark up the bill tomorrow?

Mr. KRAMER. Yes.

Mr. CLAUSEN. It is my understanding, because we have in the chair as the Speaker pro tempore the distinguished chairman, it is my understanding that if we were to start work on the markup and then our own bill on the surface transportation, the highway bill, comes up on the floor, that we would not proceed with a markup but would come over and take care of that bill on the floor, and then reconvene for purposes of finishing the markup on the water resources bill. Is that correct?

Mr. ROUSSELOT. If the gentleman will yield further, there is other important legislation besides the surface transportation bill, and I can appreciate the concern of my colleague from California, the ranking minority member of the Public Works Committee, as to surface transportation, but what about all the other important legislation we have up tomorrow? Does the gentleman want to just avoid or prevent the fine members of this committee from being involved in that legislation?

Mr. OBERSTAR. If the gentleman would yield further, never had the House Public Works Committee detained or prevented any of its members from participating fully in the actions on the House floor.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield further?

Mr. KRAMER. For purposes of debate only.

Mr. ROUSSELOT. As my colleague knows very well, when we are marking up a bill in committee, that requires the full attention of the people on that committee, and that denies them in many cases, especially when they are conscientious like the gentleman from Minnesota, that they are not then able to be present on the floor for any potential amendments or that type of thing. The gentleman has already agreed that you will adjourn as a committee if we get to the surface transportation bill, but what about the other legislation that is up tomorrow—and we do go in at 10 o'clock? Is it absolutely essential that this committee meet tomorrow to mark up and interfere potentially with the other legislation on the floor?

The SPEAKER pro tempore. The Chair would like to state for the information of the gentleman and the other gentlemen that the Chair is also chairman of the Committee on Public Works and Transportation. Tomorrow, he intends to recess the committee from 10 o'clock until 30 minutes after for the highway bill tomorrow.

The Chair would like to state that at this moment there is no other legislation contemplated on the floor.

□ 1810

Mr. ROUSSELOT. Mr. Speaker, I appreciate the statement of the chairman of the committee, and if the gentleman will yield further, may I ask, what, then do we need the unanimous consent for?

Mr. OBERSTAR. Mr. Speaker, if the gentleman will yield, perhaps it is because the legislative program has been changed since the decision was made to ask for unanimous consent for the committee to sit during the 5-minute rule. I do not think that the legislative program was fully known to the chairman of the committee at the time that our schedule for tomorrow was completed.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, the gentleman appreciates the fact that our distinguished chairman of the Committee on Public Works and Transportation has just stated that if the surface transportation bill does come to the floor—and he expects it to come to the floor—he is going to ask that the committee adjourn. So I do not know why the unanimous-consent request is needed.

The SPEAKER pro tempore. The Chair will state that there had been a further bill scheduled for the consideration of the House tomorrow which, subsequent to the request of the gentleman asking unanimous consent for the committee to sit, has been taken off the calendar for tomorrow.

Mr. ROUSSELOT. It has been "scrubbed"? I refer to the other bill.

The SPEAKER pro tempore. The gentleman may use his word.

The Chair will inquire if the gentleman would care to withdraw his unanimous-consent request.

Mr. BONKER. Mr. Speaker, I withdraw my unanimous consent request.

The SPEAKER pro tempore. The request is withdrawn.

## GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include therein extraneous material, on the subject of the special order today by the gentleman from Florida (Mr. IRELAND).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## SPEAKER O'NEILL SAYS HE HAS NOTHING TO DO WITH NATIONAL DEBT OR INFLATION

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ASHBROOK. Mr. Speaker, Speaker TIP O'NEILL has just announced that, "The monkey is off the Democrats' back. These are Reagan's deficits and Reagan's interest rates." I thought he must be kidding because, like our beloved Speaker, I served here during the sixties and seventies when the Democrats blew our Federal budget through the dome. From 1955 to 1981, the Democrats held control of both Houses of Congress, with Speaker O'NEILL a powerful part of it. In 1955, banks were glad to lend money at 5-percent prime rate interest. By 1981, we were trying to avoid the prime rate reaching 20 percent. That transformation took place under the Democrats who now say, "the monkey is off the Democrats' back," and that these are "Reagan's interest rates."

### O'NEILL'S DEBT PAYMENTS

In 1955, due almost entirely to World War II and Korea, we had a $280 billion national debt. In 1981, before Ronald Reagan presented his first budget, it stood at $930 billion. The interest on the national debt, which Ronald Reagan had nothing to do with causing, was $92 billion. A little arithmetic and historical honesty tells us that, at the very least, the Democrats have put most of the $700 billion in Mr. Reagan's budget, fought efforts to cut it, and now say they have nothing to do with the deficit. No major spending program now on the books is President Reagan's program. Democratic Congresses passed them all. Most came under the White House incumbents who envisioned a Great Society or New Frontier.

### O'NEILL'S DEFENSE DEFICIT

There is another debt the Democrats left President Reagan by 1981. For a decade, they had been letting America's weapons get older, using the money to pay for their waste and their

new, vote-buying social programs, while the Soviet Union mounted the largest arms buildup in history. When President Reagan took office, even the Democrats admitted that a huge expenditure was necessary for the United States to survive.

Add Speaker O'NEILL's debt payments to his military deficit, and you will find that any deficit up to $100 billion, which President Reagan will certainly not allow to happen, would be the result of burdens already put into the new administration's budget before it took office. But our beloved Speaker has the gall to call it "Reagan's deficit."

Those are just some of the extra Government costs a quarter of a century of liberal Democratic rule has left us. During the same period, they have wrecked the economy that must pay those costs.

TWENTY-SIX YEARS OF BLEEDING THE CAPITAL MARKET

If $650 billion of new national debt had not been pulled out of our capital market over the last 26 years of Democratic control of Congress, that money would have built new houses, bought new machinery for our factories, allowed a whole generation of young people to buy homes they cannot now afford, and made our factories able to keep up with the new machinery Europe and Japan are using to drive so many of our own industries out of business. Millions of jobs and a whole generation of homes have been wiped out by the leadership which now claims our national problems are the new President's fault.

O'NEILL'S INFLATION

Keep in mind that every dollar of that $650 billon was worth more than a dollar today. They were pulled out of the capital market in the fifties, the sixties, and the seventies, when a dollar was worth from 20 percent to 300 percent more, under the leadership of the party which today insists that it is terrified that the Reagan budget may be inflationary. Turnabout may be fair play, but this is ridiculous.

LIBERALS HAVE DESTROYED THE HOUSING MARKET

In today's dollars, the Democrats have drained our economy of at least a trillion, and probably closer to $2 trillion for homes and factories. The price of homes is out of sight because the supply is too low for the demand. Why? Because the money which should have built them has been swallowed up by Government borrowing. To buy a new home, a person must go to the capital market and borrow twice or more what a home would have cost had those millions of homes been built—and lived in—by Americans all those years, and then sold, to the huge benefit of both buyer and seller. When every new home takes twice as much money out of the capital market to buy as it would have, the demand for credit is higher, and interest rates are driven yet higher. But those, says the Speaker, are "Reagan's interest rates."

DRAIN ON AMERICAN CAPITAL TO COMMUNIST COUNTRIES

Under the Speaker who says he represents "the average working man," tens of billions more dollars from our starved capital market have been loaned, at low rates, to Communist countries, making money for Rockefeller's Chase-Manhattan and other huge banks, with plenty of help from the U.S. Government. This money was vital to help the slave masters behind the Iron Curtain keep their economies from collapsing while they devoted their resources to a huge arms buildup while Democrats cut our defense steadily. That capital, which should have produced jobs here, made possible the military build-up we must now catch up with, either by more taxes or more debt. Bad as they are, these economic disasters are not the greatest danger liberal Democrats have faced us with. America is faced with a serious threat to its very survival.

SUMMARY

To anybody but a liberal, the important effect of all this has been to destroy American jobs by the millions, rob a generation of the ability to buy homes, to cripple our economy in years it should have been healthy and growing, and to make this the first time in over 300 years that the American people have not had by far the highest standard of living on Earth. But another point is that the healthy economy we could have had would have produced a lot more taxes at a lower tax rate.

Look at the powerful, thriving, growing economy the Democrats took over in 1955, and compare it to the one President Reagan has been trying to save from ruin since January 20, 1981. Picture that comparison in your mind, and then listen to the Speaker's words: "The monkey is off the Democrats' back. This is Reagan's deficit and Reagan's interest rates." These are the words of the legislator who calls himself a leader of the party of conscience, the party of compassion.

After all this, what exactly is it that Speaker O'NEILL is infuriated about? Deficits cannot bother him. He has never supported anything but a national debt bigger than the previous one he voted for. As one who has fought him every inch of the way, I can testify to that. He has supported giveaways to foreign countries, hundreds of billions of dollars, he supported giving away the Panama Canal, along with lots of money for Panama's Marxist dictator. He supported giveaways to bureaucrats, radical activists, welfare cheaters, and everybody else. But he is outraged by what he sees as a giveaway to taxpayers: President Reagan's tax cut. He is indignant about what his fellow liberal, HOWARD METZENBAUM, calls a "tax expenditure." A deduction or a tax cut is, to a liberal, an "expenditure" of money that they think rightfully belongs to the Federal Government. These dedicated liberals are honestly infuriated at "giving away" Washington's money to taxpayers. What scares me most is that this is not just political rhetoric from these elected leaders. This is genuinely the kind of thinking that has controlled both Houses of Congress since 1955. They really believe it, believe it or not.

## AGRICULTURAL TRADE: THE UNITED STATES MUST NOT BEGIN DUMPING SUBSIDIZED FARM EXPORTS ABROAD

(Mr. GIBBONS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, I want to talk to the House for just a moment about the agriculture bill that we are going to take up next week.

The Subcommittee on Trade of the Committee on Ways and Means has completed some studies. The views I express are only my own, but as I see this agriculture bill that is coming up next week, we are about to make some of the fatal errors we have made in the past on policy.

We are constantly as a nation going around complaining about other nations subsidizing and fostering their inefficient production on the world, and we rightly do that. But we undermine ourselves and we undermine our economy when we adopt an unwise agricultural policy.

We should stop subsidizing those inefficient industries in the United States that cost us money and cost us world markets and cost us an opportunity to spread our efficient products around the world. The milk provisions and the sugar provisions are some of the things that we should examine closely.

Mr. Speaker, agriculture is the brightest star in our Nation's export picture. In fiscal year 1981, we will export about $44 billion worth of farm goods and import only $17 billion, for a positive trade surplus in agriculture of $27 billion.

It is particularly important, therefore, that the United States lead the world in developing fairer and more open trade in agricultural products. Because agriculture is so important to each nation's security and is rooted in the history and culture of each nation, it is particularly hard to encourage liberalization of agricultural trade. There are probably more barriers to farm trade than to any other type of product.

Thus, it is a continuous battle to nudge the world toward more open, more rational, more fair trade in farm products. But because agricultural products are one of the strongest areas of America's export potential, this is a battle that we must continue to make.

For these reasons, it is particularly important that the United States take the lead in setting an example of fair, open, and nonsubsidized trade in farm products.

I am therefore very concerned about recent statements and proposals within the administration and the Congress that the United States unload certain Commodity Credit Corporation's stockpiles into the world market at 50 percent or less than the U.S. market value.

For example, the CCC has already contracted to sell to the New Zealand Dairy Board 220 million pounds of butter over the next 10 months. This sale alone equals about 8 percent of the entire year's world butter trade. There is a real danger that this precedent may be followed by the disposal, in a less orderly manner, of other dairy products. Indeed, this could become a precedent for other commodities as farm groups seek to keep support prices high and disguise some of the costs through overseas dumping.

Not only would this be unfair to the American consumer and taxpayer, but it would cripple the ability of the United States to complain and to act against such activities when they are practiced by foreigners and when they hurt America's nonsubsidized exports. If the United States proceeds to dump large quantities of products abroad, how can we complain about the Japanese using subsidized rice to destroy our rice sales to Korea and Indonesia? How can we complain about the European communities' subsidized sales of chickens, wheat flour, and sugar?

Clearly, the problem of what to do with the present mountains of dairy products is difficult. I do not have an answer on how to deal with this disposal problem.

But to prevent the accumulation of new excess stocks is possible. Clearly, to avoid the destruction of America's negotiating position on behalf of fair and free trade in world agriculture, we must adjust our agricultural support policies to avoid future excess stock accumulations.

The Congress of the United States can minimize future international problems by amending the farm bill, as requested by the administration, to provide the Secretary of Agriculture with the latitude he needs to operate the dairy support program in a manner that will once again lead to a reasonable balance between domestic supply and demand.

Present law would require the Secretary of Agriculture to set support prices between 75 and 90 percent of parity. After the first year a semiannual adjustment is also required. The administration favors giving the Secretary the discretion to set prices between 70 and 90 percent of parity, without a mandatory semiannual adjustment. The administration also seeks the authority to go below 70 percent of parity if CCC acquisition costs remain high.

During fiscal year 1982—October 1, 1981 to September 30, 1982—the dairy support program's cost is expected to reach $2 billion, with purchases up to 12.6 billion pounds of milk equivalent. In product terms, when the year is up the CCC is expected to have purchased 500 million pounds of cheese, 360 million pounds of butter, and over 750 million pounds of nonfat dry milk.

Unfortunately, disposal problems will persist for some time. This creates further pressures to sell surplus U.S. dairy products at subsidized prices in the world market. International and domestic economic realities clearly demonstrate the necessity to amend present law to hold milk support prices at reasonable levels and curtail the burgeoning U.S. surpluses.

Failure to do so will make the export of other, more efficient low-cost sectors of American agriculture more difficult. Continued excessive subsidy of the dairy sector will be paid for by all the other sectors of American agriculture. All Americans will suffer through the reduced earnings of American agriculture in the world's export markets.

## CONGRESSIONAL VIGIL FOR SOVIET JEWRY

(Mr. FOGLIETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOGLIETTA. Mr. Speaker, as a participant in the Congressional Vigil for Soviet Jewry, I rise to speak out in protest against Soviet persecution of Jews who seek permission to emigrate to Israel.

My adopted "Prisoner of Conscience" is Grigory Geishis, who, at age 20, is now serving a 2-year sentence in a labor camp for draft evasion. Grigory's situation is not unique. Many other young men who were refuseniks from childhood, have recently been called up for military service as the Soviets increasingly use this tactic to thwart Jewish emigration.

I am committed to work for the release of Grigory Geishis and other young men like him from Soviet prison camps. I am committed to work for the release of the Geishis family, and other families who are being denied permission to emigrate from the Soviet Union. I will continue the struggle until all are free.

Mr. Speaker, I rise to speak out in protest against Soviet persecution of Jews who seek permission to emigrate to Israel. I consider it both an honor and a moral obligation to join in this Congressional Vigil for Soviet Jewry by adding my voice to the chorus of others, both in this House of Representatives, and throughout the Nation, who have expressed outrage at the Soviet repression of these "Prisoners of Conscience."

I am addressing my remarks today to the plight of my own adopted refusenik, Grigory Geishis, a young man who, at age 20, is now serving a 2-year sentence in a labor camp for draft evasion.

Grigory, his parents and grandfather, applied for permission to emigrate to Israel on December 4, 1978. At that time he was a second year student at the Electrotechnical Institute for Communications in Leningrad. As a result of this request, he was denounced as a traitor and expelled from school. On May 25, 1979, his family was denied permission to emigrate because of the secrecy of his mother's former place of work. When his grandfather was granted permission to leave in July 5, 1979, he declined to do so without his son and grandson. Grigory was denied permission to leave with his grandfather on "humanitarian grounds," even though he had no secrecy classification.

When Grigory received a notice to appear before the military draft board in May 1980, he refused to enlist on the following grounds: He was not eligible, since he had been branded a traitor; in the military he would acquire, against his wishes, a secrecy classification which would prevent him from emigrating; and he could not be expected to fulfill his military obligations since he had been denied his civil rights to study and to leave the U.S.S.R. On August 8, 1980, he was sentenced to 2 years in a labor camp for draft evasion.

Grigory's situation is not unique. Boris Kalendariov, Aleksandre Vilig and Simon Shnirman have all been convicted and sentenced under similar circumstances. Aleksandr Yakir, the 23-year-old son of long term refusenik Rimma and Evgeny Yakir, and many other young men who have been refuseniks since childhood have recently been called for predraft examinations. Activists believe that the Soviet authorities are increasingly using this method as another tactic to thwart Jewish emigration from the Soviet Union.

I am committed to work for the release of Grigory Geishis, and other young men like him, from the Soviet prison camps. I am committed to work for the release of Grigory and the entire Geishis family from the Soviet Union, along with all of the other re-

fusenik families who are being detained there against their wishes. It is a difficult task, but not without hope.

I have had the satisfaction of seeing my first adopted Prisoner of Conscience, Yosif Mendelevich, leave the Soviet Union. From his new home in Israel he sent me the following telegram:

My sincere thanks to you for all efforts to secure my release. Please continue the struggle so that prisoners of Zion Anatoly Scharansky, Vladimir Slepak, Ida Nudel, Dan Ehrenburg, Viktor Brailovshy and Prisoners of Conscience Yuri Fodorov and Alexei Murzhenko and all others will be free soon.

I will continue that struggle, until all are free.

## FLOOR STATEMENT BY CONGRESSMAN ANDY IRELAND ON THE PASSING OF JAMES A. HALEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. IRELAND) is recognized for 60 minutes.

● Mr. IRELAND. Mr. Speaker, I have taken this time to pay tribute to our former colleague, James A. Haley, who passed away on August 6, at his home in Sarasota, Fla.

Jim served in the House for 24 distinguished years. In a town and an occupation that adds a certain amount of insecurity in one's life—Jim stood apart like a rock. He knew what was right and acted accordingly. He conscientiously worked hard for reduced Federal spending and a balanced budget long before it was fashionable in Washington. He was one of those politicians who first saw the implications of the past Federal spending policies and worked to turn them around. It is gratifying to know that before his death, he had the opportunity to see Congress moving in the direction he had pointed out many years ago.

Another area of concern to Jim was the conservation of our natural resources. As chairman of the Interior and Insular Affairs Committee, he worked to insure the establishment of the Big Cypress National Watershed Preserve in Florida to protect the water supply of the Everglades National Park. After this summer, we in Florida are well aware of the importance of insuring the preservation and the efficient use of our water supply.

Another deep concern of Jim's was our veterans. As a soldier in Europe during World War I, Jim knew personally of the sacrifices so many have made for our country and as chairman of the House Veterans' Affairs Subcommittee on Hospitals he worked to insure that they were compensated for these sacrifices. As a tribute to his efforts, the VA hospital in Tampa, Fla., was named after Jim.

During his tenure in the Congress, Jim was also chairman of the House Subcommittee on Indian Affairs. His conscientious concern for the problems of the American Indians earned him the title "Big Chief." And, he was particularly proud of his efforts to deal with the native claims issues.

As the Representative of the Seventh and later the Eighth Congressional District of Florida, Jim worked hard as an ombudsman for those he represented in the Congress. His constituents knew they had a friend in Congress who would help them in the bureaucracy. That is why they overwhelmingly elected him 11 times to serve them in Congress.

I, too, counted Jim as my friend and I consider it a privilege that I had the opportunity to follow in his footsteps by representing the Eighth District. He was a man that one could count on and one knew that he would give you all the assistance that he could. It was a privilege knowing him and knowing he was my friend. He was a man respected and admired by those who knew him.

I would like to take a moment to express my heartfelt sympathy for Jim's family and friends. We will all miss him. Because he was so important to so many, he will not be forgotten.

And now, Mr. Speaker, I would like to have inserted into the RECORD an editorial from the Winter Haven News-Chief:

JAMES A. HALEY CONTRIBUTED MUCH TO OUR DEMOCRACY

Thousands of Floridians today are mourning the death of former congressman James A. Haley, who served 12 terms in Washington.

We are saddened by the loss of Mr. Haley, a man whose dedication to his nation was exemplary.

As a member of Congress, Mr. Haley was noted as a conservationist, a man whose vision of the future always included a respect for protecting nature.

Veterans across the nation remember him as a champion of veterans' causes. He never forgot those who served their nation.

And American Indians had few friends as much interested in their causes than James Haley.

Haley never lost an election in nearly 30 years of public service.

That, alone, is a tribute to the greatness of the man.

Although saddened by his death, our loss is not quite so hard to bear knowing what a contribution he made to our democracy.

He was a giant of a man.●

● Mr. QUILLEN. Mr. Speaker, it is with sorrow that I join my colleagues to pay tribute to former Congressman James A. Haley of Florida who passed away last month.

Congressman Haley was first elected to the House in 1952 and served with distinction until his retirement in 1974. I was privileged to serve with Jim Haley for 12 of those 22 years.

Congressman Haley was a distinguished member of the Committee on Interior and Insular Affairs for many years and served as the chairman of the committee in the 93d Congress.

Jim Haley was known for his efforts on behalf of American Indians, and his genuine concern for their problems earned him the title of "Big Chief." He played a key role in the enactment of the Alaskan Native Claims Settlement and other important measures affecting American Indians.

Congressman Haley was also justifiably proud of his efforts directly benefiting his State. He was especially active in creating the saline water conversion program and the establishment of the Big Cypress National Watershed Preserve in Florida.

Congressman Jim Haley was a fine man and an outstanding Member of the House of Representatives. I mourn his passing and extend my sincere condolences to his family and friends.

● Mr. YOUNG of Florida. Mr. Speaker, we come today, to honor a man who contributed over 30 years to public service. Former Congressman James A. Haley served both the State of Florida and the United States with dedication and distinction. Although he showed concern and compassion for his district and his constituents, he may well be remembered as a champion of the Armed Forces veterans. In fact, while Jim was a member of the Committee on Veterans' Affairs, he became the driving force behind the Tampa VA hospital, which now bears his name.

Yet, Jim was also a man of many diverse talents. Prior to his election to the House of Representatives, he worked as a newspaper publisher, an accountant, president of Halocoe Printing Co., and even became general manager of the John Ringling estate and president and director of the Ringling Bros., Barnum & Bailey Combined Shows.

Although our years together in the House of Representatives were few, I appreciated his thoughtful direction. His hard work and dedication was an inspiration to us all. As a fellow Congressman, Floridian and friend, I can honestly say Jim will be missed.●

● Mr. PHILLIP BURTON. Mr. Speaker, it was with deep regret that I learned about the death of our former colleague James A. Haley on August 6. Having served with Jim on the Interior Committee, which he chaired during the 93d and 94th Congresses, I can testify to the dedication and conscientiousness he brought to the work of the committee. Jim was a conservative and a conservationist long before the two labels were mistakenly portrayed as incompatible. An example of his ecological foresight was Jim's leadership in protecting the Big Cypress Swamp in Florida—thereby also protecting the water supply of the area. His concern for people was demon-

strated in his efforts on behalf of the Alaska Native Claims Settlement Act and the Indian Self-Determination Act. But Jim's record of public service is only part of the legacy he left. His dignity and his goodness have left a lasting mark as well.●

● Mr. HORTON. Mr. Speaker, this House is again saddened by the news of the death of former colleague Hon. James A. Haley. I had the distinct pleasure of knowing Jim well and of serving with him.

Throughout his 24 years of service in the House of Representatives, Jim Haley registered a distinguished record of accomplishment in a number of areas. As a member of the House Interior and Insular Affairs Committee and the Veterans' Affairs Committee, Jim developed a recognized expertise in the programs under the jurisdiction of these committees, an expertise on which his colleagues were able to rely. His departure from the House in 1971 was widely regarded as a loss to this great institution.

I join my colleague from Florida, Congressman IRELAND, in paying tribute to the memory of Jim Haley and in extending our condolences to his family.●

● Mr. BENNETT. Mr. Speaker, it is an honor to pay tribute to the late James Andrew Haley, former U.S. Congressman. His was a spectacular life of achievement and service to his fellowman. He was born in Jacksonville, Calhoun County, Ala., January 4, 1899, attended the public schools and the University of Alabama, enlisted in Troop A, 2d Cavalry, in April 1917 and served overseas in the campaigns of Chateau-Thierry, St. Mihiel, and the Argonne Forest.

From 1920 to 1933 he was an accountant in Sarasota, Fla., then general manager of the John Ringling estate and then president of Ringling Bros., Barnum & Bailey Circus until 1948. He was also engaged in newspaper publishing and in the general printing business, as chairman of Halco Printing Co. He married Aubrey Ringling and, although he had no children, her children by her deceased former husband became his children in fact.

In the field of government he served with distinction in the Florida House of Representatives in 1948 and 1950 and was elected to Congress in 1952 and served with distinction until his retirement from the 94th Congress. Here in Congress he served in leadership and with great ability and great legislative attainment both on the House Interior and Insular Affairs Committee and on the Veterans' Affairs Committee.

He was a magnificent man and we all mourn his recent passing. Certainly he left behind him a monument of good works and a wealth of inspiration for all who knew him or knew of him.●

● Mr. FASCELL. Mr. Speaker, I share our deep sense of loss over the recent passing of one of Florida's most dedicated Members of Congress, James A. Haley. I had the privilege of serving with Jim both in the Florida Legislature and in the Congress, and I will always be grateful to him for his friendship, words of advice, and good judgment.

Jim was a man who loved the environment, and his work as chairman of the Interior and Insular Affairs Committee serves as a reminder of his commitment to preserve and protect our natural areas for future generations. The people of south Florida will remain indebted to him for his work toward the establishment of the Biscayne National Monument and the Big Cypress National Preserve. But we must also credit Jim for his foresight in helping to enact sound, responsible legislation which addressed our energy needs without ignoring our environmental concerns.

Jim was also a man who loved this country, and he did what he could on behalf of those Americans who, like himself, put their lives on the line to defend the Nation. He was always concerned over the special needs of veterans and, largely as a result of his efforts, programs were established and hospitals were constructed which benefited veterans throughout the country.

Jim retired from Congress 5 years ago because, as he stated, there comes a time when public servants should step aside to allow future generations to leave their mark on Congress. Many of us joined in paying tribute to Jim then, and recall his last appearance on the floor of the House. As he reflected over his many years in Congress, Jim said:

> I hope that my service here of 24 years has added a little something to make this Nation a better place for my grandchildren and great-grandchildren, and your children, to live in this great Nation of ours.

I am sure that Jim would be proud to know that we have remembered him today, and that his dedication and efforts on behalf of the people of Florida, and of the entire country, will not be forgotten.●

Mr. SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, another in a long string of articles purporting to show Wall Street's newround disaffection for the administration's economic program appeared yesterday in the Washington Post. Mary McGrory, no erstwhile proponent of Reaganomics herself, writes that big business and recalcitrant liberals are ironically linked in their opposition to the interest-fueling budget/tax cut package.

We have heard a lot of this line recently, so it was quite a surprise to receive the results of a business poll in the mail yesterday which indicates exactly the opposite. The nationwide opinion survey, conducted by Touche Ross, tallied responses from 1,606 corporate leaders—over 63 percent of whom were chief executive, financial, or operating officiers of their respective corporations—representing a wide spectrum of the business community in terms of size, type, and geographic location.

When asked if they thought the next tax bill goes far enough in removing obstacles to investment and productivity, more than 53 percent replied "no." When asked if the new tax bill will benefit their companies, over 85 percent said "yes;" conversely, on whether it would hurt business, 97 percent said "no." Nearly 51 percent chose capital recovery allowances as the strongest feature of the new bill. When asked what the effect of the new tax law on the economy would be, 87 percent replied that it would increase investment incentive, fight inflation, or have some other positive psychological effect.

That does not sound like wailing and gnashing to me. In fact, it sounds pretty positive and true to form. Also true to form was the day before yesterday's surge in the stock market following the decline in the prime rate to 19½ percent. I believe it ought to be apparent to everyone here that economic events will run their course if we simply allow them to. That does not mean tampering with short-term stopgap measures or raising taxes or revising the next tax law or artificially propping up sagging industries. It means balancing the budget by trimming deficits so that interest rates can fall, thereby promoting further and more long-lasting economic surges.

This Member has on previous days over the course of the past 2 weeks taken some time at the close of our session and read from a study prepared for the Republican Research Committee's Economic Task Force Budget Study Subcommittee. This subcommittee produced a work product in the latter part of July wherein we identified 272 items where savings could be made in fiscal year 1982. These totaled some $52 billion.

We are not necessarily suggesting that these items should all be implemented. We are saying that if the Congress would assert the courage in this institution to make the cuts necessary to balance the budget, these items, among others, certainly should be considered.

On previous days I have read very briefly through items relating to Legislative, 21 cuts; Judiciary, 8 cuts; Executive Office, 4 cuts; Funds for the President, 15 cuts; Agriculture, 27 cuts;

Commerce, 8 cuts; Defense (military), 15 cuts; Defense (civil), 4 cuts; Education, 9 cuts; Energy, 13 cuts; and Health and Human Services, 16 cuts.

Today I would propose to read through a list of cuts for Housing and Urban Development totaling 15, for some $3,304,249,600; and in the Department of the Interior, 6 cuts totaling $297,557,300.

The first item from HUD is housing programs, subsidized housing. In this category we would allow 20 percent above fiscal year 1980. The proposal as it is in the present law would provide for a 51.4-percent increase over the preceding year. Moreover, the GAO finds considerable overcommitment of funds due to inaccuracies in contracts.

We believe this is excessive and should not be tolerated. If adopted, this would save $1,421,941,800.

In housing programs, payments for operation of low-income housing projects, we would cut 10 percent from 1981. These projects have been ill-advised, ill-conceived, and ill-managed. We propose eliminating operation of the most wasteful portions of those projects and achieve savings of $215,080,000.

□ 1820

Housing programs, congregate services would be eliminated. Funding authority for this program has already been deleted and remaining outlays should follow suit. This would save, if adopted, $5,300,000.

Housing programs, troubled project operation subsidy; we would allow 20 percent above 1980. The additional funding of housing projects is redundant. If the worst offenders would be deleted we could remove that redundancy. This would save, if adopted, $57,399,200.

Housing programs, low-rent housing loans and expenditures; we would allow 20 percent above 1980. The current proposal is for a 173.5-percent increase from 1980, which is altogether, in our judgment, unnecessary and unreasonable. If implemented, this would save $51,473,400.

Government National Mortgage Association, special assistance functions; we would improve this by following the recommendations of the General Accounting Office for improving accounting procedures which, if adopted for this program, would save $22,700,000.

GNMA, emergency mortgage purchase assistance; we would improve the servicing of multifamily mortgages and provide incentives for prompt payments. This, again, is a recommendation of the General Accounting Office. If adopted, it is estimated to save $500 million.

Community Planning and Development, community development support assistance, we would cut 10 percent from proposed funding for block grants, not including UDAG. These grants have helped corporations and developers, not the needy. This would save $411,300,000.

Community Planning and Development, community development support assistance, we would eliminate UDAG funding to decaying inner cities, which should be redeveloped under the concept of enterprise zones, not out of subsidies from the public Treasury. If implemented and adopted, this would save $500 million.

New Community Development Corporation; we would eliminate funding for this program because we feel it can be better financed in creation of enterprise zones. If adopted, this would save $37,117,000.

Neighborhoods, Voluntary Associations, and Consumer Protection, interstate land sales; we would eliminate this on the grounds that the Federal Government should never have gotten into this area to begin with and, in addition, this regulatory body has expanded into the intrastate field as well, which certainly is not justified. If implemented, this would save $300,000.

Fair Housing and Equal Opportunity; we would eliminate this on the grounds that it is unnecessary; it should not be functioning as a separate program but rather as policy. If adopted, this would save $6,100,000.

Management and administration, public assistance and income supplement; we would allow a growth of 20 percent above 1980. Currently, proposed spending represents a 51.8-percent increase from 1980, which we believe to be excessive. If implemented, this would save $19,572,800.

Management and administration, law enforcement activities; we would allow a 20-percent growth above 1980. The proposed increase is unnecessary because of cutbacks in enforcement activities. If implemented this would reduce spending by $1,570,400.

Finally for this category we would follow the recommendation of the General Accounting Office by correcting auditing procedures which, if implemented, would save $54,395,000.

In the Department of the Interior, the first item here of the six that are proposed departmentwide, we would correct auditing procedures recommended by the General Accounting Office which, if implemented, would reduce spending for this category by $59,510,000.

Land and Water Resources, BLM range improvement; we would cut 10 percent from 1981 by limiting further land acquisition. If implemented, this would save $1,350,000.

Land and water resources, BLM resource management; we would cut 10 percent from 1981 by restricting regulation and management. If implemented, this would reduce spending by $24,482,500.

Land and water resources, BLM miscellaneous permanent appropriation, general purpose fiscal assistance; we would allow 20-percent growth above what was spent in 1980. The current proposal allows a 74.4-percent increase from 1980, which we perceive as unwarranted. This, if adopted, would save $201,515,600.

Land and water resources, water and power resource service, general administration; we would allow 20 percent above 1980. The proposed 50.1-percent increase from 1980 is, in our judgment, excessive and should not be tolerated. This, if implemented, would reduce spending in fiscal year 1982 by $8,899,200.

Land and water resources, Office of Water Policy, salaries and expenses; we would eliminate this new agency on the grounds that it is not needed. There is little justification for its existence, in our opinion. This, if implemented, would reduce spending by $1,800,000.

To sum up this category of the Department of Interior, these six items would result in spending $297,557,300 less in fiscal year 1982.

For the Department of Housing and Urban Development, the 15 items total $3,304,249,600.

Some Members in this Chamber may from time to time ask the question:

If it is so simple, why do we not do it? That is, why do we not balance the budget? Why do we not assert the necessary independence to bring the discipline to bear to match the outgo with the income and remove one of the great obstacles to economic recovery of this country?

The answer to that question is puzzling, but it is probably more political than anything else. There is a drum beat that runs through these Chambers which says that if the Members exhibit the courage to cut the spending, this will aggravate those people and organizations adversely affected, and these same special interests who are cut down or cut off will retaliate against the offending Members in the voting booth. That philosophy has been driving this institution for almost a generation. It still is the controlling philosophy in this Chamber.

Then you may ask what hope is there for the people of this country if we, who have the stewardship of raising taxes and voting spending, do not have the courage to match the outgo with the income? I think one constructive way is to demonstrate that we can balance the budget of this Nation in fiscal year 1982 while at the same time providing for the recognized needs of the downtrodden, the poor, the handicapped, and the deprived in our society. Because when you analyze these items that I have been reading, I challenge Members to stand up and honestly say that we cannot do that because if we adopted this or that item we would be working against the genu-

ine interests of the poor, the downtrodden, the handicapped, and the deprived, those who do not have the ability to fend for themselves.

I say to the Members here, look at these items carefully. We have prepared them in all sincerity. We as an institution cannot go on year after year spending more money then we take in.

In this fiscal year, which will close in less than a week, we will have probably gone into debt roughly $90 billion. In the last 5 years we have added to our national debt over $300 billion. Notwithstanding the election of November 1980, the spending of the Congress of the United States is today out of control. The Members of this institution do not have the discipline, at least as they have exhibited it up to now, to match the outgo with the income.

□ 1830

I think the constructive thing for us to do is to demonstrate with a work product of this type that we can cut spending, we can cut our bureaucracy, we can cut out waste, fraud, and abuse. I think it is reasonable to undertake this effort in a bipartisan way and try to bring some fiscal sanity into the affairs of this Nation.

## THE PRESIDENT'S ECONOMIC PROGRAM IS NOT WORKING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 60 minutes.

GENERAL LEAVE

Mr. BONKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. BONKER. Mr. Speaker, PAT WILLIAMS and I want to thank you for giving us this opportunity to focus the attention of the House on a situation of grave importance to the Western States.

For as we know all too well in the Pacific Northwest, the President's economic program is not working. There are those who say—"it is too soon to tell." Presidential Adviser Ed Meese's earlier statement that the program is "80-percent psychological" is absolutely correct. It is psychological and it can be summed up in one word: "depression."

The real problem is that this economic program does not directly address the twin problems we face in the Northwest—and that many areas of the country are experiencing—high interest rates and high unemployment.

Unfortunately, the White House and the Federal Reserve Board continue to use high interest rates as the chief weapon against inflation. On June 13, Treasury Secretary Regan said: "You cannot get inflation under control without having high interest rates."

Not only is this policy wrong, it is counterproductive.

I see where interest rates have dropped by 1 percentage point, but the Federal Reserve called the drop only a "technical response," and there is no hope for long-term relief.

There are currently eight counties in my district suffering from double-digit unemployment. In some areas, real unemployment is as high as 30 percent. In the first quarter of 1981, some 11,400 lumber and wood-products workers in Washington State were out of a job because of mill closures and slowdowns. This is 20.4 percent of the total wood-products workforce. Entire communities are being devastated.

The current economic recovery program is coming at the expense of the Pacific Northwest.

Part of the problem is that this administration has essentially left the housing industry out in the cold—there is no coherent policy to help America build housing, at a time when demand is greater than ever. Not only is housing suffering, but the automobile industry, and many, many small businesses—all those enterprises that are at the mercy of high interest rates—are taking an undue share of the sacrifice required by current policies.

The disastrous decline of our housing industry has been extremely inflationary. Later on in today's special order, I will be submitting statements for the RECORD from homebuilders nationally and in my district as to the crippling effect interest rates have had upon their industry.

The current housing slump has cost 1.1 million men and women their jobs nationwide, and an additional $18 billion in wages. This is not merely a slump, it is a crisis.

It has resulted in the direct loss of more than $5.5 billion in taxes for local, State, and Federal Governments. In addition, the soaring jobless rate in the housing and wood products industries has added as much as $4.6 billion to Federal outlays for unemployment benefits, food stamps, and other programs designed to aid the jobless.

The President and his economic advisers promise that favorable expectations will shortly bring down interest rates. They have been making that promise since January. It is not going to happen. There is not any reason for it to happen precisely because it is their policies that are creating those high interest rates.

The President says he can step on the monetary brakes to decelerate inflation while stepping on the fiscal accelerator with large tax cuts and sharp increases in defense spending to speed up economic growth. As MIT economist Lester Thurow has noted recently: "Nowhere else in the world has this been possible."

Tight money always stops growth—whatever its effect on inflation. The simple theory of supply and demand also tells us that if you reduce the rate of growth of the money supply and increase the demand for funds to finance an economic expansion, interest rates go up.

The President expects $514 billion in social welfare spending cuts to offset more than $700 billion in tax cuts and $1.5 trillion in defense spending over the next 5 years.

The numbers simply do not add up. The only way to achieve a balanced budget under those conditions is to totally destroy the social safety net the President is on record as supporting. Short of this, there is only the social security system.

The time has come for Congress to act. I am happy to see my colleagues offering rational alternatives to this present course. It makes no sense to give $11 billion in tax relief to the oil companies when the community college system in my State may be shut down entirely due, in large measure, to a drastic reduction in Federal funds for education.

During the debate on the tax bill, I supported the Udall-Obey substitute. This bill would reduce Government borrowing by $40 billion next year by phasing in tax cuts for individuals and providing small tax reductions for the richest 25 percent of all taxpayers. It also strips the new tax code of those provisions that amount to little more than corporate welfare.

It has not yet been determined whether this sane tax approach will be offered as an amendment to the second concurrent budget resolution, or as a separate bill. In either case, I believe it deserves the serious consideration of the House.

A $40 billion reduction in Federal borrowing is the only plausible means of bringing about a significant drop in interest rates at the current time.

The rapidly growing deficit demonstrates we cannot afford new welfare programs for commodity traders, oil companies, and the super-rich. The administration's tax program has put us so far out of kilter that even the drastic cuts already mandated are not sufficient to restore economic stability to the money markets and the stock exchange.

Tomorrow evening, when President Reagan addresses the Nation, he will

present us with only one alternative: slash the social safety net, dismantle the social security program. It is not likely our Republican colleagues will support something that is so irresponsible.

It is Kemp-Roth that is the Achilles' heel of the President's economic program and the sooner we realize and accept it the better off we will be.

Meanwhile, the President ought to appoint a high-level task force to report on the housing crisis in the country and come up with some answers before the housing industry vanishes from the American scene.

● Mr. COELHO. Mr. Speaker, I share the concerns of my fellow colleagues about the impact which high interest rates have on the housing industry. In recent weeks, I have been contacted by mail, telephone, and in personal visits by people who work in the housing and real estate industry to say that their jobs are literally evaporating because of the persistence of ridiculously high interest rates.

In my district, builders and contractors have laid off seasoned and skilled employees and workers, real estate firms have cut back on their sales forces, lenders have been forced to dismiss experienced loan processors and appraisers, all because the housing market is approaching a state of collapse. While it is indeed tragic that these cutbacks are occurring, the real tragedy is that most of these people are probably lost to the housing industry for good—they simply cannot wait around for things to get better so they try to get employment elsewhere, thus further compounding housing's recovery at some point in the future.

While we all agree that inflation must be stopped to benefit the American consumer and American businesses, the President must recognize that relying so heavily on tight money may destroy the businesses we are trying to "protect."●

● Mr. UDALL. Mr. Speaker, I rise with my colleagues today to address the serious economic problems facing our society, particularly those of high interest rates and massive deficits.

In slightly more than 7 weeks, the impact of the adoption of the administration's tax plan has become only too clear. Today Americans are confronted with unacceptably high interest rates on top of accelerating inflation, a virtual decimation of the bond market, and a nosedive in stock values. If a dramatic change in our present course does not lower interest rates, thousands of businesses and farms may turn "belly-up" in the near future.

High interest rates severely damage our economy in two ways. First, they add to the debt burden carried by the U.S. Government, and this in turn substantially widens the budget deficits projected by the Reagan administration. Second, high interest rates symbolize a growing skepticism about the President's economic program among those people who are supposed to know the most about money and our economy's future, namely the business and financial community. It is little wonder then that Harry Ellis, senior economics correspondent for the Christian Science Monitor, wrote on September 21 that:

> Money men anticipate that the U.S. Treasury's revenue loss from tax cuts, combined with higher defense outlays, would push the budget deeper into red ink, not toward balance. If this indeed works out to be true, interest rates are bound to stay high.

We need more than a Presidential policy of lashing out at those who disagree with a high deficit budget and radical tax program because of their doubts and calling them "Chicken Littles." In short, a constructive alternative focus is needed for emergency action now. I propose that such an alternative exists and it is the Udall-Obey emergency tax cut, H.R. 4504. That alternative is the tax package put before the House in July, and reintroduced this September. Our tax proposal would reduce Government borrowing by $40 billion next year by phasing in tax cuts for individuals and providing small tax reductions for the richest 25 percent of all taxpayers. It also strips the new Tax Code of numerous provisions resembling corporate welfare. Our plan offers significant new incentives to American industry, gives the majority of Americans a larger tax cut next year than can be expected under the administration's tax program, and balances the budget in 1983 and 1984 (after a near-miss next year).

The declining state of the economy is amply demonstrated by recent trends. The CPI in August increased at an annual rate of over 15 percent, and the prime is stuck at over 20 percent for the seventh consecutive week. While over 1 million construction employees are idle, fewer than 10 percent of Americans can carry a median-price home mortgage. Utility bonds are paying 15 to 17 percent, and tax-free State and municipal bonds are paying 13 to 15 percent. The Dow Jones Industrial Average is down 100 points since early August, a 14-month low. Housing starts and new mortgage volume are both way down over 1979 and 1980, and total construction failures are up 41 percent over this time last year. Further, 2,300 automobile dealers have gone under in the last 2 years.

The budgetary and economic implication of the administration's tax plan are particularly significant because 60 percent of the Federal budget is indexed to economic indicators, and therefore beyond the immediate control of the Congress or the President. The administration sees the real GNP expanding 2.6 percent this year, 3.4 percent next year, and 5 percent in 1983. Failure to meet these goals would be costly. A 1 percentage point lag in real GNP widens the deficit by about $8 billion. Already, real GNP decreased 2.4 percent annually in the second quarter of this year. Moreover, every percentage point by which interest rates exceed budget assumptions increases Federal debt-carrying costs about $2.4 billion per year. The administration assumes the rate on 91-day Treasury bills will average 12.55 percent during the second half of this year. The rates averaged 14.9 percent in July and 15.5 percent in August 1981.

We are not alone in our concern, and in fact have been joined by some of the most respected conservative observers in the country. They acknowledge the serious flaws in the administration's program. George Will observed (September 10, the Washington Post):

> The most entertaining irony of the autumn is that although Reagan preaches respect for the markets, the financial markets are not expressing respect for his program. Even the Wall Street Journal says the balanced budget of 1984 is "a dream, not a forecast."

Professional economists are as skeptical, reports the Wall Street Journal, August 31:

> Few private economists believe President Reagan will succeed in his pledge to deliver a balanced budget in 1984 . . . given the mandated tax cuts, the uncertain economic outlook, and the administration's commitment to a hefty increase in defense spending. For instance, Lawrence Chimerine, chairman of Chase Econometrics, the forecasting firm, believes there is a "strong possibility" that the deficit "could reach $100 billion in each of the next several years." This prospect, he notes, is keeping interest rates high by "preventing an improvement in inflationary expectations."

Business Week offered this observation on September 7:

> The stock market and the money markets are sending a message to the administration that its program is not expected to work. The money markets are clearly saying the inflation will be worse than the Government believes, while the stock market is also worrying about recession and its impact on earnings.

Former Defense Secretary, CIA Director, and acting budget director James Schlesinger wrote on September 9, in the Washington Post:

> The recent tax legislation . . . seems likely to go down in history as the single most irresponsible fiscal action of modern times. Unless the tax reductions are reversed . . . on the basis of present legislation and projected defense spending, the Nation faces growing budget deficits of $65 billion in 1982, $90 billion in 1983, and $120 billion in 1984.

When the Congress passed the administration's tax package, we were not told that there would be cuts in defense, or that deficits would be

higher than expected, or that the budget would not be balanced in 1984, or that deeper cuts would be necessary in nondefense areas. Circumstances have changed, and we should act accordingly.

There are four major reasons why you should support our bill. First, no other proposal offered can realistically be expected to cut the Federal deficit and Federal borrowing for fiscal 1982 by more than $40 billion. Yet, that kind of abrupt reduction in Federal borrowing is the only plausible means of bringing about a significant drop in interest rates at the current time.

Second, the rapidly growing deficit demonstrates we cannot afford new welfare programs for banks, commodity traders, oil companies, wealthy American businessmen living overseas, and the superrich here at home. The administration needs to tell them that America just cannot afford every windfall they desire.

Third, the administration should not retreat from its agreement with Congress on the level of cuts for programs like the education of the handicapped and home heating assistance for the elderly. Originally, the administration rammed the budget down the throat of Congress. They should not back out now because of a sudden timidity of saying "no" to special interests.

Finally, the failure to make the tax revisions we recommend may easily lead to forcing Congress to make further cuts in social security over which Congress has already expressed opposition. In plain terms, the administration's tax program has put us so far out of kilter that even the drastic cuts already mandated may not be sufficient to restore economic stability to the money markets and the stock exchange.

In short, we can do more than just talk about high interest rates and massive deficits. We can adopt a prudent tax policy that will promote a balanced budget and reduce the Government's involvement in the credit markets. I urge you to join us in support of H.R. 4504, the Udall-Obey emergency tax cut.●

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. BONKER. I yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

Mr. Speaker, let me thank my colleague from Washington (Mr. BONKER) for inviting me to participate in this special order.

I share the concern of my colleagues who have spoken here today, and who have yet to speak, on the effect of high interest rates on the well-being of the Northwest. And, really, when I say the Northwest, any of you could substitute your region of the country, because sky-high interest rates are wreaking havoc across the Nation.

First, the good news—interest rates fell this week. Now the bad news—they are still at crippling levels. Leading banks have reduced their prime lending rates to 19½ percent, down from 20 or 20½ percent. The rate on a 13-week T-bill has fallen to 14.198 percent, from a level of 14.412 a week ago. This is the lowest rate we have experienced since mid-July. Also 26-week bills are down to 14.129 from 14.657 a week ago. Hey, fellows, things are looking up.

Look back a few years to the time you purchased your first home. For a young person, purchasing a first home is a big step, and it probably seemed like the price was high and the mortgage endless.

But most of us bought our first home at rates less than half of what is being charged today. Just for the heck of it, I called the mortgage loan division of the Riggs National Bank here in Washington today, to ask what the rate would be for a conventional, 30-year mortgage. For depositors of the bank, that rate is 18 percent annually, plus 1 point. For nondepositors, it rises to 19 percent annually, plus 1 point. Think about this for a minute. On a $60,000 home, which you cannot find around here, payments per month at an interest rate of 8 percent would be $440 over 30 years. Double that rate to 16 percent, and the monthly payment rises to $807. Increase the rate to 19 percent, and the payment is $953. How many of you could have afforded even a modest home as young people with payments of $953 every month?

In the Northwest, the high interest rate policy has hit particularly hard. We have disproportionate dependence on the forest products industry for the health of our economy in Washington State, so when building drops off, we get burned. Without a market for lumber, one of our biggest industries is crippled.

Overall, Washington State had an unemployment rate for 1980 of 7.6 percent. Projections using 1981 figures indicate an increase in that rate for the current year, making the rate approximately 9.3 percent for 1981. For the record, I would like to break those numbers down by county for the areas most hard-hit in Washington:

UNEMPLOYMENT

[In percent]

| County | June 1980 | June 1981 |
|---|---|---|
| Clallam | 11.3 | 14.3 |
| Cowlitz | 11.7 | 13.7 |
| Grays Harbor | 8.5 | 13.1 |
| Jefferson | 8.3 | 11.7 |
| King | 6.0 | 7.9 |
| Kitsap | 5.9 | 7.1 |
| Lewis | 10.9 | 14.1 |
| Pacific | 10.0 | 14.5 |
| Pierce (Tacoma SMSA) | 8.0 | 9.4 |

The areas most affected are those which are dependent primarily on the forest products industry.

The Washington Department of Commerce and Economic Development has provided me with some figures on the falloff in employment in the lumber and construction trades which I think tell the story dramatically.

Housing production has fallen in Washington from 61,168 units in 1978, to 32,423 in 1980. That is a reduction of 28,745 units—and Washington is a growing State. Vacancy rates are at a minimum, but builders cannot afford to produce the necessary stock. People are moving West, but the homes they will need are not available. Real estate brokers are turning in their licenses at record rates, reflecting the slow pace of home sales.

Construction employment in 1979 was at a level of 104,200 in Washington, but fell to 91,500 in 1980. When an industry loses nearly 13,000 jobs in a single year, that industry is faltering.

The story is similar in the lumber and forest products areas; 7,400 jobs have been lost since 1979 in wood products fields in Washington State.

The lumber, plywood, and logging industries in the Northwest now have a record high 20-percent unemployment rate.

This morning, I received word that the St. Regis Co. would be shutting down both its sawmill and its studmill in Tacoma, laying off 250 people. Tacoma already had an unemployment rate of 9.4 percent.

According to the secretary of the State commerce and economic development department, Richard Schrock, unemployment in the State of Washington is at a level comparable to the slump which occurred in 1970–71, when the Boeing Co. was suffering under a slowdown in the aerospace industry, and the State was in an economic tailspin.

We cannot afford to wait for the Federal Reserve Board's restrictive monetary policy to be effective. We need relief now.

On Monday, our colleague from Massachusetts, Mr. FRANK, made a speech which impressed me in its clear presentation of the situation. His topic was the Federal Reserve Board and monetary policy, and he drew on material presented by Beryl Sprinkel, the Under Secretary of the Treasury for Monetary Policy. As the official spokesman for the Reagan administration, Dr. Sprinkel assured the Congress that the Federal Reserve was doing a terrific job, and that the administration supported their interest rate policy. This is after the passage of the budget bill, and taking into account the impact of the tax reductions. Even given these factors, Sprin-

kel is backing the Fed 100 percent, saying:

With a steady deceleration of money growth, any effect of the impending deficits on interest rates would be more than offset by the reduction of inflationary expectations.

That, to me, is an endorsement of the actions of the Federal Reserve Board. Sprinkel is telling the Congress not to worry about the effect of interest rates on the deficit. He is telling the Congress that high interest rates are OK with the administration.

I get mad at these economists and budget wizards who sit in their nice offices and tell the rest of us not to worry. Given the situation in my State and my district, I would be crazy not to worry. I cannot have faith in the administration's plans when people in my district are out of work, when plants are closing down, when unemployment is at a 10-year high.

And now, just 2 months after Dr. Sprinkel's address, the administration is backpedaling on its unqualified support for the policies of the Fed. Well, I say, nice try, fellas, but it will not work. It is too late to disassociate yourselves with this tight money policy; it is too late to try to tell the American people that you did not mean it. People losing their jobs and their businesses do not want to hear it.

Of the Northwestern States, Washington has the highest unemployment rate—9.3 percent for the current year. High interest rates nationally have resulted in the worst recession in the home sales market in the post World War II era. Our dependence on the forest products industry has made us particularly vulnerable to the falloff in the housing market. Interest rates must come down. The economic viabilty of the Northwest depends on it.

At this point, Mr. Speaker, I would like to insert in the RECORD a letter which I received from the Independent Business Association, and I would like to read a quote from that letter:

Small businesses are usually in very competitive markets which make it difficult for small businesses to pass on cost increases. Small businesses that were paying 10 percent for their money 2 years ago are forced to pay 23 percent now. These small businesses find it difficult to pass on this large cost increase and their profits are quickly eroding.

I would also like to put in a statement from the National Association of Realtors.

I guess the bottom line here is I had an opportunity in August, before the recess, to meet with the President of the United States and to talk to him directly about his economic recovery program. At that time I told the President that I wanted to talk to him about one important thing, and that was the question of high interest rates and the impact of a high interest rate policy on his economic recovery program.

I told him that I had been home every weekend during the summer, and that in my view there was not going to be an economic recovery unless the administration convinced the Fed that its tight money policy, which produces high interest rates, was going to lead to disaster, not only in the homebuilding and forest products industries, but in automobile manufacturing and sales, and small businesses across the board.

I told the President that if he did not take some steps quickly, we were going to be faced, in our particular part of the world, in the Northwest, with tremendous bankruptcies and insolvencies over the next 2 years.

The President insisted at that point that a high interest rate policy was not part of his economic recovery program. And I said to him at that point, "Yes, Mr. President, but why are your people up before the Congress on a daily basis testifying that they support this kind of a high interest rate policy and endorsing what the Federal Reserve Board is doing?"

He said, "Well, we talk about it, and we talk about it in the Cabinet meetings."

I told him, "Mr. President, it is going to take a lot more than talk."

And as my colleague from Washington (Mr. BONKER), whose district is tragically affected by this high interest rate policy has already pointed out, we do not even have a plan for homebuilding in this country.

So I think it is time for this administration to come clean with the American people, to face up to the realities of the high interest rate policy and its impact on business, and its consequence on jobs in human terms.

I applaud my two colleagues from Washington and my colleague from Montana for their leadership in taking this special order, and I am going to work with them to see if we can find policies to provide concrete answers to this very difficult problem.

The letters follow:

INDEPENDENT BUSINESS ASSOCIATION,
*Bellevue, Wash., September 21, 1981.*

We appreciate the opportunity to provide you input on high interest rates and its effect on small business.

Independent Business Association represents small business exclusively and has over 3,500 members in Washington State. IBA would like to briefly comment on what the adverse impact of the administration's high interest policy has on small business.

Small businesses are the least able to afford these high interest rates and have been drastically affected. Small businesses need short-term credit simply to stay in business. Small businesses find it extremely difficult to get a loan during recessionary times, since small businesses are considered "riskier" than a large business. If small businesses can get a loan, they usually pay 2 to 3 percent above what a large business pays.

Also, small businesses are usually in very competitive markets which makes it difficult for small businesses to pass on cost increases. Small businesses that were paying 10 percent for their money 2 years ago are forced to pay 23 percent now. These small businesses find it difficult to pass on this large cost increase and their profits are quickly eroding.

We believe the following data reflects the adverse impact high interest rates have had on small businesses. The data compares 1980 to 1979 when the economy, like now, was experiencing a recession and high interest rates. This data was taken from the Washington State Department of Revenue.

Out of a total of 52 standard industrial classifications, businesses with sales of less than $100,000 per month had a decline in sales of 15 percent as compared with a year ago. Businesses with over $100,000 in sales per month had an increase in sales of 13 percent over the same period. This 28 percent gap in sales for small businesses is what's forcing them out of business. Below are some comparisons for the first and second quarters of 1980 relative to 1979 of some representative Washington industries. This more clearly spotlights the plight and trend of small businesses in Washington's economy.

| | Percent change | | | |
|---|---|---|---|---|
| | 1st quarter | | 2d quarter | |
| | Smaller | Larger | Smaller | Larger |
| General construction | −17 | 7 | −31 | −14 |
| Wholesale durable | −7 | −4 | −9 | −12 |
| Wholesale nondurable | −11 | 37 | −8 | 16 |
| Auto dealers and service stations | −26 | 0 | −23 | −9 |
| General merchandise stores | −8 | −4 | −10 | −5 |
| Miscellaneous retail | −6 | 20 | −15 | 11 |
| Machinery | −8 | −2 | −13 | 4 |
| All businesses | −9 | 5 | −15 | 13 |

It is difficult to argue if the administration's high interest rate policy is working to control inflation; but it is certainly having an adverse impact on small businesses. What are other inflation fighting tools the administration can use? That is difficult to answer. Perhaps a more moderate approach to interest rates and continuing the fight to balance the budget is a solution to control inflation.

Again, we appreciate providing you input on the problems small businesses are facing with high interest rates. Whatever can be done to change the administration's policy of high interest rates would help small businesses survive these economic times.

Sincerely,

MIKE FAGIN, *Finance Director.*

---

NATIONAL ASSOCIATION OF REALTORS—
INTEREST RATES, HOUSING RECESSION

A combination of high interest rates, escalating home prices and related expenses have made home ownership more difficult over the last three years.

The increase in the overall cost of housing in the nation in the last three years has been devastating. The nation has suffered a 34 month old housing recession which is not only the steepest, but also the longest housing downturn since statistics have been gathered on the resale market.

Nationwide, in 1978, the monthly payment for principal and interest for the average priced existing single-family home financed with an 80 percent, 30-year mortgage was $382. By 1981, the amount climbed 112 percent to $810. For the average household the payment burden was 22 percent in 1978 and has risen to 37 percent in 1981.

There are national variations as well. In the far west, with the highest housing costs in the country, the average family must use 66 percent of their monthly income on shelter. While many factors combine to determine total housing costs in any area, such as location, lot sizes, employment opportunities, climate, and age of the houses, there is no doubt that the rise in interest rates has been the largest component of the total monthly rise in housing costs. That is, specifically, of the $428 per month rise in housing costs today from those of 1978, 66 percent was due to higher interest rates.

Clearly, the future health of the housing market throughout the country depends upon reversing this upward trend in home ownership costs. Declines in mortgage interest rates will help ease the current crisis in housing affordability and reopen the opportunity of home ownership.

□ 1850

Mr. BONKER. I thank the gentleman.

I yield to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Speaker, I, too, want to compliment my colleagues from Washington and Montana for just outstanding leadership on this issue. There is just no debating the fact that high interest rates are pure poison for the Pacific Northwest.

Again I compliment the gentleman for his leadership.

THE PRESIDENT'S ECONOMIC THEOLOGY

At the depth of the Great Depression, President Herbert Hoover OK'd spending $45 million to save the livestock of drought-stricken Arkansas farmers.

But President Hoover pointedly refused to send an additional $25 million to help the farmers themselves.

His reason? President Hoover didn't want to "demoralize" the farmers by putting them on the dole.

History has shown President Hoover failed to provide the leadership to pull the United States out of the pit of economic oblivion because he was the prisoner of fixed ideas. He clung stubbornly to those ideas even in the face of Hoovervilles and soup lines. To the very end, he insisted on being the prophet of prosperity, even though he left only a legacy of despair.

Today we are witnessing a scene that is too close for comfort to 1929.

President Reagan has rallied America to blindly follow an economic theology that promises to cut taxes, protect needy Americans, increase defense spending, and produce prosperity for all. It is a theology the Vice President once called voodoo economics. It is a theology that a leading GOP spokesman called a huge riverboat gamble. It is a theology that the ministers of Wall Street said just didn't add up.

Today—with interest rates soaring, inflation rekindling, and unemployment skyrocketing—it is a theology that is unraveling at the seams.

Yet, President Reagan resists the steps needed to turn the situation around. He refuses to admit that he promised a miracle that he couldn't deliver.

The reason we have interest rates near 20 percent today is because we cannot cut taxes twice as much as spending, balloon our defense spending to record peacetime heights and still achieve a balanced budget.

The truth is that the Reagan administration has put balancing the budget third in its priorities—standing in line behind defense spending increases and huge tax cuts. The result? The possibility, if not likelihood, of budget deficits by 1984 that reach $100 billion.

Balancing the budget is the key to reducing interest rates and reviving our economy.

There is nothing magical about a balanced budget. It is not even something that is always desirable. But now we need the budget balanced.

We need a balanced budget because we have a credit crunch in America. When the Federal Government borrows big sums to pay its bills—it borrowed $9 billion alone in August—a lot of money that would go to expand a sawmill or buy a house is sucked out of the private market.

And that private market is not very large right now because inflation makes it very difficult for the average saver to keep his or her money in a bank. That is why savings in America is at an alltime low.

So with heavy pressure from the Federal Government and with competition centering on an ever-smaller pot of credit capital, it is little wonder interest rates are so high.

A balanced budget will help bring down interest rates for several reasons.

First, a balanced budget means less Federal Government borrowing—thus less competition for credit capital, and the removal of a competitor who does not wait in line patiently, but barges to the front of the line for its money and pays whatever price it has to, regardless of the impact on the small businessmen and individual consumers left waiting in line.

Movement toward a balanced budget also is the signal the Federal Reserve Board needs to ease its tight money policies.

I oppose those tight money policies because I believe they are counterproductive. But, we have to recognize that the Fed is trapped at this point and has little choice but to do what it is doing.

The President, in presenting his proposals for cutting the budget Thursday night, appears unwilling or too stubborn to admit to his mistaken calculations on the economy. He also appears unwilling or too stubborn to tackle the sacred cows where budget savings could be realized—such as synthetic fuel loans, tobacco subsidies, and defense spending.

Let us face it, military cost overruns in the last 3 months of 1980 exceeded all the money we cut from the budget this year. We cannot keep allowing cost overruns like that to occur and make up the difference by forcing children to eat school lunches that consist of vegetables such as ketchup and pickle relish.

Instead, President Reagan still clings to the idea that we can ravage the social safety net he promised to preserve and induce economic recovery through massive tax cuts. He prescribes a cure for the economic engine, and ignores the human being running the engine.

But the medicine just is not working. When the earlier budget cuts take effect next week, there will be a tremendous outcry from Americans who are hurting already and will be asked to hurt some more. And the tax cuts? All I can say is what an Oregon developer told me during the summer break, "The Federal Government can give back all the money I pay in taxes, but if interest rates remain high, I am out of business."

He is not alone. Oregon's Employment Division predicted that unless there is a drastic turnaround in the economy, which is unlikely if interest rates remain high, our State's jobless rate will reach 12½ percent by January. Three of our State's most thriving and innovative businesses—Tektronix, Intel, and Wacker—are all planning layoffs. More than a third of the West's sawmills are closed or on curtailed schedules this month. About 32,000 of the 102,000 sawmill employes in the West are not working full time—or at all.

A Weyerhaeuser executive described the economic conditions in the housing and lumber industry—staples of Oregon's economy—as the worst since the Great Depression.

Around the nation the statistics are nearly as bad. 2,300 auto dealers have gone bankrupt in the last year. Construction failures are up 41 percent. 70,000 realtors have quit in the last 3 years.

The reason is simply high interest rates.

High interest rates choke off economic activity three ways.

High interest rates restrict the number of consumers for a particular good. Take housing, for example. For every 1 percent of increased mortgage interest rates, 1 million potential homebuyers are rendered unable to buy because they can't afford the cost of a house and the interest necessary to service the debt on the house.

High interest rates shrink the number of producers—and the capacity of existing producers. Who in their right mind is going to start up a business if you have to borrow money? And who is going to add that addition-

al production line, or expand into another side of an operation, at today's cost of money? They will sit tight and wait. Meanwhile, opportunities will be forgone and over time those lost opportunties will translate into smaller commercial and industrial capacity. When times are good again, the ability to meet more demand will not be there, nor will the attitude to try to hurry and develop that capacity. The inflationary cycle wins another battle.

Finally, high interest rates, by superinflating the worth of the U.S. dollar relative to foreign currencies, forfeit export markets. This is especially painful because the businesses affected are generally the businesses that are in the upswing and have products that are competitive in world markets. At higher prices, caused by high interest rates, they just can't compete with their foreign competition and they lose sales. That means lost jobs back home.

Economic recovery should be more than a wished-for goal. It must be our daily quest. To achieve economic recovery, we need to stimulate economic expansion and the creation of jobs. That can't happen as long as interest rates are high.

President Reagan says the Nation only has to fear the Chicken Littles of Wall Street. I say the Nation only has to fear the ghost of Herbert Hoover, preaching prosperity but paving the way for disaster.

Instead of following the Reagan theology with blind faith, we need to open our eyes and follow the facts.

Mr. BONKER. Mr. Speaker, I thank the gentleman.

I yield to the gentleman from Montana, who has joined me in this effort in calling for a special order. We are drawn together by our mutual interest and concern about the acute economic problems in our respective districts. Indeed, all of us who are here this afternoon share these common concerns, but it was through the gentleman's efforts that we were able to obtain this special order so that we could focus exclusively on problems that affect housing and the wood products industry.

I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. Mr. Speaker, I thank my colleague for his kind and generous remarks.

Folks out our way in the upper Midwest and the Pacific Northwest are concerned and that concern leads them to ask us to move toward a balanced Federal budget. Most of us in the Congress, including myself, support that move toward a balanced budget; however, I do want to say this about that effort. This Nation has had several financial crashes and between the Civil War and World War II we had two long, difficult depressions. During those early years of American history up to World War II there was violent dissension between labor and management. We had a caste class system in America that was something like a European economic caste system; but through it all the President of the United States in concert with the Congress insisted and demanded that this Nation have a balanced budget. That was up until World War II.

Then since and after World War II, this Nation has learned how to handle an unbalanced budget during those years when the budget has been unbalanced. We have learned how to be flexible with the Federal deficit and we have now gone 40 years without financial panic and without a depression. Unemployment during those years has never reached 10 percent as it consistently did during most of the years in which we did have a balanced budget.

So while I join my colleagues in wanting to move toward a balanced budget, I think it would be wrongheaded with this Congress, this President, or the people of this Nation to worship continually at that altar. Nevertheless, our people in the Pacific Northwest do want a balanced budget because they correctly want the Federal Government to begin to move out of the borrowing market. That is necessary if we are going to bring interest rates down. President Reagan ostensibly wants to do that; however, under President Reagan the total defense budget will be $1.6 trillion—trillion—by the end of 1986.

Under President Reagan, we are cutting other spending by $560 billion, but we are also cutting taxes by $718 billion.

Economists quickly grasp that tax cuts will exceed spending cuts by as much as $103 billion a year.

So we continue to make policy from the White House and from a majority of those here in the Congress, which creates a tight money policy. Such policy in turn, and there should be no mistake about this, works as it restricts spending and investments from borrowed funds. It creates idle plant capacity and unemployment and acts thus to restrain prices and wages.

In other words, a tight money policy works best when it induces a recession and high interest rates are the antidote to supply-side economics.

Today our wrong-headed policies are being accepted on neither Main Street nor Wall Street. The administration says, "Give us time, trust us," and they point to the technically correct fact that the President's program has not yet taken effect, and I accept that; however, the linchpin of the President's economic policy is the establishment of good expectations across the land, an end to the inflationary psychology which has permeated America.

Yes, the President's economic programs are affecting our expectations all right. The most recent national poll available indicates that only one American in eight believes that the economy is getting better. This administration is now into its second winter and the administration finds that it is a winter of the people's discontent.

Out our way in the Pacific Northwest, the economy is in distress. We rely on several industries out there and those are industries important to us and important as well to the Nation—agriculture, mining, wood products, and tourism. Those businesses, all of them, and most particularly the first three, are in deep trouble.

Let us look first at wood products, timber. Our western lumber industry is operating between 25 and 40 percent below capacity. How is that for increased productivity?

The greatest crippler of investment, in fact, is recession. We are being crippled in the Pacific Northwest by that recession, particularly the timber industry.

New construction of single family houses has hit its lowest level since the Government began keeping track. Builder-began construction of new single family homes was running at an annual rate of 591,000 in August, which is a decrease of 16 percent from July and the lowest rate since 1959.

In addition, building permits for future construction fell 5½ percent in August, the fourth straight monthly decline, and an indication that no upswing is in sight.

In western Montana, more than one-half of the 23 wood products mills have either closed, curtailed operations, or are scheduled to do so.

By the way, September of a normal year means these mills would be operating on a normal basis.

Montana has lost 60 percent of its construction volume in the past 2 years. Montanans are beginning to send me house keys with little tags on them. I want to read one of the messages on one of those house keys.

□ 1900

It says:

My buying days are over,
My money has no clout.
With all of these high interest rates,
My future's left in doubt.
It used to be so easy
To buy the things I need.
With credit, cash and barter,
Life was affordable indeed.
But now those days are over,
I'm poorer than a mouse.
So here's a gift from me to you,
The key to my future house.

I intend to send those keys to the Federal Reserve Board, because I have the key, and so do my colleagues that are addressing the House tonight. We have those keys. It is the key called lower interest rates. That is what will

help the timber and the housing market.

I mentioned that mining is in trouble in the Pacific Northwest.

Mr. AuCOIN. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to the gentleman from Oregon.

Mr. AuCOIN. I appreciate the gentleman's remarks and I want to join in complimenting him and the gentleman from Washington (Mr. BONKER) for organizing this special order.

I would suggest that the gentleman save some of those keys to send them not just to the Federal Reserve Board. I think it would be even more apt and more appropriate if he were to send them, along with the poetry, to the White House, because this high interest rate policy that is being followed which is destroying the housing industry, which has resulted in the keys to people's homes that they will not buy, is being formulated, is being supported and enhanced by economic wizards in the White House.

Our colleague, the gentleman from Massachusetts (Mr. FRANK) took time in a special order on September 21, and entered into the RECORD statements by Treasury Under Secretary Beryl Sprinkel, in which he repeatedly stated the administration's support for and "satisfaction" with this tight-money, high-interest-rate policy. So I know the gentleman meant the White House when he indicated he intended to send those keys to the Federal Reserve Board.

Mr. WILLIAMS of Montana. I thank the gentleman for that succinct and frank recommendation that I share these keys not only with Federal Reserve Board Chairman Paul Volcker but also with President Reagan. Montanans have sent me enough keys that I will be able to divide them equally. I accept the gentleman's suggestion of sharing them with President Reagan.

Mining in Montana cannot be ignored, as it is a major industry out our way, and throughout our region. The Anaconda Co. has closed all of its smelting and refining operations in Montana. The Bunker Hill Co. has announced the closure of its very important mine in our neighboring State of Idaho.

The slowdown in the economy, the uncertainty created by this administration's riverboat gamble with the economy, will soon create near chaos in the mining industry, most particularly among mineworkers and their families.

Agriculture is a third leg of our economic stool. Parity levels for farmers are about as low now as they have been in 20 years. You know, farmers, through hard work and improved technology, and mandated price protection from the Congress, have been able to not only feed America, as we ask them to, but really to feed the world. And now high interest rates are punishing them very, very unfairly.

My friends in Montana and folks throughout our region are worried for themselves and for this Nation. A reading of American history requires that worry.

All people across this country, not just those who live in our area, remember the Great Depression, and we have heard the myths about the action that was taken during the Great Depression to save the banks, and that that action, therefore, saved this country. But a close look at history will demonstrate that that is not so.

What Franklin Roosevelt, the Democratic Party, Democratic Congress did, in fact, was save small farmers, small miners, got the small lumber mills going again. That, in turn, saved the banks, and that brought the country off of its knees.

When the natural resource industries—mining, timber, agriculture—are in trouble, those people who remember the Great Depression worry because they understand that economic trouble in those natural resource industries can very easily create a black hole which sucks in the rest of the economy and a depression ensues.

What do we do?

I think we continue to move toward a balanced budget, but we do that not through a ravaging of people expenditures such as social security or additional cuts to the working poor. We continue to move toward a balanced budget, but not through more trickle-down economics. We do not need a repeat of Margaret Thatcher's England here in the United States. Rather, we must re-do the budget which passed this summer. We must rewrite it, this time with correct assumptions and correct economic projections. We must rewrite it, this time trimming back the President's unprecedented expenditures for the military.

Remember, the defense buildup, as proposed, is three times as large as the one that took place during the Vietnam war. And by the way, that is after correcting for inflation. And then, when we have finished correcting the budget mistakes of last summer, we must turn attention to the tax bill.

Time today does not permit a full discussion of the various changes needed, but let us use this as our guide.

History has shown the trickle-down economics simply do not work. So let us start over and write a tax bill that quits pretending that trickle-down economics will work.

I want to thank my colleague and friend, the gentleman from Washington, DON BONKER, for his leadership in helping to establish this time in which our colleagues can deliver to the Nation the concern of constituents throughout the Pacific Northwest. I want to thank my colleagues who have joined us in this effort.

Mr. BONKER. I thank the gentleman from Montana for his eloquent statement. It is a sober reminder that economic policies may be working in the corporate board rooms of America, but with respect to basic industries in the Northwest they are having a devastating impact.

The policies impact not only the Northwest, but the entire West. So at this time I would like to yield to my colleague, the gentleman from California (Mr. PATTERSON).

Mr. PATTERSON. I thank the gentleman for yielding. I want to commend the gentleman from Washington and the gentleman from Montana for calling for this special order and arranging it so that we could speak out on, I think, the most important issue facing all of Americans today.

The gentleman from Montana noted the chain of hurt that is going on in the mining and lumber and timber industries. And I would add that in California and other parts of the country, those who make other building materials, those who are builders, those who are in real estate, those who finance housing, are all hurting. We on the Banking Committee are facing many, many difficult questions in how the Federal Government might come to the aid of financial institutions that have been overstressed in terms of their ability to meet the housing needs and to try to remain a viable institution at a time when, really, housing is just not being sold.

Most of all, I think it is the consumer who is being hurt. There just are not any young people today who do not own a home already who can afford to buy a home, and that simply reflects, I think, upon the policies that certainly the President has proposed.

We all remember when the President took office he had a four-part program: budget cuts; tax cuts second; third, fewer regulations from the Federal Government; and fourth, and not mentioned much in the last few weeks by the administration, was a restrictive monetary policy.

The President got his budget cuts. The President got his tax cuts. The President certainly is in position via each and every Cabinet member to have fewer regulations coming from the Federal Government.

□ 1910

Whether we were for these items or against them, they are in place.

The fourth condition of the economic recovery program; that is, of a restrictive monetary policy, means high interest rates. Translated to the American people, that means 85 percent of the homebuyers in America, those people who do not own a home today, cannot afford to buy a home. High in-

terest rates have caused problems from Wall Street to Main Street, in response to the President's economic recovery program in the business community, where he should be quite popular.

Housing starts have crashed to a 5-year low, at a time when demand is high but supply is not going to be there. The stock market has been unimpressed with Treasury Secretary Regan's one-man band. In spite of everything he has done, it has sunk to its lowest level in 16 months.

Continuing high interest rates, even with the slight bit of relief this week, continue to propel the economy further toward recession, not recovery. The inescapable truth is that despite a heavy dose of supply side elixir, major segments of the economy are simply going under. Indeed, the Reagan-Regan-Stockman prescription nearly has the patient on the critical list.

The business community and the financial markets, having been hypnotized by the allure of seductive tax cuts and a supply side evangelism, are suddenly waking up to the harsh economic reality of gaping budget deficits. Financial experts and business leaders have already begun lining up at our doors to disown the supply side spectacle and demand a return to commonsense balanced budgets and an approach to good fiscal policy.

Well, now we are being asked to throw more than just fuel on the fire. We are being asked not only to throw away student aid, school lunches, food stamps, and housing assistance, and casting these people on the altar of sacrifice, but now we are turning to social security and that safety net the President was not going to allow anyone to fall through. Social security beneficiaries are next on the Stockman hit list to take a dive in the name of Reaganomics. How many more sacrificial lambs must be spared in order to bankroll an obese defense budget and the massive tax cut, the most massive one of our time? It is time for the White House to recognize the flaw in this program, and that is: It simply does not work. It ought to be glaringly obvious to a growing public audience. Extensive across-the-board tax cuts, increasing military spending are just simply fiscally incompatible and economically disastrous.

I thank the gentleman for yielding.

Mr. BONKER. I thank the gentleman for an excellent statement.

I yield to the gentleman from Oregon (Mr. AuCoin).

Mr. AuCOIN. Mr. Speaker, I appreciate the gentleman yielding. I want to compliment the gentleman again for taking this special order and giving colleagues an opportunity to call attention to what I consider to be the Achilles heel of the administration's economic plan, and I hope that my colleague would agree that as long as the administration and its economic followers pursue a high interest rate policy and do not back off from a course in which these high interest rates occur, that it would be our policy here in the House to continue special orders of this kind pointing out the agony, the grief, the shattered hopes, the broken lives that that policy is causing. I am sure the gentleman would agree for the record that for those who read the Record, that we will embark on such a course.

Mr. BONKER. I would certainly agree, and for the record, the gentleman from Oregon and I represent districts that are separated only by Columbia River, districts that are heavily dependent on housing and the wood products industry, that are being devastated by the current economic policies.

I think it is only through a forum like this that we express the sentiments and the concerns of the people that we represent as those concerns relate to the overall economy. But, I rather imagine that the economic crisis is not limited to the Northwest, but indeed is felt throughout the entire country.

Mr. AuCOIN. The gentleman is entirely right, and I think the Record should show that those of us from the Northwest are particularly aware of the problems that are caused by a high interest rate policy. That is because of our timber base, which is such a vital part of our economy.

But no one should confuse the facts on this question. This is not just a housing issue. It is not just an issue that those of us in the Northwest care about. High interest rates are not only going to kill the housing industry in this country, they are going to decimate the small businesses across the length and breadth of this land. They are going to foreclose a decent economic future for families that are struggling to keep even with high inflation.

High interest rates never worked under the Nixon administration, they did not work under the Ford administration. They did not work under the Carter administration. They are not fighting inflation, they accelerate inflation, and so for the small families of middle income and below trying to survive and meet basic costs, there will be no relief from the inflation and economic hardships that they have from such a policy as this.

History shows that no amount of tooth fairy economics is going to change that basic historic fact today. So, it is not a Northwest issue. It is an issue that, if not checked and if not controlled, could bring this country's economy to its knees.

Once again, I appreciate the gentleman's contribution and his lengthy work over the years in trying to bring this message to the country and to the Members of the Congress. In my hand I have an article from the Sunday, September 20, Washington Post. It makes a very interesting statement which I think is apt at this point in our colloquy. It states:

> Like a fever, high interest rates are a symptom that something is seriously wrong in the nation's economy. If they climb too high, they can kill. Home builders, buyers, farmers, small businessmen, and thrift institutions, among others, are bearing the brunt of the tight money seige. * * *

The article goes on to vindicate in terms of those who may be killed by such a policy, these that are listed are among the first on the list. If those sections of the economy collapse, I do not think any of us need to draw any pictures about the ultimate impact. This would cause a tidal wave of business failures, bankruptcies, personal disasters, that could cause, I think, the most serious financial crisis this country has seen since the depths of the Depression of the 1930's. I am sure my friend from Washington State would agree with that analysis.

Mr. BONKER. I would totally agree with the gentleman, and would also point out with respect to that same article which appeared in the Washington Post, and in response to the comment that perhaps we have not allowed enough time for the Reagan program to go into effect, it points out that the most important elements in that four-part program, the President proposed last February, that is, a highly restrictive monetary policy, was in place even before he assumed office, and that the tax cuts for business as requested were made retroactive to January 1. Beyond that, businesses are already getting considerable relief from Federal regulatory burdens, administration officials themselves have maintained, and that the significant cuts began last spring in some major Federal spending programs, such as the Public Service CETA program with which the gentleman is familiar.

□ 1920

But it seems ironic that the category of people who were to benefit primarily from the economic recovery program, the corporate interests, the stock markets, and others, are those who are in effect betraying the President simply because they are not investing in America's future as he intended. Instead, the money is going into mutual funds and other sources which may go to finance corporate mergers and other nonproductive investments.

So the entire program as it was laid out by the President and which was supposed to have such a psychological boost to bring about economic recovery has not taken place, and while we do not want to place a judgment this soon, I think all the economic indicators are that it is indeed the wrong

prescription for what ails our economy.

Mr. AuCOIN. Mr. Speaker, if the gentleman will yield, let me say that I appreciate the gentleman's statement.

Our colleague, the gentleman from Montana (Mr. WILLIAMS), spoke to this fact clearly only a few moments ago when he indicated that the administration has from the beginning placed a great deal of stock on expectations in this country, economic expectations. In fact, those of us who bothered to look at the arithmetic of the administration's program and saw that budget cuts fell far short of the dollars of tax cuts that were involved in this package were told, when we criticized that element of the package, that "economic expectations" are going to create such a tremendous growth in economic activity that revenues coming back to the Treasury will take care of the problem.

Well, what is the barometer for expectations?

My best barometer and, I think, the country's best barometer, is the market itself. I have listened to the administration for months, and prior to that I listened with great interest over a period of several years as many of those familiar faces preached their economic gospel prior to seeking and obtaining their high offices, and what I was told through those years and what the country was told was that all we need to do is to trust the market. We were told to trust free market forces.

Look at the market today. Look at the stock market, look at Wall Street, and examine what the market is doing in terms of its expectations, its economic expectations, based on the arithmetic that those of us in this body saw earlier this year when we said we had no alternative but to say "no" to the particular budget requests the administration brought forward and the particular tax bill the President had presented to the Congress.

Wall Street is not the national Democratic Party. This is the collection of private investors across the length and breadth of America who are saying they are not going to place their bets based on an improved economy until a policy change is made.

I am frankly amazed that one of the great free market advocates since Calvin Coolidge, the incumbent President of the United States, a person who is claimed to have been a noninterventionist in the free market, now says to Wall Street that it had better behave, that it had better place its bets in a different way. He does not seem satisfied with free market forces; he does not seem satisfied with free market decisions, decisions by which private investors are investing in money market certificates because they do not believe that common stocks and bonds are going to be worth much if these interest rates continue at the rate they are today.

I have never before in my time in the Congress heard such an interventionist view coming from the Oval Office. Here is a President who seems to be trying to command the personal, private decisions of Americans because they are not making the decisions he wants with their personal assets. According to his lieutenant—the majority leader of the Senate—there was a threat of credit allocations and credit controls if the market and the investors in that market did not behave and did not buy the political plan the White House has laid down for America.

I think that is one of the most breathtaking market interventionist views I have ever heard suggested. I am shocked. I am absolutely shocked to hear this kind of suggestion.

Mr. BONKER. Mr. Speaker, if the gentleman is in shock over that, I would like to ask him a question, given his distinguished career on the Banking Committee.

Mr. AuCOIN. I might also add that I am also appalled.

Mr. BONKER. Mr. Speaker, I would also ask the gentleman whether in these circumstances he would accuse those on Wall Street of being chicken littles.

Mr. AuCOIN. Mr. Speaker, I think that is an interesting point the gentleman raises.

The President, in being perplexed over the free market's response to the arithmetic of his economic plan, stated, as the gentleman just indicated, in a speech in Denver, that those of us who have had economic concerns from the beginning about this plan are "chicken littles," afraid that the sky is falling.

The message the President ought to understand is that what we are worried about is not that the sky is falling but that the debt ceiling is rising.

It is the deficit that is caused by a $1.6 trillion military arms buildup, coupled with a $750 billion outlay in tax cuts that are indexed against inflation for all time.

As long as that deficit is there, as long as there is this gap between budget cuts and tax cuts, the deficit is going to be there, the market is going to respond in precisely the way it is, and, frankly, it is fraudulent economic advice for any political figure to suggest to any investor in this country that he should invest in any other way than the market is investing today, based on the economic plan that has been laid down on this country.

Mr. Speaker, I just want to add another thought on this question. It is clear to me that all the sermons we have heard for years that we need to get the budget in balance have been forgotten and rejected by the highest economic priests of this administration. The American people have come to realize that we cannot have extremely expensive outlays for military spending or domestic spending if we do not have the money in the till to pay for it.

I think that the people understand, if the town meetings I have conducted across my district are any indicator—and I think they are—that before we cut taxes in massive ways, we ought to get the budget in balance first. The people are not naive.

The people, when they get a tax cut, want real dollars, not deficit dollars.

It seems to me that the administration ought to understand this, and I hope the President, when he makes his address to the country tomorrow night, will come clean with the American people and admit that there is this flaw in his economic plan and will admit that just as in the case of LBJ, when we tried to have "guns and butter" in the 1960's, which really caused the massive dose of inflation that we are still trying to cope with today, that this economic plan is inflationary. Just as guns and butter in those days was economically unsound, guns and butter today will be equally inflationary.

The Members might ask, "Well, what do you mean, guns and butter today?" Well, there is butter there. It may not be there for the poor man. That is the difference between the Great Society and what we have today. The butter is not for the poor; the butter is there for the people who are far better off than the poor ever thought of being or ever will hope to be under current social policies.

The administration's guns and butter, approach calls for a $1.6 trillion arms buildup, no SALT treaty, no real commitment to negotiating an end to strategic arms production but, rather, an unrestrained arms race, and at the same time passing out the butter in massive tax cuts in the thought that somehow that is going to provide a sound prescription for the United States of America.

Well, it is not sound. It simply is not sound. And this exposes the basic flaw in the administration's plan.

We cannot have supply side tax cut stimuli along with history's most draconian tight money in a coherent economic policy.

Abraham Lincoln said that a house divided cannot stand. It is equally true that an economic policy divided against itself cannot stand.

Tight money and supply side tax stimuli are mutually canceling economic facts. They are mutually canceling facts.

So I say to my colleagues, Mr. Speaker, that I would hope that the President, when he speaks to the Nation tomorrow night, will say to the American people what needs to be

said, that a $2 billion reduction in the Pentagon's massive arms buildup is not sufficient—that we need substantially more than a $2 billion nick in the Defense Department's budget, substantially more.

□ 1930

The administration also needs to say that all of the sweeteners that were added to the tax bill in the course of the bidding war that took place on Capitol Hill as that bill passed need to be reevaluated in the clear light of day and in the clear light of the economic damage and grief that is being caused today because of high interest rates, resulting from the deficit caused by unnecessary revenue losses.

We can say to big oil that it can do it without its $15 billion tax sweetener. We can reduce the deficit by that measure. We can say to tobacco and sugar and some of these other people who are coming out quite nicely, thank you, from the fiscal plan of this administration, that we may have thought at one time we had the luxury to make these political accommodations, but if we are down to such basic steps as threatening a reduction of benefits for social security pensioners, then we no longer have the luxury of going along with these political accommodations resulting in continued drains to the Treasury, higher deficits, and the perpetuation of interest rates for as far as the eye can see.

I appreciate the gentleman's leadership on this issue tonight and I will stand with him as we push this fight in the weeks to come.

Mr. BONKER. I thank the gentleman. As usual, he has made salient points which add to the wealth of testimony that has been laid out in this afternoon's session.

## THE PRESIDENT'S ECONOMIC PROGRAM IS NOT WORKING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. WILLIAMS) is recognized for 60 minutes.

Mr. WILLIAMS of Montana. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. SWIFT).

Mr. SWIFT. I thank my friend and colleague, the gentleman from Montana (Mr. WILLIAMS) and my friend from the State of Washington (Mr. BONKER) for asking for this special order so that we can discuss this important topic.

□ 1940

I think that maybe we should say a good word for high interest rates, after all that has been going on here. After all, you do understand the theory, do you not? I mean the theory of all of this is that if you raise the interest rates, people will not borrow so much money. If they do not borrow money, it is going to reduce demand. And when it reduces demand, the prices will go down. Now, why do we not seem to understand that? I mean we have been talking here for over an hour, and there has been no recognition that we understand that wonderful theory, possibly because we have lived through 3 years of watching it not work.

The theory makes wonderful sense in a high school economics textbook. In the economy of the United States in the 1980's, it is not working. And the great tragedy is, of course, that when it does not work, then it itself becomes one of the major inflationary engines in the economy of the country.

That is the situation in which we find ourselves. And yet there are those that insist on beating this dead horse and, in the process, they are beating the small businessman, the farmers, anybody who wants to buy a home, anybody who wants to sell a home, buy a car, sell a car. Virtually every American is harmed by this policy, this incessant insistence that "this policy may not have worked yet but, by George, it is going to start working tomorrow, fellows."

Well, it is not going to work tomorrow any more than it has worked today or yesterday.

Then we have those who say, "Well, you should not be complaining about high interest rates because it was your spending policies that created the high interest rates, in the first place."

Well, first of all, that does not follow logically. But that aside, that could only possibly be true, that particular criticism, if in fact deficits in the spending of this country were the only cause of inflation.

Now, every industrialized democracy in the world suffers from inflation. And one of the reasons that is consistent in every one of them is the inflated cost of energy, something that is totally ignored in the entire economic policy of this administration.

We are told by this administration that if we balance the budget a number of things are going to happen, magically and automatically. One is that the interest rates are going to come down, and the second thing is that inflation is going to disappear and all of the prices are going to go back to the 1960 levels.

That is absolute hogwash.

Now, how is it that energy can do that to our economy?

I think out in the Northwest some of our folks find it particularly hard, because our energy over the years has been very, very inexpensive. Hydroelectric energy is many times cheaper than it is in almost any other part of the country. But the lights that are lighting this room right now are fueled not by inexpensive hydroelectricity, but by very expensive imported oil. And in the great manufacturing areas of the East, that price of oil comes in and comes in again and again and again at every stage of the manufacturing process.

You pay the cost of high energy when you dig it; you pay the cost of high energy when you smelt it; you pay the price of high energy when you fabricate it; and it is added at every stage of the process, including the point at which you finally take it out and deliver it to a retailer that sells it.

Inflated energy costs work themselves into every aspect of our economy and are a fundamental part of the causes of inflation in this country, and certainly will not be affected in any degree by a policy of high interest rates.

Mr. WILLIAMS of Montana. Just for the purpose of posing a question to the gentleman from Washington, we hear a great deal now about how it is going to take many years for this economy to recover because today's inflation, it is said by some, is the result of 50 years of the New Deal. What I hear the gentleman saying this afternoon makes more sense to me, and that is each year's inflation is caused by activities that have taken place in the years immediately preceding and, in this instance, the sudden and dramatic increase in the price of energy would be more responsible for the present-day inflation than would the New Deal policies of the 1930's.

Is that accurate? Is that a portrayal of the point that the gentleman is making?

Mr. SWIFT. No, I do not think it is a portrayal at all. Furthermore, I would assume that anyone who would suggest that the problems we face today are caused by the problems of the 1930's would have to also say that the tremendous prosperity we had in the 1960's was caused by the policies of the 1930's. And I suppose whatever wonderful or bad thing happens to us 5 years from now will be caused by the 1930's. It is a perfectly irrational argument made by people who we did not hear crediting New Deal policies with the prosperity of the 1960's, incidentally.

I have heard people say, "Look, your argument that energy is the major cause of inflation"—and I do not consider it the only cause, but I consider it the major cause of inflation—"Your argument is ridiculous. Why are not inflation rates, then, as high in, say, West Germany as they are here?"

Well, first of all, energy costs in West Germany were higher, to begin with. And so when they raised the price of a barrel of oil, say, $10, it was proportionately a much greater increase in cost for us in the United States than it was for West Germany and, therefore, the inflation rate was

not as great. And, second, in countries in which energy has always been more expensive, they not only residentially but industrially have been more conservation oriented all along, so that they make much more efficient use of the much more expensive energy. Those two points put together explain why other industrialized societies have not necessarily been affected quite as much as we have by the increase in energy rates.

Now, energy is probably not going to continue to escalate at the same rate that it has over the past 5 years. Therefore, we probably are going to see a leveling off of inflation in the near future, a leveling off, not going back to what it used to be, prices going back to what they used to be, but the rate of inflation will doubtlessly level off. And somebody is going to be attributing it to the budget bill or the tax cut bill or the high interest rate policy, or something else, when, in fact, it will have occurred naturally, not because of any of those things, and very possibly in spite of many of those things; but it will have occurred because we will have gotten stability in our energy pricing in this country.

I think it is terribly important to understand that, because when you understand that, you really begin to see what a useless weapon high interest rates are in dealing with our inflationary system.

And who is paying for this mistake? It is the homebuilders and the real estate people and the auto dealers and the small business and farmers.

I would like to make one last point, if the gentleman from Montana would permit, and that is the role the Fed has played in this. You know, we have a wonderful saying in this country, and that is that there is a magical, wonderful quality of taking something out of politics. "Oh, you want to take it out of politics." Heaven forbid that politics should sully the decisions of some group or other.

I remember in my hometown of Bellingham, Wash., we wanted to take the park board out of politics. So we passed a little amendment in the city council. And, by George, we did such a good job taking the park board out of politics that they had the authority, if they had wanted to, to plow under every square foot of parkland in the city of Bellingham. And the mayor or the city council or no other elected official could have put a stop to it. Some citizen might have been able to go down and get a court injunction.

But so often what we mean by taking something out of politics is that we are purifying the process; but in fact what we are doing is, we are removing important public policymaking from any influence by the people of the United States through their elected officials.

And the Fed sits down there marvelously resplendent in its independence. It has defied every President since Roosevelt, Republican and Democrat, at one time or another. It has canceled out whole economic policies of administrations over the last 50 years. And still it wallows in the wonderfulness of its independence.

Now, I happen to believe that a measure, a very substantial measure of independence from the whims of politics is appropriate for the Federal Reserve and for some other independent agencies of the Government of the United States. But when that independence is abused and it is abused incessantly and it is abused in a way that hurts virtually all Americans, then the ability for those Americans to have some means by which, through their elected officials, they can register their dissatisfaction with that policy, is important.

And the Congress stands, as it is today, virtually impotent to do much but what we are doing, sitting here and saying that we are mad and something must be done. But I think we must also begin to consider a prudent means of providing some measure of dependence on the will of the people and the Federal Reserve Board.

□ 1950

We must be careful in doing that. We must certainly be responsible because that is an issue that could be demagoged, an issue that could be handled in an outrageously irresponsible way. But we must begin to consider whys and rational and prudent and conservative ways of inserting some influence on the part of the Presidency, the administration and of Congress, in the decisions that are made by the Federal Reserve Board.

Lastly, I would point out that while it is also true that the President of the United States has no really statutory ability to influence the Federal Reserve's policy, and it is also true this is not the first President to support high interest rates as weapon against inflation, this is certainly a President who is the most enthusiastic supporter of that tool.

There is such a thing as jawboning. It can be effective. This President has demonstrated he is very good at jawboning and this President should be sitting down with the Federal Reserve Board and instead of insisting on maintaining this failed policy, he should be asking them to please begin to understand the need to stop using a tool that has not worked, give some relief to the people of America, and let us focus our anti-inflationary devices and plans on something that is going to work so that the pain—and believe me, it is pain—is not inflicted for naught.

Mr. Speaker, as I have already stated, the problems of high interest rates have been especially tough on the Pacific Northwest. I include in the record several statements from people who know firsthand the magnitude of these problems.

I have met many times with people in home construction and real estate. Perhaps the problems they face can best be summarized in a recent letter I received from Mr. Anthony DiPangrazio, whose firm is located in Edmonds, Wash.:

In a previous letter you stated that the votes are not in Congress to strip the Federal Reserve of some of its awesome power.

But there is not anyone, to my knowledge, who agrees that the financial destruction of so many businesses and jobs is the only way to control inflation.

It seems to me that either the Unions should get together and stop production of everything, nothing should move. The Nation should be brought down to its knees if necessary, at least long enough to stop the people in Congress who are owned by the International Financiers.

Why this does not happen, I do not understand? Who do the Unions represent? Why does General Motors, Ford and American Motors continue to lose money due to the high interest policy?

It seems to me that if they would all shut down as of a given day and put all of their people out of work, then would we not have the votes in Congress to do something?

At this point, I must sound like a radical ready to embrace Communism. I am by nature a Republican. I voted for you because I believe that you are against giving everything to the free loaders and drones. That you believe in free enterprise. I ask for no gifts. I ask only that our Government, through the Federal Reserve, please stop destroying us financially. Please do not give us further sympathy and understanding, but instead, do something to remove the burden of the Federal Reserve before it is too late.

Regarding the economists who advocate high interest rates. Do any of those jerks own any factories or firms that provide jobs, goods and taxes? Just what is it that they contribute to our society other than heartache and despair?

Please help now.

Very truly yours,

ANTHONY C. DIPANGRAZIO,
*President, Sunset Construction, Inc.*

Because of the unprecedented downturn in new home starts nationwide, the demand for lumber in the domestic market is the lowest since World War II. Mr. Chuck Skillman, executive secretary of the Washington Contract Loggers Association, recently wrote a letter which lays out the crisis facing the contract logging industry in the Northwest:

The Washington Contract Loggers Association (WCLA) is made up of over three hundred independent logging companies. They are primarily logging contractors for larger timber companies and sawmills. However, many of them also buy state, federal, or private tracts of timber and sell to the highest markets. The membership covers all areas of the state of Washington. They range in size from employers of two or three people to one hundred employees.

Our members have been experiencing poor market conditions since early 1980. The market has gradually worsened to the extent that at this time, over fifty percent of the companies are not working. Of those who are working, many expect to shut down with the completion of their present contract, and have no idea when they will start back to work.

At the present time, many of those who are working are on Mt. St. Helens disaster clean-up and will be done in 1982.

The Weyerhaeuser Company has been a purchaser of almost every type of log from independent loggers and landowners in Western Washington. They have had to suspend all such purchases as of September 21, 1981. They don't know when they can resume purchases.

Crown Zellerbach Company has been the major employer of independent logging contractors in North Central Washington. They have had to close their mills at Omak and Twisp, Washington for lack of lumber markets.

Logging on the Olympic Peninsula from Grays Harbor to Forks is at a near standstill. Some contractors have moved away, some are staying but have not worked in months, up to sixteen months for one company. The Columbia River Area is also hard hit. Some of these companies are certain to fail.

The Yakima area has been logging intermittently this year and expect much more down time this fall and winter. The northeastern corner of the state is almost completely shut down. Louisiana Pacific and Diamond International are the major markets in that area and both are shut down.

It is the opinion of the Executive Board of the Washington Contract Loggers Association that uncontrolled government spending over a long period of time has created a national debt, so large (one trillion dollars this fall) and consequently causing government borrowing to be so great that it has dried up private sources of money for home building.

The forest industry in Washington is dependent on domestic lumber market, pulp market and the export of round logs to foreign markets in that order. Because of the unprecedented downturn in new home starts nationwide the demand for lumber in the domestic market is the lowest since World War II. Foreign markets for round logs are poor. The logging industry needs markets in domestic home building, pulp, and foreign log export to achieve the employment our forest industry is capable of.

Sincerely,

CHARLES (CHUCK) P. SKILLMAN,
*Executive Secretary, Washington Contract Loggers Association.*

The local sawmills are a backbone of the economy in my district and many areas of Washington State. But mills throughout the Northwest are closing at an unprecedented rate. In the following statement, Mr. Glenn Wiggins of Port Angeles details the effect that current economic policies have had on mills and he offers some solutions:

The life expectancy of the installed sawmill capacity in the Pacific Northwest is drawing short, particularly for mills dependent on public timber. Already many are failing in the current squeeze brought on by high interest rates. Those who survive have been seriously hurt, limiting opportunities for capital investment and greater efficiency in the future.

Historically public timber has been competitive and remains so. However, the competitor could never forsee the government's posture on control of interest rates and availability of mortgage money.

At the same time that the government has encouraged competitive bidding and higher stumpage rates, it has concluded that market restrictions for building products through tight money best serves the war on inflation. Thus we see no end in sight for the current debacle. The federal government who owns the timber is the major party responsible for the current chaos which interrupts the normal flow of logs from stump to the mill.

This chaos is not localized. It is worldwide. Because of tight money policies by both the Carter and Reagan administrations, lumber normally sold into U.S. markets by Canadians has been rerouted to Japan, creating extreme problems in selling logs and finished products into this market. This mill was the first on the U.S. Coast to convert to metric sizes for sale of lumber into Japan. Products were readily accepted. For the last year and one half the market in Japan has been dominated by cheap Canadian lumber, subsidized by policies which encourage noncompetitive values on standing timber. This same cheaper wood fills the U.S. market, restricted by federal fiscal policy, thereby making operations here unprofitable, disjointed, and lacking potential.

We have been to many recent mill auctions in this region and anticipate many more should the current money restraints continue. It is hard to understand how the government plans to fund its own operations and those of local governments when stumpage receipts fall and taxable income is reduced. Our suggestions are these:

1. Reduce interest rates by whatever means possible to permit industry operations and expansions.
2. Increase the supply of timber, particularly short-termed sale, at this time.
3. Consider tariffs on the import of Canadian lumber, similar to current tariffs on plywood.
4. Provide incentives for manufacture of finished products exported to world markets.

GLENN WIGGINS,
*Merrill & Rang, Inc.*

No sector of our economy has been so devastated by current economic policies as the homebuilding industry.

As noted in the following statement by Mr. Herman Smith, president of the National Association of Home Builders, we are currently in the middle of the longest housing slump in history—now in its 34th month.

There is one message coming out of this meeting: interest rates must come down and come down soon. The situation is desperate. Under today's miserable economic conditions, builders cannot sell the homes they have already built * * * they certainly cannot start new homes * * * they cannot meet their payrolls * * * and they cannot meet their loan obligations. From Maine to California, the homebuilding industry has been shut down.

Demand for housing is backing up. More than 41 million Americans will reach age 30 during this decade. Many of them are coming to the realization that the dream of owning a home can no longer be taken for granted. The problem, again, is record high interest rates.

Consider what it costs to carry a modest, $60,000 mortgage loan. At 9 percent interest—the going rate 2 years ago—the monthly payment was $483. At 17 percent, the payment is $855 per month, or almost double the payment of 2 years ago.

First, the Congress and the administration must further reduce the budget for fiscal year 1982 to keep the deficit below $42 billion and to move to a balanced budget by fiscal year 1984. Otherwise, credit demands and interest rates will remain at peak levels, and the entire Reagan economic recovery program will come apart at the seams.

Second, we believe there must be some adjustments in monetary policy. We believe the Federal Reserve Board should institute a policy that will allow the money supply to grow at a rate that will accommodate economic stability.

Generally, builders are an optimistic lot. But frankly, the mood of our membership at this board meeting was clearly one of desperation.

I thank the gentleman from Montana.

Mr. WILLIAMS of Montana. I commend my colleague from Washington State for his cogent statement and want to place particular focus on one of the later statements that he made concerning the necessity of politics in our actions in this country, particularly as those actions affect our economy.

The Federal Government is really nothing more than Americans acting in concert, and politics is nothing more than the mechanism by which they can provide that action.

I now yield to my colleague, the distinguished Congressman from Washington State (Mr. LOWRY).

Mr. LOWRY of Washington. I thank the gentleman from Montana for yielding and join my previous colleagues in complimenting the gentleman from Montana (Mr. WILLIAMS) and our colleague from Washington (Mr. BONKER) for taking this time on what I think is the most vital economic problem facing this Nation, and because of the effect of this Nation facing this world, I want to say that this is not the first time the two gentlemen have been saying that.

I have heard the gentlemen talking about this in discussions for a long period of time now, just as I have heard our colleague, the gentleman from Washington (Mr. SWIFT), the gentleman from Washington (Mr. AUCOIN), and others, who have spoken before.

This is a serious problem that we have been addressing for quite a period of time. I am not going to ask to revise my remarks and I am not

going to talk for the 5 or 6 hours that I have talked on this in the past. I am going to agree with the statements that the gentlemen have made and the others that have spoken today have made, and I am going to take just a minute to say that we know that it is also incumbent upon us, this Congress, to immediately be moving to meet this challenge because we just do not have very long; that if we do not, the effect will be deep, deep, deep recession.

Now, I concur with the comments that have been made about the need for a more enlightened Federal Reserve Board policy, and I believe that the Federal Reserve Board would be targeting monetary growth at a correct supply level rather than going under their own target, and if they would look strongly at reducing another percentage point from the charge, surcharge that they charge banks, their most frequent customers from the 3 percent on down to the 2 percent to follow the recent reduction of 4 percent to the 3 percent, they would still be following prudent monetary policy and that would give us an improvement.

I believe that an improvement in the money supply would be able to lower interest rates perhaps as much as 2 percent.

But I do not think we want to kid ourselves that only the Federal Reserve Board improved monetary policies, that could lower the interest rates perhaps 2 percent below where they are now, is going to do the job because we are going to still have that deep recession at 17-percent interest rates. We are still not going to have housing starts. We are not going to be making automobile loans and things are going to continue to get worse.

So, it is going to take more than that. We have to look at what is the economic package that the President has proposed and that we have approved and we have got to change it. We have got to change it as soon as possible.

The numbers are simple and the gentleman referred to them, the gentleman referred to them earlier in his talks tonight.

The most misused word I believe by journalists relating to the Federal budget this year is that we cut the Federal budget. That is inaccurate. We increased the defense budget as much as those overly extensive domestic cuts reduced the domestic budget.

To use the 3-year figure, the President's announced 3-year cumulative $130 billion cut in domestic and social programs, during the next 3 years we increased the defense budget $160 billion. Now if we increase the defense budget $160 billion and we cut the social and domestic budgets $130 billion, we have not cut the Federal budget.

Then, during exactly that same 3-year period of time, we cut Federal revenues $286 billion. So, while we did not reduce the Federal budget because we increased the defense budget, at least as much as we cut the social budget, we cut Federal revenues $285 billion. That is a massive deficit and massive conflicts into the credit market where we are now taking and will be taking up to a third of the available capital out of the credit market because the tax cut was too big, and the defense budget is too big, and we have got to change that or we are going to go into deep, deep recession and we in this House are calling on the administration to look at that and acknowledge that and say, let us reverse this before it gets absolutely irreversible.

Mr. BONKER. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS of Montana. I yield to the gentleman from Washington.

Mr. BONKER. The gentleman referred several times to the plural "we." That "we" cut the domestic programs and "we" increased defense spending.

I do not think the gentleman means that he voted to support those programs, that they represent the other side's approach to our economic policy.

Mr. LOWRY of Washington. Yes; being a person like everyone else on this floor, very proud to be in this Congress, I always accept what we have passed, "we" as an institution, passed. I did oppose that economic recovery program as have the other people sitting on the floor here with us.

Continuing on the defense budget for just a moment and the gentleman in the well accurately, in my opinion, described the defense increase proposed over the next 5 years as three times the acceleration at the height of the Vietnam war, after inflation, I believe that is an accurate description.

Very knowledgeable economists like Lester Thurow and Vassily Leontiff pointed that out.

I would like to add another one. I have done a little studying and the $1.6 trillion proposed defense increase in the next 6 years after factoring inflation, after factoring in increased technological cost now of military goods is more than we spent during World War II. It is more than we spent during World War II.

Now, that is an excessive defense budget that we cannot afford in this economy. Every one of us is for a strong national security. A strong national security needs a strong national economy. Military expenditures and related deficits due to the overexpenditure of the military more than necessary and the tax cut being too large is bad for our national security and we in the next few weeks and the next few months have got to be willing to look at making meaningful cuts in the defense budget that will be coming before us in the defense appropriations that will be coming before us and we have go to be prepared to change that tax cut.

□ 2000

If we are not, then I am afraid that this trend is going to go on.

I thank the two gentlemen that have brought this issue to the floor. I appreciate them doing that very much. Nothing could be more important to the economy of this Nation than that we have accomplished the objective of this special order tonight.

I thank the gentleman.

Mr. WILLIAMS of Montana. Mr. Speaker, I thank the gentleman from Washington for that statement and make particular focus on the point that the gentleman made, which I think has not been made often enough and therefore is unclear to the vast majority of the American people. That point is this: The President's budget spends more than the Democratic alternative budget.

Let me put that another way.

President Reagan's budget cuts less than the Democrat's budget would have cut. The overall Democratic program carried with it less deficit, less red ink than does the President's plan which this Congress accepted. That is a point that unfortunately has been lost upon some of the American people, although I note that it has not been lost upon those American people who work on Wall Street.

Mr. Speaker, I yield to my colleague in this endeavor, the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, I thank the gentleman.

In closing this worthwhile session, I would like to have included in the RECORD various letters and statements that have been submitted to my office from people that are experiencing firsthand economic hardships in the Northwest.

I know that all of us who have spoken today have heard from people we represent expressing similar concerns.

One letter that is worth noting comes from Jim Hodges, who is a realtor and developer in Olympia, Wash. Mr. Hodges was in my office last week. He is probably the most successful developer in my district, very prominent, a proud man, but a man who carries his burdens heavily these days because of what is occurring in his industry. I just would like to read one statement from the letter that I will have included in the RECORD:

I am the chairman of a group of realtors which represents 16 different large market areas of the State of Washington and Portland, Oreg. The members of this group, in most cases, are the leading operators in

their market areas. What is happening to them is representative of the problems faced by the whole industry in this area.

At least 25 percent of them at this very moment are in receivership, near bankruptcy or negotiating to allow subdivisions and other property to be repossessed. Fifty percent of them will be in the same position within 6 months if interest rates stay at or near where they are today. The other 50 percent of us are losing so many dollars that we will not be paying income taxes on our 1981 returns. I paid approximately $200,000 in income taxes for myself and two corporations last year. If this year finishes at the same level that it has been running for the last 6 months, I will pay little or no taxes to the IRS for 1981.

He speaks as a representative of a number of prominent businessmen who I think add a new dimension to the issue, and that is, without income there will be no income tax. With that lost revenue, it means a much higher deficit.

Mr. Speaker, I include the letter at this point in the RECORD:

SEPTEMBER 21, 1981.

Congressman DON BONKER,
*Longworth House Office Building,*
*Washington, D.C.*

DEAR DON: When I was in your office last week you mentioned that specific suggestions for action to improve the economy would be helpful.

We had some discussion about the extraneous factors in the CPI which were causing unnecessarily harsh measures in attempts to reduce the Index. Actually, inflation is in great part an imaginary menace. Most of our problems are caused trying to cure it. We need to reduce it to size by readjusting the weight of those factors included in it which only impact any given family once in several years. The two principal factors in this category are housing and transportation. The average family buys a house once every six or seven years and an automobile every three or four years. Properly weighted they would reduce the CPI by at least three points.

Another category of costs included in the Index are items such as food and fuel. We know that the price of these items is increasing. However, there is a finite supply of these, as well as many other necessary resources, which means that increased demand does not automatically increase the supply. As long as we are producing more people and fighting the law of diminishing returns in trying to increase the supply of these depleting resources, we have to regard the increased cost of these items as a real and not an inflationary increase. We have to accept what we can't change.

Periodically, statements appear in the media lamenting that the income of the American worker is losing ground to inflation. The fact is that this isn't true is proof that the CPI is a false number. All we have to do is look around us to see that the average American worker has more in the way of material goods and leisure time than at any time in history. There are more vehicles per household (including recreation types), more TV sets, more stereos, better furniture, better facilitized homes and more people eating out than at any other time in the past. All you've got to do is have someone on your staff dig up the statistics to convince your colleagues that this is true. Time for composing this letter is short or I would do it for you.

The statement was made that the factors included in the CPI were only adjusted about once every ten years. If you had a nail through your foot you wouldn't wait ten years to pull it out. The high interest rates established to combat this radically overstated inflation rate is a nail through the hearts of three of America's most basic industries: the automobile industry, home building and real estate. These industries along with companion industries represent over fifty percent of the country's economy. It is hoped that the leaders of this country have courage enough to pull the nail before they kill the whole economy.

With regard to the impact of the high interest rates in our area and the current status which we discussed in your office last week, here are some of the facts.

I am the Chairman of a group of Realtors which represents sixteen different large market areas of the State of Washington and Portland, Oregon. The members of this group, in most cases, are the leading operators in their market areas. What is happening to them is representative of the problems faced by the whole industry in this area. Meetings are held every three months, beginning on Thursday and lasting through Saturday. I have been an active participant at every meeting since I was invited to join the group ten years ago. My company has been built around ideas obtained from the group during the last ten years. Be assured that they are the leaders in the Real Estate field in the Pacific Northwest. Also, most of them are builders and developers.

They are all proud hard working men and are not the type that complain and blame others if they fail. However, at least 25 percent of them at this very moment are in receivership, near bankruptcy or negotiating to allow subdivisions and other property be repossessed by lenders. Fifty percent of them will be in the same position within six months if interest rates stay at or near where they are today. The other 50 percent of us are losing so many dollars that we will not be paying income taxes on our 1981 returns. I paid approximately $200,000 in income taxes for myself and my two corporations last year. If this year finishes at the same level that it has been running for the last six months, I will pay little or no taxes to the IRS for 1981. My companies are getting by on a break-even basis in the top 50 percent of this group of major operators. This group is as close as one could come to getting a sampling of how the real estate and building industries are faring in the State of Washington.

The Administration keeps telling the news media that we are not in a recession. However, I assure you that real estate, home building, lumbering and related industries are in a deep depression.

There are approximately 1,660,000 people employed in the State at this time. The jobs of 1,300,000 are jeopardized by the rapid drop in building, lumbering and related industries. Construction, lumbering, finance, insurance and real estate employs 236,000 people. A 50% layoff in these businesses would double the State's unemployment rate.

Governor Spellman said last Thursday that the State of Washington was going to be 655 million dollars short in meeting budget this biennium. The enclosed article from the Daily Olympian of September 21, 1981 states that one of the main causes of the shortfall is "Portions of our economy, those related to home building, are in a Depression, even while other sectors are reasonably affluent, but because so much of our prosperity depends upon good times in lumbering and construction, we now have fallen on hard times in the State revenue take".

In closing, let me say that our Federal Government is going to experience a shortfall in tax revenues many times larger, due to putting the real estate and building industries of the U.S. out of business, if it continues with high interest rates.

Very truly yours,

JAMES W. HODGES.

Mr. Speaker, I also have a statement from the Washington State Labor Council, AFL-CIO, representing the working people of the State of Washington. They are equally concerned. The letter is from Mr. Marvin Williams, who is its president, and he outlines in painful detail the effect that high interest rates are having on the Washington State economy. I will not detail those at this time, but I would like to have Mr. Marvin Williams' letter included in the RECORD at this time:

WASHINGTON STATE
LABOR COUNCIL, AFL-CIO,
*Seattle, Wash., September 23, 1981.*

High interest rates are having a crushing impact on the economy of Washington State. High interest rates are shattering lives through unemployment, devastating communities through plant closures and rendering the state government nearly bankrupt.

Washington's economy is heavily dependent on logging and forest products manufacturing. These employment sectors are immediately hurt when high interest rates force reductions in construction. As of July 1981, Washington's unemployment rate stood at 9.1 percent, up from 7.7 percent a year earlier. Twenty-one of Washington's 39 counties had double digit unemploynemt rates in July. Four counties had unemployment rates exceeding 15 percent. These figures are not surprising considering that of the 170 forest product mills in the state, 31 are shut down and 37 have curtailed production.

The state's economy will suffer permanent damage if the 31 mills that are completely shut down do not re-open. These closures devastate families, communities and governments precisely at the time when their resources are stretched to the limit.

The spillover effect of the depression in the housing industry is clearly illustrated by the fiscal crisis being experienced by Washington's state government. Revenue generated by the three major sources of state tax revenue, the sales tax, the business and occupation tax and the real estate excise tax, have fallen far below forecast. Two weeks ago the state had to borrow $300 million from a private bank to meet its payroll and other obligations. Last week the Governor declared a "financial emergency", announced a projected $655 million deficit in state general fund revenues and ordered a 10.1 percent across-the-board budget reduction. These reductions will come on top of a $400 million reduction in federal aid to the state.

The citizens of Washington State need relief from an economic recovery plan which puts workers out of work, housing out of reach and the needs of corporations and the wealthy ahead of the needs of workers and the poor. We need immediate

relief from intolerably high interest rates. The longer the delay, the greater the harm to our economy.

Mr. Speaker, probably the most prominent individual in the savings and loan business in the State of Washington is Mr. Hal Wolfe. He has a number of outlets in my district and throughout the State. He is very prominent nationally in the savings and loan league. He has discussed the plight of the economy on a number of occasions with me. He feels, as many of us do, that the economic situation is not going to improve for his industry and, of course, all of us who are concerned about this problem know that S. & L.'s are very near extinction and that they depend heavily upon long-term mortgages in an environment where short-term investments prevail. So I would like to have the statement that has been submitted to us by Mr. Hal Wolfe, president of Capital Savings & Loan Association included at this point in the RECORD:

CAPITAL SAVINGS & LOAN ASSOCIATION,
*Olympia, Wash., September 22, 1981.*

Memo to: Congressman DON BONKER.
From: Hal T. Wolfe, Sr., President, Capital Savings and Loan Association.

The following figures represent the effect recent high interest rates have on the housing industry. The trend from 1978 to 1981 demonstrates the increasing intensity of the housing problem. Clearly, action must be taken now to evade a housing catastrophe.

Housing demand has been artificially suppressed by high interest rates. Housing construction has fallen dramatically. Demographics indicate that there simply are not enough homes being produced to meet present and future needs.

The American public cannot afford home ownership. The average American home in 1969 was $25,600 and in 1979 was $63,200. There will be a housing shortage in the 1980's. The price of a home will rise to meet demand.

The attached figures indicate that the production of new housing is well below the needed levels for minimum requirements. They also show that if sufficient housing units were available, they would not be at a price that would be affordable by the majority of Americans.

The cause of this dire housing situation is high interest rates. These rates must come down and they must come down immediately!

Mr. Speaker, Mr. Joe Martineau is executive vice president of the Home Builders Association of Washington State. He writes that those small businessmen involved in the housing industry are closing their doors, facing closure, or entering into bankruptcy in the largest numbers in the industry's history. It is obvious that such a situation cannot be tolerated any longer.

Mr. Speaker, I include Mr. Martineau's letter at this point in the RECORD:

HOUSE BUILDERS ASSOCIATION
OF WASHINGTON STATE,
*Olympia, Wash., September 23, 1981.*

Hon. DON BONKER,
*Washington, D.C.*

DEAR REPRESENTATIVE BONKER: The National Association of Home Builders, representing 123,500 building industry firms, and of which we are an affiliate, is about to embark upon a nationwide campaign from across the country designated as "Unlock the Economy Week". A year ago such an effort would have been most appropriate. Today its success is critical.

Statistics nationally reflecting housing starts and permits issued do not reflect in any instance the true occurrences in the market place today. In the real world of housing, builder, subcontractor, supplier, financing and marketing firms are closing their doors, facing closure or entering into bankruptcy in the largest numbers in the industry's history. It can only be apparent to those of us in the field that there are those others in high places who do not have to face the reality of a business depression and who cannot understand the despair of the individual who is about to suffer the loss of a lifetime of work and dedication.

For months we have seen the spread between the prime rates, Fed's discount rates and inflation grow larger and larger, when in fact, the prime rate and Fed's discount rate should be closing on the inflation rate. 95 percent of the potential American housing market need not even look to the purchase of a home today because of unconscionably high interest rates. The employment picture in the state of Washington has reached the startling proportions that existed during the employment recession of a few years ago which was fueled by the massive layoffs in the aerospace industry.

I am sure that every state has its own unique problems in an economic climate such as we face today. Because two of our major industries are so significantly affected, that is, the home building industry and the timber industry, we perhaps have felt the impact of hard money policies and high interest rates more significantly than other areas. It is extremely difficult to convince the members of an industry or to convince businessmen and their employees generally that to save the nation's economy, we must, in fact, "throw the baby out with the bath water". I would hope and pray that the elective administrators and policy makers of this nation in concert with the appointive managers of our government could apply a combination of their talents and compassion to devise an economic interim program capable of "keeping the nation afloat" while the greater overall program of revitalizing the whole economy and balancing the budget takes place.

I see no reason to dazzle you with statistics because only a blind man and a fool could fail to see and understand that the nation's greatest asset, it's small business community, is about to be decimated.

Sincerely,

JOSEPH A. MARTINEAU,
*Executive Vice President.*

Mr. Speaker, here is another example of a realtor experiencing similar problems. This is from Vince Himlie of Himlie Realty, Inc.:

HIMLIE REALTY, INC.
*Shelton, Wash., September 17, 1981.*

DEAR CONGRESSMAN BONKER: In a recent conversation with Jim Hodges, wherein we were discussing economic conditions in relationship to the real estate field in particular, he suggested that I contact you and relate what has transpired in my personal situation.

Jim and I are both members of a group of Realtors in the State of Washington, namely the Northwest Brainstormers, a group of fellows who meet regularly to discuss and compare business trends in our separate communities throughout the state.

Let me give you some background information pertaining to my involvement in the real estate field. I have been in real estate sales for the past 19 years, and opened my own office 17 years ago.

I have grown from a one-man operation to the largest firm in our town of Shelton, and during that time have employed as many as 8 office staff, in addition to my sales staff, which membered 18 salesmen at one time.

I have developed 4 areas of new homes, seeing new homes built and sold within a very short time. I have part ownership in several commercial buildings in Shelton, besides my own new office, which covers one-half of a city block, and we moved into it 2½ years ago.

At the time the economy started worsening, I had just finished developing an 85 lot tract, anticipating that it would have new homes built on the lots and sold, as had happened in the previous developments. But, this has never happened. To date there are five homes in the entire development, and some of the houses were sold on contract, so the builder recognized very little income at the time of the sales.

As money became more scarce. I was forced to turn to individuals to borrow money to operate my company. Interest rates were becoming very expensive, and I soon found I was in deep trouble.

As of May 11, 1981, I was forced to file a Chapter 11 with the United States Bankruptcy Court. Even though I am still able to operate my business, with the current

[1] Since no figures are available for 1981, a loan amount of $55,000 was used and the current FHA rate of 17.50 percent.

market as it is, my future is very unpredictable.

The economy of Shelton as a whole is greatly affected by the slump in the sale of homes. Our town is mainly a lumber oriented economy, so when the sale of new homes is curtailed, it causes a wide rippling effect, which touches nearly every business in town, from the lumber yards to the house furnishing department stores. We have seen many people lose their jobs.

In our own office, we have had to cut back on our staff until we have two secretaries, a bookkeeper, and my wife has even come in to work on a non-paying position, just to help keep the door open for business. We now have 8 salesmen left—the others have been forced to take other jobs in order to make a living.

Everyone involved in the real estate field is greatly concerned, not only for our own area, but can see the nation as a whole being in great trouble if something is not done soon to ease the strict regulations regarding obtaining mortgages to purchase new homes. When you see large lumber mills, such as the Diamond Match Co. in Newport, Washington being closed, after being in operation for many, many years, as well as seeing Simpson Timber company having to give some of their key personnel early retirement in order to keep the operation going, we cannot help but be very alarmed.

It is my greatest hope that you can be of assistance in helping to get our country back on its feet, and once again be the booming economy that we can all remember of a few years ago.

Very truly yours,

VINCE HIMLIE,
*Realtor.*

Mr. Speaker, these are just a few examples of individuals and organizations, all of whom are experiencing economic hardship, not only in the State of Washington, but the State of Oregon, the State of Montana, the State of Idaho, and the State of California.

This is an economic crisis. All of us hope that tomorrow night when the President addresses the Nation that he will acknowledge certain aspects of his program are not working and will attempt to set things straight so that we can have an economic policy that will truly bring about economic recovery in America.

Mr. WILLIAMS of Montana. Mr. Speaker, again I thank my colleague, the gentleman from Washington, for his leadership and assistance in providing the time for this effort this afternoon.

## GREEK COIN PROGRAM SHOULD BE A WARNING TO U.S. OLYMPIC COINS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 10 minutes.

● Mr. ANNUNZIO Mr. Speaker, last week I reported on the accusations in Greece about a cloud over its 1982 Pan-European Games coin program. Those accusations are of interest in the United States because the firm involved in marketing the Greek coins, Numarco, is a subsidiary of the international banking company Lazard-Freres. Lazard-Freres is a partner of Occidental Petroleum and has a contract with the Los Angeles Olympic Organizing Committee (LAOOC) for the exclusive worldwide rights to market U.S. Olympic coins proposed under S. 1230 and H.R. 3958.

Another report on the Greek problem has appeared in the September 26, 1981, issue of Numismatic News. It shows how the issues being raised in Greece are very similar to those I have raised about S. 1230 and H.R. 3958. It also shows how my Olympic coin bill, H.R. 3879, resolves these issues.

There have been accusations in Greece that the Lazard subsidiary, Numarco, was improperly awarded a sweetheart contract granting it the exclusive rights to market 1982 Pan-European Games coins. I have questioned whether the LAOOC acted properly in awa 'ding Lazard-Occidental exclusive marketing rights to U.S. coins that are not in existence and cannot come into existence unless Congress acts.

The terms of the contract between the Greek Government and Numarco have never been made public. Similarly, the terms of the contract between the LAOOC and Lazard-Occidental have never been made public, even though I requested a copy of the contract over 3 months ago.

Also questioned was the decision of the Greek Government to permit Numarco to market the coins in Greece rather than market the coins itself. In the United States I believe that the U.S. Mint, with its 45 years experience in selling coins can do an excellent job at a lower cost than private marketers. It is also wrong for a private concern to be given the exclusive rights to U.S. coinage minted pursuant to the Constitution. My bill provides for direct marketing by the mint, while S. 1230 and H.R. 3958 require private marketing.

The Greek coins will be issued in three series of five coins each. The entire set will cost over $2,000 at current prices and rates of exchange. S. 1230 and H.R. 3958 repeat the error of flooding the market with too many designs by proposing 29 coins. I estimate that a complete set could easily cost $8,000 or more. My bill calls for only a single 90-percent silver coin, which will be easier to sell and will be affordable to many more people than a set of 29 coins. My coin would cost between $20 and $25.

Finally, there has never been as estimate of how much, if any, revenues will be raised for the Greek Government. S. 1230 and H.R. 3958 would raise little or no revenue for the Federal Government. My bill requires that 50 percent of the profits go to reducing the national debt. It should raise between $50 to $135 million for that purpose.

Let us learn from others so that we can have a successful and profitable coin program not clouded by suggestions of scandal.

The entire Numismatic News article is reprinted below:

GREEK PLAN DRAWING FIRE

Angry exchanges characterized a news conference Sept. 9 in Athens, Greece, held to announce the issuance by *Greece* of the first five coins in a series planned to commemorate the 1982 European Games, according to Anastasios Tzamalis, Krause Publications' Athens correspondent.

Delving into what appears to be a growing scandal concerning the awarding of the contract to market the commemorative coins, reporters pressed Greek officials and representatives of Lazard-Numarco, the firm that received marketing rights from the Greek government, for answers.

Of those present, including a deputy minister, president of the organizing committee of the European Games and several managers of the Bank of Greece, only the Lazard-Numarco team responded to a "barrage of questions from reporters," Tzamalis said.

These Lazard-Numarco representatives used the "tactic of a lot of words to say nothing" and "they succeeded in adding substantially to the frustration," Tzamalis continued. "In the end, the Greek deputy minister interrupted the angry exchanges, asking the press point blank to help the program rather than criticize it."

Left unanswered were such questions as:

What are the expected profits for Greece?

Why did the Greek government prefer to deal with a distributing company instead of holding an international bidding competition for the contract?

Why had prior marketing offers from organizations, such as Great Britain's Royal Mint and the Franklin Mint, been overlooked?

Why hadn't the Greek government undertaken the program, placing only the international distribution with Lazard-Numarco?

Prompting the inquiry of the press were the systematic silence of Greek officials to questions raised about the deal in the Greek parliament earlier this year and the Greek government's refusal to publish the terms of the contract between the government and Lazard-Numarco, Tzamalis said.

In February, 1981, Member of Parliament Virginia Tsouderou termed the deal between the Greek government and Lazard-Numarco a "first class scandal." She accused the government of awarding a sweetheart contract to the firm, which is a subsidiary of Lazard Freres & Co., a Paris-based international investment banking firm.

Lazard Freres & Co. is also a partner with Occidental Petroleum Corp. of Los Angeles, Calif., in the "coin group," an entity that is currently trying to push a bill through Congress that will create a 29-coin program to commemorate the 1984 Olympics and give itself exclusive marketing privileges.

A total of 15 designs will be issued by Greece to commemorate the 1982 European Games. They will be issued five to a group and the second and third groups will be released in February, 1982, and later in the spring of 1982, respectively.

Each group will consist of three silver coins of the 100, 250 and 500-drachma denominations and two gold coins of the 2,500 and 5,000-drachma denominations.

Mintages of 300,000 silver coins and 75,000 gold coins are planned. Tzamalis considers these figures highly optimistic in light of the fact that of the 18,000 silver 500-drachma coins and 10,000 10,000-drachma coins minted by Greece in 1979 to mark its entry into the European Common Market, half remain unsold in Bank of Greece vaults.●

## REAGAN PROSPERITY HURTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, the first results of the administration's grand economic experiment are starting to come in, and they are far from encouraging.

Historically high interest rates are suffocating the housing industry, thwarting a recovery in the automobile industry, and plunging thousands of small businesses into bankruptcy. Wall Street is suffering from a bad case of Reaganomic jitters.

The future looks anything but bright.

What we are seeing now does not at all resemble the rosy picture painted last winter as President Reagan was exhorting Congress to give supply-side economics a chance. The supply-side apostles then promised to deliver strong economic growth, a lower unemployment rate, and a defense buildup all at the same time. All this would be possible, they said, by cutting taxes; the savings would be used by industry to invest in new plants and equipment; and this would lead to reduced inflation through higher productivity.

Frankly, I think we have enjoyed about all the Reagan prosperity that we can stand.

Mr. Reagan says it is unfair to criticize his economic policy now since it does not go in effect until October 1, when the new fiscal year begins.

I do not think this argument is very convincing to workers who have lost their jobs since last winter, to college students who have had to drop out because they cannot get loans, to children on school lunch programs, to small businessmen who have lost their businesses, to investors in the stock market, and countless other victims of Mr. Reagan's economic policy.

I have to agree with economist Walter Heller who was quoted in a recent *Times* magazine article as saying: "Only an ostrich could have missed the contradictions of Reaganomics."

We had ample warnings that the Reagan economic program was nothing but a will-o'-the-wisp concocted by rightwing economic youngsters who never thought through the consequences.

The twin goals of supply-side economics—a huge tax cut and increased revenues—simply are not compatible. It does not take a Ph. D. in economics to figure this out.

From the very beginning we were warned by respected economists of both liberal and conservative persuasions—people like Henry Kaufman of Solomon Bros. among them—that the arithmetic of supply-side economics just did not add up. They warned that there was no way you could cut taxes more than $700 billion over 4 years and still balance the budget without catastrophic results.

The untutored Reagan economic brain trusters exhorted us not to worry about figures and facts—to buy it all on faith. They convinced the President that in the short run he did not have to concern himself with deficits.

Well, the Republicans and some of my misguided brothers in Congress passed the President's tax bill. Now Mr. Reagan is finding out that deficits do matter. And he is asking us to bail him out. The financial community has made it clear it does not believe Mr. Reagan when he says he can cut taxes and balance the budget at the same time. So the President wants us to cut another $16 billion from social programs—on top of the $35 billion already slashed—to prove to Wall Street that he is serious.

It is not difficult to understand what is happening. When the Government has to borrow large sums of money to finance a deficit, it competes with the private sector for available funds. When these funds become scarce—or when lenders think they will be in the near future—interest rates go up. This is the case now because the lenders have no faith that Mr. Reagan can have it both ways: A balanced budget where the Government does not have to borrow and a huge tax cut.

The administration has promised to hold the deficit to $42.5 billion in 1982 and balance the budget by 1984. The Congressional Budget Office, however, predicts a 1982 deficit of $65 billion, declining to about $50 billion in 1984. This is about in line with what private forecasters are saying.

So it is apparent now that by listening to the pie-in-the-sky supply siders Mr. Reagan has gotten himself between a rock and a hard place. In desperation the administration wants more blood from the poor and the needy, those least able to make any more sacrifices. Alice Rivlin, the highly respected economist with the Congressional Budget Office, told Congress recently that the only way the budget could be balanced without rollbacks in social security or military spending would be to "close down the rest of the Government."

So much for the administration's claim that it could cut taxes and balance the budget at the same time. I guess we could if we wanted to turn our backs on everything else that we have done to make this an enviable society since the days of the New Deal.

Complicating the economic outlook is the other side of the administration's economic game plan. This is its determination to hold down the money supply. Repeatedly it has applauded, indeed embraced as its own, the Federal Reserve's tight money policy. According to the monetarists who expouse this course, you restrain the growth of the economy by restricting the money supply.

The goal is simple: By making the cost of borrowing very expensive you reduce total demand in the economy. Unemployment increases, workers moderate wage demands and, with a little luck, price increases moderate.

The trouble is that with the tax cut putting added pressure on lendable funds because of expected deficits, we are getting a double whammy on the money supply side.

Federal Reserve Chairman Paul Volcker has pledged that his independent agency will stick with its tight money policy to battle inflation.

He says the solution is simple: Either cut more out of the budget or increase taxes. Since it would be terribly embarrassing for the President to propose a tax increase after fighting so hard for a cut, he has decided to try to wring more from those in our society who have the least ability to fight back.

Mr. Volcker recently reminded those who voted for the tax cut that in doing so they accepted the responsibility of "cutting the spending suit to fit the revenue cloth."

When we left for the August recess many of my colleagues assumed that they had bitten the budget bullet and that it was all over. Well, clearly it is not. The question now is how much farther we can go and still look at ourselves in the mirror.

There is indeed a bit of irony in the fact that the same administration that has promised a balanced budget was forced to come to Congress in a move to allow the national debt to pass the trillion-dollar mark. And it is the second time since he took office that the President has had to ask for a debt-limit increase.

How much longer can we endure this adventure into the never-never land of economics? I do not think very long.

High interest rates are having a disastrous effect. The housing recession is now nearly 3 years old, longer than any of its recent predecessors. Bankruptcies have increased 42 percent over the same period last year; 85 percent of all savings and loan institutions, the life's blood of the housing industry, are losing money because of high interest rates.

The dire predictions of those who warned against Reaganomics with its promises of tax cuts and a balanced

budget at the same time are turning out to be quite accurate.

The administration's economic experiment is turning into an economic nightmare.

It is time for the President to spurn the band of zealous economic neophytes and turn to the old pros for advice on how to get out of this dilemma.●

## MILITARY SERVICE MEMBERS INEQUITABLY EXCLUDED FROM FEDERALLY FUNDED UNEMPLOYMENT BENEFITS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. WHITE) is recognized for 5 minutes.

● Mr. WHITE. Mr. Speaker, I rise in behalf of all military service members who, under recent changes in the law, are now inequitably excluded from federally funded unemployment benefits.

A brief historical sketch of this situation is in order here. Under former law, Federal unemployment benefits were provided to former military personnel if they met certain eligibility requirements of the State in which they applied and if they had served 365 or more continuous days of active duty and were separated from the military under other than dishonorable conditions. Unlike other workers whom many States disqualify for voluntarily leaving a job, service members were eligible for unemployment benefits for leaving the military at the end of a term of enlistment.

Recent changes in the law, however, have eliminated unemployment compensation for those who voluntarily quit military service at the end of a term of enlistment and are eligible to reenlist. Proponents of this provision of the budget reconciliation bill argued that these individuals had voluntarily enlisted in an All-Volunteer Force and should therefore be treated like civilians who voluntarily accept and quit a job. In the process of saving dollars, equity was not considered. This change in the law has the net effect of rewarding those persons who are not qualified to reenlist in our military services and punishing those who have honorably and capably served our country.

There are other problems with the present approach as well. First, it drastically impacts the number of households which might be eligible for food stamps. Second, it places the service member who may be quite a distance from his home at a considerable disadvantage in assessing the labor market compared to the local civilian. Generally speaking, it serves to impede rather than assist the readjustment process from the military to the civilian sector.

Today, I am introducing a bill which remedies this situation and which appears to be a reasonable response to critics of unemployment benefits for ex-service members, yet which represents a reduction in spending compared to the former law. In short, it first provides that a person must have 730 days of continuous military service in order to qualify as employment for unemployment compensation purposes. Second, it requires a 4-week waiting period between the week in which an individual is separated from the military and the week in which he or she first becomes entitled to compensation. And finally, it limits an eligible ex-service member's total entitlement to no more than 13 times the weekly benefit amount payable.

I sincerely believe that this legislation will serve the best interests of our veterans, and I therefore urge my colleagues to join me in assisting those who have served our country by supporting this bill.●

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 5 minutes.

● Mr. CROCKETT. Mr. Speaker, yesterday, the House, on rollcall 213, voted on House Concurrent Resolution 183, expressing the sense of the House that the national rugby team of South Africa should not play in the United States.

Mr. Speaker, although I voted "yes" on this measure, apparently the electronic voting system did not register my vote, as I am listed as "not voting" in the RECORD of yesterday.

I wish the RECORD to show that I did support this measure, and that I did cast my vote for it in the House on September 22.●

## TRIBUTE TO EDNA M. VOORHEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. OBERSTAR) is recognized for 5 minutes.

Mr. OBERSTAR. Mr. Speaker, yesterday family and friends paid their last tribute to Edna M. Voorhees, a dedicated and much loved member of my staff, who passed away this weekend, a victim of cancer.

During her 16 years' service here Edna Voorhees personified the unsung hero nature of Hill staffers, serving four Members of Congress, Bob Duncan, Jerry Pettis, John Blatnik, and myself in that period of time. The labors of dedicated and hard-working staff turn the gears of this institution, but they receive little public recognition for their efforts. I think Edna deserves that special public recognition. She was an exceptional secretary. In fact, I would say the very model of a true professional in her vocation.

But Edna was more than the model of a professional. She was wife, homemaker, mother, friend, counselor, comforter to many, a profound and beautiful person to all who knew her.

At birth we rejoice and we wonder at the mystery of new life ahead. But the irony of human existence is that in death the mystery of life is revealed to us. The joys, the sorrows, the disappointments, and the triumphs are special ways in which we were touched by the life of a loved one. In life we may have been too embarrassed to say all we felt or appreciated in that person. But death releases us from that bondage. In life we held back, but now we are no longer restrained. Our hearts and memories will overflow and recall and retell our favorite secret memory of that loved one.

In life Edna was such a person. In life she belonged to a few. In death she belongs to us all.

We are the most human in those special milestones in our brief passage on Earth, marriage, birth, and death. At those times we let our guard down, we let others invade our privacy. We let our feelings and emotions out to touch the lives of others.

It strikes me that Edna never had her guard up, she never wore a mask. She was one person, she was not inscrutable. She allowed herself to be vulnerable. She allowed herself to be totally open to others' needs and hurts. She loved and she was hurt. She showed and she shared the love and the hurt.

If love is the glue that binds the family together, then Edna was that glue. She was love itself.

Inevitably the question forces itself on us. She was such a good person, always putting others ahead of herself, why did she have to suffer so.

So life, a good life, does not mean that we have earned an easy death. A compassionate life is one in which the joys and the sufferings of others are deeply felt and that kind of life makes death an act of dying for and with others, and in a very real sense as well as in a symbolic way Edna suffered for those with whom she had lived.

There is a Yiddish saying, "God gave us burdens, but he also gave us shoulders." Edna was shoulders for all of her family and for all of us whose lives she touched. The Lord has taken her to His house, but he has not left us alone. He has left us the example of Edna's strength, her courage, and of her love.

Her time of testing is over. Ours has just begun. I pray that we shall not be found wanting and that her example will live on in each of us.

## TRIBUTE TO MR. FRANK J. ZAMBONI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DYMALLY) is recognized for 60 minutes.

Mr. DYMALLY. Mr. Speaker, on September 30, 1981, the Paramount Chamber of Commerce will pay tribute to one of our local pioneers who had contributed a great deal to the success and development of Paramount. This honor will go to Mr. Frank J. Zamboni at a chamber of commerce membership luncheon to be held at Iceland, 8041 E. Jackson, Paramount, at 12 noon.

The origin of Frank J. Zamboni can be traced to January 16, 1901, when he was born in Eureka, Utah.

Mr. Zamboni, in the ice manufacturing business in the 1930's when that type of endeavor went to pieces, was concerned that his ice plant was lying idle. This concern coupled with the fact that Hynes—Paramount—was primarily a Dutch community, gave birth to the idea of an ice rink for Hynes.

When he first proposed the idea of building a first-class ice skating rink at the small town of Hynes, the idea was denied. But he went ahead, convinced the idea was sound. The first years were tough and trying, but the rink has attained national prominence and serves multitudes of ice enthusiasts weekly. When the rink originally opened in January 1939, it did so with all of the splendor and ceremony of a true "Hollywood" opening.

The biggest problem was the resurfacing of the ice, which required up to 1½ hours and three to five men. In March 1942, Zamboni began to experiment with a tractor and a sled. After 7 years of tinkering, he patented mankind's first ice resurfacer.

In 1952 Sonja Henie was practicing in the Paramount rink. At her request, Zamboni built a machine she took on a tour of the United States, Canada, and Europe. Other rink owners spotted Zamboni's machine and placed orders.

In 1954, Zamboni began limited production of a standardized model and started his rise from "little old ice maker" to king of the ice resurfacer. The name "Zamboni" is now synonymous with the machine.

Besides being a prominent businessman, he was also a civic leader and led the undertaking to unite Hynes and Clearwater under the single name of "Paramount." taking office as president of the Hynes Clearwater Kiwanis Club January 3, 1946, he announced the Paramount unification project as the club's major objective for the year. Soon nearly all other civic, patriotic, and cultural organizations of the community had lined up in support of the plan. Consolidation of the two towns under the single name of Paramount marked the final step in the community unification project.

Another highlight of Mr. Zamboni's career is in June of 1965, he had the high honor of being named to Ice Skatings Hall of Fame.

Frank married Norda Chamberlain in February of 1923. They have three children, Arlene Lenarth, Jean Zamboni, and Richard Zamboni, 14 grandchildren and 7 great-grandchildren.

Mr. Speaker, as the Representative of the city of Paramount I am pleased to join with the residents of Paramount in paying tribute to Mr. Frank J. Zamboni and his family.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. NELSON (at the request of Mr. WRIGHT), for today, on account of illness.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KRAMER) to revise and extend their remarks and include extraneous material:)

Mr. ROGERS, for 10 minutes, today.

(The following Members (at the request of Mr. BONKER) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. WHITE, for 5 minutes, today.

Mr. FORD of Tennessee, for 10 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. BONER of Tennessee, for 15 minutes, today.

Mr. OBERSTAR, for 5 minutes, today.

Mr. ANNUNZIO, for 15 minutes, on September 24.

Mr. ROEMER, for 20 minutes, on September 24.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. HYDE, at the conclusion of general debate on H.R. 4 in the Committee of the Whole today.

(The following Members (at the request of Mr. KRAMER) and to include extraneous matter:)

Mr. NELLIGAN.
Mr. CONTE.
Mr. MCGRATH.
Mr. SNYDER.
Mr. BUTLER.
Mr. MILLER of Ohio in three instances.
Mr. HAMMERSCHMIDT.
Mr. WHITTAKER.
Mr. MOLINARI.
Mr. HYDE.
Mr. FINDLEY.
Mr. LEWIS.
Mr. WINN.
Mr. HOLLENBECK.
Mr. LUJAN.
Mr. WAMPLER.
Mr. TRIBLE.
Mr. WOLF.
Mr. DOUGHERTY.
Ms. FIEDLER in two instances.

(The following Members (at the request of Mr. BONKER) and to include extraneous matter:)

Mr. DORGAN of North Dakota.
Mr. MAZZOLI.
Mr. HAMILTON.
Mr. WHITTEN.
Mr. ERTEL.

Mr. GARCIA.

## SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 764. An act to provide for protection of the John Sack cabin, Targhee National Forest in the State of Idaho; to the Committee on Interior and Insular Affairs; and

S. 1475. An act to extend the expiration date of section 252 of the Energy Policy and Conservation Act; to the Committee on Energy and Commerce.

## ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that the committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 618. An act to convey certain interests in public lands to the city of Angels, Calif.; and

H.R. 2218. An act to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes.

## SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled Joint Resolution of the Senate of the following title:

S.J. Res. 65. Joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

## ADJOURNMENT

Mr. SWIFT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 10 minutes p.m.) the House adjourned until tomorrow, Thursday, September 24, 1981, at 10 a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2231. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend the act of September 30, 1950, with respect to assuring a free public education for military dependents residing on Federal property; to the Committee on Education and Labor.

2232. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the month of June 1981, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

2233. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Greece (Transmittal No. 81-101), pursuant to section 36(b) of the Arms Export Control Act, together with certification that the sale is consistent with the principles contained in section 620C(b) of the Foreign Assistance Act of 1961, pursuant to section 620C(d) of the act; to the Committee on Foreign Affairs.

2234. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Colombia (Transmittal No. 81-105), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2235. A letter from the Acting Secretary of the Interior, transmitting a report covering fiscal year 1980 on donations received and allocations made from the fund "14X8563 Funds Contributed for the Advancement of the Indian Race, Bureau of Indian Affairs," pursuant to the act of February 14, 1931, as amended (82 Stat. 171); to the Committee on Interior and Insular Affairs.

2236. A letter from the Architect of the Capitol, transmitting the proposed master plan for future development of the Capitol grounds, pursuant to title V of the Legislative Appropriations Act, 1976; to the Committee on Appropriations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. EDWARDS of California: Committee on the Judiciary. Supplemental report on H.R. 3112 (Rept. No. 97-227, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. NATCHER: Committee on Appropriations. H.R. 4560. A bill making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-251). Referred to the Committee of the Whole House on the State of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SAM B. HALL, JR.: Committee on the Judiciary H.R. 1352. A bill for the relief of Laszlo Revesz (Rept. No. 97-246). Referred to the Committee of the Whole House.

Mrs. SCHROEDER: Committee on the Judiciary H.R. 1796. A bill for the relief of Jacobo Cosio-Franco; with an amendment (Rept. No. 97-247). Referred to the Committee of the Whole House.

Mr. McCOLLUM: Committee on the Judiciary H.R. 1624. A bill for the relief of Theresa Macam Alcalen; with amendments (Rept. No. 97-248). Referred to the Committee of the Whole House.

Mr. MAZZOLI: Committee on the Judiciary H.R. 1977. A bill for the relief of Maria Gloria (Joy) C. Villa (Rept. No. 97-249). Referred to the Committee of the Whole House.

Mr. LUNGREN: Committee on the Judiciary H.R. 3478. A bill for the relief of Mrs. Maruko Kubota Smith; with amendments (Rept. No. 97-250). Referred to the Committee of the Whole House.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. NATCHER:

H.R. 4560. A bill making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

By Mr. BONER of Tennessee:

H.R. 4561. A bill to amend title II of the Social Security Act to limit benefits in the case of individuals who are not citizens or nationals of the United States or who are residing abroad; to the Committee on Ways and Means.

By Mr. DORGAN of North Dakota:

H.R. 4562. A bill to amend the Internal Revenue Code of 1954 to deny all deductions for interest paid or incurred on loans in connection with an unfriendly takeover, or attempted takeover, of a corporation; to the Committee on Ways and Means.

By Mr. DORNAN of California:

H.R. 4563. A bill to amend title 18 of the United States Code to make rape a Federal crime if committed after travel in interstate commerce with the intent to commit rape, and to provide for the establishment within the Federal Bureau of Investigation a Rape Prevention Information Center; to the Committee on the Judiciary.

By Mr. ERTEL (for himself, Mr. FUQUA, Mr. WALGREN, Mr. BROWN of California, Mr. HOLLENBECK, Mr. LAFALCE, Mr. AUCOIN, Mr. MURPHY, Mrs. HECKLER, Mr. HUGHES, and Mr. WINN):

H.R. 4564. A bill to establish a uniform Federal system for management, protection, and utilization of the results of federally sponsored scientific and technological research and development; and to further the public interest of the United States domestically and abroad; and for other related purposes; jointly, to the Committees on the Judiciary and Science and Technology.

By Mr. FINDLEY:

H.R. 4565. A bill to temporarily delay the October 1, 1981, increase in the price support level for milk; to the Committee on Agriculture.

By Mr. GIBBONS (for himself, Mr. ROSTENKOWSKI, Mr. BRODHEAD, Mr. JENKINS, Mr. ALBOSTA, Mr. FRANK, Mr. WILSON, Mr. CONABLE, Mr. ARCHER, Mr. VANDER JAGT, Mr. PHILIP M. CRANE, Mr. FRENZEL, Mr. SHULZE, Mr. DERWINSKI, Mr. GREEN, Mr. PETRI, and Mr. WYLIE):

H.R. 4566. A bill to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes; to the Committee on Ways and Means.

By Mr. GUARINI (for himself, Mr. NOWAK, Mr. MCDADE, and Mr. MOAKLEY):

H.R. 4567. A bill to delay the application of Revenue Ruling 81-216, relating to the treatment of separate lots of industrial development bonds under the small issue exemption; to the Committee on Ways and Means.

By Mr. LUJAN:

H.R. 4568. A bill to direct the Secretary of the Interior to release on behalf of the United States certain restrictions contained in a previous conveyance of land to the city of Albuquerque, N. Mex., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MCKINNEY (for himself, Mr. MOFFETT, Mr. RATCHFORD, Mr. GEJDENSON, and Mr. DENARDIS):

H.R. 4569. A bill to designate the U.S. Post Office Building in Hartford, Conn., as the "William R. Cotter Federal Building"; to the Committee on Public Works and Transportation.

By Mr. PRICE (for himself and Mr. DICKINSON) (by request):

H.R. 4570. A bill to amend title 10, United States Code, to eliminate the requirement that an individual be a member of the National Rifle Association in order to be eligible to purchase arms, ammunition, targets, and other supplies and appliances necessary for target practice which are sold by the Department of the Army; to the Committee on Armed Services.

By Mrs. SCHROEDER:

H.R. 4571. A bill to amend the Second Liberty Bond Act to increase the investment yield on U.S. savings bonds to a level com-

petitive with comparable investments, and for other purposes; to the Committee on Ways and Means.

By Mr. SNYDER (for himself, Mr. PERKINS, Mr. TAYLOR, Mr. HUBBARD, Mr. STOKES, Mr. EVANS of Georgia, Mr. ROE, Mr. LATTA, Mr. GONZALEZ, Mr. STANGELAND, Mr. MOTTL, Mr. SOLOMON, and Mr. WATKINS):

H.R. 4572. A bill to provide that no person may charge interest at a rate which is greater than 10 percent per annum on loans exceeding $300, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WHITE:

H.R. 4573. A bill to amend title 5, United States Code, to allow ex-service members who voluntarily leave military service to receive unemployment compensation; to the Committee on Ways and Means.

By Mr. FOLEY:

H.R. 4574. A bill to amend section 164 of the Water Resources Development Act of 1976; to the Committee on Public Works and Transportation.

By Mr. ROGERS:

H.R. 4575. A bill to direct the Secretary of the Treasury to develop a plan for lowering interest rates; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WATKINS (for himself, Mr. ALBOSTA, Mr. ALEXANDER, Mr. ANTHONY, Mr. BEVILL, Mr. BOWEN, Mr. DE LA GARZA, Mr. EMERY, Mr. HOLLAND, Mr. HAMMERSCHMIDT, Mr. HENDON, Mr. JONES of North Carolina, Mr. JONES of Tennessee, Mr. LONG of Louisiana, Mr. KOGOVSEK, Mr. MCCOLLUM, Mr. MCCURDY, Mr. MCEWEN, Mr. MITCHELL of New York, Mr. NAPIER, Mr. ROE, Mr. SKELTON, Mr. SUNIA, Mr. WEBER of Minnesota, Mr. GILMAN, and Mr. CLAUSEN):

H.R. 4576. A bill to amend the Agricultural Act of 1961 to allow the Secretary of Agriculture to provide financial assistance for the economic development of rural enterprise zones, and to amend the Internal Revenue Code of 1954 to provide tax incentives for small businesses located in rural enterprise zones; jointly, to the Committees on Agriculture and Ways and Means.

By Mr. COELHO:

H.R. 4577. A bill to amend Public Law 97-34; to the Committee on Ways and Means.

By Mr. CARMAN:

H. Res. 230. Resolution expressing the sense of the House of Representatives with respect to the uncontrolled production, and exportation to the United States, of illicit narcotics; to the Committee on Foreign Affairs.

## MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

187. By the SPEAKER: Memorial of the Senate of the State of South Carolina, relative to textile imports; to the Committee on Ways and Means.

188. Also, memorial of the House of Representatives of the State of South Carolina, relative to textile imports; to the Committee on Ways and Means.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BENJAMIN:

H.R. 4578. A bill for the relief of Bert Van Prooyen; to the Committee on the Judiciary.

By Mr. BROWN of California:

H.R. 4579. A bill for the relief of Ofelma Pinghian Mangabat; to the Committee on the Judiciary.

By Mr. HORTON:

H.R. 4580. A bill for the relief of Maria Angela Chinn; to the Committee on the Judiciary.

H.R. 4581. A bill for the relief of Ronald H. Clifford; to the Committee on the Judiciary.

By Mr. MCKINNEY:

H.R. 4582. A bill for the relief of Bernard E. Teichgraeber; estate of Barbara G. Teichgraeber, deceased, Bernard E. Teichgraeber, and Richard F. Teichgraeber, executors; Bernard E. Teichgraeber and estate of Barbara G. Teichgraeber, Bernard E. Teichgraeber, and Richard F. Teichgraeber, executors; and Richard F. Teichgraeber and Winifred Teichgraeber; to the Committee on the Judiciary.

By Mr. MITCHELL of New York:

H.R. 4583. A bill to extend patent numbered 26,901 (originally issued as number 3,226,696) for a period of 10 years; to the Committee on the Judiciary.

By Mr. WILLIAMS of Ohio:

H.R. 4584. A bill for the relief of Eun Ook Hahn; to the Committee on the Judiciary.

H.R. 4585. A bill for the relief of Dr. Irfan Khan; to the Committee on the Judiciary.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 27: Mr. RICHMOND and Mr. YOUNG of Missouri.

H.R. 878: Mr. TRAXLER.

H.R. 1509: Mr. SEIBERLING and Mr. EVANS of Indiana.

H.R. 1778: Mr. MCCOLLUM.

H.R. 1779: Mr. MCCOLLUM.

H.R. 1989: Mr. RATCHFORD.

H.R. 2322: Mr. ROBINSON.

H.R. 2439: Mr. GEJDENSON.

H.R. 2488: Mr. SMITH of New Jersey.

H.R. 2642: Mr. BARNES.

H.R. 2793: Mr. LOWRY of Washington.

H.R. 3006: Mr. ROTH.

H.R. 3200: Mr. DONNELLY, Ms. FERRARO, Mr. LELAND, Mr. MCKINNEY, and Mr. PATTERSON.

H.R. 3704: Mr. CONTE, Mr. DORNAN of California, Mr. DOUGHERTY, Mr. HAGEDORN, and Mr. ROBINSON.

H.R. 3934: Mr. RUDD.

H.R. 4075: Mr. EVANS of Delaware.

H.R. 4091: Mr. CONTE and Mr. DICKS.

H.R. 4108: Mr. LUNGREN, Mr. EMERSON, and Mr. PASHAYAN.

H.R. 4147: Mr. SMITH of New Jersey and Mr. EVANS of Delaware.

H.R. 4162: Mr. GUNDERSON and Mr. PETRI.

H.R. 4230: Mr. CLINGER, Mr. GINGRICH, Mr. BADHAM, Mr. STOKES, Mr. SOLOMON, Mr. MARTIN of North Carolina, Mr. ROUSSELOT, and Mr. LOEFFLER.

H.R. 4373: Mr. NELLIGAN, Mr. SILJANDER, Mr. BEVILL, Mrs. SCHNEIDER, Ms. MIKULSKI, Mr. PORTER, Mr. MITCHELL of New York, Mr. FORD of Tennessee, Mrs. MARTIN of Illinois, Mr. BARNARD, Mr. MCHUGH, Mr. WON PAT, Mr. GINGRICH, Mr. SAVAGE, Mr. GEJDENSON, Mr. CORRADA, Mr. NEAL, Mr. ECKART, Mr. MAZZOLI, Mr. HUGHES, Mr. MOLINARI, and Mr. MARTIN of New York.

H.R. 4400: Mr. BLANCHARD, Mr. WON PAT, Mr. KAZEN, Mr. DAVIS, Mr. FORD of Michigan, Mr. SAM B. HALL, JR., Mr. STOKES, Mr. BROOMFIELD, Mr. SILJANDER, Mr. SAWYER, Mr. LATTA, Mr. MURPHY, Mr. DANIEL B. CRANE, Mr. ALBOSTA, Mr. HANSEN of Utah, Mr. LUKEN, Mr. OXLEY, Mr. ATKINSON, Mr. HOLLAND, Mr. VANDER JAGT, and Mr. MONTGOMERY.

H.R. 4460: Mr. NELLIGAN, Mr. JEFFORDS, Mrs. HECKLER, Mr. OBERSTAR, Mr. MURPHY, Mr. D'AMOURS, Mr. EDWARDS of California, Mr. LAFALCE, Mr. MITCHELL of New York, Mr. LEACH of Iowa, Mr. RAHALL, Mr. BONKER, Mr. BONIOR of Michigan, Mr. GILMAN, Mr. BARNES, Mr. HOLLENBECK, Mr. EDGAR, Mrs. ROUKEMA, Mr. MAZZOLI, Mr. MITCHELL of Maryland, Mr. RATCHFORD, Mr. ST GERMAIN, and Mr. SEIBERLING.

H.R. 4467: Mr. MATSUI, Mr. PEPPER, Mr. SMITH of New Jersey, Mr. ROE, Mr. DICKS, Mr. D'AMOURS, Ms. MIKULSKI, Mr. GINGRICH, and Mr. JOHN L. BURTON.

H.R. 4501: Mr. EVANS of Delaware.

H.R. 4528: Mr. FORSYTHE, Mr. WATKINS, Mr. ROBINSON, and Mr. EVANS of Iowa.

H.R. 4534: Mr. LOWRY of Washington and Mr. FOGLIETTA.

H.R. 4554: Mr. LIVINGSTON.

H.J. Res. 157: Mr. LEBOUTILLIER.

H.J. Res. 318: Mr. ANDREWS, Mr. ARCHER, Mr. CRAIG, Mr. DE LA GARZA, Mr. DENARDIS, Mr. DORGAN of North Dakota, Mr. DOWNEY, Mr. EVANS of Iowa, Mr. FASCELL, Mr. FAZIO, Mr. FISH, Mr. GEJDENSON, Mr. GILMAN, Mr. GINN, Mr. GOLDWATER, Mr. GREGG, Mr. HATCHER, Mr. HAWKINS, Mr. HUCKABY, Mr. HUGHES, Mr. HUTTO, Mr. JEFFRIES, Mr. JENKINS, Mr. JONES of North Carolina, Mr. LEHMAN, Mr. LENT, Mr. LONG of Louisiana, Mr. MILLER of California, Mr. MINETA, Mr. MOFFETT, Mr. NAPIER, Mr. OTTINGER, Mr. PASHAYAN, Mr. PATTERSON, Mr. PEYSER, Mr. ROE, Mr. SANTINI, Mr. SMITH of Iowa, Mr. STANTON of Ohio, Mr. STENHOLM, Mr. SWIFT, Mr. TAUKE, Mr. THOMAS, Mr. WATKINS, Mr. WHITEHURST, Mr. WIRTH, Mr. WOLF, and Mr. YOUNG of Florida.

H.J. Res. 323: Mr. FAZIO, Mr. SMITH of Pennsylvania, Mr. MAZZOLI, Mr. HANSEN of Utah, Mr. TAUKE, Mr. MARRIOTT, Mr. EVANS of Delaware, Mr. STANGELAND, Mr. DICKINSON, Mr. BONER of Tennessee, Mr. SABO, Mr. EDWARDS of Alabama, Mr. BEARD, and Mr. QUILLEN.

H. Con. Res. 27: Mr. DICKS.

H. Con. Res. 87: Ms. FERRARO.

H. Con. Res. 166: Mr. D'AMOURS, Mr. AUCOIN, Mr. HUGHES, Mrs. HOLT, Mr. PANETTA, Mr. MATSUI, Mr. MOAKLEY, Mr. FISH, Mr. EMERY, Mr. AKAKA, Mr. DYSON, Mr. MINISH, Mr. EDWARDS of California, Mr. CORRADA, Mr. LOWRY of Washington, Mr. MARKEY, Mr. FAZIO, Mr. WEAVER, Mr. LANTOS, Mr. HERTEL, Mr. JEFFORDS, Mr. SHAW, Mr. BEILENSON, Mr. VENTO, Mr. HOWARD, Mr. JOHN L. BURTON, Mr. DWYER, Ms. MIKULSKI, Mr. PATTERSON, Mr. BONKER, Mr. DICKS, Mr. BONIOR of Michigan, and Mr. FRANK.

H. Res. 175: Mr. GINGRICH, Mr. HILER, and Mr. DORNAN of California.

H. Res. 211: Mrs. BOUQUARD and Mr. HUTTO.

H. Res. 219: Mr. EDGAR and Mr. DORGAN of North Dakota.

## DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1805: Mr. BONIOR OF MICHIGAN.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

205. By the SPEAKER: Petition of the legislature of the Republic of Palau, Koror, relative to assistance for the eradication of the Republic's deficit; to the Committee on Appropriations.

206. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to inflation; to the Committee on Banking, Finance and Urban Affairs.

207. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to the Longshoremen's and Harbor Workers' Compensation Act; To the Committee on Education and Labor.

208. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to the Clean Air Act; to the Committee on Energy and Commerce.

209. Also, petition of the board of directors, Meriden Community Action Agency, Meriden, Conn., relative to decontrol of natural gas; To the Committee on Energy and Commerce.

210. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to Federal regulation of State and local pension systems; to the Committee on Government Operations.

211. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to revision of the Federal Bankruptcy Act; to the Committee on the Judiciary.

212. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to air traffic controllers; to the Committee on Post Office and Civil Service.

213. Also, petition of the 35th annual meeting, Southern Legislative Conference of the Council of State Governments, Charlotte, N.C., relative to improving forest management in the South; jointly, to the Committees on Agriculture and Ways and Means.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3210

By Mr. BROWN of Colorado:

—Page 6, line 8, insert after "October 1, 1981," the following: "and any project on the Interstate System with respect to which the environmental impact statement or statements required under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) were prepared and approved by the Secretary of Transportation before the date of enactment of the Federal-Aid Highway Act of 1981,".

# EXTENSIONS OF REMARKS

## FIRST THINGS FIRST CREDIT ACT OF 1981

**HON. BYRON L. DORGAN**
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. DORGAN of North Dakota. Mr. Speaker, today I am introducing a bill to discourage the waste of our Nation's limited supply of credit by some of our largest corporations, so that a greater amount of credit can be available to the farmers and small business people of America.

This bill would get the Federal Government out of the business of subsidizing such credit waste through our tax system.

Our Nation is in a credit famine. Our farmers and small business people who need credit to buy equipment or to carry their inventory often cannot get that credit. Or if they can get it, they cannot afford it.

The Federal Reserve Board, with the administration's blessing, has adopted a deliberate policy of keeping interest rates so high that they amount to an almost confiscatory tax on the productive enterprises of this country.

The administration tells us to be patient. We are told the dubious theory that this credit famine—and high interest rates—will cure inflation in the long run.

But not everyone has to wait for that "long run." Not everyone has to be patient. While our farmers and small business people come home from the bank loan office emptyhanded, some of our very largest corporations, like Mobil Oil and Dupont, are heaping their plates high with more credit than they need.

In most cases, they are paying, moreover, interest rates that are considerably lower than those the smaller producer has to pay.

It is like 19th-century India: The maharajahs eat and grow fat while everyone else goes hungry.

Mobil alone lined up over $5.5 billion in credit in its recent unsuccessful effort to buy control of Conoco, the Nation's 11th largest oil company. That $5.5 billion is over three times the total outstanding commercial and farm production debt in my State of North Dakota.

In other words, this one oil company, Mobil Oil, was guzzling enough credit to finance the business needs of my State several times over. That credit guzzling meant that $5.5 billion less credit was available for the small producers of this country. It also meant that these small producers have to pay interest rates that are yet higher, because when the available supply of credit goes down, the price goes up.

The Mobil-Conoco episode is just one example of a merger storm that continues to gain strength. Mergers are up 34 percent this year over last, and the truly gigantic combinations, those involving one-half of a billion dollars or more, have grown 15 times over in the last 5 years. Our free enterprise economy may go the way of the dime cup of coffee and the nickel Hershey bar if this trend continues.

It would be one thing if this corporate credit guzzling were doing something useful and constructive. If Mobil, for example, were going to use that $5.5 billion to find new oil, or to develop new techniques for recovering oil presently beyond our reach, or to help develop engines that require less gasoline, or to do any one of the thousands of things it could do with that enormous sum of money to make America better and stronger, our farmers and business people might be patient. They might say, "Well, I do not like those big companies cornering all that credit, but at least the rest of us will get something for it."

But that is not what is happening. The merger schemes of Mobil and others do not provide any new jobs, except for the blue-chip lawyers who grew richer by over $15 million creating the 5-week blizzard of paperwork involved in the Conoco battle. The primary beneficiaries are the top corporate managers who build their empires at the expense of the rest of us.

There is a direct connection between the credit famine on Main Street and the credit orgy that is taking place in the board rooms of giant corporations like Mobil.

There is also a direct connection between this credit-financed corporate takeover spree and other economic problems which our Nation faces.

Is it any wonder, for example, that our productivity is lagging, when the managers of many of our largest corporations prefer to buy up each other's assets instead of minding their own business—instead of spending that money and management energy building new factories, devising better methods of production, improving their products, and doing the other things we need for jobs and economic health?

Mr. John J. Nevin, the president of Firestone Tire and Rubber, said recently that poor management is the primary cause of America's lagging productivity. When our top managers spend their time devising schemes to buy each other's companies, instead of making better products and protecting their markets against foreign competition, productivity is bound to lag.

The Japanese corporations that are challenging ours in the marketplace, rarely engage in merger and takeover games. They grow from within. They grow better instead of just bigger. Their executives spend their time developing top quality products and beating American companies in their own marketplace.

The current credit-financed merger spree in the United States is reducing competition in our economy, and that means higher prices and lower quality products for all of us.

It also threatens to smother our economy in bureaucracy and redtape. When giant corporations like Mobil and Exxon buy up other companies—especially smaller ones—the result frequently is just additional layers of management bureaucracy. Business people who were independent—who were accustomed to making their own decisions, taking their own risks—suddenly find themselves forced to push paper through endless channels and higher-ups just to make simple business decisions.

For example, the cofounder of one small company that Exxon gobbled up not long ago complained to Business Week magazine that, "It can take a year to get approval for a strategy change. The speed at which Exxon moves is incredibly slow." This executive quit, he said, "strictly on the question of independence."

"It is a full time job just filling out all the forms Exxon wants," grumbled the founder of another small company which lost its independence to Exxon's empire-building appetite.

If we wanted to crush the spirit of initiative and individual risk taking in American enterprise, we could find no better way than to let the current merger spree continue unchecked.

To meet the challenges of the 1980's, we need entrepreneurs who are lean and hungry risk takers. We do not need new legions of corporate paper pushers and yes-men. What good will it do us to cut back government bureaucracy, if big new corporate bureaucracies rise up in its place?

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Let us not forget the consumer. The borrowing costs that are financing the takeover binge are passed on directly to the consumer. Du Pont, which prevailed in the battle for Conoco, is going to be paying $750 million per year, more than its total 1980 earnings, just to finance the loan it used in buying control of that oil company. Unless DuPont has discovered the Tooth Fairy, that $750 million will be passed along to all the Americans who buy Teflon cookware; Lucite paints; clothing made from dacron, orlon, and nylon; Rain Dance car wax; agricultural chemicals like Lannate, Marlate 50, and Mansate 500; and all the other products marketed by DuPont.

In other words, the consumer's and producer's dollar will buy less. We have a word for this: "Inflation."

If Congress does not act, this destructive merger trend will grow. The Reagan administration has proclaimed its policy of permissiveness regarding enforcement of the antitrust laws. Our largest companies know the Justice Department intends to look the other way, and are acting accordingly. On top of this, the tax cuts recently passed by Congress included over $50 billion for the oil companies alone during this decade. That is close to the total capital investments made by all U.S. manufacturing companies in 1979. It is more than the dollar volume of all corporate mergers last year. Unless Congress does something soon, the oil companies and others will use their new tax cut bonus to buy up other companies, grab more U.S. farmland, and generally increase their hold over our economy.

The worst part is that the Federal Government is actually subsidizing this merger trend and the credit guzzling associated with it. By allowing the corporations involved to deduct their interest payments on this unnecessary borrowing, the Federal Government—that is the American taxpayer—in effect picks up a big part of the cost.

Today I am introducing a bill to help quell the merger fever, which is worsening the credit famine on Main Street, and to get this credit waste off the back of the American taxpayer. My bill, the First Things First Credit Act of 1981, would simply deny income tax deductions for interest payments on borrowings used to buy up companies that do not want to be bought up. The bill would not prohibit such borrowing; nor would it prohibit takeovers. It would simply say to these giant corporations that if they want to corner the Nation's credit supply to pursue their takeover games, then they will have to pay for this credit themselves. There will be no more subsidies from the U.S. Treasury through deductions for interest expenses for these purposes.

This bill would not affect in any way the deduction of interest payments for other, legitimate business expenses.

Mr. Speaker, America's credit famine is worsening. Business failures are growing at an alarming rate. Members of Congress have been expressing outrage and dismay. We have written letters. We have sponsored resolutions. We have requested the President and the Federal Reserve Board to act. These are helpful steps, but they are not enough. We have to act. We have to do something that will make a real difference.

The bill I am introducing would not solve the whole problem, by any means. But it is a concrete step we can take now. It will discourage credit-guzzling by our largest corporations so that more credit is available to the farmers and business people on Main Street America.●

## TRIBUTE TO CATHERINE DORRIS NORRELL

### HON. JAMIE L. WHITTEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. WHITTEN. Mr. Speaker, I would like to join my colleagues in paying tribute to a former colleague, Catherine Dorris Norrell, who passed away recently.

Mrs. Norrell ably served the people of Arkansas for 22 years as staff assistant to her husband, the late William Norrell. Upon his untimely death, Mrs. Norrell was elected by a 2-to-1 margin in a special election to complete his term. This margin of victory serves as a testimony to the admiration and respect the people of Arkansas felt for Mrs. Norrell. After her all too brief stint as a Member of this body, Mrs. Norrell continued her valuable service to this country in her employment with the State Department.

I consider myself fortunate to have known and served with Mrs. Norrell. I wish to extend my sincerest sympathies to her daughter, Judy.●

## NATIONAL CYSTIC FIBROSIS WEEK

### HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BARNARD. Mr. Speaker, the President and the Congress have joined in declaring September 20 to 26 as National Cystic Fibrosis Week to increase public awareness of this disease, the No. 1 killer of children and young adults in our country.

The only hope for a cure of cystic fibrosis, a degenerative disease that attacks the lungs and digestive system, is through more research. Considerable progress has been made in adding years to the lives of thousands of youngters suffering from cystic fibrosis, yet too few survive past their teens or twenties.

Scientists believe the defective genes for the disease are passed on to the child by both parents. Although two carriers of this trait can pass it on to some of their children, the parents themselves show no symptoms.

That is why it is imperative to make the public aware of the disease, its symptoms and the need for research.

Approximately 1 out of every 20 Americans are carriers of this gene. A child born to parents who each carry the gene has a 25-percent chance of inheriting the disease and a 50-percent chance of carrying the gene.

The disease afflicts nearly 30,000 Americans.

A new case of cystic fibrosis occurs in roughly 1 out of every 1,800 births; every 5 hours a child is born with it. And every 8 hours, someone dies from it. Unfortunately, there is not yet any test to identify cystic fibrosis carriers.

However, a simple, painless test which measures the amount of salt in the sweat is a reliable test for the disease in a child. Parents and grandparents are often the first to notice one of the telltale signs of the condition: When they kiss the baby, they taste salt on the infant's skin.

It is sad to consider that a loving parental kiss may be the first indication of the presence of an incurable disease. But even this—and other—early signals might be accidentally ignored without public education about the disease.

Early diagnosis can prolong lives. Only 25 years ago, victims of cystic fibrosis were not expected to reach school age. Today, half will live into their twenties, thanks to advances in diagnostic techniques and day-to-day treatment.

This is testimony, in large measure, to the effectiveness of the Cystic Fibrosis Foundation, a nonprofit, voluntary health agency. The foundation is a network of 75 State and local chapters. It grew out of the concerns and frustrations of a small group of parents of cystic fibrosis patients who, in 1955, decided to fuse their scattered efforts into an alliance against the disease.

These volunteers had organized to publicize the plight of those with the disease, to raise money for the support of medical treatment and to share with others their personal experience.

Today, the foundation prepares a variety of publications and audiovisual materials and conducts public information campaigns.

To support research, care and education, the foundation's chapters conduct numerous fundraising activities

throughout the year. Professional education programs for health care providers are another major responsibility.

The foundation enjoys support from leading corporations and businesses; industry leaders help in the fight through their contributions of money, time, talent, and leadership.

The support of a growing number of individuals, corporations, and foundations—and, with the designation of National Cystic Fibrosis Week, the symbolic support of the Nation—helps insure that efforts to find answers to cystic fibrosis will continue to show positive results.●

## COMMEMORATION OF NICOLA PETKOV ANNIVERSARY

### HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. NELLIGAN. Mr. Speaker, today we pay tribute to the great Bulgarian hero, Nicola Petkov, who, 34 years ago, on this day, heroically resisted Soviet oppression. The great statesman and leader of the Bulgarian peasants union chose a martyr's death rather than bow to Soviet aggression.

In the summer of 1947, Nicola Petkov stood in the Bulgarian Parliament Building, refusing to give up the cause of Bulgarian independence. For insisting on exercising his right to freedom of speech within the sanctuary of the Parliament Building, he was arrested and imprisoned by the Soviets. On September 23, 1947, Nicola Petkov met his death for resisting the forces of tyranny. His heroic example served as an inspiration to the Bulgarian people, and he became a symbol of their resistance to foreign rule.

I join with Americans of Bulgarian descent in the 11th Congressional District of Pennsylvania, which I am privileged to represent, in commemorating the anniversary of the death of Nicola Petkov. We recognize his inspiration as a reflection of our own great ideals, and acknowledge his example as a challenge to free men everywhere.●

## A NATIONAL USURY LAW

### HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. SNYDER. Mr. Speaker, last week I introduced a bill, H.R. 4471, to establish a national usury law to limit the interest charged on most loans to a maximum of 10 percent.

The primary objection I have heard to the bill is that an immediate reduction of interest rates to a level of 10 percent would cause considerable hardship to financial institutions issuing certificates of deposit and other long-term saving instruments on which they are paying in excess of 10 percent.

In response, I am today reintroducing the bill with a provision which provides for an orderly phase-in period, gradually reducing the interest rate ceiling to 10 percent over a 3-year period.

The National Usury Act would establish a single, uniform nationwide usury rate; a maximum legal rate of interest that could be charged on most loans. Following a 36-month phase-in this legal interest rate would be 10 percent.

The legal rate of interest would apply to all loans in excess of $300 (except for loans up to $2,500 made by credit unions and petty loan companies and except for installment loans for periods up to 5 years and 32 days.)

The interest rate limitations would be phased in as follows: 15 percent per annum effective 30 days after enactment, 14 percent per annum effective 12 months after enactment, 13 percent per annum effective 18 months after enactment, 12 percent per annum effective 24 months after enactment, 11 percent per annum effective 30 months after enactment, 10 percent per annum effective 36 months after enactment.

Slightly higher interest rates are allowed for installment loans to insure the availability of money for consumer loans—appliances, autos, and so forth. The maximum rate for installment loans would range between 12 and 14 percent, depending on the amount of the loan.

This schedule for reducing the maximum rate of interest allowable would maintain a steady downward pressure on interest rates but would in no way preclude a faster decrease in rates through normal market forces—a decrease foreseen by many economists. In effect, it would take the forecasts of declining interest rates and make them a "guarantee" instead of a "guess."

The gradually decreasing interest ceiling would insure steadily declining interest rates. And this guarantee in turn would facilitate long-range planning in both financial institutions and industry.

It is time we did something about the exorbitant interest rates which are jeopardizing the economic recovery we have worked so hard to initiate. I urge my colleagues to join me in cosponsoring the National Usury Act.●

## OBSERVES 75TH ANNIVERSARY

### HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. CONTE. Mr. Speaker, on September 27, 1981, the parish of Notre Dame du Bon Conseil, of Easthampton, Mass., will celebrate its 75th anniversary.

For the past three-quarters of a century, Notre Dame has served the sizable Franco-American populace in this small town in the First District of Massachusetts as a Roman Catholic place of worship and as the nucleus of the French community in Easthampton.

The clergy and parishioners of Notre Dame are to be commended for their dedication to God, to their faith and to their fellow man. It is this type of commitment that enhances not only their personal lives and that of their neighbors in Easthampton, but, indeed, has a strong and lasting impact on the very life of our Nation. It is faith such as theirs that is a mainstay in our communities and it is their children, growing in the love of God, who will determine the future of our world.

I am pleased to bring this joyous occasion to the attention of my colleagues and I wish the clergy and parishioners of Notre Dame many more years of God's blessing.●

## WHITE HOUSE CONFERENCE ON AGING

### HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HAMMERSCHMIDT. Mr. Speaker, from November 30 to December 3, our country will be conducting its third White House Conference on Aging. Approximately 2,000 delegates and 1,500 observers are expected to participate at the national Conference which will be held here in Washington. I know that there is a great deal of interest in Congress because 99 percent of all the Members of the House and Senate have responded positively to the opportunity to select delegates for the Conference.

When the National Retired Teachers Association/American Association of Retired Persons brought their "1981 Federal and State Legislative Policy" paper to my attention, it seemed to me, in light of the upcoming Conference, it would be helpful to share some of their proposals with my colleagues.

The article follows:

EMPHASIZING EMPLOYMENT AS A SOURCE OF INCOME

Given current economic, demographic, and elderly labor force participation trends, government policy ought to permit and encourage greater elderly labor force participation. Increased elderly employment activity would generate additional tax revenue for use at all levels of government. The economy in general would benefit from the added value of goods and services produced. The elderly would benefit by being able to supplement their incomes from other sources with income from employment, thus increasing their ability to maintain their standard of living and do it with a form of income (wages) that has better prospects for keeping up with inflation than most other forms of income. Given the national commitment to the maintenance of reasonable levels of income among the elderly, any share of that income that can be generated through the work effort of willing and able elderly individuals represents a share that need not be borne by other workers through taxes.

To reverse the elderly's labor force participation trend, a national, coordinated older worker employment strategy is needed. One component of such a strategy entails the elimination of existing elderly employment barriers, the greatest of which is mandatory forced retirement.

In 1978, Congress enacted amendments to the Age Discrimination in Employment Act (ADEA) that prohibit mandatory retirement before age 70, with a few exceptions, and protect most federal employees completely against age-based retirement. These amendments, however, do not go far enough. First, we recommend that forced retirement based solely on age should be completely prohibited under ADEA. Statutory sanctions which exist in current law, such as the bona fide occupational qualification provision, should be eliminated. Finally, the Equal Employment Opportunity Commission should enforce the ADEA as vigorously as possible to assure that the Act's full potential is realized in the case of middle-aged and older workers who continue to be victims of various discriminatory practices.

The second major component of an older worker employment strategy involves the elimination of existing work disincentives. Although the social security earnings limitation and other factors within the structure of the social security programs have already been discussed, other factors exist which serve to discourage work effort by older groups. One such disincentive that must be addressed is a law which mandates that states reduce a person's unemployment compensation by the amount of any pension income received. Although the law was amended in 1980 to limit the applicability of the offset, a person's unemployment compensation will still almost always be reduced by one-half of the amount of any social security benefits received. The Associations recommend that the unemployment compensation offset be repealed in its entirety.

The third component of an older worker employment strategy involves the creation of strong work incentives—some focused on the older workers themselves, other on potential employers. One such incentive focused on the individual worker, an increased delayed retirement credit, was discussed in the context of social security. However, other incentives could be created that would fall outside of social security. For example, credits against federal income tax liability could be established for older workers who avail themselves of job training or retraining programs that are designed to prevent skill obsolescence.

To provide employers with incentives to employ and/or retain older workers, the federal tax structure appears to be the most appropriate vehicle. For example, the employer portion of the social security payroll tax that would otherwise have to be paid with respect to older workers could be reduced or eliminated. A tax credit for a certain portion of the older worker's wages could also be used to encourage employers to hire them. Such changes would effectively reduce the cost of hiring older workers, compensating to some extent for any real or imagined productivity decline associated with age that an employer might otherwise entertain. These changes would also tend to counter any disincentive effect that the minimum wage might have on an employer's willingness to hire or retain an older worker. In addition, the tax laws could be used to encourage employers to introduce a host of job training, retraining, part-time and flex-time programs aimed at older workers.

To complement the other components of an older worker employment strategy, job opportunities must be made available to older workers through federal government employment programs.

The SCSEP is the only categorical program focused exclusively on older workers. It provides a small number (50,250) of part-time jobs for workers age 55 and over who have been chronically unemployed and are below the poverty level at program entry. This program emphasizes on-the-job training and placement of trained workers in permanent unsubsidized jobs.

The Associations support increased funding for SCSEP so that the number of jobs provided by the program can be expanded. SCSEP has been an effective program, free from fraud and abuse. But it has only begun to fill the large need which the low-income elderly population has for jobs.

Over the longer-term, a nationwide, categorical, centrally directed older worker program like the SCSEP should be created that would include full as well as part-time jobs.

TRANSPORTATION

For the most part, the elderly's transportation needs are intertwined with those of the general public and can best be met through a coordinated and improved transportation system which adequately serves the entire community. Certainly much more funding ought to be committed to mass transit in both urban and rural settings. To help meet the elderly's needs, special subsystems should be used as part of the total transportation system, particularly in areas where transportation services are limited or non-existent.

The Associations believe that local communities should be allowed some flexibility in complying with the statutory requirement that all transit facilities and vehicles must be "barrier free" (i.e., accessible to wheelchairs). By giving local communities some options in accommodating the disabled, the needs of the handicapped and the elderly and the financial concerns of the communities can be reconciled.

Because transportation is the link to all other human services needed by the elderly, it must be affordable and reasonably accessible in terms of vehicle design and routing to the places they need to go. Therefore, efforts should be made on the federal level to improve accessibility for older persons through reduced fare programs, universally accepted identification cards for mass transit discounts (for example, Medicare cards) and the coordination of transportation services across human service programs.

Restrictions placed on persons who can be insured raise transportation costs for human service programs. For example, social service agencies are often unable to use older volunteer drivers because insurance often cannot be obtained for drivers above an arbitrary age. Utilization of school, church and privately owned buses or vans is limited because, again, insurance often does not cover the social service clients who could be transported in such vehicles. Certainly remedying these problems could promote more efficient use of transportation resources and at the same time, enhance the elderly's and the poor's access to many social services available in the community.●

## TRIBUTE TO NATHAN HALE

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BIAGGI. Mr. Speaker, today we honor and pay tribute to the memory of Capt. Nathan Hale who gave his life for his country 205 years ago today as a Revolutionary War hero.

Nathan Hale grew up on a farm in Cambridge, Mass. Hale was an avid reader and while in college he was known for his wit and urbanity. His patriotic speech of liberty and independence given after the Battle of Lexington brought him to public notice as a man of literary and oratorical powers. Hale's leadership, resourcefulness, and devotion as a soldier in the Continental Army led to his promotion to captain.

On September 21, 1776, Hale volunteered for a dangerous mission to gather intelligence about the movement of British troops. On that fateful night he was captured by the enemy. One day later, on orders by King George 3d, Nathan Hale was hung by the British. Before his execution Nathan Hale uttered the lines for which he is most often remembered, "I regret that I have but one life to lose for my country".

These famous words reflect Hale's honor and devotion to his country. More than a hero-martyr of the American Revolution, Hale symbolizes the spirit of patriotism and leadership, so important to the growth and well-being of our country. The conduct and courage of Nathan Hale has made him one of America's best-remembered and most respected heroes. It is my pleasure to pay tribute to Nathan Hale on the 205th anniversary of his death.●

## WATER: ANOTHER NATIONAL PROBLEM?

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HAMILTON. Mr. Speaker, I insert my Washington Report for Wednesday, September 23, 1981, into the CONGRESSIONAL RECORD:

WATER: ANOTHER NATIONAL PROBLEM?

Recent headlines have proclaimed that the United States could face a water problem in the 1980's as severe as the energy problem of the 1970's. Such a problem would be due less to a physical shortage of water than to waste, pollution, and mismanagement of the water supply. Today, nearly every congressional district has some kind of water problem—flooding, leaking water mains, fouling of ground water, lakes destroyed by acid rain, and so on. The situation could get worse.

Our present experience with water brings to mind our experience with energy in the early 1970's, the time just prior to the shortages and price increases. The demand for water is growing, and, although estimates vary, annual consumption at the end of the 1990's could be half again as much as consumption in 1975. The water supply is periodically decreased because of pollution of surface and ground sources, overdrafting of underground aquifers, and droughts which may have effects into the mid-1980's. Federal policy encourages enormous waste by providing western farmers with water for irrigation at prices that cover as little as 2 percent of costs. Even more waste occurs because of substandard techniques of irrigation and aging of municipal water mains, some of which lose up to 50 percent of their contents. Costly government programs—$30 billion to treat waste water and $330 million to remove salt from water—have not met expectations, and only one new federal water project has been authorized since 1976. Also, the jurisdiction over issues related to water is confused, with 25 federal commissions and agencies, 50 subcommittees of Congress, and literally hundreds of state and local bureaus trying to carry out overlapping responsibilities. The parallels between water and energy are striking.

Given increasing demand, decreased supply, waste, pollution, and mismanagement, there is an obvious and pressing question to be answered: Are we headed for a water problem as severe as the energy problem of the last decade? The question admits of two answers: yes, if current trends continue unchanged; no, if we take corrective action soon.

To understand our dilemma better, it is helpful for us to review the facts of the situation. Water is constantly available in the fifty states in the form of rain, the amount of which is plentiful, reaching 4.2 trillion gallons per day. However, we are able to use only a small portion of this amount since about 92 percent of it evaporates immediately or else runs off, unused, into the oceans. We actually withdraw some 400 billion gallons per day to irrigate, power, and bathe America—65 percent of it from freshwater sources (such as rivers, lakes, marshes, and reservoirs), 20 percent from undergound aquifers, and 15 percent from saltwater sources (such as inland seas). Most of this water is returned to surface sources, but we do consume, through evaporation and incorporation into our products, some 100 billion gallons per day. About 83 percent of the water consumed goes into agriculture, while 8 percent is consumed in manufacturing, 7 percent in homes, and just over 1 percent each in the generation of power and on public lands. In Indiana, water is withdrawn primarily for industry and the production of energy. It is consumed primarily by use in rural areas and in industry.

Water quality and supply vary greatly from place to place. In the West, we find inadequate supplies of surface water, significant overdrafting of ground water, and pollution of ground water. In the East, we see flooding and pollution of surface water. In southern Indiana, we have surface water polluted by effluents from factories and runoff from fields, excessive growth of algae, and a lack of ground water. Extensive flooding, sedimentation, and erosion must also be addressed. Nonetheless, Indiana is in much better shape than are most states. It ranks somewhere in the top one-quarter in quality and supply of water. Indiana is expected to become an even more attractive "water-belt" state in the future as the "sunbelt" states experience more serious shortages of water.

Even though there are shortages of usable water in some regions, the national situation is good on the whole. We will have enough water to meet our needs well beyond 1985. Nonetheless, our favorable outlook in the near term should be tempered by the realization that the supply of water is not nearly as ample as it was 20 years ago. Also, we should be concerned that increasing demand, decreased supply, waste, pollution, and mismanagement do not bode well for the future. If these matters are not attacked soon, we may have on our hands within the next two decades a water problem every bit as severe as the energy problem of the 1970's.●

## THE REAGAN REVOLUTION?

### HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. LAFALCE. Mr. Speaker, I am certain many of my colleagues experienced similar reactions from constituents during the August recess as I did. So many questioned the Reagan administration's interpretation of the vote last November. So many expressed the view that they did not vote for the magnitude of changes in government that the administration is talking about and stating that they have a mandate to implement.

George Will, a most respected leading conservative commentator captures these constituents' views and comments upon the real meaning of the Reagan election. In addition he states that if President Reagan believes that Americans want a revolution, a 180 turn in the course of government, he is dead wrong.

Such an analysis by a strong Reagan supporter is worth noting and reading. Mr. Will's article from the September 17, 1981, issue of the Washington Post follows:

[From the Washington Post, Sept. 17, 1981]

ABOUT THAT REAGAN REVOLUTION

(By George F. Will)

Perhaps President Reagan should not be expected to offer a balanced assessment of his achievements so far. He certainly didn't when, in an interview with Fortune magazine, he was asked whether his administration might be "just a four-year blip off the long-term national direction." He responded:

"No, I feel that we did just about a 180-degree turn in the course of government, and I'd like to feel that it reflects what the people out there are thinking."

Leave aside the question of in what sense it can ever be said that the people "out there" are thinking about the course of government. But it should be said that Reagan's statement, like other person's hyperbole about a "Reagan revolution," is notably unhistorical.

Nothing Reagan has done or aspires to do is comparable to what Franklin Roosevelt did in the mid-1930s. FDR altered, fundamentally and irrevocably, the relationship between the citizen and the central government. That government assumed responsibility for the nation's economic health—the aggregate economic output—and for a minimum material well-being of the individual.

If Reagan wants to repeal those federal responsibilities (a repeal that would constitute a real revolution), he has not said so. And he had better not. If Carter had succeeded in portraying Reagan as bent on repealing the New Deal and dismantling the welfare state, Carter might have carried 44 states.

Reagan's most "revolutionary" measure is said to be the cut in personal income taxes. But that cut is primarily a measure to enable people to run in place, a measure to counter the silent, unlegislated tax increases imposed by inflation. The National Journal calculates that "no category of taxpayer will have a significantly lower tax burden in 1984 than in 1977." This is a "revolution"? A "180-degree turn"?

Analysis of the 1980 election results does not reveal a call for a 180-degree turn. Reagan's 10 percentage-point margin of victory over his Democratic opponent was impressive, but it was only the ninth biggest margin in the 21 elections in this century. It was smaller than three Democratic victories (1932, 1936, 1964) and five Republican victories (1920, 1924, 1928, 1956, 1972). And Reagan's electoral margin should be seen primarily as Carter's electoral deficit.

Reagan has so improved the nation's mood that it is hard to recall how sour was the mood about Carter. In January 1960, Eisenhower's job-approval rating was 57 percent. Ford's was 45 percent in the summer of 1976. Truman's was 32 percent in June 1952. But Carter's record-smashing collapse put him at 21 percent in June 1980.

Not surprisingly, on Nov. 4, 1980, Carter lost 4 of 10 of his 1976 supporters. There was one dominating fact of 1980 and it was not a national conversion to conservative ideology. It was a desire to see Carter gone.

In a Yankelovich poll in January 1981, 63 percent said that the primary reason for Reagan's victory was dismay about Carter. Only 24 percent called it a mandate for conservatism. Even Republicans and self-described conservatives agreed (54-34 and 57-30 respectively).

William Schneider of the Hoover Institution at Stanford, writing in a volume published by the American Enterprise Institute,

says the electorate was not "convinced" about conservatism, but was tolerant about it, willing to give it a chance. Schneider says every election offers a "plebiscitary choice" (a chance to say how the government is being run) and an "ideological choice" (a chance to say which candidate or party comes closest to one's ideological beliefs). Carter's campaign strategy was to emphasize the ideological choice. Reagan struggled successfully to make the election turn on the plebiscitary choice.

That is, Reagan won because he kept the election from being a referendum on conservative ideology. Bear that in mind as Congress is asked to make more cuts in domestic spending—and as Congress instead turns against defense spending.

It is not true that Republicans won because they have "ideas," or that Democrats desperately need to originate some ideas. Certainly, they need Jacksonism—part Andrew, part Scoop: balanced-budget liberalism, laced with nationalism. But what they most need are Republican mistakes.

Mistakes by those in power make an opposition party seem intellectual. Democratic mistakes made the GOP seem intellectual, so it can happen to absolutely any party. Thus, the Democratic Party can sit back and wait to see how sturdy is the basket of economic theories into which Republicans have put all their eggs.●

## SEXUAL REFORM ACT: MORE THAN AN ISSUE OF HOME RULE

### HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. MAZZOLI. Mr. Speaker, on July 14, 1981, the District of Columbia City Council enacted the Sexual Reform Act of 1981, District of Columbia Act 4-69. The legislation was directed toward the modernization of the District's sexual assault laws.

I commend the District of Columbia City Council and the Mayor for their careful deliberation on this legislation and also for their good intentions.

I am aware that an initial legislative proposal to lower the age of sexual consent for girls from age 15 to age 12 was defeated in the City Council. The only amendment made to this section of the law is that this statutory rape section now applies to boys as well as girls.

Nonetheless, D.C. Act 4-69 repeals current fornication, adultery, sodomy, and incest laws for consenting adults in the District of Columbia. I am in total disagreement with this aspect of the proposed legislation.

I am well aware of the District's right to self-government. I joined the House District Committee in 1973 and helped pass the home rule bill.

On the other hand, I cannot, in good conscience, support legislation which condones certain extramarital sexual relations, certain homosexual and—most grievously—condone incestuous activity.

I remain a supporter of home rule for the District of Columbia. However, for the reasons stated above, I will support the resolution disapproving D.C. Act 4-69, Sexual Reform Act of 1981.●

## HIGH INTEREST RATES

### HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. RICHMOND. Mr. Speaker, we have been so pounded for so long by bad economic news that any development that is not an out-and-out disaster brings an almost automatic sigh of relief. We have come to view a 10-percent inflation rate as good news. We fervently pray for a budget deficit of only $42.5 billion. We cheer when the prime rate falls to 19½ percent.

But let us not kid ourselves. Only a few years ago, the floor of the House would have been filled with Members expressing their outrage at an economic situation that produced these kinds of figures.

The bad news about Monday's decline in the prime rate to 19½ percent is that everyone considers it good news.

Interest rates today are not good news, and neither is the effect that they are having on our economy.

We are now almost three-quarters of the way through 1981 and not once during the year has the prime rate fallen below 17½ percent. For small businesses who pay 2 to 3 points above prime—and the economy of my district in Brooklyn is based almost entirely on small businesses—this means that they have been paying no less than 20 percent all year for the bank loans they need to finance their inventories and meet their payrolls. They simply can not do it.

During 1981, bankruptcies reached their highest level in more than a decade and now stand at twice the level of 1978, when interest rates were only half what they are now.

Other sectors of the economy have been equally devastated. During the past few weeks, the interest rate on 30-year traditional home mortgages has surged to an all-time record of more than 18 percent, and the homebuilding industry is now in a total depression. The annualized housing starts figure for August of 937,000 is the lowest we have seen since the housing depression in 1975.

Unemployment among construction workers is 26.7 percent, more than double the national average. In Brooklyn where we concentrate on rehabilitation, the industry is at a standstill.

The municipal bond market is virtually in chaos. According to Salomon Brothers, the average interest rate on tax-exempt municipal bonds is now over 13 percent. This is twice what local governments had to pay only 2 years ago. These high interest rates, combined with President Reagan's cut in programs that assist State and local governments, are wreaking havoc on the ability of local governments to fund the capital expenditures needed to keep their economies viable and healthy. We will pay for this in the future as the infrastructure of this country deteriorates beyond repair.

We have all known for some time that high interest rates are no cure for anything, and they are not curing anything now. Instead, it is time that the President and the Federal Reserve rechart their economic policies, and cure our most pressing economic problem—high interest rates.●

## CANADIAN DUMPING OF LUMBER HURTS U.S. ECONOMY

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BONKER. Mr. Speaker, I want to bring to the attention of my colleagues a recent editorial in the Seattle Times which points out certain actions of the Canadian Government that are devastating our domestic lumber industry, which is already reeling under sky-high interest rates.

The Canadian Government is unfairly subsidizing its lumber industry. The result is that the United States is importing more and more lumber from Canada at a time when our domestic saw mills are closing down and throwing thousands of people out of work.

The Canadian share of the U.S. lumber market was 18.7 percent in 1975; that has increased every year but one since then—to a new high of 32.2 percent this year. The reason is cheaper stumpage prices for Canadian wood. The Canadian mills can buy trees to cut for about one-eighth of what U.S. mills must pay. Both buy trees from their Governments, but U.S. mills are required to bid against one another, while Canadian companies are not.

A study by Associate Prof. David Haley of the University of British Columbia's School of Forestry points out that in 1978, Canadian mills paid $4.58 per cubic meter of stumpage, while mills in the U.S. Pacific Northwest paid $39.11 per cubic meter for comparable trees. This amounts to a $60 per thousand board feet subsidy for British Columbia mills, or a cost advantage of 25 percent of the price of the manufactured product.

In effect, the Canadian Province is accepting less money for the right to cut trees on its land than U.S. Federal and State governments are accepting for cutting on their lands. This amounts to a subsidy. British Colum-

bia sets its fee for cutting rights at an appraisal far below market value, and without bids.

The cheaper stumpage prices for Canadian lumber give the Canadian producers an unbeatable advantage in selling finished products to Japan. This is the main reason why Japan buys most of its finished lumber from Canadian producers, while purchasing unfinished logs from Americans.

I have contacted the Department of Commerce and have had personal discussions with Mr. Lionel Olmer, the Department's Undersecretary of Trade on this matter. There is discussion in the Northwest about applying to the Department of Commerce and the U.S. International Trade Commission for a countervailing duty, which would bring Canadian lumber imports more in line with domestic industry.

We cannot allow foreign competitors to enjoy an unfair advantage, where that advantage is based upon Government subsidies and other trade-distorting practices.

This is a matter I plan to continue pursuing. I bring this editorial to the attention of my colleagues.

FOREST-INDUSTRY PLAINTS MERIT PRIORITY ATTENTION

The slump in housing is not the only reason for the record 20 percent unemployment in Washington State's lumber, plywood and logging industry during the first quarter of this year.

So says M. J. Kuehne, head of the Tacoma-based Northwest Independent Forest Manufacturers. And he has some startling statistics to prove his point.

During the first five months of 1981, Kuehne says, Canadian imports amounted to nearly a third of the lumber consumed in the United States.

"This is the highest level in the history of trade between the two countries," Kuehne points out, and amounts to a 17 percent increase in Canadian lumber imports over a similar period last year.

The manufacturers' association chief says there is a reason why U.S. lumber manufacturers are continuing to lose domestic lumber markets to Canadian imports. That reason is a combination of unfair labor practices.

Kuehne says a University of British Columbia analysis published last year showed timber in Oregon and Washington from public lands being sold for 8½ times the price of public timber in B.C.

"Even given the differences in species and quality, logging costs and tax treatment, this timber subsidy works out to a 25 percent price advantage in the sale of finished lumber," he says.

Canada not only subsidizes publicly sold timber, but rail and energy costs, Kuehne asserts. He has called upon the Reagan administration and Congress to investigate his charges.

In a well publicized outlining of Reagan-administration trade policies, U.S. Trade Representative Bill Brock has declared that "where . . . foreign advantage is based upon government subsidies and other trade-distorting practices, U.S. policy will be to enforce U.S. trade laws and to work to eliminate such policies." The Pacific Northwest forest industry now is challenging Brock to demonstrate that he means what he says.●

## U.S. SAVINGS BOND PROGRAM

### HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mrs. SCHROEDER. Mr. Speaker, today I am introducing legislation to correct the most serious deficiency in the U.S. savings bond program. The problem is that savings bonds are a miserable investment. Their yields are so far below market rates that you have to be a superpatriot, a philanthropist, or a spendthrift to buy and hold bonds.

As a result of the disparity between market interest rates and bond interest rates, we have been forced to employ a battalion of door-to-door promoters who try to push bonds on the gullible. Since these folks are, obviously, unable to sell many bonds, they count their productivity by tallying up the number of contacts made. In other words, the Savings Bond Division justifies its own existence by counting the paperwork it produces.

When the Treasury, Postal appropriations bill was on the floor last July, I attempted to eliminate the Bond Division as a waste of money. After winning two record votes on the issue, I was finally outgunned by high level Treasury Department lobbying. Obviously, turf protection has become the No. 1 priority for top Treasury officials, while reducing the Federal budget is a distant second.

One obvious deficiency with my amendment to the Treasury, Postal appropriations bill was that it only dealt with the wasted money spent promoting bonds and not with the basic problem which is that bonds are a lousy investment. This bill addresses both sides of the issue. First, it requires the Secretary of the Treasury to set yield on bonds at levels competitive with comparable investments. Second, it eliminates the Savings Bond Division, except for $1 million which is used to trigger a massive amount of donated public service advertising.

I urge the Ways and Means Committee to promptly consider this issue.●

## IN HONOR OF CYSTIC FIBROSIS WEEK: CF RESEARCH IN CLEVELAND

### HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. STOKES. Mr. Speaker, a unique concentration of scientists in Cleveland, Ohio, is providing new hope for thousands of children, teenagers, and young adults suffering from cystic fibrosis (CF), the most common genetic killer of young people in America.

The largest center for CF research in the United States, Cleveland's Cystic Fibrosis and Children's Disease Research Center is a cooperative venture between Case Western Reserve University and Rainbow Babies and Childrens Hospital. Its efforts are focused on answering many of the baffling fundamental questions about the cause, prevention, and treatment of this fatal, incurable disease.

The center's research program was begun in 1957 by Dr. LeRoy Matthews in an effort to improve the care of patients with cystic fibrosis through increasing awareness of clinical problems and the development of new knowledge. This center was designated as a "Cystic Fibrosis Center and Institute" by the Cystic Fibrosis Foundation in 1970, one of only three in the country with this designation.

The National Institutes of Health has provided institutional support for the Cleveland CF Center continuously since 1964. During these years, the pediatric nucleus of the center has grown, and currently consists of six full-time cystic fibrosis and pulmonary specialists, seven basic researchers, and more than a dozen trainees and other staff.

In addition, clinical specialists in gastroenterology, cardiology, biomedical engineering, anatomy, immunology, microbiology, the behavioral sciences, and the surgical subspecialties participate substantially in the program.

This overall research effort, currently led by Dr. Carl Doershuk, now exceeds $2 million per year in total funding. The more than 35 investigators who constitute the Cleveland cystic fibrosis group are currently conducting more than 25 separate research projects covering a wide range of topics related to CF. In order to assure the rapid dissemination of findings, the center conducts a weekly cystic fibrosis-oriented research seminar, and many of the current projects began as ideas developed in those seminars.

Cleveland's cystic fibrosis reputation is not based entirely on research, however. At present, more than 450 cystic fibrosis patients are seen at Rainbow Babies and Childrens Hospital, as are an additional 400 patients with other chronic lung diseases.

Most of the leading researchers also treat patients assuring the closest relationship between the work performed in the laboratory and the care delivered at bedside.

In light of this aggressive program to provide and integrate both basic and clinical research and research training, and to share and nurture new ideas, the Cleveland program has been designated the first national CF resource center by the Cystic Fibrosis Foundation. Under the foundation's new research resources development

program, this designation allows the center to be eligible to receive funds for construction, specialized equipment, and endowed (distinguished) chairs. The Cystic Fibrosis Foundation is currently assisting the center in expanding its space for laboratories and shared facilities.

With the Cystic Fibrosis and Children's Disease Center as a model, the Cystic Fibrosis Foundation hopes to establish other high-quality research centers across the Nation, enabling the resources of entire institutions to be tapped in the fight against CF and its devastating consequences.●

## THE AWARD OF AMERICAN CITIZENSHIP TO RAOUL WALLENBERG

### HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Ms. FIEDLER. Mr. Speaker, no vote I have cast in the 97th Congress has given me more pleasure than the one I had privilege of joining in to award U.S. citizenship to Raoul Wallenberg. I know of no man alive I am prouder to call my fellow citizen than the saviour of the Hungarian Jews, today still imprisoned in the Soviet Union.

In 1980, I was present at the lighting of an eternal flame in honor to Raoul Wallenberg at the Simon Wiesenthal Center for Holocaust Studies. There, in the peace and sunshine of California, I met with Raoul Wallenberg's sister, his friends and family; and, most moving of all, some of the people whose lives Raoul Wallenberg saved in the long-ago nightmare of wartime Hungary. Nothing could have done more to bring home what this man meant to the Hungarian Jews he saved and, indeed, to all those who value human freedom.

While the Jewish community holds Raoul Wallenberg in especially high regard, he is owed a debt by all his fellow citizens, a debt that only now we are starting to pay. Raoul Wallenberg left the safety of neutral Sweden for his mission to Nazi-occupied Hungary on behalf of the U.S. Government. He is America's longest held diplomatic hostage, and it was on his 13,065th day of capitivity that we passed the resolution awarding him U.S. citizenship. This is no empty gesture or gilded honor. As a U.S. citizen, Raoul Wallenberg's case can now be pressed by our country with the greatest vigor and urgency. That this remarkable man has survivied so long—for its appears that survived he has—is a testimony to human endurance. We owe it to him to make every effort to see that he can spend the rest or his life in the sort of freedom that he risked all to secure for others.

All Americans should therefore let this be a moment of pride, a moment of gratitude, and a moment of rededication to the cause of freedom. Let us remember that all those of any nationality who fight for human freedom and dignity are our friends, and, come what may, we shall not, at the end of the day, forget them. Raoul Wallenberg did what he saw as his duty. In doing so, he saved the lives of thousands of Jews. Let us now do our duty to this man who has done much, and suffered much.●

## THE SPIRIT OF SOLIDARITY

### HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. VENTO. Mr. Speaker, this article, by St. Paul Dispatch reporter Jackie Roedler, paints an accurate picture of the spirit that surrounded Solidarity Day September 19. The unselfishness, dedication, and commitment of the hundreds of thousands of people who participated say a great deal for the human spirit. It was a truly moving and uplifting experience to walk in the Solidarity Day march with my wife and son; with my father, a machinist who came to Washington by bus with his fellow workers; with my staff; and with my many friends from Minnesota and other parts of the Nation.

I would like to share this article with my colleagues:

ELEVEN-BUS STATE CARAVAN HEADS FOR D.C. PROTEST

When a caravan of 11 buses heads east from Minnesota to Washington, D.C., early Friday morning, Bea Kersten and Helen Kruth will be riding along to let President Reagan know what they think of his social and labor legislation.

Mrs. Kersten has had two heart attacks and her "heart medicine" will be tucked in her jacket pocket.

But she feels she can't "ask others to do what you can't do," and she wants the president to know she's not going to stand by silently "while he wipes out in a few weeks or months what labor people have worked for for 50 years."

Mrs. Kersten, 70, has been a union member for 45 years, starting as a Teamster when she worked as the first female welder on electric pipes at Cal Ship near Long Beach, Calif.

Now she and Mrs. Kruth and more than 400 other Minnesotans from such cities as Worthington, Albert Lea, Virginia, Duluth and Winona will board the buses at 6:30 a.m. Friday for a 24-hour trip to march in the Washington Solidarity Day parade. Other Minnesotans traveling by truck, car, camper and trailer will join them shortly after 9 a.m. Saturday on the west side of the Washington Monument.

After a picnic, entertainment and some "short" speeches, the Minnesotans will don their blue and gold caps, grab their blue and gold Solidarity Day signs and fall in line behind the state's mammoth blue and gold Solidarity Day banner.

(Delegates to the state AFL-CIO convention, which opened today in the St. Paul Radisson Hotel, are expected to pass a resolution urging Solidarity Day participation. Former Vice President Walter Mondale was expected to give his support in his speech to delegates today.)

The delegation will march under the banner of the Minnesota AFL-CIO Economic Coalition, whose members include the Minnesota Farmers Union, the Minnesota Council of Churches, the Minnesota chapter of the National Association for the Advancement of Colored People and the St. Paul Urban League.

The one-day demonstration for "economic, social and labor relations justice" has been called by the AFL-CIO to demonstrate the depth of opposition to Reagan's cuts in social programs and "attacks" on labor and civil rights gains. Estimates of the number of demonstrators expected range from 100,000 to close to 500,000.

Minnesota marchers will include students, teachers, rank and file union members, civil rights leaders, air traffic controllers, farmers and retired folks like 72-year-old Helen Kruth of Minneapolis who feels "a half million people can show the President he doesn't have a mandate, that he isn't speaking for us."

Mrs. Kruth, who was a member of an eastern furrier union and later worked in a steel plant before the steel industry was organized by labor, feels it's a monumental mistake to make military spending a priority over social programs.

And, she said, she's "terribly upset" about the way the Professional Air Traffic Controllers Organization strike has been handled by the administration.

"If we allow PATCO to be destroyed, a lot of other unions will be destroyed, too," Mrs. Kruth said. "People who have complained for years about the problems and pressures of their jobs should have the right to strike."

When the march and protest speeches at the Capitol are over, the Minnesota delegation will head back to the buses for the 6 p.m. start of the long ride back to Minnesota. Buses are expected to arrive here at 6 p.m. Sunday.

Many had not planned to travel by bus. State AFL-CIO Solidarity Day coordinator Art Jelinski had arranged to charter two airplanes, but they were canceled in the wake of the PATCO strike.

"We had other seniors who would have made the trip by plane," Mrs. Kersten said. "They felt the bus ride would be just too tough, but we'll make it. You can bet we will."●

## TRIBUTE TO THE LATE FRANK J. BECKER

### HON. JAMIE L. WHITTEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. WHITTEN. Mr. Speaker, I would like to join my colleagues in paying tribute to Frank J. Becker, a former Member of this body who died recently.

Frank Becker's distinguished career of public service spanned some 20

years. I had the pleasure of serving with Frank during his 12 years in Congress from 1953 to 1965. During this period I found Frank to be a man of great ability and integrity.

I would like to extend my sincerest sympathies to Frank's wife Claire and to his entire family.●

## PROSPECTS FOR PEACE IMPRESSIONS FROM ISRAEL

### HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. MOLINARI. Mr. Speaker, The impact 1 week in Israel made on me was profound. Even though we receive a steady diet of news from the networks and the newspapers about Israel and the Middle East, one can never really understand the pressures, tensions, the hatreds, the mindsets, and the yearnings for a true and stable peace that is so much a part of the daily lives of the people there.

I met with many of the nation's leaders including Prime Minister Begin, Simon Peres, the leader of the Labour Party who challenged Begin in the recent elections, the Speaker of the Knesset, Managem Savidor, Yatdhak Shamir, the Minister of Foreign Affairs, the popular mayor of Jerusalem Teddy Kollek and many other government leaders, all of whom were extremely intelligent and possessed a broad range of knowledge on international affairs. Despite the different political parties and different factions, they all had one common goal—the genuine pursuit of peace.

I also visited the country's landmarks and holy shrines, including: Massada, the legendary city which was under siege by the Romans the first century after Christ, the Good Fence in the northernmost region of Israel, the Golan Heights, where landmarks of war still dot the landscape from the Six-Day War as well as the Yom Kippur War and I swam, or I should say, I floated in the Dead Sea. We also spent a great deal of time in the Holy City of Jerusalem visiting its many cultural and spiritual attractions, including the Church of the Holy Sepulcher, the Wailing Wall, the Shrine of the Book, the Shrine of the Nativity and the Yad Vashem, the shrine to the holocaust victims.

One of my most vivid memories of the trip was driving into Jerusalem from the Golan Heights late one afternoon as dusk was settling. The monuments and landmarks of our religious heritage silhouetted against the sky were truly breathtaking. I became aware of how important this spiritual foundation was to the people of Israel and how it gave them the incentive to help them "keep on keeping on" even against seemingly insurmountable odds.

I was left with the impression that we in the West have lost sight of a strength that the people of Israel have retained through their struggle. "Out of adversity comes strength," says the old adage, and it certainly is true for the people of Israel. They are strong; physically, mentally, and spiritually. They are prepared, ready for action, out of necessity ready for war and out of a profound, longing, ready for peace.

Throughout my very busy week in Israel, I continually asked myself as well as many I spoke with in the Israeli Government, whether peace is possible in the Mideast. Despite all the signs of war and devastation and despite the difficulties in achieving a lasting peace, Egypt and Israel are at peace and the recent treaty with Lebanon, although tenuous, is being observed for the present. Jordan, meanwhile, doesn't appear to desire future war with Israel. However, everyone recognizes the realities of the situation here. The hatred between the many factions are so pronounced that beneath the delicate shroud of a temporary peace lies a potential spark that could cause the fires of war to once again burn.

Nonetheless, I believe, as does every Israeli official I spoke with, that a lasting and true peace can be achieved. It was encouraging to see that these officials sincerely believe that there is always a solution, somehow, somewhere, a solution. This optimism gives one hope that a true and lasting peace can someday soon be achieved. In the meantime, Israel must continue to be in a state of military preparedness if it wishes to survive the antagonisms of other peoples and countries in the region.●

## THE VOTE PREVENTION ACT

### HON. M. CALDWELL BUTLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BUTLER. Mr. Speaker, the Voting Rights Act has been fundamental to assuring that no citizen is denied the right to vote for reason of their race, color, or native language. During the weeks ahead, the House will consider legislation to amend the Voting Rights Act and by so doing, to further define the Federal role, beyond 1982, for protecting the right to vote of minority group citizens.

In considering the Voting Rights Act in 1981, the House is faced with a vastly different social and political environment than existed in 1965 and which justified the establishment of the act. The original intent of the act, the enfranchisement of black citizens in the South, was largely accomplished after the first 5 years of the act's passage. Throughout the South, both increased participation at the polls and success in pursuing public office has created pressure from minority group citizens to force politics of the "old South" to change. While pockets of discrimination may still exist, voting discrimination is no longer the widespread problem that it was in 1965 when conditions justified an extraordinary exercise of Federal authority to protect the right to vote.

Despite the great progress which has been made to open the political process to minority group citizens, the Voting Rights Act has remained substantively the same since its enactment. The act is not, therefore, a precise response to the need in 1981 for protections of the voting rights of minority group citizens. In many circumstances, the act can be enforced only by subjective interpretations of how provisions written in 1965 apply to the current situation. As such its usefulness as a means to protect individuals' right to vote is diminished by the unwarranted burdens it imposes on localities and the disruption of the normal conduct of elections which it can create.

On September 11, the Wall Street Journal published an op-ed article entitled, "The Vote Prevention Act." This article sheds valuable light on the problems created for enforcing the right to vote by using legislation which has not evolved in sequence with the political progress of minority group citizens. I commend it to my colleagues and its timely contribution to the discussion of the appropriate Federal role for protecting the right to vote.

[From the Wall Street Journal, Sept. 11, 1981]

THE VOTE PREVENTION ACT

Thanks to a unanimous election-eve decision by the Supreme Court, New York City citizens weren't allowed to vote in primary elections yesterday. The ruling is but another example of how the Voting Rights Act of 1966, which has done much to boost political participation of blacks and Hispanics, has also unnecessary interfered with local self-government.

With its nationwide ban on intimidation at the polls, on literacy tests and on poll taxes, the Voting Rights Act has served its principal purpose of allowing blacks and Hispanics to vote. As late as the early Sixties, blacks were virtually excluded from the voting booth in many Southern states; now, they participate in politics much more than in the North. Last year, 59.5 percent of all voting-age blacks in Mississippi voted, as did 51.3 percent of all voting-age blacks in South Carolina. The comparable figures were 40.4 percent for New York, and 38.4 percent for Massachusetts.

The problem comes with the bill's "preclearance" provisions, which require that state and local governments in Alabama, Alaska, Arizona, Georgia, Louisiana, Mississippi, South Carolina, Texas and Virginia,

as well as portions of 13 other states (including the New York boroughs of Manhattan, Brooklyn and the Bronx), get prior Justice Department approval for any annexations, redistricting plans or other electoral changes. The rationale is to prevent white-run jurisdictions from, say, annexing white territories or switching from a district-based to an at-large City County, expressly for the purpose of diluting black or Hispanic voting strength.

In enforcing this provisions, however, the Justice Department and federal courts have run amok, imposing their own electoral ideas and intervening in local decisions and have little if anything to do with race. In 1979, for example, the Justice Department called off all elections in Houston, refusing to approve annexation plans designed to swell the city's tax base unless the city switched somewhat from its at-large voting method.

In the case of New York, elections were called off even without a finding of discrimination. The Justice Department simply didn't think it had received enough information to approve the city's redrawing of City Council district lines in light of the 1980 Census. For this sin, a three-judge federal panel, with Supreme Court approval, postponed the primaries.

The redistricting plan at the heart of the dispute seems to have been drawn, as is so often the case, in such a way as to preserve the seats of 45 incumbents, including eight blacks and Puerto Ricans. The plan adds two districts in primarily white Queens and Staten Island to reflect the population shifts within the city, so groups like the New York State Black and Puerto Rican Legislative Caucus are afraid that black and Hispanic representation on the council will decline from 19 percent to 18 percent.

It is arguable that a declining proportion of minority officeholders in a city like New York may be a sign that blacks and Hispanics are making real economic and social progress. As economic and social barriers come down, more and more blacks and Puerto Ricans are leaving areas like Harlem and Bedford Stuyvesant where they had previously been concentrated. As integration proceeds, it will probably be harder for black and Puerto Rican politicians to get elected unless they learn to appeal to broader constituencies, as mayors such as Tom Bradley in Los Angeles have done. But to hold up elections in order to support an affirmative action program for minority officeholders is a perversion of the once-noble principles of the Voting Rights Act.●

## NATIONAL ADVISORY COMMITTEE REPORT IS DISTURBING

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. SIMON. Mr. Speaker, yesterday, the National Advisory Council on Economic Opportunity released its final report, a devastating yet realistic analysis of the real impact of the administration's budget and tax policies. The irony of the Council releasing the report a few short weeks before it falls victim to the very budget axes it fears is not lost on any of us.

For those of us who have fought what the President calls his economic recovery package and voted against both the budget and the tax package, the recent doubts that are surfacing among the American people about the wisdom of these policies represent a hollow victory. The damage that will be done to millions of Americans, many defenseless and many trying hard to move themselves to self-sufficiency, represents one of the greatest injustices in my political career.

The National Advisory Council was established under the 1964 Economic Opportunity Act and appointed by the President in 1967. With the passage of this act in 1964, the United States committed itself to reduce, if not eliminate, poverty in this country. At that time, there were an estimated 36 million people living at or below the poverty level in this country. According to the Council's report:

The painful reality is that over 25 million Americans live in poverty (today). And recent studies have estimated that there are another 30 million Americans who might be called "the near poor": Those who live marginally above the poverty line but who are one family accident, one family sickness, or a job layoff away from slipping below the poverty line.

And after 15 years of steady progress in our Nation's effort to relieve poverty, we are deeply concerned that the process will be reversed by recent policy decisions that will serve not only to increase the number of poor, but to make their burden more severe.

In their letter of transmittal to President Reagan, the Advisory Council states:

The Council believes that the substantial budget cutbacks in human and social services programs proposed in your economic package to Congress represent a severe cutback to the poor as a whole, and in particular to the elderly, to women, to minorities and to the young. In addition we feel that your tax plan is regressive and punitive in that it offers the least relief to those who are in greatest need. We raise this issue in the belief that tax (or economic) policy cannot be separated from social policy.

Mr. Speaker, the Advisory Council states its position so well and addresses the concerns many of us have about the President's economic recovery program directly and with compassion. I am inserting a copy of the press statement released with the report by the Council and I urge my colleagues to read carefully this release, as well as the Council's full report. After my own reading, and taking to heart much of what is contained in the report, I am even more concerned about what this administration is doing to American Government. It will come back to haunt us for years to come. The message we are sending to millions of Americans through the budget and the tax program is one in which I take no pride and one that demonstrates a total lack of understanding of what makes this country strong and just.

Text of the press release follows:

ADMINISTRATION'S ECONOMIC POLICY COULD LEAD TO SOCIAL CHAOS

U.S. ADVISORY COUNCIL WARNS THAT REAGAN'S POLICIES WILL RESULT IN MORE WELFARE DEPENDENCY AND LESS ECONOMIC OPPORTUNITY: IMPACT ON 29 MILLION POOR AMERICANS WILL BE DEVASTATING

The National Advisory Council on Economic Opportunity today sharply criticized the Reagan Administration's proposed cutbacks in federal income-transfer and anti-poverty programs, saying that the effect of these cuts will be to cause massive suffering as well as to undermine the work ethnic and family life among the poor. The Administration's proposed cutbacks of these crucial federal programs, warned the Council in releasing its Final Report, will severely deepen the crisis of poverty in the future and could drive whole segments of our society toward hopelessness and despair. Instead, the Report calls for passage of the Economic Opportunity Act and continuation of the Legal Services Corporation, two programs that are essential to the well-being of the more than 29 million Americans still living in poverty.

In a separate statement, Arthur I. Blaustein, Chairman of the Council, said:

"By separating economic theory from social policy and pursuing the former at the expense of the latter, the Administration has adopted a strategy of brinksmanship that could lead to social chaos.

"There is a price to be paid for the reduction of human and social services. The price is that these cutbacks will not reduce crime; they will increase it. They will not reduce the use of drugs; they will increase it. They will not reduce alcoholism; they will increase it. They will not reduce physical and mental illness; they will increase it. They will not promote better family life; they will destabilize it. They will not increase respect for the law; they will weaken it.

"At present, there exists an air of suspended disbelief over the radical changes that have occurred in the past two months. That is because the lay-offs, the shut-downs, the cut-backs, and the reduced pay-checks have not yet reached ground level. But the day of reckoning will come shortly. October 1, 1981, will be remembered as a day of infamy, for it will mark the worst massacre of social and human service programs in American history."

The Report, "The American Promise: Equal Justice and Economic Opportunity," addresses itself specifically to the issues of unemployment, inflation, women in poverty, the implementation of human and social service programs, citizen participation and volunteerism, and the "myths" of poverty. The 15-member Council, established by Congress in 1967 and appointed by the President, is responsible for making an annual report to the President and Congress on programs and policies aimed at helping the poor. It is slated for abolition by this Administration.

Attacking what it termed persistent myths about poverty in the United States, the Council presented evidence that disputed what it termed the "mistaken" view of some economists that the reduction in the poverty population had been a result of "growth in the private economy." The Council maintained that for some time such growth "has ceased to 'trickle down' to the poor in the form of more jobs, better income, and a more rewarding and productive role in society." And, the Council reaffirmed its belief that only those comprehen-

sive and national economic revitalization efforts targeted specifically toward disadvantaged communities and the jobless would effectively combat poverty in the 1980s: a strategy that the Administration is abandoning.

In addition to releasing the Report, the Council issued the following statement:

"Seventeen years ago, this nation made an historic commitment to reduce, if not eliminate, poverty in America. The Economic Opportunity Act was conceived with moral conviction and dedicated to the proposition that all Americans, even the 36 million poor, were entitled to both economic opportunity and equal access to the law.

"The Act itself called for a national effort to attack the causes of poverty, and related social problems, which were national in character and scope.

"All the testimony given to the Council over the past several years has shown that these federal programs do work; that they do help people get out of poverty; and that the delivery systems are providing the necessary basic human and social services. Thus, after fifteen years of progress in our nation's effort to relieve poverty, when in fact the number of poor had, by 1980, been reduced by 11 million and millions more have been kept above the poverty line, this Council is deeply concerned that the process will be reversed by recent policy decisions by the Administration that will serve not only to increase the number of poor, but to make their burden more severe.

"The three aspects of the Administration's Economic Recovery Program that gravely concern the Council are: (1) the massive across-the-board cuts in social and human service programs; (2) the abolition of delivery systems provided for in the Economic Opportunity Act and the Legal Services Corporation Act; (3) the transfer of federal authority and program responsibility to the states through block grant programs.

"In evaluating the impact of these changes on the poor, we believe that each of these decisions taken alone would be painful; but taken together they will be absolutely devastating. This Council, under four Presidents (two Republicans and two Democrats), has consistently taken the position that the federal government must maintain active responsibility for pursuing the goals of the Economic Opportunity Act. This has never been a partisan issue, and it should not be one now. The Council vigorously reaffirms its earlier recommendations that the Economic Opportunity Act and the Legal Services Corporation Act should be reauthorized.

"The Council is well aware that the economic difficulties facing our nation are complex and often seem overwhelming. But these difficulties cannot be used as an excuse for reneging on our social and moral commitments as a nation. We are deeply troubled by the notion that national issues, ones that require national policy and programs and that are a part of our national purpose, should suddenly devolve to the states. The issue is not federal versus state responsibility; rather, it is the dimunition or avoidance of any national standards of responsibility and accountability. To deflect, suspend, or fragment responsibility and accountability suggests that we are either renouncing or failing to assert our moral purpose as a nation. Worse than that, the administration seems to be denying that this moral purpose exists.

"The effect of the block grant proposal, as opposed to the Economic Opportunity Act and the Legal Services Corporation Act, is to destroy existing support systems that are effective, that have a proven capacity to deliver services, and that utilize local planning and implementation capabilities. They are being replaced by a new system that has a poor track record, and is restrictively financed, more bureaucratic, less accountable, and more subject to intense political pressures. The last point is extremely important in that effective and efficient use of limited federal funds is in danger of being thwarted by conflicting political interests in each state.

"After reviewing the recent budget process, it appears that there has been a massive transfer from basic human and social services to our military budget. The Council seriously questions whether it is in the national interest to relegate a substantial number of human and social service programs to the junkpile, while we increase the stockpiling of weapons of mass destruction in an arms race where overkill has long been achieved.

"Moreover, these changes are occurring without any serious national debate, when advocates of balanced national priorities are dismissed by the President as representatives of 'special interests,' and critics of the Administration's policy are referred to as 'demagogues.' "

In criticizing the Administration's sharp cutbacks in social programs, the Council's statement emphasized the negative impact of these cutbacks on work and family life. "From an administration that places high priority on the importance of family life and the work ethic" it said, "this budget will be self-defeating." The Council cited the following analyses, drawn from its own research and other recent studies, in support of its statement that "these policies will actually encourage dependency instead of work, family breakdown instead of family stability:"

The Council cited an estimate by the Congressional Budget Office that proposed cuts in Public Service Employment under the Comprehensive Employment and Training Act (CETA) would result in a net loss of between 210,000 and 330,000 jobs in fiscal years 1981 and 1982, causing a sharp rise in expenditures for welfare and unemployment insurance.

The loss of these jobs, the Council pointed out, would be compounded by cuts in support services (which range from child care to mass transit), creating a "spiral effect" that will "deal a devastating blow to the realistic job prospects of hundreds of thousands of disadvantaged workers." The Council cited an estimate by the Wharton Economic Forecasting Associates that about three-quarters of a million jobs would be lost through cuts in CETA alone, and an additional million as a result of the Administration's program reductions as a whole.

The Council singled out proposed cuts in the Aid to Families with Dependent Children (AFDC) program as an example of how the reality of the Administration's budget departs from its rhetoric. Citing independent studies by the Congressional Budget Office and the University of Chicago's Center for the Study of Welfare Policy, the Council noted that the bulk of cuts in AFDC are concentrated on families who are presently working but do not now earn enough to maintain an adequate living. The Council pointed out that welfare recipients who work will have their incomes cut by an average of more than 20%, versus a 4% reduction for those who do not work, and in some states the Administration's proposed changes will eliminate the difference between what an AFDC family can receive if no one works and the income it can receive with a full-time worker. Noting that this sharply penalizes the working poor, the Council commented that "The Administration apparently feels that only the rich need incentives to work."

The Council said that families with young children—especially minority families and families headed by women—would be among the worst victims of the hardships imposed by the Administration's cuts. Citing an analysis by the Congressional Budget Office, the Council pointed out that of those families that are expected to lose a substantial portion of their spendable income from reductions in Public Service jobs, AFDC, Food Stamps, and the School Lunch program, over two-thirds are headed by women, and almost two out of five are nonwhite. Referring to the University of Chicago study, the Council noted that a single-parent family with two children could lose up to 30 percent of its disposable income from reductions in AFDC, Food Stamps, and child nutrition programs alone.

In rejecting the Administration's contention that renewed economic growth will eventually "trickle down" to the poor to offset these losses, the Council declared that it "flies in the face of everything we know about poverty today." The Council cited new evidence in this year's Report affirming that growth in the private economy has had a declining role in reducing poverty, and that "virtually all of the reduction in poverty since the mid-1960's has come about through the expansion of social insurance and income-transfer programs" of the kind now under attack by the administration.

Though poverty increased most dramatically in the "hard-hit, declining cities of the Northeast and Midwest," the Report says, "poverty rates also remained disturbingly stable even in those cities characterized by strong—occasionally phenomenal—growth in jobs and income. In short, economic growth has had little impact in decreasing poverty rates in recent years, even in the boom cities of the Southwest."

The stubborn persistence of poverty in the face of economic growth, the Council pointed out in its statement, results in part from the changing nature of the poverty population. What the report terms the "new" poor are increasingly a population of those whom the private economy has passed by. Even in good times, the Council noted, these people—the aged, the disabled, disadvantaged youth, women heading families with small children—are rarely hired by the private sector. In 1978, a year of economic recovery, the unemployment rate among disadvantaged minority youth was 41 percent. Among AFDC recipients, one of the groups most harshly affected by the Administration's cuts, nearly 70 percent are children, more than two-thirds of them 11 years old or younger. Among the adults, the overwhelming majority are women heading families—about 80 percent of whom are either required as full-time homemakers, disabled, or already in training, at work, or seeking work.

Because few of these people can be absorbed into the private economy without special assistance and support, said the Council, the "massive suffering" these program cuts will bring "cannot be balanced by any credible long-range benefits from the Administration's program—even under the most optimistic economic assumptions." Instead, the Council declared, any economic

"renewal" resulting from the Administration's policies would "take place at the expense of stable, rewarding family lives and genuine work opportunities for the poor and their children."

Mr. Blaustein, Chairman of the Council, added that: "We are watching a great tragedy unfurl before us. The steady drumbeat of rhetoric emanating from Administration officials and shrewdly orchestrated by the White House is intended to create, and has heretofore succeeded in creating, a counterreality and new myths with respect to social policy. For example, by continuously referring to economic opportunity and equal justice programs as welfare programs, the Administration has misled the American public. These programs are, in fact, designed to achieve the opposite, to create jobs and economic opportunities and to encourage people who are dependent upon welfare to become productive citizens and taxpayers. By seeking to eliminate these programs and substituting its own policies, the Administration will deny upward mobility to millions on welfare and will force many of the working poor into welfare dependency. By shifting program authority from the federal government to the states through block grants, the Administration has created a bureaucratic nightmare that will result in government by provisional catastrophe. By transferring huge amounts of funds from human and social services to defense, the Administration is not dampening inflation, it is fueling it.

"In order to gain support for its economic package, the Administration has conjured up the specter of an 'economic Dunkirk.' What it is perpetrating instead is a 'social Pearl Harbor' which will have a devasting impact on the poor who are defenseless, as well as wiping out the modest gains made in the past fifteen years by women, the elderly, minorities, and the young—the most vulnerable segments of our society."●

## A TRIBUTE TO BEREK DON

### HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HOLLENBECK. Mr. Speaker, it is a pleasure for me to take this opportunity to commend the efforts of Berek Don who is completing his term as president of the Fort Lee, N.J., Kiwanis Club. Rarely do we have the chance to honor an individual who has so clearly distinguished himself through his selfless commitment to numerous civic organizations. I am confident that all of those who know Berek will agree with me when I say that he has made a genuine contribution to the many groups with which he has worked.

Fort Lee and the Kiwanis Club are fortunate to have been the recipients of Berek Don's talent. As a worldwide service organization appealing to men who have the desire to become personally involved in making their communities better places in which to live, Kiwanis was well suited for Berek's qualifications and enthusiasm. In 1977, he joined the Fort Lee Kiwanis Club and served as its secretary. After working his way through the ranks as treasurer and vice president, he became president last year. Yet, Berek's service to the community does not stop there. He is serving this year as president of the Fort Lee City Council.

As Berek steps down from his position as president of the Kiwanis Club, I am confident that his friends will join me in extending to him our sincerest best wishes for success and continued happiness in the future.●

## A TRIBUTE TO CAPT. PAUL McLAUGHLIN

### HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. FARY. Mr. Speaker, one of my constituents, Capt. Paul V. McLaughlin, recently retired from the Chicago Police Department after more than 35 years of selfless dedication to the city of Chicago and all its residents. Although we Chicagoans are happy to see that his retirement will bring well-deserved leisure, I must say that the city will be left wanting because of it.

As a lifelong resident of Chicago, I can say unequivocally that his personal contribution as a public servant has had a real and positive effect on all our lives. His skill and integrity made us feel safer, his unwavering spirit made us more secure, and his professionalism made us proud. Indeed, his 10 years as commander of the Central District including our downtown area, probably did as much to insure the vitality and success of our business district as any combination of private efforts.

Paul McLaughlin can retire with the full satisfaction that he has made this a better world and he has made us, his friends, happier people.

Mr. Speaker, I offer a summary of Captain McLaughlin's career for the edification of all my colleagues in the House:

CHICAGO POLICE CAPTAIN PAUL V. MCLAUGHLIN

Chicago Police Captain Paul V. McLaughlin, a 35 year veteran, retired from the Chicago Police Department effective May 4, 1981. Capt. McLaughlin is best known as Commander of the Central (1st) District, a post he held from 1969 to 1980, for more than 10 years.

During those 10½ years as Commander, McLaughlin became a prominent and visible figure in the streets of Chicago's Downtown Area exhibiting leadership, expertise and personal courage in the many encounters with violent demonstrators during the "Days of Rage", "Rock Concert Riot at the Old Band Shell" in Grant Park, "The Chicago '7' Trial", 5 Rock Concerts at Soldier's Field, and hundreds of other Loop demonstrations.

On August 17, 1978, he was the first police official on the scene at the "Hostage Situation" at the office of the German Consulate directing police operations throughout the day. During 12 hours of continual supervision, McLaughlin was successful in getting the two Croatioan terrorists to release two of the German Hostages very early in the situation, as well as shutting down access to the building located at 104 South Michigan.

As the Commanding Officer of the First District, he supervised complete police operations of all parades, rallies, various official visits of the President of the United States from Truman through Carter; hundreds of other U.S. dignitaries and Foreign Heads of State (31 Official Visits from Foreign Heads of State during the 1976 Bicentennial Year). "Among the most memorable assignments as First District Commander," McLaughlin said, "was the visit of Pope John Paul II in 1979" which he supervised the city's largest gathering in history for the Papal Mass celebrated in Grant Park on October 5, 1979.

In his long and illustrious police career, he earned the Superintendent's Award of Valor, 3 Superintendent's Awards of Merit, 5 Unit Citations, 3 Creditable Mentions, 11 Department Commendations, 131 Honorable Mentions, and 1,233 Complimentary letters.

In 1977, Capt. McLaughlin was awarded the Superintendent's "Special Commendation" for "His Excellence in Leadership and his Tactical Courage in directing the overall on-the-scene police operations immediately after the 'El' Train Accident at Wabash and Lake Streets."

Capt. McLaughlin, 58, is a life-long resident of Bridgeport attending Nativity of Our Lord Grade School, St. Pat's High School, Wilson Jr. College, with special Police Training at DePaul University, Northwestern University and University of Chicago.

After serving the U.S. Army Military Police, he joined the Chicago Police Force on March 18, 1946. He was promoted to Sgt. in August 1957; Lieutenant in May 1961; Captain in August 1966, and District Commander in October, 1967 serving as the Commanding Officer in the Roseland Community and Chicago Loop areas.

McLaughlin is married to a former neighbor, Mary Jones. They have four children, Michael (27), Elaine (24), Patrick (23) and Timothy (18).●

## KING HYPOCRISY

### HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. WILSON. Mr. Speaker, I would like to call to the attention of the House the following column by James J. Kilpatrick which appeared in the Washington Post on Tuesday, September 22. I would only add that in most cases, including the current conflict between South Africa and Namibia, there are two sides to every question.

The article follows:

KING HYPOCRISY

(By James J. Kilpatrick)

NEW YORK.—The General Assembly of the United Nations, that monument to imbecility, acted in character again the other day. By a vote of 117-0, the assembly adopted

another of its resolutions against South Africa, and once again the assembly violated the most elementary principles of fair play and parliamentary privilege.

Such expressions of hypocritical unanimity have become commonplace in these gaudy realms of make-believe. In theory, member nations subscribe to the original purpose of the United Nations. That was to provide a forum in which all nations—repeat, all nations—could be heard. In theory, member nations also subscribe to the principle that all nations should respect the borders of all other nations.

In practice, and notably in the matter of South-West Africa, also known as Namibia, these theories disappear into the gaseous clouds. Here the rule is that all nations may be heard in the forum—all nations, that is, except the one nation most intimately and directly concerned in the matter: South Africa.

The purpose of the assembly's most recent resolution was to condemn South Africa for an incursion into Angola. Very well. But if King Hypocrisy were not presiding over this mummery, the assembly would equally have condemned Angola for harboring forces of SWAPO (the South-West African People's Organization), whose purpose is to seize power in Namibia by force of arms.

Hypocrisy is defined as "a feigning to believe what one does not." It is "the false assumption of an appearance of virtue." In the matter of Namibia, the assembly feigns to believe that the United Nations has some valid authority to dictate the future of South-West Africa. But this is not so, and any person capable of tracing the last days of the old League of Nations knows it is not so. The notion that the league formally transferred its mandates to the U.N. is a notion spun from moonbeams. The chain of title is not there. No such testamentary proof exists.

The assembly also feigns to believe that all acts of international meddling are bad, but this appearance of virtue is false. The SWAPO terrorists are armed by the Soviet Union. No one denies it. The terrorists are supported and trained by thousands of Cuban troops. No one denies it. In the assembly, the matter is simply not discussed.

Here at the U.N., the notion is carefully fostered that only one outfit embodies the longing of all the people of Namibia for independence, and that outfit is SWAPO. The notion is fatuous. The guerrillas of SWAPO seek power for the Ovambo, who make up something less than half the population. But the Ovambo are themselves divided into seven Bantu tribes; and beyond the Ovambo are such tribes as the Damara, the Herero, the Kavango and the Nama. There is no "Namibian people." There is no sense of national loyalty, no universal hunger on the part of "Namibians" for a flag to call their own. There is only a hunger on the part of a relatively few ambitious men for wealth and power.

It is all dumbshow. The assembly's resolutions, devoid of the slightest power even to influence or persuade, are no more than tales told by idiots, full of sound and fury, signifying nothing. No self-respecting nation—not South Africa, not Israel in other contexts, not any of the great powers—will surrender its national interest to the vaporings of an impotent body. It is lunacy to suppose that South Africa will accept any imposed "solution" that creates a Marxist state upon its northern border and jeopardizes access to Walvis Bay. If the old mandated territory of South-West Africa is to be cut loose, it will have to be cut loose with strings still attached. In the 20 years that the Namibian question has been debated, no one yet has mastered such a feat of legerdemain.

Reading an inch-thick stack of windy resolutions, I wonder anew: why the United Nations? Seriously, why? Its purpose as a forum has been reduced to a nullity. Its portentous demands have less weight than a resolution of the Maryland Audubon Society demanding the resignation of Secretary Watt. Perhaps we should carry news of the U.N. back on the comic pages to dwell with Doonesbury and his friends.●

## THE THREAT TO AFFIRMATIVE ACTION

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HAWKINS. Mr. Speaker, one frequently voiced complaint about federally enforced affirmative action programs is that they are overly costly for the companies involved. This is a specious argument says Karen Nussbaum in her August 24 Los Angeles Times column. The cost of affirmative action programs, especially for the largest and most powerful firms, is miniscule when compared to revenues. Comparatively, the costs of discrimination are enormous. Millions of underpaid women and minorities are forced onto public assistance programs simply to make ends meet. Cutting affirmative action efforts in the name of cost consciousness, ignores the greater costs of employment discrimination.

THE THREAT TO AFFIRMATIVE ACTION

(By Karen Nussbaum)

Attacks on affirmative action are nothing new. This time they are coming from the Reagan Administration and various conservative forces disguised as concern for thrift in government and streamlined regulation.

Sen. Orrin G. Hatch (R-Utah) wants to outlaw affirmative action by constitutional amendment. Professing a more moderate approach, Reagan Administration appointees at the Labor Department, some conservatives in Congress and a strong business lobby favor weakening the regulation by limiting the scope of affirmative action or tampering with the enforcement process.

These attacks are all the more serious for the very real discrimination that women and minorities continue to experience. On the average, Latinas earned 54 cents, black women 59 cents and white women 63 cents for every dollar earned by white males in 1980.

As one indication of the severity of the threat to affirmative-action efforts, the Labor Department no longer plans to review First Interstate Bank's employment practices. The California-based bank has been targeted by Working Women, the national organization for women office workers, because of its poor record. Although the Labor Department gave no reason for dropping the investigation, which was scheduled to begin this summer, we have to assume that pressure from the banking lobby and current Reagan Administration attitudes have had their effect.

Opponents of affirmative action argue that the costs of implementation outweigh the benefits, but the costs are minimal when compared with the costs of discrimination.

A 1979 study, commissioned by the Business Roundtable, tabulated the actual costs of federal regulation to member companies. Three banks participating in the study—Citicorp (N.Y.), Chase Manhattan and Continental Illinois—spent a total of $1.7 million on affirmative-action programs in 1977. The average cost per bank: $356,000, or 0.01% of gross revenues.

The chairmen of these banks earned 1980 salaries at least $200,000 in excess of what each bank spent on affirmative action in 1977. In 1978, Citicorp spent more money on one promotional campaign to persuade race car drivers to wear Citicorp patches than it spent on the previous year's affirmative-action programs.

Furthermore, since both the Office of Federal Contract Compliance Programs (the agency responsible for enforcement of affirmative action) and the Equal Employment Opportunity Commission underwent reorganization and streamlining for efficiency in 1978, the actual total cost of affirmative action today should be less than in 1977.

The cost of discrimination, on the other hand, is astronomical when measured in taxpayer-supported federal aid programs alone. More than 12 million full-time workers are paid so little that they are eligible for food stamps and other forms of public assistance. Of these, 67 percent are women, 25 percent minorities.

Examination of the employment policies and profiles of banks before and after investigations by the federal compliance office shows that banks subjected to the most government scrutiny made the most progress in certain employment areas. First National Bank of Boston, for example, began to post in-house job openings, and gave employees their first cost-of-living raises in four years. In Cleveland, National City Bank—currently in the midst of a large discrimination study by the Labor Department—began a management-training program for employees lacking college degrees. Even banks not directly under investigation have begun new programs in response to government actions elsewhere.

The banking industry's own reports to the government show that the percentage of managers who are women rose slowly before strong government enforcement began in that industry during the 1970's. Compare these figures: 11.6 percent in 1950 to 12.2 percent in 1960, and 17.6 percent in 1970 to 31.6 percent in 1979.

Currently, women and minority employees at two banks—National City Bank of Cleveland and Harris Trust & Savings Bank of Chicago—are claiming about $26 million in back pay. The American Bankers Assn., however, is asking the Labor Department to delay final decision on the discrimination proceeding against Harris until the Administration has completed its review of equal-employment and affirmative-action regulations. The banking association observes, "* * * it is fair to conclude that the policies of prior Administrations are inconsistent with the policies of the new Administration in respect to 'affirmative-action' programs and * * * in the near term, there will be a fully developed new policy."

But are the delay and review fair? Or just? A $26 million penalty for discrimination is a powerful incentive for the banking industry to develop policies of fair treatment for all employees. But so far, perhaps unwittingly, the Administration seems to be providing the industry with an incentive to do the opposite: to fight against affirmative action.

We have to recognize the sophistry in the concern for cost-consciousness. Those of us who have experienced racism and/or sexism in employment do not call genuine national concern for an end of wasteful government spending a national mandate to end affirmative action. The cost of discrimination is too great.●

## TRIBUTE TO DONALD MARRS

### HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. LUKEN. Mr. Speaker, it is a pleasure and a privilege to recognize and commend Donald Marrs for his outstanding service to Cincinnati and cancer research. Mr. Marrs, who's terminal cancer is in remission, will be honored in a special event that recognizes his cross-country run to raise money for cancer research.

Cincinnati will give special tribute to him on September 23 by sponsoring Don Marrs Day on Fountain Square. This appreciation day will acknowledge Don Marrs' caring for all humanity and depict the kind of person he is in the community.

At a time in our Nation's history when many would rather take than give, we find a man who is devoting his time and effort to something meaningful. Fourteen months ago, Donald Marrs, a 44-year-old Western Hills resident and postal employee, discovered that he had an incurable form of lymphoma, cancer of the lymph nodes. On July 25, he began a 2,200-mile run across America in the name of cancer and as a tribute to the late Canadian Terry Fox, who attempted to run across Canada for cancer research. Mr. Marrs started running at Carlyle, Ill., and plans to reach San Francisco in mid-November. His goal is "to touch a few lives and offer hope and strength to other cancer patients."

We in Cincinnati are privileged to have a man who seeks to help his fellow citizens. Don Marrs has waved the banner of sensitivity, compassion, and bravery and deserves a day of honor for immeasurable public service. Speaking for the people of the Second District, Cincinnati, and the United States as a whole, I would like to thank Don Marrs for his dedicated and distinguished run for cancer research.●

## CUT BACK ON SOCIAL SECURITY

### HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HUBBARD. Mr. Speaker, one of the most sensitive issues awaiting congressional action is the financial status of the social security system. A constituent of mine, Lynda L. Combs of 414 Linda Drive in Hopkinsville, Ky., contends that the working class cannot tolerate higher social security rates. She has made several points on the social security issue in a letter to me and I would like to take this opportunity to share her letter with my colleagues. Her letter follows:

DEAR SIR: There are several points in regard to the Social Security issue that I feel very strongly about:

(1) Social Security was set up as an insurance supplement for parents left with minor children. Minor children are children under eighteen, not twelve years of age. No twelve-year-old can earn his way in the world today. Parents, who die before their children reach eighteen, never receive benefits from Social Security; they pay their money in vain if their dependents never receive benefits. Young people have no option as to whether they want to participate in the Social Security program—the government says they will. If benefits are cut to dependent minors, then, young parents should have the option of deciding whether to participate in the Social Security program or buy life insurance protection.

(2) The persons working and paying Social Security today, started paying into the program earlier than those already drawing Social Security. Why tax the working class today who are paying into the program all their working lives for the benefit of the older citizens, some of which have been drawing this retirement for over twenty years?

(3) Social Security was set up as an income supplement for retirement years. This was not meant to be full retirement pay just as the person was receiving on the job. Persons not working do not incur the same expenses as those working: transportation to and from work, as much clothing expense, and they certainly enjoy a lower tax bracket.

(4) The working class cannot tolerate higher Social Security rates. I also fear higher Social Security payments from employers may mean less jobs in unskilled areas.

Please cut back on Social Security; do not raise taxes again for the working class. We voted in the last presidential election for new leadership and newer programs which promised a tax cut. As a representative, please help us obtain this.

Sincerely,

LYNDA L. COMBS.●

## MOSCOW'S UN-FAIR

### HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an important article by Mr. Robert L. Bernstein which recently appeared in the New York Times. As chairman and president of Random House, and as chairman of the U.S. Helsinki Watch Committee, Mr. Bernstein is uniquely qualified to discuss the Third Moscow International Book Fair, which was held earlier this month.

As it is routine for the Soviet system to seek to shackle the minds of their citizens, it is hardly surprising that the Soviets have virtually destroyed the book fair by increasing levels of censorship and abuse of writers. Indeed, Moscow has gone so far as to deny visas to American publishers of Soviet dissident writers and Americans who have views on publishing that annoy the Soviet Government. As a result, many American publishers have lost interest in the Moscow Book Fair.

The Soviets have been imprisoning and exiling prominent authors at an alarming rate. Meanwhile, the rate of Soviet Jews who are given permission to leave the U.S.S.R. has reached its lowest point since the start of the Soviet Jewry movement a decade ago; only 430 Soviet Jews were permitted to emigrate in the month of August. This trend represents a 92-percent decline from 1979 levels of Soviet Jewish emigration.

It is imperative that the Reagan administration protest this disturbing trend more forcefully than it has to date. I profoundly hope that Secretary of State Haig addresses the issue of Soviet Jewry in his meeting today with Soviet Foreign Minister Gromyko.

As Mr. Bernstein points out in his article:

It is a monstrous irony that the Soviet Government has signed the Universal Declaration of Human Rights and that Leonid Brezhnev has signed the Helsinki Final Act, both of which guarantee the basic natural rights of all peoples, including the fundamental right of free expression.

I commend this excellent article to the attention of my colleagues:

[From the New York Times]

MOSCOW'S UN-FAIR

(By Robert L. Bernstein)

This week the Soviet Union is playing host to the Third Moscow International Book Fair, but as far as American book publishers are concerned, the Moscow Book Fair is dead.

American publishers have lost interest, and the Soviet Government has only itself to blame. The reason is simple. If you want to hold an international event, you must

make it attractive to the guests. The Moscow Book Fair is no longer attractive to business people and certainly not to people who care about ideas—the two conditions essential for success.

Before the first Moscow Fair in 1977, there was a considerable dispute among American publishers about whether to attend. Some opposed participation because of extensive censorship and abuse of writers. Others argued that support for the fair would increase the possibilities for the free exchange of ideas between the United States and the Soviet Union. Our position at Random House was to attend the fair only if we understood its censorship rules. When the Soviet Union refused to explain the cryptic summary in the fair's rule book, Random House decided not to attend.

In 1979 we changed our position, joining other American publishers in a concerted effort to try to make the fair a success. The Soviet Union had always compared the Moscow Fair to the leading international fair at Frankfurt. Accordingly, instead of pressing for advance commitments about the censorship rules, we decided to approach the Moscow Book Fair in the same way we would approach the Frankfurt Fair; we shipped to Moscow the same broad selection of books that we send to Frankfurt or to any other serious cultural fair. In addition, the Association of American Publishers sponsored "America Through American Eyes," a unique exhibit of books depicting life in America, with all its strengths and weaknesses.

The result, however, was disappointing: increased censorship, coupled with a new element—the denial of visas to American publishers whose authors included dissident Soviet writers or who had had views on publishing that annoyed the Soviet Government. My visa was issued, then withdrawn the day before my scheduled departure. Carl and Ellendea Proffer of Ardis, the leading publisher of Soviet authors in both Russian and English, were also denied visas. And shortly after the fair, the Soviet Union denied the visa of Winthrop Knowlton, chairman of Harper & Row, publishers of Alexandr I. Solzhenitsyn.

Since the 1979 Book Fair, the Soviet Government has been alarmingly active in exiling and imprisoning prominent authors, much more active than at any time in the last century. Anatoly Marchenko, who has served 15 years in labor camps, has been arrested again and his trial began Wednesday, the day this year's fair opened.

Among those sentenced last year were Vyacheslav Chernovil, 5 years labor camp, 4 months internal exile; Viktor Nekipelov, 7 years labor camp, 5 years internal exile, and Vasyl Stus, 10 years labor camp, 5 years internal exile. And perhaps most notoriously, 1980 was the year that Andrei D. Sakharov was banished to Gorky. In addition, the many writers who have been forced into exile abroad this year include Vasily Aksyonov, Philip Berman, Lev Kopelev and Vladimir Voinovich.

It is a monstrous irony that the Soviet Government has signed the Universal Declaration of Human Rights and that Leonid I. Brezhnev has signed the Helsinki Final Act, both of which guarantee the basic natural and inalienable rights of all peoples, including the fundamental right of free expression.

The Soviet Government has made its book fair a Potemkin Village, a ludicrous event. In so doing, it has placed itself in a position clearly apart from the company of civilized nations.

NOTE.—Robert L. Bernstein is chairman and president of Random House and chairman of the United States Helsinki Watch Committee.●

## THE TROUBLE WITH THE WORLD BANK

**HON. HENRY J. HYDE**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HYDE. Mr. Speaker, in the 7 years of my congressional service I have yet to encounter as insightful and useful article on the World Bank as appeared in the Wall Street Journal of September 18, 1981. It is all the more useful in that it was written by our California colleague JERRY LEWIS.

To understand the gigantic problems we face in the important area of multilateral financing for the lesser developed countries, and to consider some effective solutions, I highly commend Congressman LEWIS' article to my colleagues.

The article follows:

THE TROUBLE WITH THE WORLD BANK

(By JERRY LEWIS)

This summer, Congress authorized U.S. participation in a general capital increase for the World Bank which doubles its size to over $80 billion. Also authorized are additional U.S. payments of $3.24 billion to the International Development Association, the World Bank affiliate providing 50-year loans at no interest to impoverished nations, such as India and Red China. These actions, particularly the latter, have so divided the House of Representatives that for the third year in a row a foreign-aid appropriations bill may not pass Congress.

On one side of the battle over World Bank funding is the Reagan administration, congressional liberals and large commercial banks. The opposition consists of many of the President's staunchest supporters in Congress.

The administration supports the bank to honor non-binding foreign aid initiatives begun in the Carter years. Liberals want to maintain wealth redistribution programs from the West to the Third World. Commercial banks want their foreign loans protected by the World Bank's presence.

These are insufficient reasons for taxing U.S. citizens to send financial aid abroad. Before voting to spend more, we should be asking, What is the purpose of our foreign aid programs? Are there more efficient aid vehicles? What leads to economic development in poor nations? Can the World Bank stimulate these forces? Congress has spent little time examining these questions.

The World Bank and its affiliates have evolved into the major multilateral vehicle for expression of American interest in the developing world. Though denounced by Communists as a prime promoter of capitalistic ideas, the bank on closer examination is a decidedly noncapitalistic organization. It is owned and controlled by governments doing business with other governments. If it were a privately held development bank, financing marketplace rather than statist solutions, maybe there would be substance to the Communist criticism.

As the administration struggles to form a foreign aid policy, it would be refreshing to see the sense of innovation shown in reorienting domestic programs transferred to the international arena. Domestically we have just agreed to privatize the National Consumer Cooperative Bank. The concept of privatization is sound. Perhaps it could be applied to the World Bank to invigorate our maligned foreign-aid efforts.

NOT AN EFFECTIVE INSTRUMENT

Recent U.S. foreign aid has a record of failure. The program is not an effective instrument capable of meeting U.S. objectives and helping friendly nations develop. This is due in part to lack of focus.

There has been no consistent set of humanitarian, political, eonomic or military goals to which U.S. aid was directed. Perhaps consistency wasn't wanted or felt necessary, since foreign aid was regarded as "walking around money" for the Secretary of State. From this perspective, the purpose of these funds was simply to influence foreign governments. What use was made of the money by the recipients was of secondary interest.

I reject this notion. If we are going to provide funds abroad, they should be given in a way that helps rather than hinders friendly economies. We should be supporting private enterprise over bureaucratic planning. And we should evaluate the effectiveness of our aid programs, not by the amount of money transferred but by results.

The World Bank is symptomatic of past shortcomings in the U.S. foreign aid program. Created by U.S. initiative after World War II to help finance reconstruction, the bank has transformed itself into a conduit for multilateral development assistance from economically mature countries to less developed countries (LDCs). From funding roads, dams, irrigation systems and electrical networks, the bank has shifted over 40 percent of its lending into what it calls new-style social projects to achieve "growth with equity." As a result the bank has become more involved with income redistribution, land reform, population control and other social issues.

The bank's critics contend that it has not promoted economic progress in the LDCs but has retarded it. In its zeal to move money from the West the bank has induced LDCs to accept uneconomic capital intensive and social engineering projects at the cost of increasing national debt, taxes and bureaucracy, while decreasing private sector activity.

The bank has been unable to foster the prime conditions for development—sound economic policies and stable political environments. Economic success stories such as the U.S., post-World War II Japan and West Germany, modern Taiwan, South Korea, Hong Kong and Singapore all have a common factor—reliance on private enterprise to organize most economic activity.

The World Bank could play an important role in LDC development if it would condition its loans on the elimination in Third World economies of price controls, nationalized industries, high tax rates, government subsidies, state monopolies, trade restrictions and impediments to private capital flows.

The Reagan administration recognizes this and is trying to turn the multilateral banks into positive forces for LDC development. For example, there is the recent U.S. veto of a concessional Inter-American Development bank loan to Guyana, which wanted

a subsidized loan to aid its ailing rice farmers. The U.S. Treasury pointed out that rice farmers would be better served by eliminating Guyanese government pricing regulations, a main cause of the poor rice production.

But the administration faces serious pitfalls in improving the performance of the World Bank. It is unlikely that less market-oriented major members such as France and Canada would allow the bank to enforce stringent free-market principles as conditions for receiving loans. Moreover, many of the bank's staff are hostile to marketplace solutions and the over-emphasis on external capital flows as the key factor in development.

One suggestion, which could permanently resolve some of the bank's major weaknesses, is to allow it to become a freestanding private financial institution. It would remain the flagship of development banks, but it no longer would have a direct pipeline into the treasuries of Western nations for subsidized capital replenishments. More importantly a private World Bank would have an entirely changed incentive structure to mandate lending policies more conducive to economic development.

Proponents of the bank point to the soundness of its lending, its efficient operations, its earnings and now, to its new private enterprise-oriented president. These are the essential elements of a successful private financial institution.

DISCIPLINE OF MARKET FORCES

Privatizing the bank would subject it to the discipline of market forces; it could attract capital to lend to LDCs only for projects deemed worthwhile by the market. As a private bank it would no longer receive capital infusions from governments, and its viability and growth would depend on its ability to earn a profit on the spread between its borrowing and lending rates.

As long as the bank paid sufficient dividends to stockholders, it could channel any amount of capital to LDCs of its choice without criticism by outsiders and without burdening taxpayers in developed nations. A private World Bank could also increase its one-to-one gearing ratio of loans to capital, to expand its lending without going through the difficult process of requesting replenishments of capital from owner nations.

No longer would the bank have an incentive to move ever-increasing amounts of money. It would have to ensure that its loan projects were productive and that conditions in borrowing nations were conducive to economic growth, and thus repayment. Just as private banks scrutinize the financial standing of loan applicants and may recommend changes in balance sheets to obtain loan approvals, a private World Bank could condition its loans on changes in LDC economic policies which retard growth.

Of course the reorganization of the World Bank would be complex, but research indicates it is feasible. For example current "soft" or zero interest loans and social lending projects of the bank which are not attractive to private capital, to the extent they are worthwhile, could be carried out through expanded bilateral aid programs or new, more effective multilateral grant efforts. After some restructuring of its portfolio, the stock of the bank could be traded on public stock exchanges and be an attractive investment.

Privatizing the World Bank is one idea which may help put focus in our ineffective and seemingly aimless foreign-aid programs. The goal is to increase international stability by promoting sound economic development. While U.S. concern for the world's less fortunate is a legitimate foreign policy objective, this concern has yet to be translated into programs that work. New ideas are needed. The basic premises of existing aid efforts require prompt re-examination. Programs that prove ineffective must be halted if American taxpayers are to get a fair return for their foreign aid sacrifices.

(Mr. LEWIS, Republican Congressman from California, is a member of the House Foreign Operations Subcommittee of the Appropriations Committee, which approves U.S. funding for the World Bank.)●

## ARMS SALE TO SAUDI ARABIA

### HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. WYDEN. Mr. Speaker, while each Member of Congress supports the President's efforts to reach a just and lasting peace in the Middle East, many of us believe that the proposed sale of AWACS radar planes and the F-15 enhancement package is a step in the wrong direction.

I was joined by my colleagues from Oregon, Congressmen LES AUCOIN and JIM WEAVER in expressing our objections to the sale in a letter to President Reagan. Below is the text of the letter:

HOUSE OF REPRESENTATIVES,
*Washington D.C., September 23, 1981.*
President RONALD REAGAN,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: We respectfully inform you that three of the four Members of the Oregon House delegation are opposed to the sale of AWACS and the F-15 enhancement package to Saudi Arabia.

We support your efforts to strengthen relations both with Israel and with friendly Arab nations, but believe this sale is not in the best interests of our nation.

We believe that the proposed Saudi arms package will increase tensions and instability in the Middle East and we wanted you to know our strong feelings on this issue as Congressional debate on the proposed sale begins.

*Sincerely,*

RON WYDEN,
LES AUCOIN,
JIM WEAVER,
*Members of Congress.*●

## AWARD WINNING ESSAY

### HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. McGRATH. Mr. Speaker, it was with great pride that I learned earlier this week that a constituent of mine, James Bingham, of Rockville Centre, N.Y. was a winner of a nationwide essay contest sponsored by the Presidential Inaugural Committee. James and his parents were among the honorees at a White House reception hosted by the First Lady today.

I was truly impressed by the patriotic spirit demonstrated in the words of this fine young man who is a credit to his family, his community, and this great Nation. I would like to take this opportunity to share his essay with the Members of this House:

AWARD WINNING ESSAY OF JAMES BINGHAM

"I do solemnly swear that I will faithfully execute the office of President of the United States and will to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Nowhere in the world but in our great country do thirty-five words bring to a dramatic conclusion both the electoral and political processes whereby a new beginning is declared throughout a nation, and I was there!

As President-elect Ronald Reagan spoke those thirty-five words mandated by the Constitution of the United States, I sensed feelings in the audience not only of excitment, but of pride, support and respect for our system of government, the democracy we have chosen. The taking of this oath truly marks an "American Beginning."

This "American Beginning" occurs every four years at the inauguration of the President and Vice President. American voters, exercising their Constitutional privilege, either return the incumbents to office or select a new team. In the elections of 1980 the people once again opted for a completely new "American Beginning" for Inauguration Day, 1981. So important is the meaning of the Inaugural that President Reagan himself chose to focus on it in his Address: "To a few of us here today this is a solemn and most momentous occasion. And, yet, in the history of our nation it is a commonplace occurrence. The orderly transfer of authority as called for in the Constitution takes place as it has for almost two centuries, and few of us stop to think how unique we really are. In the eyes of many in the world, this every-four-year ceremony we accept as normal is nothing less than a miracle." Our "miracle," our way to new beginnings, is the envy of oppressed peoples all over the world!

President Ronald Reagan is the catalyst for this new beginning. In him rests a mandate from the American people to balance the budget, help the truly needy, end double-digit inflation, decrease the size of government bureaucracy and cut taxes, and as leader of the free world—to build a lasting peace. It is an awesome task for one man, and further, as we the people look to this man we have called to be our President, we are not alone in looking to him for leadership.

Political and world events have brought our nation to the center of world affairs as leader of the free world. It is no exaggeration therefore to say that the Presidential years of Ronald Reagan will affect the entire world. His is the responsibility to make our country strong, to strengthen the free world, to bring about lasting peace. The Inauguration of the President and Vice President of the United States is indeed a landmark event of world importance, per-

haps indicating even a "world beginning" as well as a significant "American Beginning." In our President rests the hope of mankind for peace.

I was there as he spoke on his Inauguration Day, and the air was filled with that hope!●

## UNION NOW

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. FINDLEY. Mr. Speaker, some ideas endure no matter the power of the forces which oppose them. These are ideas which enhance the dignity of man and which appeal to his sense of fairness and justice.

Atlantic union is one of those ideas. Despite the skeptics who emphasize the forces which separate like-minded peoples over those which bring them together for their common benefit, this idea persists in the visions of many people. Occasionally, it reemerges with clarity and bouyancy. Often, for example, I have noted the strength of this idea as expressed by Clarence Streit. Streit, through his writings and lifework, urged the elevation of the individual through the combination of the resources of the democratic nations. His work and those of men like Jean Monnet, Robert Schumann, and George C. Marshall, led to the emergence of the great Atlantic cooperative endeavors from the destruction of World War II.

Now the idea of union has been given new and forceful expression by the West German Foreign Minister, Hans-Dietrich Genscher, in an August 1981 article. The Foreign Minister directs his attention to the need for European union—now. He bases his argument for greater European unity on a central premise which is common to all unifying efforts and particularly important, at this juncture, for the European community:

> In view of the magnitude of both the issues incumbent upon the Community and the challenges in foreign policy confronting the Ten, there is a need for political vision so as to make the indispensable European unification more attractive again. The citizens expect this of us.

Hans-Dietrich Genscher has supplied the necessary vision to promote the process of unification of Europe which will enhance its ability to meet the many and great challenges of these times. I feel confident that others will join the West German Foreign Minister in expounding this vision and in advancing it even further to include Atlantic union—now.

EUROPEAN UNION—NOW

(By Hans-Dietrich Genscher)

It is recognized everywhere that the Europe of the democracies, the European Community, needs a fresh political impetus if stagnation and the ensuing distintegraton are not to become a real danger.

Energetic political decisions are now necessary in order to strengthen the European identity and Europe and to organize the safeguarding of its interests in a more viable manner. International tensions and crises such as we are now again experiencing have always furnished a stimulus for invigorating the European concept in the past. Europe must now draw practical conclusions from this.

If we do not succeed in taking such an initiative, Europe will run the risk of becoming deadlocked in an outmoded approach constrained by national egotism when it sets out to resolve the undeniably existing problems in the European Community such as the Agricultural Market, the Steel Market and the enlargement of the Community to the south. Even in our own country, we can hear voices which seem to suggest that Europe signifies the Europe of the other countries for whom we are reluctant to pay our contributions—and not the place for our own German future. Viewed in the long term, a narrow-minded, book-keeper's outlook and national self-righteousness constitute the opposite of a forward-looking approach—the determination of political priorities and the sparing use of financial resources.

A NEW INITIATIVE

The following factors, in particular, indicate the need for a political European initiative at the present point of time: The objectives of the European Community such as were already set out in the Schuman Plan and in the European Defense Community (Franco-German reconciliation and the creation of a European federation as a matter of economic necessity) have played an increasingly smaller role in recent years due to the mounting economic and financial difficulties (and increasing national egotism). Political unification has not followed economic unification on an adequate scale. Even during the period of rapid progress in economic integration, it had become clear that this was not in itself going to develop automatically toward a greater political unification of Europe. This confirms one of the lessons of history: The German Customs Union in the 19th century did not automatically lead to political unification of the Reich, even though everyone had the same nationality.

Today, there is a leeway to be made up in Europe for political unification. The Community of the Ten does not have at its disposal, in its present nexus of supranational and intrastate components, a coherent and comprehensive set of instruments which enables it to meet in adequate manner the great challenges of our age—the maintenance of the equilibrium and of detente between East and West, the overcoming of the energy crisis and the strengthening of the world economy including free world trade, and the narrowing of the gap between North and South. In particular, the Ten lack the essential state and institutional prerequisites such as the "decision-making center," called for in the Tindemans Report, for the overall policy of the European Community and of European political cooperation and, in practical terms, the competence for a European foreign and security policy—without which the Europe of the Ten cannot have any capacity of its own to take political action.

THE UNIFICATION PROCESS

Such thought about the overriding political finality of the European unification process has become necessary, not least to secure, at national level, the future financial expenditure which will be required of some segments at least of the European population in order to settle the pending Community problems in the common, self-enlightened interest. In view of the magnitude of both the issues incumbent upon the Community and the challenges in foreign policy confronting the Ten, there is a need for political vision so as to make the indispensable European unification more attractive again. The citizens expect this of us.

The proposals for the gradual realization of a European Union, whose creation was called for by the heads of state and government of the EEC states in Paris in 1972, take into account the political developments and demands in European policy. These proposals proceed from the existing realities in the Community. The European Federation such as the founding fathers of the European Community aspired to is not yet feasible. The existing state of integration contains federal and confederal features. The position of member states vis-a-vis the Community has become stronger as the shift in political importance from the EEC Commission to the Council of Ministers emphasizes. In these circumstances, it would seem expedient to link federal and confederal elements together in a system such as that envisaged in the modified Fouchet Plan. The European Community, European political cooperation and the European Council will be cast in a new contractual form or joined together pursuant to a politically binding act with the Community continuing as the core of European integration and still developing while, at the same time, political collaboration is placed on a firm and binding fundament.

The initiative ought to rest primarily on the fundamental idea of achieving treaty form. The argument for the latter is its legally binding quality, which would provide the requisite foundations under international law for political cooperation and for the institution of the European Council. A political declaration—however much it may be emphasized—can only be binding to a limited degree, as the implementation of the CSCE Final Act indicates. Another argument in favor of assigning priority to contractual form is the most recent constitutional initiative undertaken by the European Parliament. Recourse should only be had to a formal political declaration on the part of the governments of member states when a treaty cannot gain acceptance in certain member countries due, perhaps, to parliamentary resistance. In view of the anticipated misgivings of some partner countries, the proposed treaty will not in itself establish the European Union, but it will establish the framework for a European Union to materialize through a continuous process. This basic treaty permits an evolutionary process moving toward the European Union and it upholds the prospects of future developments.

Serious consideration should be given to the creation of a Council for Security Questions and a Council for Cultural Cooperation. Thought might also be given to the Council of Foreign Ministers having jurisdiction for political cooperation in all its sectors. The Council of Foreign Ministers could also appoint sub-committees (at State-Secretary level) in order to deal with specific questions.

FURTHER GOALS

With this in mind, there should be a call for the explicit inclusion of these new sectors in the treaty or in the formal act. Further goals of the European Union which may be taken into account are: harmonization and standardization of the legislation in member states, and the coordinating of matters of internal security. In both fields, there has been cooperation between the Ministers of the Interior and of Justice since 1974/76 and this cooperation is of increasing importance.

The powers of the European Parliament must be given greater consideration and further developed. In advancement of the responsibilities granted to it by the Treaties of Rome, Parliament should be given supplementary powers including, in particular: the right to receive semi-annual reports from the President of the European Council; a report by the Council on the resolutions adopted by the European Parliament; the consulting of its President and officers prior to the appointment of a new President of the Commission; an investigative debate on the new Commission's program; an extension of the procedure for concerted action to cover all normative resolutions adopted by the Council and possessing special significance; ascertainment of the views of the European Parliament on treaties of accession, trade and association agreements.

The enhancing of the European Parliament's status envisaged by these measures accords with the active European policy pursued by the Federal Government. It is also intended to accommodate the pressure from the European Parliament clearly manifested by the adoption of a number of resolutions at its July session as well as the wishes of a number of member states. At any rate, the prospects for a European constitutional reform such as is being increasingly demanded by Parliament must be strengthened. The demand for a political union represents a proposition to our partners in the European Community. The Federal Republic of Germany in particular must play an active role in European unification. In the near future, the Federal Government will hold a special meeting to deal with questions of the European Union. The hour has come for Europe to take stock of the present situation. Its guiding motto can only be:

Create the European Union—now.●

## STATUE OF MARTIN LUTHER KING, JR.

### HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. GARCIA. Mr. Speaker, on September 15, the House passed House Concurrent Resolution 153 which authorizes a bust or statue of Dr. Martin Luther King, Jr., to be placed in a suitable location in the Capitol. The recognition is long overdue, and I cannot think of a more fitting person to honor in such a way. Dr. King was an outstanding American and will be the first black to be commemorated with a sculpture in the Capitol.

However, my satisfaction is tempered by my concern that a statue of Dr. King in the Capitol will be used as an excuse not to establish a national holiday honoring his memory. As you know, the Subcommittee on Census and Population, which I chair, twice brought to the floor legislation which would have established a national Federal holiday honoring Dr. King. Both times the bill was defeated.

Honoring Dr. King by placing a statue of him in the Capitol is necessary but not significant enough. Only a limited number of Americans, including black Americans, will ever know we have taken this step. Most citizens neither read the CONGRESSIONAL RECORD nor prowl the Halls of Congress examining statues. A more visible, more vibrant, more vital means of commemorating the life and death of Dr. King is still needed. A national holiday will meet this need because it will serve as a reminder every year that there lived, sacrificed, and suffered a noble black man of extraordinary vision who dreamed of the day when all children, regardless of the color of their skin, could grow up in peace and harmony together and share in the American dream.

I suggest that a day devoted to Dr. King's memory is a more substantial symbol, particularly during the difficult days ahead when the burden of massive budget reductions falls on the least advantaged in our society.

To insure that Congress does not evade its obligation in this regard, I intend to continue to press for passage of the holiday bill.

I urge all of my worthy colleagues who supported placement of a statue of Dr. King in the Capitol to take the next step with me, and with other colleagues who have steadfastly sought the same end, to establish a national holiday as a living memorial to the ideals for which Dr. King gave his life.●

## POSTPONEMENT OF EFFECTIVE DATE OF REVENUE RULING 81-216

### HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. GUARINI. Mr. Speaker, today I join my colleagues, Mr. NOWAK, Mr. MCDADE, and Mr. MOAKLEY, in introducing legislation to postpone the effective date of revenue ruling 81-216 until January 1, 1983. Similar legislation was introduced by Senators WEICKER, DURENBERGER, and STEVENS on September 17.

Revenue Ruling 81-216, effective August 24, 1981, holds that industrial revenue bonds issued in multiples of $1,000,000 may not qualify as exempt small issues under section 103 of the Internal Revenue Code.

A number of States in recent years have established agencies which issue these industrial development bonds on which the interest is tax exempt in order to provide below market rate loans to small business owners and small farmers who have been hard pressed by inflation.

The following States currently issue bonds for business purposes: Alaska, Connecticut, Delaware, Illinois, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, and Vermont.

In addition, Alabama, Arkansas, Colorado, Georgia, Illinois, Indiana, Missouri, Nebraska, North Dakota, Oklahoma, and West Virginia presently issue bonds for agricultural purposes. Legislation to permit bonds to be issued for agricultural purposes is pending in Kentucky and Michigan.

Revenue Ruling 81-216 reverses an Internal Revenue Service position of many years standing and does so without notice or opportunity for public comment. This sudden action on the part of Treasury comes at a most inopportune time. Interest rates are at an all time high for small business and farmers and Federal programs for these groups are being severely curtailed. To cite a specific example, the fiscal year 1982 budget slashes Small Business Administration credit assistance program by 25 percent.

The revenue ruling is particularly troublesome in that it forecloses the ability of States to meet the needs of small business and farmers for affordable capital at a time when it is crucial to their survival and to the economic stability of the communities in which they are located. For example, the New Jersey Economic Development Authority has on its drawing board plans to provide low-interest loans to businesses with less than $500,000 in annual sales and which are located in distressed areas. Under ordinary circumstances, these small businesses would find it difficult to obtain the capital needed to continue operation. Prolonged inflation and economic uncertainty have left many small businesses literally on the brink and this revenue ruling has precluded the New Jersey EDA from acting on their behalf.

The effective date of Revenue Ruling 81-216 should be postponed until Congress has had the opportunity to fully investigate the consequences of its implementation.●

## CIVIL RIGHTS GIANT DIES—ROY WILKINS

### HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. HORTON. Mr. Speaker, a man whose work and name have been synonymous with the organization he headed for so many years died earlier this month. For the many thousands of Americans who knew him personally, had the opportunity to work with him as I did on a number of occasions, or to the millions who recognized his outstanding achievements, his death constitutes an irreplaceable loss to us all.

The accomplishments which were wrought principally as a result of Roy Wilkins labor are legendary: The Brown against Board of Education decision in the U.S. Supreme Court in 1954, the 1964 Civil Rights Act, the March on Washington, 1963 and others. To each he brought his considerable talent, compassion, hard work and dedication all for one common goal: civil and human rights.

For more than 22 years, Roy Wilkins served as executive director of the National Association for the Advancement of Colored People. In that capacity, he not only registered the successes already mentioned, but he stood as an example to all Americans of what is right, honorable, and good in this country. His quest for equality and justice for all constitutes a lasting contribution to this country and to those of us who supported his cause.●

## A TRIBUTE TO MARILYN GLICK

### HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. LEWIS. Mr. Speaker, I want to take this opportunity to commend to the House of Representatives one of my dearest friends and associates, a truly outstanding individual, Marilyn Glick. Marilyn is a shining reflection of an ever-changing society afforded by the fantastic American dream.

A long-time resident of San Bernardino, Calif., Marilyn has tirelessly devoted many volunteer hours to the betterment of her community. The mother of two beautiful daughters, she has been a PTA officer and a Girl Scout leader. Her deep concern for the well-being and education of children has led her to role of developer and coordinator of a successful elementary school program for the gifted. An active member of the Inland Area American Red Cross and Inland Adolescent Clinic Board, Marilyn has further demonstrated her concern for the people of her community.

In addition to superbly balancing a busy life as wife, mother, and civic leader, Marilyn followed her dreams and pursued a college education. While attending classes, she remained employed full time. She graduated this year from Cal State San Bernardino with honors in social studies and public administration. For her excellent academic achievement she was elected to Phi Kappa Phi Honor Society. She also holds honorary membership in the prestigious American Society for Public Administrators.

During her illustrious undergraduate years, Marilyn served as an intern in the California State Assembly. It was in this capacity that I learned of her genuine caring attitude. Fully realizing that her special qualities would well serve the 37th Congressional District, I asked Marilyn to join my staff. She brought to her job the same enthusiasm, generosity, and kindness that she has given to family, friends, and community.

Marilyn Glick is the embodiment and reaffirmation of a democratic society, a society that allows change and opportunity for those individuals willing to take advantage of its bounties. Mr. Speaker, it is truly an honor and a pleasure to recognize Marilyn Glick today and to commend her to the House of Representatives.●

## WOMEN'S EQUALITY DAY IN LOS ANGELES

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HAWKINS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following: As the deadline for equal rights amendment ratification approaches, it is increasingly important to galvanize the public in support for this vitally necessary and long overdue amendment. Simple equality is what the ERA is all about and was the focus of the August 22 celebration of Women's Equality Day. I have included a description of the activities sponsored by the Los Angeles Chapter of the National Organization for Women in observance of this important day.

In Los Angeles, on August 22, 1981, in observance of Women's Equality Day and as a demonstration of support for ratification of the equal rights amendment, some 10,000 people participated in a parade on the Avenue of the Stars in Century City, a fund-raising walk that brought in pledges totaling $325,000, an Equality Fair and a rally that attracted a galaxy of prominent public figures from government and the entertainment industry. Delegations from more than 100 organizations in Los Angeles participated in the parade.

The events of the day were organized and sponsored by the Los Angeles Chapter of the National Organization for Women (NOW) as part of a nationwide observance of the 61st anniversary of the ratification of the 19th amendment giving women the right to vote and as a mobilization for the campaign for ratification of the equal rights amendment. Similar events in some 150 cities across the country organized by the National Organization for Women raised nearly a million dollars for the ERA campaign and involved thousands upon thousands of people.

Toni Carabillo, president of the Los Angeles Chapter of NOW, who has been working for ratification of the ERA for 15 years, described the significance of the day as follows:

THE LAST ERA WALK

(By Toni Carabillo, president, Los Angeles Chapter of NOW)

Sixty-one years ago on August 26, 1920, 26 million people won the right to vote with the certification of the Nineteenth Amendment to the U.S. Constitution. It was a right previously denied them even though they were legally citizens of the United States because they were women.

The victory marked the end of a 72-year long struggle by three generations of American women. Two who led that effort in the final decades—Carrie Chapman, Catt and Nettie Rogers Schuler—summed up its cost:

"Hundreds of women gave the accumulated possibilities of an entire lifetime, thousands gave years of their lives, hundreds of thousands gave constant interest and such aid as they could. It was a continuous seemingly endless, chain of activity. Young suffragists who helped forge the last links of that chain were not born when it began. Old suffragists who forged the first links were dead when it ended . . .

"It is doubtful if any man, even among suffrage men, ever realized what the suffrage struggle came to mean to women before the end was allowed in America. How much of time and patience, how much work, energy and aspiration, how much faith, how much hope, how much despair went into it. It leaves its mark on one, such a struggle. It fills the days and it rides the nights. Working, eating, drinking, sleeping, it is there. Not all women in all the States of the Union were in the struggle. There were some women in every State who knew nothing about it. But most women in all the States were at least on the periphery of its effort and interest when they were not in the heart of it. To them all its success became a monumental thing."

Only three years later, in 1923, a new struggle began with the introduction into the 68th Congress of the Equal Rights Amendment by Senator Charles Curtis and Representative Daniel Anthony (nephew of suffragist leader Susan B. Anthony), both Republicans from Kansas.

Alice Paul, the militant suffragist leader of the National Woman's Party, which had played a crucial role in winning ratification of the 19th Amendment, had recognized even before that victory, that the right to vote alone would not guarantee to women the equal protection of the law. The Equal Rights Amendment was her concept and she

fought for its passage until her death on July 9, 1977 at the age of 92.

She died knowing a new generation of women and men were committed to the cause and the struggle for ratification would go on.

Like the struggle to win the right to vote, the struggle to win ratification of the Equal Rights Amendment now "fills the days" and rides the nights. Working, eating, drinking, sleeping, it is there. Like the struggle for the right to vote, it consumes time and patience, work that seems endless, energy and aspiration, faith, hope and, yes, sometimes, despair. No one has yet catalogued the miracles performed in its behalf by individuals who never dreamed they had the capacity to bring them about until they tried because they cared so much.

And again, as in the struggle for the right to vote, it is doubtful if any man, even among the dedicated men working daily for its ratification, realize what the struggle for the Equal Rights Amendment has come to mean to the women fighting for it. It is again "a monumental thing."

On this Women's Equality Day, 35 states have ratified. Three more are needed to make the Equal Rights Amendment part of the U.S. Constitution, and only 310 days remain before the deadline for ratification on June 30, 1982. Carrier Chapman Catt, who led the suffragist struggle once said, "When a just cause reaches its floodtide—whatever stands in its way must fall before its overwhelming power."

The campaign for ratification of the Equal Rights Amendment is now at floodtide.●

## STEEL CAUCUS FINANCIAL REPORT

### HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Ms. MIKULSKI. Mr. Speaker, in accordance with Executive Committee Order No. 1, I am respectfully submitting herewith the quarterly financial report of the Congressional Steel Caucus for insertion in the RECORD. The report is as follows:

*Quarterly report, fund balance statement, U.S. House of Representatives, Congressional Steel Caucus*

| | |
|---|---|
| Balance forward (as of Apr. 1, 1981) | $16,127.25 |
| Total revenues (clerk hire, dues and donations) | 12,454.63 |
| Total | 28,581.88 |
| Less expenses: | |
| April 1981 | 3,713.68 |
| May 1981 | 3,881.44 |
| June 1981 | 10,519.54 |
| Remainder | 10,467.22 |
| Plus interest deposit | 43.73 |
| Balance as of June 30, 1981 | 10,510.95 |

*Quarterly report, cumulative statement of expenses, U.S. House of Representatives, Congressional Steel Caucus*

| | |
|---|---|
| Salaries | $21,070.21 |
| Postage | 141.92 |
| Stationery (Donations, Mr. Bevill) | 228.53 |
| Telephone | 271.23 |
| Publications | 149.75 |
| Equipment | 888.60 |
| Printing | 471.10 |
| Miscellaneous | 6,787.40 |
| Total through June 30, 1981 | 30,008.74 |

CONGRESSIONAL STEEL CAUCUS DUES PAID AS OF SEPTEMBER 21, 1981

Jospeh Addabbo, Douglas Applegate, Eugene Atkinson, Don Bailey, Adam Benjamin, Tom Bevill, William Brodhead, Clarence Brown, George Brown, Don Clausen, William Clinger.

Cardiss Collins, John Conyers, Lawrence Coughlin, William J. Coyne, Dan Daniel, Robert Davis, Edward Derwinski, John Dingell, Dennis E. Eckhart, Allen Ertel, David Evans.

John G. Fary, Vic Fazio, William Ford, Joseph Gaydos, Sam Gejdenson, Benjamin Gilman, Sam B. Hall, Jr., James V. Hansen, John Hiler, Elwood Hillis, Ron Wyden.

Ken Holland, Thomas Kindness, Ray Kogovsek, Tom Lantos, John LeBoutillier, James K. Coyne, Gary Lee, Jerry Lewis, Clarence Long, Thomas Luken, Stanley Lundine.

Robert McClory, Joseph McDade, Bob McEwen, Marc Marks, Dan Marriott, James Martin, Robert Michel, Clarence Miller, George Miller, Barbara Mikulski, Donald Mitchell.

Robert Mollohan, Ronald Mottl, Austin Murphy, John Murtha, John Napier, James Nelligan, Bill Nichols, Henry Nowak, Mary Rose Oakar, James Oberstar, Joe Smith.

George O'Brien, Thomas P. O'Neill, Donald Pease, Carl Perkins, Melvin Price, Carl Pursell, Nick Joe Rahall, Ralph Regula, Don Ritter, Robert Roe, Marty Russo.

Gus Savage, James Scheuer, Richard Schulze, John Seiberling, Richard Shelby, Bud Shuster, Paul Simon, Albert Lee Smith, J. William Stanton, David M. Staton, Louis Stokes.

Gene Taylor, Bruce Vento, Doug Walgren, Robert Walker, Richard White, Lyle Williams, Charles Wilson, Gus Yatron, Clement Zablocki, Leo Zeferetti.●

## DISTINGUISHED JURIST-JUDGE SHIGERU ODA DELIVERS MAJOR LECTURE ON LAW OF THE SEA

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BIAGGI. Mr. Speaker, on September 1, it was my distinct pleasure and privilege to attend the seventh annual Walter M. Jeffords, Jr., lecture series at my alma mater—New York Law School. The seventh distinguished Walter M. Jeffords lecturer was the world renowned Judge Shigeru Oda of the International Court of Justice.

The title of the judge's lecture was "Sharing of Ocean Resources—Unsolved Issues in the Law of the Sea." Judge Oda is widely recognized as one of the most influential scholars in the law of the sea. As a public servant, a lawyer, an author, and since 1976 as a judge in the International Court of Justice, Shigeru Oda has long advocated the importance of sharing ocean resources. I agree with him on the need to establish this as a fundamental goal of the law of the sea and I commend Judge Oda's address to my colleagues.

Mr. Dean and distinguished members of the Faculty of the New York Law School: Your School has just done me great honour by conferring upon me an honorary degree, for which I am very grateful. That I have sufficient merit to be awarded this distinction is due in no small measure to the legal education which I received in this country. If I may be allowed to mention only one name, it must be that of Professor Myers S. McDougal of your Faculty. If I had not met Professor McDougal, and pursued my studies under his guidance in New Haven between 1950 and 1953, my life would have moved in a different direction and I would not now be where I am today.

Mr. Dean and distinguished faculty members, ladies and gentlemen: It is already thirty years since I studied international law in this country. In these thirty years a great deal of my work on international law has been devoted to the Law of the Sea, and my interest has centered on the problem of the sharing of marine resources. Professor McDougal will probably agree that he and I were among the few who predicted, as far back as the early 1950's, the future conflicts and confusions among national interests involved in the sharing of ocean resources, and I would like to take this opportunity to discuss how the question of ocean resources has been dealt with under international law. My remarks will thus constitute for me, in part, a reminiscence of my work of the past thirty years, yet I think I shall also be able to pinpoint some of the problems which face us today as regards the question of the ocean, and will also face us tomorrow.

As a preliminary observation, I must recall how the ocean became the object of the interest of the people of the world and has been made subject to regulations of international law.

First, for centuries past the ocean has been used universally as a common concourse for maritime traffic. Such use of the ocean, being in the interest of all nations, with no one nation assailing the interests of others by claiming its exclusive use, has led to the creation of advanced regulations for the promotion and safe control of traffic. Subject only to such regulations of a technical nature, the freedom of maritime traffic has continued to remain the most well-established rule of international law to be followed by nations. Since this freedom is in the common interest of all nations and innocent passage is guaranteed in the narrowly-limited territorial seas around the coasts, the traditional dualism of the high seas and the territorial seas in international law does not have a great impact on such use of the ocean.

The second aspect of the ocean relates to national security. The ocean has been a common battleground for naval vessels of the sovereign nations, and freedom for the manoeuvre of naval fleets has undoubtedly been secure. In fact, only a handful of the great powers remain consistently alert to this aspect, and the United States in particular was strongly concerned with it in the first and second Conferences on the Law of the Sea in 1958 and 1960, when it tried by every means to keep the territorial seas as narrow as possible in order to ensure that the free manoeuvre of its naval fleet would not be hindered by the closure of any straits of strategic importance, hit upon a uniform limit for the narrower territorial seas. Real-

izing that the main interest of the developing countries lay in the resource aspect of the ocean, and that, if the pressure of a group of developing countries was kept up, the acceptance of a 12-mile territorial sea could not be avoided, the United States tried to lure the group into admitting its narrowly-limited territorial seas policy, even offering some substantial interest in the use of ocean resources in the offshore areas for the benefit of the developing countries. Thus, early in 1970, the Nixon administration announced the belief of the United States Government that the time was ripe for the conclusion of a new international treaty fixing the territorial sea at 12 miles, provided that freedom of transit through international straits, and carefully-defined preferential fishing rights for coastal States, were also recognized. The aim of securing the free maneuver of naval fleets seems to have been achieved after somewhat lengthy negotiations in UNCLOS III, as the concept of transit passage of warships through international straits has now been recognized in Part III of the Draft Convention prepared last year, some articles of which are specifically devoted to "Straits used for international navigation".

The third aspect of the ocean, which relates to the exploitation of marine resources, seems to be one of the greatest problems still remaining insufficiently discussed in UNCLOS III. Thus I would like today to take up this question of the Law of the Sea as seen from the resource aspect.

First of all, we must bear in mind the fact that interests in the development of resources in general are bound to bring about frequent conflicts, so long as the world community consists of co-existing sovereign nations. On the one hand, the resources of the land covering nearly one-third of the globe are divided among nations by land frontiers which were drawn for various historical and political reasons. The global land resources have never been evenly allocated among the sovereign nations; some States are in advantageous positions, while others are not. Yet these unevenly distributed land resources of the sovereign nations, which have often been the cause of war in the past, are not made the object of re-distribution today. While in past colonial ages land resources in Asia and Africa were often grabbed by colonial powers, the new concept of permanent sovereignty over natural resources, as proclaimed in the United Nations General Assembly resolution of 1962, can now save these resources from exploitation by foreign powers and preserve them for the benefit of each sovereign nation. In the field of international law today, the exclusive control of land resources by each nation is no longer challenged, and no one doubts that access to the land and to its resources is exclusively reserved to each sovereign nation and retained in its hands.

In contrast, the resources of the ocean which cover two-thirds of the globe were long considered as common to all. Few ever doubted that the traditional concept of freedom of the high seas would also apply to the exploitation of ocean resources. Yet the fact was that, with respect to ocean resources, the mutually conflicting and excluding interests of nations had not yet come to light before the Second World War. The ocean was not then considered from the aspect of its resources, except perhaps in some narrowly-confined offshore areas, as the science and technology of such utilization, as well as the demand for ocean resources, had not yet reached the stage where any international regulations for this purpose were necessary. If there were any legal implications relating to the exploitation of ocean resources, the extent of the territorial sea was regarded as the sole issue, since this was deemed to coincide with the outer limit of the exclusive use of the coastal nation's sea resources, while the resources of the vast ocean, being infinite and renewable, could be utilized by any nation without detriment to the interests of others. There was, at least in the period prior to the Second World War, no incentive to prevent free access to ocean resources. Thus the freedom of the seas in this respect, as simply an abstract concept, remained unchallenged, and the concept of free access remained a principle in this field, with no one opposing the idea that those who wanted, and were able, to exploit the marine resources were free to do so.

In the post-war period, the development of international law relating to ocean resources has marked something of a revolution in the whole history of international law. Some parts of the ocean which had been considered, if theoretically and in abstracto, as free for all, now stand under the regime of the exclusive control of each coastal State. The concepts of the continental shelf and the exclusive economic zone, which were not known at all under traditional international law, are now being introduced.

Now let me begin with the concept of the continental shelf. It was only after the second World War that the possibility of profitably working the petroleum resources of the offshore continental shelf became the subject of the attention of some nations. In 1945 the United States claimed the submarine areas off its coasts, thus excluding access by other nations to offshore deposits of petroleum. Many other coastal States then followed suit, undoubtedly because, in so doing, they had much to gain and nothing to lose. There was almost no resistance from any corner of the world to countries monopolizing offshore seabed petroleum in the name of the continental shelf. In those days, foreign interests saw no loss to themselves whatever involved in a country's working the petroleum resources of its own offshore areas, since the exploitation of seabed petroleum in the offshore areas of other countries was hardly considered possible without the co-operation of those other coastal nations. In other words, the exclusive use of the seabed's mineral resources based on the geographically-privileged position of a nation was not considered to be detrimental to the interests of other nations.

Thus, in 1958, the Continental Shelf Convention, concerned with the distribution of seabed petroleum resources only among the respective beneficial coastal nations, was adopted without difficulty. At that time there was no possibility of exploiting the mineral resources of the seabed beyond the continental shelf, which was widely understood as not extending beyond the 200-metre isobath. The problem was not one of law, but rather one of geography or geology, which would not necessarily cause any conflict of national interests. If there were any conflicts, these would result mainly from the determination of the boundary of the continental shelf which each nation could claim.

However, this calm situation was broken in the mid-1960s after only two decades, when the United States oil industry began to find it technically possible even to extract resources from under one or two thousand metres' depth of water, on the continental slope. The exclusive claims of coastal nations to the continental slope far beyond the general concept of the 200-metre depthline as the limit of the continental shelf would still have been permissible in terms of the exploitability criterion in the Continental Shelf Convention. Yet there was another interest in the United States, represented by the hard minerals industry, which had begun to set its sights on the exploitation of manganese nodules at the bottom of the vast ocean. It would be contrary to their interest to see an extension of the exclusive areas reserved for the coastal nations, thus diminishing the areas which would otherwise have been open to them.

In 1967, noting these conflicting interests between the oil industry and the hard minerals industry, the Maltese delegate to the United Nations took a step towards halting the gradual extension of coastal jurisdiction for mineral resources, thus reserving the vast deep-ocean floor for the benefit of the world in terms of the common heritage of mankind. As was only natural, the concept of the common heritage of mankind received wide support from a group of developing countries which could dream of some benefits deriving from such a concept through the avoidance of competition with the powerful developed nations in the exploitation of the seabed, which was still far beyond their own technical capability.

The conflict between the claim to a wider area for the exclusive use of mineral resources for each coastal nation, and the demand to retain as much of the vast ocean areas as possible for the benefit of the whole world, seems to have only just been resolved by a compromise agreement reached after the past ten years of debate in the United Nations Seabed Committee and UNCLOS III. The Draft Convention on the Law of the Sea which was prepared just one year ago provides for the redefinition of the continental shelf. Quite differently from that of the 1958 Convention, and also from the geographical concept, the definition now suggested, containing more than 500 words, is not easy to grasp at first glance. At any rate, however, it is safe to say that practically all exploitation of offshore petroleum extending to the outer edge of the continental margin will fall under the exclusive control of each coastal nation.

Now let me turn to the exclusive economic zone. The history of ocean fishing is more complicated than the case of the exploitation of seabed mineral resources. The difference lies in the fact that the principle of free access was believed to have exited more strongly in ocean fishing. A claim to the extension of the coastal nations' fishery jurisdiction, which would be a blow to the then-established laissez-faire policy in ocean fishing, would invite the opposition of those nations which would otherwise have enjoyed the freedom of fishing in such claimed offshore areas, since the limit of the territorial seas had been regarded as coincident with the exclusive fishing interest of the coastal States.

In this field also the role played by the United States in the post-war period was not insignificant, and in the United States itself there were two opposing fishery interests, one represented by the coastal fishing industry, particularly on the North Pacific coast, and the other by the highly migratory tuna industry. In the post-war period the United States fishing industry on the North Pacific coast began to realize that the three-

mile territorial sea guaranteeing its exclusive interest would probably not be sufficient to secure its profits in offshore fishing, owing to the increasing competitive potential of the Japanese fishing industry. Such a specific interest off the Pacific coast could have been satisfied through bilateral negotiations with Japan, which could have agreed to abstain from such fishing. Yet the 1945 Proclamation of the United States President concerning offshore fisheries took a step towards expansion of fishery jurisdiction. Then it was not difficult for any developing country, particularly in Latin America, to understand that it would benefit simply by extending its area of coastal jurisdiction, thus monopolizing the fishery income deriving therefrom or profiting by the revenues of taxation imposed on foreign fishing there. Such an expansion policy could not however constitute an overall national policy for the United States which, as an advanced fishing nation, did not want to see the ocean diminished to the detriment of its interest in free fishing.

At the First and Second Conferences on the Law of the Sea in 1958 and 1960, respectively, the problem of the limit of the territorial sea was discussed in connection with the problem of the fishery zone. Against the movement towards expansion of fishery jurisdiction, the United States expressed its readiness to recognize the wider claim to fishery jurisdiction only on condition that the limit of the territorial sea be maintained as narrow as possible. The reason for this was quite clear and, as I said at the outset, it was categorically imperative for the United States to maintain the unhindered passage of warships through narrow international straits, even at the sacrifice of any other interests, particularly in fishing. In fact, the nations which wanted to keep the jurisdiction of each coastal State as narrow as possible from the fishery resource aspect, so as to keep open as wide an area as possible for free fishing, were only a handful of the nearly-100 participating countries in the conferences of 1958 and 1960. The views of the nations favouring wider fishery jurisdiction were powerful, because the principle of laissez-faire, or free access, which would apply to fishing beyond coastal jurisdiction, could benefit only those who were strong enough to rely upon this principle. Even though in the conferences of 1958 and 1960 extension of coastal fishery jurisdiction as such was not accepted, no one could doubt that the trend the world was turning towards at that time could be deviated no longer.

Being aware of this trend, the United States knew in the late 1960s and early 1970s that it could not but give support to the claims to wider fishery jurisdiction in order to secure the unhindered passage of warships through international straits. At the United Nations Seabed Committee, the concept of the exclusive fishery zone and that of the patrimonial sea were introduced respectively by Kenya in 1972 and by Mexico and a few other Caribbean countries in 1973. No one could divert this trend towards expansion of the exclusive interest of the coastal States aimed at enjoyment of the fishing resources in offshore areas. The only possibility was to attempt to mitigate the exclusiveness claimed by the coastal States by imposing some restrictions on their competence.

Thus Part V of the Draft Convention on the Law of the Sea of 1980, comprising 21 articles, provides for a new regime of the exclusive economic zone. Certainly the exclusive economic zone as defined in the Draft Convention is different from a simple expansion of the territorial sea, in that some restrictions are imposed on the competence of the coastal States, and there are still many ambiguities left in this concept. Yet nobody today may doubt that fishing in the exclusive ecomonic zone falls within the exclusive interest of the coastal States. Whatever the outcome of UNCLOS III in the years to come, there does not remain any doubt that the concept of the exclusive economic zone has its firm position in customary international law.

What I have been talking about concerning the continental shelf and the exclusive economic zone may be summarized as follows. In the offshore areas now, which, just like the land areas, cover approximately one-third of the globe, exclusive control of resources has been established through UNCLOS III in favour of the geographically-privileged nations, in terms of the redefined continental shelf for mineral resources and the exclusive economic zone for fishery resources. Such development in the past three-and-a-half decades has completely changed the meaning of the ocean as interpreted under traditional international law. And I have no doubt that the concept of permanent sovereignty over natural resources, which has already been established for land resources, will eventually apply to those marine resources which fall under the exclusive control of each coastal State.

There still remains another half of the ocean, covering one-third of the globe, which is not placed within the exclusive control of each coastal nation. The problem which faces us now and in the future relates to how the marine resources in this remaining half of the ocean should be treated under international law. These resources are mineral resources beyond the outer limit of the continental shelf, and fishery resources beyond the exclusive economic zone.

With regard to the mineral resources in the seabed of the vast ocean beyond the limit of the continental shelf, the concept of the common heritage of mankind is now being suggested. Taking an initiative in this direction, for the first time at the United Nations General Assembly, the delegate of Malta, in 1967, considered that the time had come to declare this area to be the common heritage of mankind and proposed that immediate steps should be taken to draft a treaty for such a purpose. After three years of deliberations at the United Nations Seabed Committee, in 1970 the United Nations General Assembly declared that this area and the resources of the area were the common heritage of mankind, and that all activities regarding the exploitation of these resources should be governed by an international regime to be established.

The deliberations and negotiations continued for ten years, and UNCLOS III has now produced a set of very detailed provisions on this question in the Draft Convention on the Law of the Sea prepared last year. 59 articles in Part XI concerning this area, 20 articles in Annex 3 on Basic Conditions of Prospecting, Exploration and Exploitation and 13 articles in Annex 4 on Statute of the Enterprise are devoted to the exploitation of this area and its mineral resources, which are defined as the common heritage of mankind.

Yet for the past few years UNCLOS III has run onto the rocks, the main problems still remaining to be solved at future sessions being the composition of the Council of the Seabed Authority, which is to have decisive competence in the exploitation of this area, and the participation of private exterprise in paralled with direct exploitation by international enterprises. It is reported that the United States blocked UNCLOS III early this year, mainly because the Reagan administration was not yet in a position to determine its own policy towards this particular problem, reflecting the dissatisfaction felt by the hard-mineral industries of the United States, with the ways and means of exploitation suggested in the Draft Convention.

Now I will turn to ocean fishing. Here the concept of the common heritage of mankind has not been suggested in any formal forum of the United Nations, as it has traditionally been considered that the freedom of fishing has existed here. But I submit that the fact is that the real and difficult problems of fishing have not been touched upon in past discussions at UNCLOS III and are now left for future discussions.

Suggestions were often made at the early stages of UNCLOS III to drop fishing from the list of the freedoms of the high seas. The Draft Convention on the Law of the Sea last year did mention as one of the six freedoms of the high seas that of fishing, but subject to certain conditions concerning management and conservation of the living resources of the high seas. It suggests the co-operation of States in the management and conservation of living resources, but without mentioning any concrete substance of management. I submit that the drafting of the provisions concerning high seas fisheries is very imprecise: the duty for co-operation seems rather abstract and there is no provision referring to how international co-operation in the management and conservation of high seas fishery resources can be carried out in a concrete way. Considering this problem of the management and conservation of high seas fisheries, it will perhaps be as well to reflect for a moment on the history of high seas fishing during the past decades.

In the post-war period, the necessity of joint conservation measures had come to be widely recognized for certain species of living resources, and this has never been contested by any nation. However, the principle of free competition among States obtains only where demands upon resources do not overwhelmingly exceed the amount of allowable catch, and conservation measures take the form of restrictions on permissible fishing gear, fishing seasons, or fishing areas. If a fundamental change in circumstances should occur, each State will undoubtedly be inclined to minimize its own sacrfice and to maximize its own share of resources quite independently of any reasoning in favour of preferential distribution of resources.

This problem may best be illustrated by a simple example. If the total possible catch of a certain species is 150, and prudent conservation practice demands that the total allowable catch be only 100, the burden of abstaining from harvesting the additional 50 will have to be imposed in some way upon the States concerned in exploiting the available 100. Each State may, of course, freely compete in fishing within the total allowable catch of 100. Free competition, however, does not satisfy States which so substantially pre-empt the fisheries concerned that fishing by any newcomer will necessarily decrease their own catch, nor will it be acceptable to nations with less advanced technologies and economies.

In such cases, conflict will inevitably occur between two parties who might otherwise agree upon the desirability of conservation of marine living resources. One will adhere to traditional arguments of free competition in fishing on the high seas, especially since its own technology and economy can bring to it a larger share of resources, while the other, seeking to assure itself of a constant, preferably large, share of the resources, might invoke all kinds of reasoning in an attempt to keep its competitors from exploiting the areas it considers most important. The problems inherent in the allocation of limitations have in fact made it difficult to reconcile conflicting national interests even among those States which are most vitally concerned with the conservation of resources.

The case of Antarctic whaling may offer an interesting example of the allocation of marine living resources among the various States. Antarctic whaling had been open to those countries which, under the 1946 Whaling Convention, were able to compete freely for their maximum share within the total limit set by the International Whaling Commission. Several countries, all of which were advanced nations, were engaged in Antarctic whaling in expeditions known as the "whaling olympic". These activities had been generally regarded as typical of exploitation respecting conservation requirements on an international level. However, towards the end of the 1960s it had become increasingly difficult to maintain a system of free competition. The allocation of quotas among the States concerned, based simply on the result of negotiations each year, has become the practice in Antarctic whaling, replacing the "whaling olympic".

The decline of the laissez-faire policy which had been maintained in ocean fishing, even potentially, during past centuries, coincides with the growing concept of the common heritage of mankind suggested for the mineral resources of the deep ocean floor. Certainly in the case of ocean fishing, the problems are different from those encountered in seabed development, as some nations may claim that they already possess certain fishing rights in the vast ocean, acquired on the basis of longstanding fishing operations. Yet these advanced nations are very limited in number. I think that discussions will eventually be held on the new concept of the common heritage of mankind applicable to ocean fishing similar to those discussions centred on seabed mineral resources in UNCLOS III.

I cannot conclude my talk without referring very briefly to a further difficult problem of the future Law of the Sea which represents another aspect of the development of ocean resources. That is the issue of protection of the marine environment. With regard to marine pollution, the Law of the Sea, like environmental issues in general, is facing the basic problem of "development versus protection of the environment". One of my friends said at UNCLOS III: "Poor pollution, no one is in your favour". There are always pros and cons to the various topics at UNCLOS III, but certainly no one has ever been in favour of marine pollution. If disposal of waste or discharge of pollutants into the sea were to be completely prohibited, the problem would then be much simpler—at least, for those unconcerned with land pollution. However, the disposal of some waste and discharge of some pollutants as a result of economic development are unavoidable. In fact, the sea becomes ever more attractive to any nation or to any industry for this purpose. If we were to completely prohibit this activity, we would have to run down a great deal of industrial and social progress, and the cost would be extremely high. The shipping industry, too, would labour under an immense and costly handicap.

Thus, although no one ever doubts the necessity of environmental protection of the ocean, stringent environmental control could raise opposition from industry. A balance must be struck between the two opposite policies, namely the encouragement of economic development and the protection of the marine environment. In addition, a further consideration is how to spread the burden between the different nations: the burden of sacrificing economic development for the protection of the marine environment. We find ourselves confronted by maximum levels of pollution, and the concomitant necessity that we consider how to parcel out restrictions on industry to prevent further pollution. Aside from the question of whether the parcelling should be done by industry or by nation, it is noteworthy that among the developing nations there are those for whom "development" takes precedence over "environment". While saddling the developed countries with the burden of preventing marine pollution, they expect to continue developing as they see fit, free from all restrictions. Some years ago I predicted that the concept of the common heritage of mankind would also be introduced in this respect, and said that this might become one of the topics to be discussed at any future conference on the Law of the Sea. Here again the Law of the Sea may eventually face problems related to how to allocate sacrifices imposed in environmental protection as each nation, in its relationship with other countries, tries to minimize the burden on its industry necessitated by pollution control, even while recognizing the existence of overall limits.

I now come to the conclusion. Or, rather, I now come to the point where I must pose questions. On the one hand, the question of exclusive use being reserved to each coastal nation has now become defined in terms of either the concept of the redefined continental shelf or that of the exclusive economic zone. On the other hand, in the areas beyond, the concept of the common heritage of mankind has been introduced for the exploitation of their mineral resources, and, in future, almost without doubt, this concept will apply also to fishery resources or even to protection of the marine environment. What really faces us today is, first, how to distribute and allocate the limited amount of ocean resources, mineral or living, among the sovereign nations, each of which will naturally try to maximize its own share; and, secondly, how to distribute and allocate among the sovereign nations the sacrifices—and again each nation will naturally try to minimize its own sacrifice—involved in protection of the marine environment necessitated by economic development.

Does simply suggesting the concept of the common heritage of mankind provide us with any solution? What does the phrase "common heritage of mankind" really mean? What is the substance behind this expression? I am not in a position to comment on the legal implications the 1970 United Nations General Assembly resolution might have. The declaration does not necessarily specify by whom and how the deep ocean floor could be developed, nor by whom and how the benefits would be shared. The substance of the "the common heritage of mankind" involves various interpretations. The idea of liberty as distinct from license has always implied certain checks and balances. However, if this idea of freedom is to be denied and replaced by some new idea of justice, then new principles must be worked out. The mere words "common heritage of mankind" are pious but empty. Simply to formulate some machinery is also useless. As the issues discussed at UNCLOS III are related to the areas which are considered those of the common heritage of mankind, the interests of land-resource-possessing and non-possessing countries are so conflicting as to raise the spectre of bloody confrontations.

What kind of idea in principle can we obtain if we are to put substance into the conceptual expression "common heritage of mankind"? If we consider the complexities of national interests that are still strongly projected onto the common heritage, then it can be said that international society has not yet developed to such a high level of responsibility or harmony that we can talk with common understanding of the "common heritage of mankind". People today appear to be satisfied with the mere somewhat beautiful-sounding words. As I stated at the outset, land resources are unevenly divided among the sovereign nations, developed or developing, and offshore resources are reserved only for the benefit of the geographically-privileged coastal nations. Considering this, the problem of how to implement the concept of the common heritage of mankind with regard to sharing the benefits of the vast ocean resources, and sharing the sacrifices or burdens of economic development for the protection of the vast ocean, must be seen as a dominant problem which it is urgent to face and solve.

I thus have not given any solution, or even a hint of any solution, to these difficult problems of resource-sharing and burden-sharing. I intend only to suggest that we should go beyond a simply playing with the beautiful catch-phrase, "common heritage of mankind". To do so will require the close examination of not only international lawyers, but also economists, political scientists, and even philosophers, who are concerned with the future fate of the world community. That examination will be necessary, moreover, not for the sole sake of the Law of the Sea, but in order to put real backbone into the New International Economic Order, that concept which is now gaining ground in every corner of the world, and which likewise must not be allowed to remain a mere shibboleth.

Mr. Dean, distinguished members of the Faculty, ladies and gentleman, allow me once more to thank you sincerely for the honour you have done me and for lending me your kind attention.●

## CLEAN AIR—CONTINUED COMMITMENT CRITICAL

### HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BROWN of California. Mr. Speaker, the administration's loosely articulated stance on reauthorization of the Clean Air Act is revealing of its unwillingness to go on record against a

program which enjoys strong public support. This support was again made very clear to me this past weekend in a Town Hall Meeting on the Environment I held in my district.

As we await the President's message requesting even more budget cuts, I would like to remind my colleague's of the public's support for clean air and a program to insure the Federal Government's commitment to that goal. It is not time to weaken legal controls; rather it is time to express our commitment, once again, to a healthy nation.

As in past years, I will work for continued progress towards clean air. Unrelenting commitment is critical in this area which can experience devastating setbacks with any loosening of controls. Progress takes years; our commitment must reflect this fact.

I invite my colleagues to read the thoughtful Los Angeles Times editorial appearing over the August recess on reauthorization of the Clean Air Act. The issues raised are even more pertinent now as action is delayed on renewal of this important law.

The article follows:

[From the Los Angeles Times, Aug. 9, 1981]

WHITTLERS, MUDDLERS

The Reagan Administration apparently is not prepared to work as hard to whittle down the federal Clean Air Act as it was to whittle down the federal budget.

The vaguely worded statement of clean-air principles that was issued last week by Anne Gorsuch, administrator of the Environmental Protection Agency, leaves no doubt that the White House would prefer looser controls on air pollution.

But it can also be read as an acknowledgement that the White House does not want to pick a fight with millions of Americans who want cleaner air. The Administration also has its hands full with other matters, like holding onto the budget cuts that it already has and softening up Congress for even deeper cuts.

Congress should take the Administration statement as a sign that it is free to approach the job of extending the Clean Air Act by asking how tough controls must be to keep squeezing pollution out of the air rather than how much they could be relaxed without doing real harm.

In the few places where the statement of principles was explicit, it represented a retreat from the sort of relentless effort that will be required to reduce air pollution—particularly in Southern California.

The statement suggested, for example, that new factories or power plants be allowed to pollute clean air in rural areas faster than the law now allows.

That might make faster economic growth possible in rural areas, but it might also make impossible the task of cleaning up the air in cities downwind from such rural areas. Those are changes in the law that can be made only case by case.

The Administration proposed lifting the limits on the amount of nitrogen oxide that is allowed to escape from automobile exhausts. Any such change would be a serious blow to Southern California and a major step back from standards that the auto industry already is meeting.

Nitrogen oxides are basic elements in smog. They combine with hydrocarbons to create ozone, which irritates the lungs. They are the pollutant that turns the air on smoggy days to the color of cheap bourbon.

In discussing the Administration statement, Gorsuch said last week that she thought a limit of 2 grams of nitrogen oxides for every mile a car travels would be a reasonable emission limit. But 1981 model cars already meet the present standard of 1 gram per mile, and one-third of those cars meet the even tighter standard that will go into effect next year.

There are amendments to the act that can be made without slowing down progress toward cleaner air, some of which have been submitted to Congress by a so-called Working Group of businesses, labor unions and environmental groups in Southern California.

The section of the act that imposes the same deadline for meeting federal clean-air standards on all regions of the country should be changed. Southern California is one of several areas that cannot possibly meet the deadlines. They should be given a longer time, with some interim check points to show that they are at least making progress.

Congress also should address the concern of some Southern Californians about how many more years the so-called "offset" program will allow the region's economic base to grow.

The program requires new or expanded plants that add pollution to the air to offset the new pollution by shutting down or putting tighter controls on existing operations.

Obviously, there will come a time when the controls on all refineries and oil-drilling rigs and other polluting facilities will be as tight as engineers can make them and there can be no more offsets. Some businessmen think Southern California is about to run out of offsets. Most air-quality technicians think there are enough to allow the region to grow indefinitely.

The Working Group suggested an amendment that would allow a new plant to pay a fee if it could not find an offset, the fee to be used on indirect offsets, such as adding fleets of vans that would take more cars off the road.

The use of fees as an alternative to offsets is reasonable as long as Congress could phrase an amendment to the act to make it clear that the fee approach would be a last resort and would be used only after tight controls were indeed in place everywhere.

Whatever Congress does, it should keep in mind that the Clean Air Act is not the federal budget. It does not need to be whittled down. It needs only to be made more effective.●

## RULING OUT REVENUE BONDS

### HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. BEDELL. Mr. Speaker, interest rates today remain so high that many small businesses and family farmers have been forced out of the commercial credit market. At the same time, the conventional Federal programs to assist startup businesses and new farms are being sharply curtailed. Thus, the States have had to assume increasing responsibility for helping to finance local economic development involving small businesses and family farms.

A number of States have turned to the use of industrial revenue bonds to help stimulate local development. IRB's, as they are called, essentially involve the use of tax-exempt bonds to help raise development money at rates less than the prime lending rates.

Quite recently, several States have adapted this concept to help finance the development of family farms. Bond offerings for this purpose often are called "aggie bonds." In my home State of Iowa, an aggie bond program was established last year by the legislature and had been due to go into operation later this year.

The key to making these bond issues work for the truly small business or the starting family farmer has been the issuance of aggregated small issue bonds. In other words, by bundling together a number of small projects, then the costs of legal advice, underwriting services, and so forth, can be spread out over a number of projects and thus become affordable to the individual entrepreneur.

On August 24, though, the Treasury Department issued Revenue Ruling 81-216. The effect of this rule is to make it virtually impossible to bring out aggregate issues of small IRB's or aggie bonds. Thus, many smaller businesses and family farms are being shut out of the program.

This past week I received a letter from Mr. George Schneiderman, a banker in my district who is the vice chairman of the Iowa Family Farm Development Authority. He describes how revenue ruling 81-216 will impede Iowa's efforts to help beginning farmers. At the conclusion of my remarks, I will insert his letter in the RECORD.

Several weeks ago, I wrote to Treasury Secretary Donald Regan, urging him to overturn the Internal Revenue Service's ruling. This week, I joined JOHN DUNCAN and WES WATKINS in preparing a joint letter to Secretary Regan, again urging him to set aside revenue ruling 81-216 because it is overly broad in scope and too disruptive of ongoing State and local development programs.

A copy of our proposed letter to Secretary Regan will appear in the RECORD at the conclusion of my remarks. We have invited interested Members to join us in signing the letter before it is sent next Wednesday. Already, we have had six more Members ask to join us.

At this point in the RECORD, Mr. Speaker, I wish to insert the text of the letter we will send to Secretary Regan and the letter I have received from Mr. Schneiderman.

TEXT OF A LETTER TO BE SENT SEPTEMBER 21, 1981, BY MEMBERS OF CONGRESS

Hon. DONALD T. REGAN,
*Secretary of the Treasury,*
*Washington, D.C.*

DEAR MR. SECRETARY: This is to request that you rescind Revenue Ruling 81-216. That ruling has the effect of prohibiting the issuance of multiple lots of small issue tax-exempt industrial and agricultural development bonds.

A number of states have established agencies which issue "umbrella" bonds to assist small businesses and family farmers. Interest on the bonds is tax-exempt, and the proceeds are used to make low interest loans to individual farmers and small business owners. With commercial interest rates at record high levels and with conventional development assistance to small business and agriculture being sharply curtailed, state and local governments must bear an increasing responsibility for economic development. Consequently we are distressed by Revenue Ruling 81-216 which makes this task much more difficult for the state and local authorities.

We are, of course, troubled by reports that industrial revenue bonds may have been used to benefit certain large corporations that were not intended to be in the program. However, it appears that Revenue Ruling 81-216 is overly broad in its scope, precluding the use of aggregated small issue revenue bonds to help the smaller enterprises the program was established to assist.

Therefore, we respectfully request that the rule be withdrawn. If changes in the industrial revenue bond program are in fact required, they should be much more limited in scope and not cause major disruptions of on-going efforts by the states to aid small businesses and family farmers.

Sincerely,

---

ROCK RAPIDS STATE BANK,
*Rock Rapids, Iowa, September 14, 1981.*

Congressman BERKLEY BEDELL,
*Rayburn Office Building,*
*Washington, D.C.*

DEAR MR. BEDELL: Recently you have received letters from several people indicating strong opposition to revenue ruling 81-216, which was issued by the IRS on August 24. As you know, this ruling places more strict limitation on small issue industrial development revenue bonds. This directly affects the Iowa Family Farm Development Authority.

I serve as Vice-Chairman of the IFFDA and would like to add my comments to the ones you have already received.

Perhaps the most distasteful aspect of IRS 81-216, is the fact that it was issued without notice, without public hearing and with immediate effectiveness. I understand that many agencies, including the IFFDA have done considerable work in preparing bond issues for market relying on previously published IRS rulings. For this reason, I would like to see this ruling rescinded. If in fact there are abuses in the issuance of aggregated industrial revenue bonds of one million dollars or less or if the treasury feels that the lost tax revenue because of these types of issues is too severe, it would seem appropriate for treasury to conduct public hearings and announce an effective date which would allow a more orderly change in operating procedures for numerous State Development Authorities.

Here in Iowa, the IFFDA has pursued an individual agricultural development bond program under which industrial revenue bonds as small as $20,000 will be issued to finance the acquisition of agricultural assets for qualifying beginning farmers. This program has some merit but will probably be limited in scope because the funding for these bonds will come from the rural banks making the loans to beginning farmers. However, it is almost certain that the benefits of our program will accrue to the "small" farmer.

Thank you for taking time to consider these comments.

Sincerely,

GEORGE SCHNEIDERMANN,
*President.*

## A TRIBUTE TO BORIS GOLOKOW

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HAWKINS. Mr. Speaker, living in South Gate, Calif., is an 81-year-old gentleman who has made numerous contributions worthy of recognition. I speak of Boris Golokow, born outside Odessa, Russia on March 6, 1900.

In 1905 he immigrated to the United States, settling with his family in Buffalo, N.Y. In 1912 Boris joined the second Boy Scout troop ever formed in Buffalo and began his assent toward the rank of Eagle Scout. He was an active Scout until his enlistment in the U.S. Marine Corps.

On August 21, 1921, he married Esther Golokow, a union that has endured for 60 years. The Golokows are parents of two children, Bruce and Evelyn.

In 1928 this gentleman organized the 3d troop in Lackawanna, N.Y., history at the orphanage of Father Baker. Additionally, he was appointed the district commissioner for Lackawanna District, Buffalo Council, Boy Scouts of America.

He remained active in the youth movement until the Government made a plea for radio instructors in 1943. This man, epitomizing a love for God and country, answered the call serving with the Army/Air Force communication system is the South Pacific during 1944-45.

Upon his return to the United States in 1945, he joined his wife Esther in California and gained employment with B'nai B'rith as the Boy Scout director, District Grand Lodge No. 4. In this capacity he was responsible for 11 Western States. He was also appointed by the Boy Scouts of America as a national Scout commissioner.

In 1949 this energetic citizen organized the first handicapped Cub Scout Pack and Boy Scout Troop on the west coast. In 1962, the Green Meadows District, Los Angeles County Council bestowed upon Mr. Golokow the Silver Beaver Award in recognition of his tireless efforts in behalf of young people.

In 1965 this remarkable man retired at the age of 65 but the thought of slowing down was not among his planned activities and he turned his energies to writing and lecturing. Three years later he focused his writing on our U.S. space program. He also began a lecture circuit of the public school system. Mr. Golokow was named the official "Poet of the Apollo's" by NASA in 1972.

His poetry, focusing on the U.S. space program, has been recognized by five Presidents—Johnson, Nixon, Ford, Carter, and Reagan—the Queen of England, NASA officials, Members of Congress, members of the California State Legislature, 17 astronauts, and many local organizations.

Mr. Golokow was the driving force in the formation of a five-city senior citizen organization boasting a membership of several thousand.

I would suggest that all who have come in contact with Mr. Golokow are inspired by his drive and dedication. Mr. Speaker, the people of South Gate, the State of California and this Nation, are proud of Mr. Golokow.●

## THE PEACE CORPS

### HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. WOLPE. Mr. Speaker, a most significant event in our history occurred 20 years ago today: on September 22, 1961, President John Fitzgerald Kennedy signed the bill establishing the Peace Corps. In the ensuing 20 years, over 100,000 Peace Corps volunteers have served in some 88 countries, helping the people of the developing world learn to build better lives for themselves and their families. These efforts have forged bonds of friendship between our countries.

Our volunteers have made tremendous inroads in the areas of health, nutrition, agriculture. and education, and I have seen it firsthand. For example, when I was in Kenya during my recent tour of Africa, the delegation visited Peace Corps projects, and talked with volunteers. I was tremendously impressed by a volunteer named Cecelia Carlson, from Minneapolis, Minn., who ran a fisheries project in Sagana, about 2 hours from Nairobi. Cecelia is a highly competent, articulate, and enthusiastic person who had been trained in fisheries management and pond construction by the Peace Corps prior to her arrival in Kenya. She had been living in Sagana about 6 months, and had just been through a particularly muddy rainy season, which often made the roads impassable. Nevertheless, with great zeal, Cecelia worked with the villagers introducing fish to the commu-

nity as a good and healthy source of food and protein, as well as a source of income for the community. She showed us fishponds that had just been constructed, and others that were underway.

Cecelia is an example of a well-trained, highly capable volunteer who is little by little helping a community realize its own potential. Other volunteers we visited were Tim Bullard and Joe Permetti, agriculture volunteers in Machakos, a farming district outside of Kenya.

When I met with President Daniel Moi of Kenya, he specifically urged the delegation to convey this message: "Don't reduce the number of volunteers—we need more." U.S. Ambassador William Harrop reiterated this message. The high regard for the Peace Corps and its 200 volunteers in Kenya was continually evident throughout my meeting with officials there.

When my wife and I lived in Nigeria, our house was always open to Peace Corps volunteers. The memories of our visits are warm ones. That is why, on this 20th anniversary, I would like to extend my congratulations to the Peace Corps for its two decades of work in the developing countries.

On this very important day, I call your attention to some historical milestones from the newly published "Twenty Years of Peace Corps," by Dr. Gerard T. Rice. I would also like to add the preface of the book, written by the new Peace Corps Director, Loret M. Ruppe, in which she looks ahead to the challenges of the new decade.

1961—President Kennedy launches the Peace Corps; the first 50 volunteers arrive in Ghana to teach physics, chemistry, math, history, geography and English to secondary school students.

1963—Over 7,000 Peace Corps volunteers at work in 44 countries of Africa, Asia and Latin America.

1965—42,125 Americans apply for Peace Corps service; the number of returned volunteers in America reaches 5,000.

1967—Over 15,000 volunteers and trainees and a Peace Corps presence in 59 countries.

1969—Peace Corps volunteers the world over assist 400,000 farmers, help educate 700,000 school children and help train 55,000 teachers.

1971—Peace Corps volunteers involved in over 540 development projects in 64 countries, speaking 187 different languages and practicing 312 skills.

1973—Peace Corps programs include treating and preventing tuberculosis in Korea, assisting earthquake victims in Nicaragua and contributing to various relief projects in the drought-stricken Sahel.

1975—The Peace Corps initiates its landmark Information Collection and Exchange program to share appropriate technology strategies with volunteers throughout the world; ICE reviews, catalogues and distributes the techniques learned by Peace Corps volunteers during their years of grassroots development experience.

1977—Around 6,000 Peace Corps volunteers renew their emphasis on the basic human needs—food, water, education, shelter—of the poorest peoples in 63 nations.

1979—A Peace Corps survey estimates that volunteers directly help one million people in a single month.

1981—Over 80,000 returned volunteers celebrate the Peace Corps' 20th Anniversary. President Reagan congratulates all volunteers on their contribution to "world peace through international goodwill."

PREFACE

During the past twenty years, over 80,000 Peace Corps volunteers have been busily weaving threads of peace, caring and friendship in the barrios, fields and villages of nearly ninety Third World countries. These threads now encircle the globe.

Volunteers have worked—and continue to work—on the frontiers of poverty, ignorance and underdevelopment. This experience has changed their lives and has left an indelible and positive impression on millions more overseas.

During my recent travels as Peace Corps Director, American ambassadors consistently told me they believe Peace Corps volunteers are the most positive American presence overseas. Third World peoples also acknowledge that volunteers have epitomized America's best qualities. At the 20th Anniversary Conference of Returned Peace Corps Volunteers, in June, 1981, Prime Minister Edward Seaga of Jamaica said: "The Peace Corps . . . is wanted, needed and loved by so many countries of the world."

This book illustrates the magnitude of what the Peace Corps has accomplished in the past two decades. It has often been called "the People Corps", a group working hand in hand with host countries in the human process of development. The work has not been easy; but it has not gone unnoticed or unappreciated. Only a few months ago, the Mayor of Sarbana Larga, in Honduras, stood in his village's dirt-floored school and said to me, "Thank you, America, for sending us these helpers. We know we are poor. But you are helping us and our children."

In 1981, with development and mutual understanding more necessary than ever, we are again looking ahead and preparing to meet the challenges of the new decade. One thing, at least, is certain. Global interdependence is a reality. In a world where 800 million people live in abject poverty and where the next serious conflict between nations could spell the doom of mankind, the need for the Peace Corps is greater than ever.

"Under the banner of the Peace Corps," said President Ronald Reagan in June, 1981, "American men and women have left their families, their jobs, and the security and familiarity of their homes to help the people of other lands." In the process, these volunteers have offered the world a very personal view of Americans putting their ideals and commitments on the line. However, it is important to recognize that this has not been just a one-way street. The Peace Corps has given Americans a path back to themselves as well as to other peoples.

In the next twenty years of the Peace Corps, volunteers will continue to bring back the deep understanding that comes from living with foreign peoples, not as expatriates, but as friends who have shared their food, obeyed their laws, spoken their languages and worked in their fields. In this way, these volunteers will enrich our community, just as they enriched their host countries overseas.

We need the Peace Corps in the 1980's more than we did the first twenty years. The world needs those threads of peace and friendship which Peace Corps volunteers weave. For the developing countries and for America, they are living and working expressions of the best that is in all of us. The Peace Corps' history embodies that spirit. The future holds the promise of further growth and expansion. Now is the time to invest in this precious commodity; now is the time for a Peace Corps renaissance.●

## INTERNATIONAL YEAR OF DISABLED PERSONS

### HON. LARRY WINN, JR.

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. WINN. Mr. Speaker, as an honorary sponsor of the U.S. Council for the International Year of Disabled Persons, I am pleased to submit the recent comments of David Kearns, Chairman of the U.S. Council and president of the Xerox Corp. His speech, which was given at the Gallaudet College convocation recently, focused on opportunities—especially for disabled persons in this country. He also comments on the International Year of Disabled Persons which, in 1981, is designed to generate more public awareness of the special problems facing the disabled and of ways to help them fully participate in society.

As the sponsor of the legislation which passed the House in April, I am particularly satisfied with the grassroots initiative underway throughout the United States in furtherance of the IYDP. As a nation committed to human rights, to the dignity of all citizens, to equality of opportunity, especially in areas over which our citizens have had no control, we will continue to take the lead as we always have—symbolized in this case by our full participation in the International Year of Disabled Persons.

SPEECH BY DAVID T. KEARNS, XEROX CORP., PRESIDENT AND CHIEF OPERATING OFFICER, AT GALLAUDET COLLEGE, WASHINGTON, D.C., SEPTEMBER 15, 1981

Back in the 16th century, Queen Elizabeth noticed that one of her favorite courtiers, Sir Walter Mildmay, was back after a long absence—an absence she thought was too long. "Sir Walter," she demanded, "Where have you been and what have you been doing?" Mildmay had been away setting up Emanuel College at Cambridge. "Madam," he said, "I have been planting an acorn. And when it becomes an oak, God only knows what it will amount to."

Well, I guess you could say that those of us involved in the International Year of Disabled Persons have been planting an acorn of our own. We've tried to plant the seed of awareness about the disabled—and I think we did. That's what I want to talk to you about today.

I know there are many here today who were at the IYDP organizational meeting

last year. The work done by many of you here at Gallaudet made possible much of what has been accomplished. Indeed, the U.S. Council for IYDP was born right here on this campus.

As you know, a lot of planning went into this effort long before 1981 rolled around. A year and a half of careful work enabled us to—if I may borrow a phrase from one of your more prominent Washingtonians—hit the ground running. Now, 1,750 communities have appointed liaisons to the U.S. Council. Every State has made a visible effort and set up a working group. President Reagan, in one of his first messages, pledged his cooperation to the work of the Council.

When the United Nations proclaimed 1981 the International Year of Disabled Persons, it set a theme for the year. That theme is "full participation of disabled persons in the life of their societies."

Our objective in this country was to promote full participation through the concept of working partnerships—partnerships between the disabled and the nondisabled at the national, State and community levels. We called for—and we got—the commitment of individuals and community groups . . . in cities and towns . . . in corporate boardrooms and school classrooms . . . in union halls and church councils . . . to focus attention on people with disabilities. From New York to Omaha to Los Angeles, there are film programs, speakers bureaus and special seminars.

Across the country, there are programs for businessmen to encourage hiring of disabled persons . . . to train employees in serving disabled customers . . . and to help businesses make their workspaces and buildings more accessible. At Xerox, we made a commitment of our own.

You may know that we've been closed-captioning our television commercials since the beginning of the year. We've also got a special coming up next year on public television, and that will be closed-captioned.

Now, I'm pleased to announce that Xerox is going to sponsor closed-captioning of live Presidential speeches for one year, beginning this fall. Ronald Reagan is the first President to use this technology for the hearing impaired. Every major televised speech he has made, beginning with his inaugural address, has been closed-captioned. The National Captioning Institute picked up the tab for the first four speeches, and Sears, Roebuck paid for the last one. We're very proud to continue this service. It's the only way people with hearing problems can know what their President is saying as he's saying it.

Some time early in the year, a friend sent me a newspaper article written by a columnist in Galesburg, Illinois. I'd like to share it with you.

"I read somewhere," the article began, "that 1981 has been designated as the Year of the Disabled. I don't know who proclaimed it so. I don't even know what it means. Whatever it means, I'm not very excited about it," the article said, "because someone is always dedicating a day, a week or a year to a cause or a group. But after the grand pronouncement, nothing much happens. It will be business as usual for the disabled next year."

Bill Campbell wrote that in his weekly syndicated column from a wheelchair.

He may be right—but I hope not—because much of what happens next year—and the year after—will depend on us . . . on my commitment, on your commitment and on the commitment of the person sitting next to you today.

When we formed the U.S. Council, we planted an acorn that we watched grow all year long. But it's up to us as individuals to water it, to weed it, to nourish it. It's up to us as individuals to help it grow into an oak.

As we all know, the political climate in Washington has changed. Who could have predicted that a candidate running on a platform to cut taxes and Government spending would actually win? Who could have predicted that—having won—he would actually keep his promises? Who could have predicted that he would give new meaning to the phrase, "reorder our priorities?"

Mr. Reagan's success in getting his budget program approved clearly shows that there is a national will to control Federal spending.

The public is beginning to perceive that Washington isn't just a place where we can go to get money from somebody else. The money just isn't there—and we're all going to have to live with a certain amount of belt-tightening. It isn't that Government has failed, or that the system has failed. After all, the institutions we've been so critical of were created by us, through our elected officials.

It's about time we go back to the idea that government isn't somebody else—government is us. For too long, many Americans have been content with the belief that government would take care of them. For too long, many Americans have turned away from one of the pillars of citizenship—service.

No, I don't mean we stopped giving to charities. For a generation, now—in good times and bad—we've added to the pool of charitable funds. In fact, private contributions to nonprofit organizations are now about two percent of our gross national product.

While we have good reason to be proud of this record, it's been accompanied by another disturbing trend—a growing preoccupation with self. During the 1970's, Tom Wolfe called it the "me" decade.

It's an attitude that makes people pull back from their obligations as citizens. They begin to see everything in terms that serve the self—rather than see themselves through service to others. A person who sees his self-worth in terms of a larger car, a better house and a bigger paycheck does well in good times.

But when that economic safety net starts to sag, as ours has, people regroup . . . they become cautious . . . and they start to take a hard look at what's really important. They fall back on traditional values, like stronger commitments to their families . . . to their work . . . and to their communities.

In his latest book, the founder of the polling firm Yankelovich, Skelly and White calls this new emerging philosophy in America a new "ethic of commitment." Daniel Yankelovich says that our economic and political prospects may leave us a little pessimistic. But he believes our cultural prospects—our shared values—are the best foundation for a brighter future.

If you ask any disabled person what value he'd like to share with the rest of us, he'll probably tell you he wants to be independent . . . he wants to have a job . . . he wants to contribute. I believe that through employment and training, the disabled can make their biggest contribution. And so can private industry.

During this International Year, that has to be the most important shared value we have. Providing jobs for the disabled makes sense. It's good for them. It's good for business. And it's good for the economy as a whole.

Right now, one out of four unemployed people is disabled. Over half of the country's disabled of working age are unemployed. That's really incredible. In my own industry, alone, thousands of jobs are going begging in the electronics centers of California and Texas, for lack of trained people.

One of the things we've tried to do in IYDP is to get across the idea that an investment in the disabled is money well spent—it will yield a return.

In a recent column, economist Peter Drucker wrote that the biggest challenge this country faces isn't the need to build more railroads, or the billions of dollars we'll have to spend on energy. The biggest challenge, he says, is to make our education system teach the skills the workplace needs. In fact, the Business Roundtable has called for a national policy to deal with the problem that many American workers don't have the skills to do the jobs that need to be done.

Well, I don't know if we need a national policy. But as a nation trying to make full use of our human resources, I'll tell you what we need. We need to stop skimping on investments in training and education. There's an old Chinese proverb that says if you give a man a fish, he will have a single meal. But if you teach him how to fish, he will eat for the rest of his life.

We're spending $10 to keep disabled persons dependent for every $1 we spend on helping them become self-sufficient. That's a terrible waste. Training is a lot cheaper—and a lot more productive. It costs about $7,000 to train an entry level computer programmer.

Compare that with $22,000 a year it takes to maintain a disabled person in an institution. Business, industry and the American people need to know about the economics involved here.

There was a time when providing training programs for the disabled would have been considered part of business' sense of social responsibility. Today, you'll be much more successful if you appeal to business' knowledge of economics.

Through IYDP, more and more businessmen and women now know about the proven work skills of individuals with disabilities. Our message through the year has been that it is in their economic interest to hire and train disabled workers. It's in the economic interest of the disabled to join the ranks of taxpaying citizens. And it's in the interest of all taxpayers who want to get this economy moving again.

It has been said that America handicaps disabled people, and in so doing, handicaps America, itself. We can no longer afford to deprive ourselves of the manpower and the intellectual talents of our disabled citizens.

In my travels around the country this year, I've been shocked by the amount of ignorance about the disabled. It takes so many forms that a list would fill this whole speech. I've found:

Corporate officers who don't know about the skills disabled people have;

Personnel people who say modifications to work areas are too costly;

Executives who say disabled workers have a higher rate of injury;

Individuals who think that somehow, if you're in a wheelchair, you haven't worked hard enough to overcome the obstacles.

No matter what form it takes, it's still ignorance. And the best weapon against ignorance is information. Misunderstanding—

both of the kinds of handicaps and the individual needs of the disabled—often leads to prejudice.

Abraham Lincoln issued the proclamation that made Gallaudet a reality. I wonder if he sensed that his legacy would include working to reduce another kind of discrimination—one that is as real as the discrimination against people whose skin happens to be a different color. In many areas, Government will provide the impetus—but it's going to be up to us, as individuals, to build on those foundations.

Government grants didn't fund the original production of "Children of a Lesser God"—and they sure weren't responsible for the way that show swept the Tony Awards. A Government grant isn't paying for one of Broadway's upcoming plays about the life of Helen Keller, either. The Rainbow Company of Las Vegas, Nevada, recently won an award as the best new children's theater group in America. There are 450 children in that group—and 80 of them are disabled.

One of the kids in that company says, "We are all equal, even if it's harder for some of us." We can't all join a Broadway cast but we can—through service in our communities—work to reduce ignorance.

Two months ago, a group of disabled people did something that few able-bodied people have managed to do. They climbed to the top of Mount Rainier in Washington State. They did it to celebrate the International Year of Disabled Persons. But they also had another, more profound reason.

One of them put it this way: "If you have a neighbor who is in a wheelchair or is blind, the next time you go fishing . . . ask him to go along. That's why we climbed the mountain . . . to show you that we can do it, too."

At the end of this year, the U.S. Council will cease to exist as an organization. Our role—and our goal—during this year has been to enlighten and to inform. Tangible things like training programs . . . like rehabilitation programs . . . like employment programs for the disabled are important. But they will work only if we change the attitude of the able-bodied towards the disabled.

Our message has been clear: Disabled doesn't mean unable. If that message was understood, then we will have succeeded.

The U.S. Council will close its doors, but if it has opened minds that had been closed, then, in some measure, we have succeeded. I think that is the finest legacy we can hope to leave. The acorn has been planted.

Now, it's up to each of us, as individuals, to help it take root and grow.●

## LOS ANGELES' 200TH ANNIVERSARY

### HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Ms. FIEDLER. Mr. Speaker, on September 4, 1981, the city of Los Angeles celebrated its 200th anniversary. At this time of commemoration, I believe it is important to recognize the rich history of the San Fernando Valley, whose long saga began just 16 years after the founding of the city itself.

As local historians Marie Harrington and Msgr. Francis Weber point out, the San Fernando Valley can trace its beginnings back to 1797, with the founding of the San Farnando Mission. Under the guidance of the mission padres, the area's Shoshone Indians, who became known as the "Fernandinos," were taught, and agriculture, cattle raising and trade began to develop. In 1804, the first adobe huts were constructed around the mission, and in 1806, construction of the first permanent church was completed.

For the next 100 years, the area remained sparsely populated by grain and citrus growers as well as cattle ranchers. It was not until 1913, when Owens Valley water came into the area that towns grew and developed.

The San Fernando Mission today is one of the most authentically restored California missions. On September 13, in conjunction with the Los Angeles Bicentennial celebration, a new Archival Center at the mission created by the Los Angeles Arch Diocese was dedicated. The center features historic documents, rare books, and relics of valley history. A special exhibit on the Bicentennial of Los Angeles was also featured.

I am proud to represent the valley today, an area of vigorous industry and rich cultural and ethnic heritage. In fact, 78 percent of the population gain of the Los Angeles area over the last 12 years is accounted for in the valley's 235 square mile bowl of 22 towns. As we commemorate the history of Los Angeles, let us not forget the importance of the San Fernando Mission and the valley's unique history.●

## IN SUPPORT OF HUMAN RIGHTS

### HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 23, 1981*

● Mr. RODINO. Mr. Speaker, while over 260,000 Americans marched on Washington last Saturday to show their united opposition to cuts in social services, thousands of others in towns and cities all across our country were showing their support for Solidarity Day.

In my home city of Newark and its sister city of East Orange hundreds of my constituents gathered in support of basic human rights. The William Manns Civic Association sponsored a rally last Thursday evening in Newark attended by 500 Newark and East Orange residents who signed petitions protesting the Reagan administration's budget reductions and strongly supporting the extension of the Voting Rights Act of 1965.

The organizers of the rally, Mr. William Manns, Ms. Annette Basto, both of whom founded the civic association, and Ms. Mamie Branch, a vice president of the civic association, presented the petitions to me in Newark this Monday. They echoed the concerns of the people—that we in Government should not cut back on programs that have provided jobs, brought millions of Americans out of poverty, expanded the middle class, provided education for the disadvantaged and care for the elderly, and brought a great measure of social justice to our minorities. They were equally concerned that the Voting Rights Act of 1965, a law that has been responsible for over a million of our minority citizens participating in our democratic process, be continued. I hope to be taking my voting rights extension bill to the House floor next week, and I am encouraged by the tremendous grassroots support for the bill.

The message of Bill Manns, Annette Basto, and Mamie Branch and the hundreds of others in my district should be heard by our Government, and I urge my colleagues and the Reagan administration to act on their concerns.●

## COMMENTS ON THE REAGAN ADMINISTRATION'S ACTIONS REGARDING THE WATER RESOURCES COUNCIL AND THE PRINCIPLES AND STANDARDS FOR WATER PLANNING

### HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. EDGAR. Mr. Speaker, two recent actions taken by the Reagan administration have enormous possible implications for the future of national water development. Yet, these actions have been little noted in Congress or the press, and the Reagan administration's decisions on water policy have been largely kept from the public's view.

First, on Friday, September 18, the Water Resource Council published in the Federal Register a one-page notice proposing to repeal the WRC's principles and standards on water resources projects. Speaking for the Cabinet Council on Natural Resources and Environment, Interior Secretary James Watt has stated that the current principles and standards will be replaced with new, simpler, more flexible guidelines; however, these guidelines have not yet been published.

On Monday, September 21, President Reagan issued an Executive order which will result in a fundamental restructuring of national water policy. The Executive order directs the Office of Management and Budget to review all proposed water projects. In effect, the independent review process of the current Water Resources Council would be circumvented.

The first "policies, standards, and procedures" on water development date back to 1961. The Water Resources Planning Act of 1965 established the Water Resources Council. Though water policy rules have been amended often and the planning process has not always worked well, Congress has for the past 16 years maintained a clear commitment to the existence of firm principles and standards for water development and to a formal, independent body to review projects.

Three committees of the House this year have approved H.R. 3432, the Water Resources Policy Act of 1981, which would replace the WRC with some form of a National Board on Water Resources, preserving the current formal structure of water development. The House Interior Committee also suggests a joint Congressional-Executive Commission to study water policy structure for a year. The Senate is also developing similar legislation. Though the Reagan administration opposes this legislation and the water board concept, the House passed energy and water appropriation approves $2.5 million for fiscal year 1982 for continuing the current WRC until new legislation is put into place.

At hearings on water policy legislation it has been completely evident that members from both parties feel it is necessary to perserve a water policy structure formulated by the cooperative efforts of the President and the Congress. However, the administration has repeatedly and uncompromisingly expressed its preference for a so-called Cabinet council approach to water development planning. Now, through Executive order, the President has acted unilaterally to place water planning decisions in OMB. And, if the September 18 proposal is allowed to stand, current environmental and economic rules regarding water development will be abolished even before the reported new guidelines on water development are revealed.

What will be the result of these actions? Aside from the administration denying the clear intent and authority of Congress, it is difficult to say. The practical effect of transferring water planning power in this way will, of course, depend on the priorities of the Reagan administration. The administration claims that the voices of interested Members of Congress will be heard with regard to water policy and that a transfer of planning authority will help to depoliticize the water development planning process. I am not at all sure that this is the case. The administration will face its own political pressures and necessities in the future, and the inherent utility of water projects as political bargaining chips will not be affected by changing the planning process.

I understand the problems that have been faced by the Water Resources Council. As a vocal critic of congressional water policy decisions, I realize fully how legislative attempts at water policy reform have been frustrated in the past. Yet, I do not believe that the failures of the past should give the Reagan adminstration license to attempt a unilateral takeover of water planning authority. In light of continuing legislative activity in the water policy area, the timing of the WRC proposal to repeal the principles and standards and the Executive order giving water planning authority to OMB is somewhat outrageous.●

## PERSONAL EXPLANATION

### HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. JOHN L. BURTON. Mr. Speaker, most unfortunately, I was unable to be present during yesterday's vote concerning an honorary American citizenship for Raoul Wallenberg due to illness. Had I been able to be present, I would have voted "aye."

We now look forward, to our Government diligently pursuing Mr. Wallenberg's release if he is still alive, and if not, we must demand that the Soviet Union tell the world what has happened to his life for the past 36 years in their prisons.●

## SUPPORT FOR ASHBROOK AMENDMENT

### HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. WOLF. Mr. Speaker, I was pleased to support the amendment offered by Congressman ASHBROOK to H.R. 4, the Intelligence Identities Protection Act, and to support H.R. 4 as it was amended.

We have needed to enact legislation to strengthen the intelligence capabilities of the United States by providing stiff criminal penalties for those who expose the identities of our intelligence officers. Too often this exposure has led to an agent's harassment, and sometimes even to his death.

H.R. 4 as it was written was a good beginning toward the goal of protecting the identities of our agents, but it was reported out of committee with an amendment which, in my opinion, weakened it.

The amendment we passed, which Congressman ASHBROOK introduced, strengthened the bill by making the person disclosing the identity of a secret agent liable for fines and imprisonment if he has reason to believe that such disclosure will harm U.S. intelligence operations.

This relieves a burden on the prosecution in identity disclosure cases which was imposed by H.R. 4 as it came out of committee.

Because of the need for a strong law protecting the lives of those men and women who are working under cover to protect our freedom, I wholeheartedly supported H.R. 4 as it was amended, and was very pleased to see its passage in the House of Representatives by an overwhelming majority.●

## PETROLEUM DISRUPTION ACT OF 1981

### HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. WAMPLER. Mr. Speaker, today I join several of my colleagues in sponsoring H.R. 4313, the Petroleum Disruption Act of 1981. The purpose of this legislation is to prevent or lessen the impact of interruptions in our petroleum supplies by establishing a standby program which provides the necessary flexibility and management tools to deal with supply disruptions in a timely and effective manner.

Mr. Speaker, there is a need for this legislation. On September 30 of this year, the Emergency Petroleum Allocation Act of 1973 will expire. While many characterize this statute as too complex, inequitable, and unworkable, the fact is that we will be extremely vulnerable in our ability to respond to petroleum shortages unless we develop a new and improved program to replace EPAA.

I believe that H.R. 4313 can provide the means for a workable emergency preparedness program. This bill gives the President the necessary standby authority to deal with disruptions in a flexible and effective manner, and allows the marketplace to work to the maximum extent possible so that we do not have to depend on massive regulatory action by the Federal Government to find solutions to energy disruption problems.

To begin with, H.R. 4313 requires the President to submit a report on the practicality of using tax incentives to encourage refiners to stockpile crude oil and crude oil products during periods of surplus and draw down these stocks during supply disruptions. More importantly, H.R. 4313 requires the President to develop four standby management programs which could be implemented only upon approval by Congress. Each of these programs would be designed to address varying degrees of disruption, ranging from substantial regional shortages to severe national emergencies.

The first disruption technique is based on the Strategic Petroleum Reserve and would authorize the Department of Energy to sell oil from the Reserve during substantial petroleum disruptions or at times when the international energy program is activated. Such authorized sales would be made to small and independent U.S. refiners and would provide them with some recourse other than the spot market, where prices rapidly escalate during a shortage. A minimum level of Strategic Reserve oil would be withheld from sale for purposes of national security.

The second management tool is a limited allocation program for sales between refiners with adequate supplies in a shortfall and those who cannot operate at the national utilization rate because of a disruption. This program, which implements use of private dedicated reserves, will provide a transition program to deal with regional shortages until the Strategic Petroleum Reserve is filled to a desirable level.

The third management technique is a national crude oil sharing program to be used only in the most severe petroleum supply interruptions. This management technique would require equal distribution of all available crude oil supplies among all refiners, and allow the President to order specific product yields and refinery utilization rates on a refinery-by-refinery basis.

Finally, the bill authorizes a petroleum product allocation program which also is intended for use only during severe national interruptions. This technique would be used only as a last resort, in the event that all other management tools failed to produce an acceptable result. Under this program, the President would have the flexibility to deal with an extreme emergency as he saw fit—either by using price and allocation controls, a national rebate program, or any other plan he found acceptable at the time. To the maximum extent possible, the plan would be designed to protect the following: public health, safety, and welfare; national defense; the maintenance of public services; and the maintenance of agricultural operations, related to the production, processing, and distribution of food.

As you can see, Mr. Speaker, the bill provides for a sequential management system which begins with reliance on the marketplace and then moves toward Government intervention only as necessary and on a limited step-by-step basis. The "trigger problem" is avoided by providing an implementation process which relies on a political rather than a statistical determination of the appropriate point to activate any one of the management techniques. This also provides the flexibility needed to deal with supply interruptions. Adequate oversight of the powers granted by this legislation is provided by requiring Congress to agree on any given set of actions within strict time limits.

Mr. Speaker, I would like to point out that the rural areas of our country are particularly vulnerable to supply disruptions. Refiners serving rural agricultural markets tend to be hardest hit during times of tight petroleum supplies. Farming is an extremely petroleum-intensive industry, and farmers annually spend more than $13 billion for fuel, lubricants, and maintenance of machinery. Yet, even though his petroleum needs are crucial, the American farmer and rancher consumes only 3 percent of the total energy used in the United States.

The farmer's contribution is vital to the survival of us all; and in recognition of this fact, it has been national policy to make sure agriculture does not run out of gas in time of shortages. That policy of high priority must be maintained for the future. I believe H.R. 4313 will maintain that priority and insure that our rural agricultural areas have the fuel they need for vital food production during serious supply interruptions.

Mr. Speaker, I am not without reservations in supporting this legislation. Many feel that private market forces are capable of dealing with regional and national shortages of petroleum supplies, and that the President has adequate authority to deal with such problems should Government intervention be necessary. The proposals contained in the bill deserve the close scrutiny and careful consideration of every Member of Congress.

Nevertheless, I believe it is vital for the country to have the ability to respond to petroleum supply interruptions in a national, effective, and timely manner. H.R. 4313 can provide the first step in meeting these goals, and I am looking forward to working with the administration, my colleagues in the House, and the other body in developing a suitable replacement for the expiring Emergency Petroleum Allocation Act authorities.●

## DO NOT OVERLOOK OVERSIGHT

### HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. LONG of Louisiana. Mr. Speaker, a lesson to be learned from our recent experience with reconciliation concerns the congressional oversight process.

The lesson is: one way to avoid being overrun as a policymaking body is to elevate oversight to the high place it deserves among our obligations and mandated duties.

I say this in a truly bipartisan spirit, for we are all concerned with maintaining the integrity of congressional legislative functions.

One of the most effective ways to evaluate programs, to weigh their comparative values and to determine their true worth to the taxpayer, is through oversight hearings tied, ideally, to the authorization process.

Constructing agendas for such hearings and setting aside adequate time for them are among topics the Subcommittee on the Legislative Process is exploring in a series of weekly hearings on oversight.

There are several new approaches before the subcommittee. The most recent is H. Res. 218, introduced by the Honorable TOBY MOFFETT. This bill provides for an experimental oversight season in January 1982. For a 3-week period, all legislative activity would cease, and Congress would conduct investigative hearings exclusively.

The Honorable TRENT LOTT, ranking minority member of the subcommittee, has introduced H. Res. 100, the Committee Improvement Amendments Act. Section 1, under the subcommittee's purview, would require authorizing committees to present their oversight plans to the Committee on Government Operations. The committee would hold hearings and fashion committee plans into a resolution which would be brought to the floor for House approval.

We are also considering H.R. 2, the Sunset Act, introduced by the Honorable JAMES J. BLANCHARD. H.R. 2 hews closely to the traditional sunset approach in that it calls for barring the expenditure of funds for programs unless these are reviewed and reauthorized at least once in a 10-year period. It also requires that GAO, CBO, and CRS cooperate in preparing an inventory of Federal programs.

H.R. 58, the Sunset Review Act, introduced by the Honorable BUTLER DERRICK and me, as subcommittee chairman, owes a great deal of its evolution to the House committees' experiences with oversight. It was developed on the basis of committee responses to questionnaires we submitted to them. It is a composite of the best features of a number of proposals, including Congressman DERRICK's Sunrise Act in the 96th Congress, which calls for a statement of goals in the report accompanying the bill.

Both H.R. 58 and H.R. 2 feature an oversight agenda and timetable. H.R. 58 incorporates the inventory features of H.R. 2.

Basically, these are the measures before the subcommittee that we will emphasize in our hearings. But we are open to ideas from every quarter.

Last week we were honored to have as panel members and witnesses the

Honorable LEON PANETTA, BERKLEY BEDELL, and JIM BLANCHARD.

The subcommittee's next hearing on oversight proposals will begin at 10 a.m., Friday, September 25, room H-313. Additional hearings are planned throughout the fall.

On behalf of TRENT LOTT and myself, I urge all interested Members to join us in exchanging ideas and opinions on oversight and ways to improve the legislative process.●

## COACH JOHN HOBAN

### HON. CHARLES F. DOUGHERTY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. DOUGHERTY. Mr. Speaker, these are busy days for the U.S. Congress. We have many pressing problems to consider, ranging from balancing the Federal budget to providing for the adequate defense of the United States. However, from time to time, we should pause, and pay tribute to one of those Americans who embodies many of the principles for which this country stands. On Friday night, September 25, 1981, Mr. John Hoban of Philadelphia will be honored by many friends.

That John Hoban has many, many friends is no secret to all who know him. In fact, John has a gift of making friends wherever he goes. Distinguished by his unfailing consideration of others, he is the kind of friend anyone would be proud to have.

John graduated from Philadelphia's Roman Catholic High School for Boys in 1935 where he served as class president. He achieved all-Catholic recognition for his outstanding performance there on the gridiron. In subsequent years, John became a coach at Roman Catholic High, helping to mold an entire generation of graduates of that fine school to become upstanding citizens.

His outstanding ability is clear to all who have been privileged to work with him. A deeply concerned and caring man, he has never neglected the needs of those around him. He has shared of himself with whomever he has worked. John Hoban is a shining example of what a civic-minded, concerned individual should be.

Above all, in all he did and is doing, John works with the utmost dedication. His commitment to his family, to his friends, and to his community serves as a beacon to every good American.

As the class of 1946 of Roman Catholic High School honors Coach John Hoban at their 35th class reunion, let me add my congratulations to this gentleman and admirable American.●

## NEED FOR CHANGE IN PRESENT PATENT POLICIES

### HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. ERTEL. Mr. Speaker, we are all too painfully aware of the serious problems afflicting our economy today. During the last few months we have looked at several proposals designed to come to grips with our economic problems. One obvious example has been the spirited debate on Federal tax policy. In part, tax legislation has been advanced on the grounds that it is needed to spur new productivity and innovation in the economy. While tax policy is important in any effort to change this Nation's downward trend in productivity, other changes are also necessary if we are to truly advance innovation and productivity.

Today, Senator HARRISON SCHMITT and I are jointly introducing legislation in our respective bodies to improve our Federal patent policies as a part of our overall effort to boost productivity and innovation. We are joined in this effort by a number of our distinguished colleagues in both the House and the Senate. Joint hearings of the House Science and Technology Committee and the Senate Commerce, Science, and Transportation Committee have already been scheduled on these bills for September 30. During the previous Congress, both committees developed an extensive hearing record on this type of legislation. We are hopeful that we will be able to build upon that record to permit timely action on our bills by the committees and the full House and Senate.

These bills provide a greater incentive for contractors engaged in Federal research and development work to bring to the marketplace new inventions which arise in the course of federally sponsored R. & D. by granting title to those inventions, under certain conditions, to the contractors who developed the invention, and who know best how to commercialize it. We must remember that under the present Government patent policy, only about 4 percent of the 27,000 to 30,000 patents held by the Government have been licensed for development. Even fewer of these have been commercialized. The rest of these patents, developed with taxpayer money, do little more than collect dust on some shelf.

Currently, Federal patents are controlled by approximately 26 statutes applying to different agencies and programs, and by Presidential patent policies in all situations not covered by statute. Under this system a contractor's rights may differ not only from agency to agency, but from department to department within an agency. This confused situation is in itself a disincentive to firms which may be interested in commercializing a federally held patent. The legislation Senator SCHMITT and I are introducing today would change this condition by establishing a uniform Federal patent policy.

In addition to this important objective, these bills achieve several other necessary goals including: Making the benefits of Federal R. & D. programs widely available in the shortest practicable time; promoting commercial utilization of inventions in order to maximize our productivity and innovation; encouraging the participation of the most qualified firms or institutions in Federal R. & D. programs; and fostering competition and preventing undue market concentration.

It is commonly recognized that in the process of bringing a product to the market, research accounts for roughly 10 percent of the cost while development makes up 90 percent of the cost. The Federal effort stops with the research part of the process. Without providing exclusive rights, a private firm is often reluctant to invest the resources needed to commercialize the invention where the economic return is unclear. Why spend the development money only to have your competitor capitalize on your investment just before you hit the market? Your competitor will be able to underprice you since he does not have to recover the development costs.

Studies have indicated that commercial utilization of federally held patented inventions is achieved at a much higher rate when, under certain circumstances, the contractor is permitted to obtain exclusive rights to the invention. For example, a NASA study has shown that contractors with exclusivity have achieved commercial utilization of patented inventions at a rate of approximately 20 times greater than that achieved by the agency itself. NASA, which generally has broader authority to grant patent rights to the contractor, has one of the best records of all agencies in obtaining commercialization.

If we are to bring many of these patents, paid for by the taxpayers, to the market, where the taxpayers can enjoy the benefits of their R. & D. investments, exclusivity must be granted to the contractor who originally develops the patent. This exclusivity is provided by granting title to the contractors as contained in the bills Senator SCHMITT and I are introducing.

Concerns have been raised in the past that by granting exclusive rights to contractors, we are allowing a private firm to profit on a patent which belongs to the American people. However, the taxpayers of this Nation

derive little benefit from patents which are not commercialized.

The bill I am introducing in the House today resolves this dilemma by requiring that contractors who are granted title to inventions they develop under Federal research and development contracts, provide payments to the Government through the sharing of royalties and/or revenues in return for the original Federal investment. I believe that this provision will compensate the Government and prevent the contractor from achieving windfall profits at the expense of the taxpayers while still encouraging commercialization of the invention.

Mr. Speaker, I am pleased to have had the opportunity to work with our colleagues in both Houses of Congress to develop legislation which I am convinced that it represents an important part of those changes which are necessary to encourage greater innovation and productivity in this country. I am looking forward to working with my colleagues in the Congress and the administration in this important endeavor.●

## THE PEACE CORPS AT 20

### HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. HALL of Ohio. Mr. Speaker, 20 years ago today, President John F. Kennedy signed into law the Peace Corps Act. At that time, Congress defined the purpose of the Peace Corps to help the people of interested countries and areas in meeting their needs for trained manpower; to help promote a better understanding of Americans on the part of the peoples served; and to help promote a better understanding of other peoples on the part of Americans.

The three goals of the Peace Corps, as they became known, hold a special importance to me. I served as a Peace Corps volunteer.

In 1966 and 1967, I taught English to high school students and adults in Nakonsawan, Thailand, a town of 40,000 in the north-central region. Without the Peace Corps, these townspeople would not have had the opportunity to learn English. This knowledge helped my students understand the Western world and opened up a storehouse of American technical and instructional literature.

I was more than a teacher; I was an ambassador of America. By living, eating, and working with the people of Thailand, I was able to instill an understanding of America. When the townspeople accepted me as one of them, they accepted the Nation I stood for.

Likewise, I gained a respect for the peoples of Southeast Asia when I learned the Thai language and culture. This has since helped me understand the motivation of other peoples in the world.

My service in the Peace Corps provided me broad experience in many aspects of life I could have gotten in no other way. As much as I was able to give to the people of Thailand or to the cause of improving American relations abroad, I feel I gained more through personal growth than I gave.

Since the founding of the Peace Corps 20 years ago, some 80,000 volunteers have shared similar experiences.

The Peace Corps is unique among American foreign assistance programs which offer food, money, or arms, because the Peace Corps offers our most precious resource—our own people. This person-to-person style diplomacy makes little dent in the Federal budget, but it can foster the most valuable kind of friendship among nations.

I hope that in the years to come the Peace Corps is given an opportunity to vigorously pursue the three goals. They are every bit as important in the future decades as they have been in the last 20 years.●

## RURAL FREE DELIVERY BEGAN IN WEST VIRGINIA

### HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. RAHALL. Mr. Speaker, the birthpace of rural free mail delivery is Jefferson County, W. Va., and on October 1, 1896, rural free delivery began out of Charles Town, Uvilla, and Halltown, W. Va.

This year commemorates the 85th anniversary of rural free delivery—one of the oldest Federal Government services, and for this reason, Mr. Speaker, I would like to take this opportunity to honor those pioneers who made this service possible and to commend today's rural letter carriers who continue to render friendly, reliable, and efficient service to millions of Americans.

William L. Wilson, a native of my home State, West Virginia, was appointed Postmaster General by President Grover Cleveland in 1896. Mr. Wilson promised to begin the long deferred rural delivery experiment, which for years had become a tug-of-war between Congress and the Postal Service.

Once Congress set aside $40,000 for the operation, Postmaster Wilson chose his hometown of Charles Town, W. Va. and two other villages, Halltown and Uvilla, as the first sites where free rural delivery would be officially tried.

The five original rural letter carriers traveled their 20-mile routes on horseback, bicycle, or horse and buggy. Today's rural carriers daily travel over 2.3 million miles in 4-wheel-drive jeeps or right-hand-drive cars along one of the 36,102 rural routes throughout the country.

Today, just as in 1896, rural free mail delivery is an essential service to families living in rural regions of the country. As our Nation's population has shifted in the past decade, rural free delivery has grown from serving 10 million Americans in 1970, to over 15 million in 1980.

Rural free delivery, for 85 years, has met the needs of those who rely on this service, especially the elderly and the handicapped. It is an important function, that must continue, because as a resident of Kabletown, W. Va., has said, "We would be pretty lost without rural free delivery."●

## LAND EXCHANGE

### HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1981*

● Mr. LUJAN. Mr. Speaker, I am today introducing legislation that will enable the city of Albuquerque, N. Mex., to exchange two parcels of land it received under the Recreation and Public Purposes Act (R. & P.P.) for property of equal value which is owned by private citizens.

Such a land swap is prohibited under present law, which states that land acquired under this act must be used for recreation and public purposes or title reverts to the agency that issued the patent.

In this case, the city of Albuquerque acquired in 1963 four parcels of land, each being 1.25 acres, from the Bureau of Land Management under the R. & P.P. Act. Two of the properties were contiguous, but the other parcels were at different locations in a 160-acre tract in the northeast heights area of Albuquerque.

The city wishes to develop a 5-acre park, which would carry out the intent of the law, but is unable to do so because the present properties are not joined by common boundaries.

My bill would simply direct the Secretary of the Interior to release on behalf of the United States certain restrictions contained in the previous conveyance of the land to the city of Albuquerque.

This legislation is supported by the Bureau of Land Management, the city of Albuquerque, and all parties involved. The two individual landowners, who are willing to swap their land to the city, are Mr. Tom Hughes and Mr. Leyburn B. Kimble.

All of the acreage involved in this proposed land exchange is part of a 160-acre tract previously owned by the

Bureau of Land Management. Most of this acreage was sold in the late 1950's and early 1960's, under the Small Tract Act, to private individuals in 1.25-acre parcels.

These properties, located on Montgomery Boulevard between the streets of Eubank and Juan Tabo, are in a section of the city which has experienced rapid development in recent years.

Unfortunately, this land has not been developed because each patent on the 115 tracts of land sold by Bureau of Land Management contained a reservation for a 33-foot-wide easement to the Bureau of Land Management along the boundaries of each parcel for street, road, and public utility purposes.

Because of these so-called floating easements, Albuquerque title insurance companies would not sell title insurance on these tracts of land. The city and Bureau of Land Management have corresponded on this matter for the past 10 years in an effort to find a solution.

In response to my request, the Bureau of Land Management recently filed a disclaimer with the city of Albuquerque, vacating the reservation on each parcel of land. Only the city and public utilities now have the right of eminent domain on these properties, and for the first time title insurance companies are starting to write title policies on the land.

In short, Mr. Speaker, the 160 acres is starting to be developed, and development of the 5-acre city park would contribute to this effort.

Under this legislation, the intent of the Recreation and Public Purposes Act would still be carried out. Therefore, I urge the Congress to take speedy action on this bill.●

## SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, September 24, 1981, may be found in the Daily Digest of today's RECORD.

### MEETINGS SCHEDULED

#### SEPTEMBER 25

9:00 a.m.
*Joint Economic
To hold hearings to review the effects of high interest rates on the economy.
2154 Rayburn Building

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Harold E. Shear, of Connecticut, to be Administrator of the Maritime Administration, Department of Transportation.
235 Russell Building

Finance
Taxation and Debt Management Subcommittee
To hold hearings on miscellaneous tax proposals, S. 578, S. 768, S. 1276, and S. 1472.
2221 Dirksen Building

10:00 a.m.
Armed Services
To hold closed hearings on the military and technical implications of the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
S-407, Capitol

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold oversight hearings on the viability of the domestic uranium mining and milling industry.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Foreign Relations
To hold hearings on the nominations of Ronald I. Spiers, of Vermont, to be Ambassador to the Islamic Republic of Pakistan, and Harry G. Barnes, Jr., of Maryland, to be Ambassador to India.
4221 Dirksen Building

#### SEPTEMBER 28

9:00 a.m.
*Labor and Human Resources
Aging, Family, and Human Services Subcommittee
To resume oversight hearings on the role of the Federal Government in family planning programs of Title X of the Public Health Services Act.
4232 Dirksen Building

9:30 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on international investment policy.
4221 Dirksen Building

*Judiciary
To hold hearings on S. 1630, to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

*Select on Indian Affairs
To hold hearings on S. 874, providing for additional protection of steelhead trout as a game fish.
6226 Dirksen Building

10:00 a.m.
Armed Services
To resume hearings on the military and technical implications of the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
318 Russell Building

Budget
To hold hearings on the effect of the President's economic program on financial markets.
6202 Dirksen Building

Joint Economic
To hold hearings on the current situation in the municipal bond markets.
2154 Rayburn Building

2:00 p.m.
Finance
Health Subcommittee
To hold hearings on the effectiveness of the End Stage Renal Disease (ESRD) program, focusing on its operation and management.
2221 Dirksen Building

#### SEPTEMBER 29

9:00 a.m.
Armed Services
Military Construction Subcommittee
To hold hearings on S. 1408, authorizing funds for fiscal year 1982 for military construction programs of the Department of Defense (pending on Senate calendar).
212 Russell Building

9:30 a.m.
Energy and Natural Resources
To hold hearings on S. 1544, authorizing funds for fiscal years 1982, 1983, and 1984 for state and local energy block grant programs.
3110 Dirksen Building

Veterans' Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans, and H. Con. Res. 76, expressing the sense of Congress that the Secretary of the Army provide for a plaque in Arlington National Cemetery honoring members of the U.S. Armed Forces who died during the rescue attempt in Iran.
412 Russell Building

10:00 a.m.
Governmental Affairs
To hold hearings on proposed legislation to extend certain provisions of the Inspector General Act of 1981 to the Departments of Justice, Defense, and Treasury.
3302 Dirksen Building

Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee
To resume hearings on S. 744, authorizing the District of Columbia to issue general obligation bonds to pay specified eligible liabilities.
357 Russell Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

Foreign Relations
Business meeting, to consider the nominations of John G. Dean, of New York, to be Ambassador to Thailand, and M. Virginia Schafer, of Washington, to be Ambassador to Papua, New Guinea, and to serve concurrently as

Ambassador to Solomon Islands, and other pending business.
4221 Dirksen Building

2:00 p.m.
Judiciary
To continue hearings on S. 1630, to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

SEPTEMBER 30

9:00 a.m.
Armed Services
Military Construction Subcommittee
To hold hearings to review the plan by the Department of Navy to move certain facilities to the Navy Yard, Washington, D.C.
212 Russell Building

9:30 a.m.
*Banking, Housing, and Urban Affairs
Business meeting, to mark up S. 1230, authorizing the minting of special coins commemorating the 1984 summer Olympic games in Los Angeles, California.
5302 Dirksen Building

Commerce, Science, and Transportation
To hold joint oversight hearings with the House Committee on Science and Technology on Federal patent policy.
235 Russell Building

Environment and Public Works
Business meeting, to mark up S. 1024, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

Governmental Affairs
Governmental Efficiency and the District of Columbia Subcommittee
To hold hearings on S. Res. 207, disapproving certain action of the District of Columbia government relating to the reform of the sexual assault laws of the District of Columbia.
1318 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on matters relating to the hiring of illegal aliens.
412 Russell Building

*Judiciary
Separation of Powers Subcommittee
To hold hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on the social impact of forced busing.
2228 Dirksen Building

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on restoring America's defense industrial base.
357 Russell Building

2.00 p.m.
Environment and Public Works
Business meeting, to continue market of S. 1024, authorizing funds through fiscal year 1986 for the construction and safety of Federal highways.
4200 Dirksen Building

OCTOBER 1

9:30 a.m.
Foreign Relations
To hold hearings on the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
1202 Dirksen Building

Labor and Human Resources
To hold hearings on the nomination of C. Everett Koop, of Pennsylvania, to be Medical Director in the Regular Corps of the Public Health Services and the Surgeon General of the Public Health Services, Department of Health and Human Services.
4232 Dirksen Building

10:00
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume hearings on S. 1542, prohibiting a company operating a common carrier railroad from holding Federal coal leases unless the coal is used for railroad purposes
3110 Dirksen Building

Judiciary
To resume hearings on S. 1630, to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

*Judiciary
Separation of Powers Subcommittee
To continue hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on the legal and constitutional issues of busing.
5110 Dirksen Building

2:00 p.m.
Foreign Relations
To continue hearings on the Airborne Warning and Control System (AWACS) and the F-15 enhancements arms sales package to Saudi Arabia.
318 Russell Building

Judiciary
Courts Subcommittee
To hold hearings on S. 1107, to require cases of a local or regional nature be filed in the States or regions in which the subject of the suit is found.
2228 Dirksen Building

OCTOBER 5

9:30 a.m.
Judiciary
*Constitution Subcommittee
To resume hearings on proposed constitutional amendments relating to abortion.
2228 Dirksen Building

Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

10:00 a.m.
*Judiciary
*Criminal Law Subcommittee
To hold hearings on S. 101 and S. 751, bills to eliminate and establish an alternative to the exclusionary rule in Federal criminal proceedings.
5110 Dirksen Building

Judiciary
Security and Terrorism Subcommittee
To resume hearings on the origin, direction, and support tactics of terrorism.
6226 Dirksen Building

OCTOBER 6

8:30 a.m.
Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold oversight hearings on the Department of the Interior's proposed five-year plan of oil and gas development in the Outer Continental Shelf.
3110 Dirksen Building

9:30 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings to review standard language to be included in all future block-grant legislation.
Room to be announced

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 709, prohibiting the sale of beverage containers without a minimum refund value, and prohibiting the sale of metal beverage containers with detachable openings.
235 Russell Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Labor and Human Resources
Investigations and General Oversight Subcommittee
To hold hearings to explore the cause and effect of missing children, focusing on home environment, local law enforcement action, and citizen action groups.
4232 Dirksen Building

OCTOBER 7

10:00 a.m.
Judiciary
To resume hearings on S. 1630 to reform the Federal criminal laws and streamline the administration of criminal justice.
2228 Dirksen Building

OCTOBER 14

9:30 a.m.
Judiciary
Agency Administration Subcommittee
To hold oversight hearings on the implementation of the Military Personnel and Civilian Employees Claims Act of 1964, title XXI of the Criminal Code.
357 Russell Building

Judiciary
*Constitution Subcommittee
To resume hearings on proposed constitutional amendments relating to abortion.
2228 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on S. 1639, to modernize the extradition laws of the United States.
2228 Dirksen Building

OCTOBER 15

9:30 a.m.
Judiciary
*Constitution Subcommittee
To resume oversight hearings on the implementation of the Freedom of Information Act, and on S. 1247, S. 1235, and S. 587, bills providing for the protection of certain confidential information from the disclosure requirements of the Freedom of Information Act.
2228 Dirksen Building

Judiciary
Criminal Law Subcommittee
To resume hearings on S. 101 and S. 751, bills to eliminate and establish an alternative to the exclusionary rule in Federal criminal proceedings.
5110 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

1:30 p.m.
Judiciary
Security and Terrorism Subcommittee
To resume hearings on the origin, direction, and support tactics of terrorism.
2228 Dirksen Building

OCTOBER 16

9:30 a.m.
Judiciary
*Separation of Powers Subcommittee
To resume hearings on proposals to restrict the power of Federal courts in matters of school busing, focusing on certain community problems.
2228 Dirksen Building

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To continue hearings on the origin, direction, and support tactics of terrorism.
6226 Dirksen Building

OCTOBER 19

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on proposed constitutional amendments relating to abortion.
2228 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee and Water and Power Subcommittee
To hold joint oversight hearings on hydroelectric development and related licensing procedures.
3110 Dirksen Building

2:00 p.m.
Judiciary
To hold oversight hearings on merger policy in the private sector.
2228 Dirksen Building

OCTOBER 20

9:00 a.m.
Labor and Human Resources
To hold oversight hearings on the implementation of the Comprehensive Employment Training Act (CETA).
4232 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on S. 1233, establishing a service industries development program in the Department of Commerce.
235 Russell Building

Energy and Natural Resources
To hold joint hearings with the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works on S. 1606, to provide for a nuclear property damage insurance fund, and to provide funds for the cleanup of the contaminated nuclear facility at Three Mile Island.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Environment and Public Works
Nuclear Regulation Subcommittee
To hold joint hearings with the Committee on Energy and Natural Resources on S. 1606, to provide for a nuclear property damage insurance fund, and to provide funds for the cleanup of the contaminated nuclear facility at Three Mile Island.
3110 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

2:00 p.m.
Judiciary
To hold oversight hearings on the activities of the Public Integrity Section of the Department of Justice.
2228 Dirksen Building

OCTOBER 21

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To continue hearings on S. 1233, establishing a service industries development program in the Department of Commerce.
235 Russell Building

Judiciary
To resume hearings on S. 326, prohibiting a refiner, other than an independent or small refiner, from operating a gas station in the United States, and making it unlawful for a supplier to practice price discrimination in the sale of motor fuel.
2228 Dirksen Building

Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings to examine the impact of marihuana on youth, focusing on the areas of health and education.
4232 Dirksen Building

Labor and Human Resources
Education Subcommittee and Employment and Productivity Subcommittee
To hold joint oversight hearings on the implementation of vocational education and youth employment programs.
1224 Dirksen Building

2:00 p.m.
Environment and Public Works
Environmental Pollution Subcommittee
To hold hearings on S. 1018, authorizing funds through fiscal year 1986 for the protection and conservation of fish and wildlife resources along the coastal barriers of the Atlantic and gulf coasts.
4200 Dirksen Building

Judiciary
*Juvenile Justice Subcommittee
To hold hearings on the early detection of juvenile crime.
5110 Dirksen Building

OCTOBER 23

10:00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee and Water and Power Subcommittee
To resume joint oversight hearings on hydroelectric development and related licensing procedures.
3110 Dirksen Building

Judiciary
Separation of Powers Subcommittee
Business meeting, to mark up proposed legislation restricting the power of Federal courts in matters of school busing.
5110 Dirksen Building

OCTOBER 26

9:30 a.m.
Judiciary
Courts Subcommittee
To hold hearings on S. 653, proposed Habeas Corpus Procedures Amendments Act.
2228 Dirksen Building

OCTOBER 27

9:30 a.m.
Labor and Human Resources
To hold hearings on S. 1483, proposed Radiation Exposure Compensation Act.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

OCTOBER 28

9:30 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold oversight hearings on the activities of the Immigration and Naturalization Service of the Department of Justice.
2228 Dirksen Building

*Labor and Human Resources
Labor Subcommittee
Business meeting, to consider S. 1182, improving the administration of the Longshoremen's and Harbor Workers' Compensation Act by removing certain inequities, reducing incentives for fraud and abuse, and assuring immediate compensation benefits and competent medical treatment for injured employees.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To continue oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

OCTOBER 29

9:30 a.m.
Commerce, Science, and Transportation
Business, Trade and Tourism Subcommittee
To hold hearings on S. 1256, to regulate interstate commerce by protecting the rights of consumers, dealers, and end users.
235 Russell Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
4200 Dirksen Building

NOVEMBER 4

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

NOVEMBER 5

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To continue hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

NOVEMBER 11

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

NOVEMBER 12

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To continue hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

NOVEMBER 17

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1541, proposed Retirement Income Incentives and Administrative Simplification Act.
4232 Dirksen Building

## CANCELLATIONS

SEPTEMBER 24

10:00 a.m.
Judiciary
Separation of Powers Subcommittee
To continue hearings on S. 481, restoring the right of voluntary prayer in public schools and to promote the separation of powers.
2228 Dirksen Building

Labor and Human Resources
Investigations and General Oversight Subcommittee
To continue oversight hearings on the activities of the Occupational Safety and Health Administration.
4232 Dirksen Building

SEPTEMBER 28

1:00 p.m.
Judiciary
*Juvenile Justice Subcommittee
To hold hearings to examine media response regarding its impact on juveniles.
2228 Dirksen Building

OCTOBER 1

9:30 a.m.
Labor and Human Resources
To resume hearings on S. 234, to encourage the establishment of home health care programs and to provide expanded coverage of home health services under the medicare and medicaid programs.
4232 Dirksen Building

OCTOBER 22

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1554, S. 1253, S. 482, and S. 440, bills to amend the Federal Criminal Code with respect to the circumstances under which a person charged with or convicted of a crime may be released on bail or personal recognizance.
Room to be announced

NOVEMBER 2

10:00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee
To hold oversight hearings on the implementation of Title I, establishing wellhead prices for natural gas, of the Natural Gas Policy Act (P.L. 95-621).
3110 Dirksen Building

NOVEMBER 3

10:00 a.m.
Energy and Natural Resources
Energy Regulation Subcommittee
To continue oversight hearings on the implementation of Title I, establishing wellhead prices for natural gas, of the Natural Gas Policy Act (P.L. 95-621).
3110 Dirksen Building
